VII	Public administration	69	55	2	2	1	9	
VIII	Professions and liberal arts	161	106	16	11	3	23	2
D	Miscellaneous	1,374	427	223	42	523	58	102
IX	Persons living on their income	16	9	2	1		4	
X	Domestic service	751	107	53	17	469	14	91
XI	Insufficiently described occupations	503	260	142	12	46	34	9
XII	Unproductive	104	51	26	12	8	6	1

The following table compares the distribution of occupations in 1931 with that disclosed by the 1921 census —

Class of sub class	Means of subsistence	Distribution of 10,000 workers in	
		1921	1932
A	Production of raw materials	7,241	6,734
I	Exploitation of animals and vegetation	7,217	6,711
II	Exploitation of minerals	24	23
B	Preparation and supply of material substances	1,759	1,665
III	Industry	1,075	997
IV	Transport	134	153
V	Trade	550	515
C	Public administration and liberal arts	283	269
VI	Public force	71	55
VII	Public administration	69	64
VIII	Professions and liberal arts	143	150
D	Miscellaneous	717	1,332
IX	Persons living on their income	13	14
X	Domestic service	173	708
XI	Insufficiently described occupations	406	505
X	Unproductive	125	105

Some of the differences revealed by the above table between 1921 and 1931 are no doubt due to changes in classification. But it is possible that the greater prevalence of unemployment in 1931 as compared to 1921 has contributed to the diversion of returns from definite to indefinite categories. A close examination of the detailed figures in the report however tends to show that there is a general tendency towards increase in what may be described as modernized occupations.

The following table classifies occupations by sex —

Among careers in principal occupations the number of females per 1,000 careers is 222. Among working dependants on the other hand females number 733 to 267 males, while if principal and dependent occupations are taken together, the proportion of actual female workers to male is 317 to 683 in every 1,000.

During the 1931 census special returns from factories were not called for. It is seen, however, that the number of workers employed in organized factories is extraordinarily low for a

population of the size of that of India, being only 15,53,169. The All India figure for persons occupied in plantations, mines, industry and transport in 1921 was 24,239,555 while in 1931 it was 26,187,689.

Pasture and agriculture occupies 71 per cent of the actual workers of India, or, if those who follow it only as a subsidiary occupation are excluded it accounts for 67 per cent. Industry occupies 10 per cent of India's workers as compared to 11 per cent in 1921. The one industrial order in which a marked increase has taken place is production and transmission of physical force. Trade shows a decrease and so do 'professions and public force'. There has however been an increase in the category 'private income and domestic service'.

The 1931 census report contains an interesting analysis of castes by occupation. It shows that in the majority of cases about half the males retain their traditional occupation. About a quarter or less of the half of those that have abandoned their hereditary occupations as their principal means of subsistence retain them as subsidiary.

RECRUITMENT OF LABOUR

The methods adopted for the recruitment of labour in India have received general condemnation even from employers and the Whitley Commission has much to say on the subject.

Recruitment except in the case of special apprentices and higher paid workers employed on railways, is effected either through Sardars (Recruiters) or Contractors, or direct at the mill or factory gates. The difficulties in connexion with recruitment are due (1) to the want of a stable labour force at any particular town or centre, (2) to the general illiteracy of the Indian labourer, and (3) to the inherent attachment of the worker taking up industrial employment to his village life and home.

The contractor is sent out to overcome the innate conservatism of the Indian peasant. He is helped in his work by the poverty and indebtedness of the peasant and also by occasional bad harvests, but in addition he not infrequently indulges in fraud and misrepresentation by painting a rosy picture of the future that awaits the peasant in a town with its crowded bazaars and other amusements which are absent in the village. The essence of the system is the payment of an advance to the prospective labourer in order to enable him to free himself from his pecuniary difficulties. The contractor retains some form of control over his recruits and takes good care to recover the amount of the advance together with interest, which is generally calculated at an exorbitant rate. Generally, the employers do not deal directly with the labourers recruited by a contractor. The latter is paid a lump sum from which he pays his men and retains a portion for himself. In the Central Provinces, however, it is reported that labour is actually purchased from private

contractors at so much per head. The system of recruitment by contractors is most in use in Burma owing to the scarcity of labour in that province and the necessity of recruitment from distant places.

The method of recruitment through Sardars is also dependent on the payment of advances, which however are made at the cost of the employer. The Sardar is an operative already at work in the mill or plantation and is sent out to recruit labour from among his relations, acquaintances or neighbours. He is drawn therefore from the same class as the recruits themselves and can therefore be relied on to deal more fairly with them. Another advantage of this system of recruitment is that the men recruited are insured against unemployment and find work waiting for them at their destination. On the other hand, it does not infrequently happen especially in the Tea Gardens in Assam that the Sardar remits persons who are lured away from their homes by prospects of a bright future and who, on arrival, find that conditions of work and wages are not so bright as they imagined. It is, however, only in plantations that this form of recruitment has been used to any appreciable extent.

The recruitment of labour at the mill gate or at the surface of mines is the form of recruitment which is gradually gaining in importance over the other two methods. The news of the very much higher rates of wages paid in towns (which to the villager sounds fabulous as he has no idea of the higher cost of living) spreads throughout the countryside and draws large crowds of would-be workers. They are to be found at convenient gathering places on the thoroughfares waiting to be picked up for employment.

The older hands also return from their village with groups of friends, relations and neighbours who come in the hope of finding employment in the mills. But the ignorance, simplicity and poverty of the Indian peasant render his exploitation an easy matter. The employer does not recruit himself the men required for his establishment but holds the overseer, jobber or mukadam responsible for the adequate supply of labour in the department. The latter takes the place of the contractor and exacts bribes from the new recruits. He also acts as a money lender and thereby reaps a double harvest from the needy labourer. It would appear therefore that education and organisation are the only means by which Indian workers can escape from the clutches of intermediaries who like harpies are ever ready to prey on them.

In the coalfields in Bihar and Orissa unskilled labour is recruited by means of Sardars. The Sardar visits villages and brings the labour with him, and the labour brought by him forms his gang. He has to pay the labour *buel sheesh*, *lhora* and travelling expenses, and for this purpose he frequently receives advances either from the contractor or from the Company concerned. At the Bhowra colliery advances varying from Rs 3 to Rs 10 are paid to the recruits in addition to their travelling allowances and food. Such advances are seldom recovered and never if the gang maintains good attendance at work. The Sardar obtains remuneration for his services in various ways. Sometimes he is paid a commission and a salary, but generally he is paid a certain amount on each ton of coal raised by miners working in his gang. Independent recruiters are paid at 9 pies per tub raised. In the Central Provinces the recruiters or mukadams as they are called receive 3 pies per head per week from the individual labourers whom they recruit and wages from the employers.

The Tata Iron and Steel Company at Jamshedpur maintains an Employment Bureau where skilled and unskilled workers are registered and employed. Applicants for work assemble in a yard and daily requirements are selected by the officer in charge. No outside recruitment is done in the literal sense of the word, but in the event of special qualifications being required and no applicants being available, the post is advertised in a few leading newspapers.

The methods adopted by different Indian railways for the recruitment of unskilled labour are generally the same as those which obtain in other industries. In the case of workshop men, a trade test is generally given and in every case a medical examination has to be gone through. Special apprentices for the higher grades are engaged by all Railways. The terms and conditions attached to apprenticeship in most cases are similar.

The Royal Commission on Indian Labour has made several recommendations with regard to the employment of the factory worker for the guidance of employees in general. We reproduce below some of the more important of these recommendations—

(a) Jobbers should be excluded from the engagement and dismissal of labour

(b) Whenever the scale of the factory permits it, a Labour Officer should be appointed directly under the General Manager. His main functions should be in regard to engagements, dismissals and discharge.

(c) Where it is not possible to appoint a whole time Labour Officer, the Manager or some responsible officer should retain complete control of engagements and dismissals.

(d) Employers' Associations in co-operation with trade unions should adopt a common policy to stamp out bribery.

(e) Where women are engaged in substantial numbers, at least one educated woman should be appointed in charge of their welfare and supervision throughout the factory.

(f) Workers should be encouraged to apply for definite periods of leave and should go with a promise that on their return at the proper time they will be able to resume their old work. Whenever possible an allowance should be given to the worker who goes on leave after approved service.

Messrs J. D. Sassoon & Co, who control eleven cotton textile mills in Bombay and the Burma Shell Corporation, have appointed Special Labour Welfare Officers to recruit labourers and look after their welfare. The acute trade depression has, however, prevented a more general adoption of this system but several firms are making noteworthy attempts to improve existing methods of recruitment in factories.

Recruitment for Assam. The Assam Labour and Emigration Act, 1901, was designed mainly to regulate the recruitment and engagement of indentured labour. It had not been possible for some years for any worker in Assam to be subjected to a penal contract and, in consequence of this and other changes, the law became entirely unsuited to present conditions. Attempts were made by amending Acts in 1908, 1915 and 1927 to adapt the Act to meet altering conditions. Substantial parts of the original Act were repealed and large numbers of rules framed in an endeavour to use the Act to regulate the recruitment of emigrants who are subject to no indenture. These changes proved inadequate and they made the law extremely confused. Large parts of the surviving provisions of the Act became completely ineffective and those provisions which were operative were open to weighty criticisms.

During the years 1926-1928 the Government of India carried on consultations with the Local Governments in regard to amending the law governing recruitment of labour for the Assam tea gardens. In the meanwhile, the Royal Commission on Labour had been appointed and they collected a large amount of evidence on the subject. The Commission recommended the replacement of the existing legislation by a new enactment and suggested that the power conferred by section 3 of the Assam Labour and Emigration Act of 1901 to prohibit recruitment for Assam in particular localities should be withdrawn immediately. They recommended that the new Act should provide (a) that no assisted emigrants from controlled areas should

be forwarded to the Assam tea gardens except through a depot maintained either by the Tea Industry or by suitable groups of employers and approved by the Local Government or by such authority as it may appoint, (b) that the Government of India should have power to frame rules regarding transit arrangements, in particular for the lying down of certain prescribed routes to Assam and for the maintenance of depots at necessary intervals, and (c) that in the event of the recrudescence of abuses, Government should have power to reintroduce in any area the prohibition of recruitment otherwise than by means of licensed *garden-sirdars* and licensed recruiters. Another recommendation of the Commission was that the Assam Labour Board should be abolished and in its place the Government of India should appoint a Protector of Immigrants in Assam to look after the interests of emigrants from other Provinces. With regard to the question of repatriation, the Commission recommended that every future assisted emigrant to an Assam tea garden should have the right after the first three years to be repatriated at his employer's expense and that the Protector should be empowered to repatriate a garden worker at the expense of the employer within one year of his arrival if it is found necessary on the ground of health, unsuitability of the work to his personal capacity or for other sufficient reason.

The Government of India framed a Bill called the Tea Districts Emigrant Labour Bill, based mainly on the recommendations of the Commission but with variations in respect of minor details. The Bill was introduced in the Legislative Assembly on the 11th March 1932 and was circulated to all Local Governments for opinion. It was then referred to a select Committee who presented their Report to the Assembly on the 5th September 1932. The Bill as amended by the select Committee was passed by the Indian Legislature in September 1932 and received the assent of the Governor General on the 8th October 1932. The new Act came into operation from the 1st April 1933.

The Tea Districts Emigrant Labour Act, 1932, extends to the whole of British India including the Southern Parganas and repeals the Assam Labour and Emigration Act, 1901, and the subsequent amending Acts. The first object of the Act is to make it possible, on the one hand, to exercise all the control over the recruitment and forwarding of assisted emigrants to the Assam Tea Gardens as may be justified and required by the interests of emigrants and potential emigrants, and, on the other hand, to ensure that no restrictions are imposed which are not justified. Local Governments are empowered, subject to the control of the Government of India, to impose control over the forwarding of assisted emigrants (Chapter III) or over both their recruitment and their forwarding as occasion may dictate (Chapters III and IV). Employers will be prevented from recruiting otherwise than by means of certificated *garden sirdars* or licensed recruiters. It is made unlawful to assist persons under 16 to emigrate unless they are accompanied by their parents or guardians. With regard to the question of repatriation (Chapter II), every emigrant labourer, on the expiry of a period of

three years from the date of his entry into Assam, will have the right of repatriation as against the employer employing him at such expiry (Section 7) and any emigrant labourer who before the expiry of three years from his entry into Assam is dismissed by his employer otherwise than for wilful and serious misconduct will also have the right of repatriation (Section 8 (1)). It will also be possible to claim repatriation within three years in the event of the emigrant failing in health, not being provided with suitable work or having his wages unjustly withheld or for any other sufficient cause (Section 10 (1)). Further, repatriation can be ordered at any time by a criminal court in the case of a labourer who has been assaulted by the employer or by his agent (Section 11). Where an employer fails to make all the necessary arrangements for the repatriation of a labourer working under him within fifteen days from the date on which a right of repatriation arises to an emigrant labourer the Controller may direct the employer concerned to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (Sections 13 and 15).

Section 3 of the Act makes provision for the appointment of a Controller of Emigrants with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish, and the charges are to be met from an annual cess called the Emigrant Labour cess which shall be levied at such rate not exceeding Rs 9 per each emigrant as the Governor General in Council may, by a notification in the "Gazette of India," determine for each year of levy.

The provisions of the Act are intended to apply only to emigration for work on tea plantations in the eight specified districts in Assam in the first instance but power is retained to extend its application to other industries and to other districts in Assam if necessary (Section 38).

Latest Statistics—The Annual Report on the working of the Assam Labour Board during the year ending the 30th June 1932 is the latest available. The Report shows that the total number of persons recruited during the year was 49,857 as against 50,555 in the previous year. The average of advances to garden sirdars for each adult recruit fell in 25 and rose in 3 agencies as compared with the preceding year. No cases occurred in which the local Agents were found to be extravagant or indiscreet in the matter of giving advances to sirdars. The total number of garden sirdars prosecuted for offences in connexion with recruitment was 32 as compared with 69 in the previous year. The rate of cess on garden sirdars and emigrants was eight annas per head during 1931-32. The actual receipts from the cess amounted to Rs 26,721-8-0.

Reforms in the Bombay Cotton Mill Industry—In a circular letter dated the 8th January 1930 the Bombay Millowners' Association instructed all mills affiliated to the Association to introduce, wherever possible, a policy of direct recruitment of labour instead

of the existing practice of recruitment through jobbers. The introduction of a system for providing Discharge Certificates to operatives leaving service was also recommended. The certificates are to contain a record of the service of the operative concerned and in all cases of recruitment, the men presenting themselves for employment will be asked to produce their Discharge Certificates. Notices are to be posted at all mills stating (a) that all persons will be engaged by the Manager or by the head

of the department concerned, and (b) that any heads of departments, assistants or jobbers accepting bribes from the workpeople will be instantly dismissed.

Several groups of mills are considering the possibility of employing labour officers who will be responsible for the direct recruitment of labour and for welfare work generally. The action taken by Messrs L. D. Sassoon & Co. in this connexion has already been referred to above.

ABSENTEEISM AND LABOUR TURNOVER.

Though there is meagre statistical information available on this subject, it may be stated with a fair amount of accuracy that the Indian worker is more habituated to absent himself from work than his prototype in other countries. He has yet to get himself thoroughly adapted to the industrial environment in which he finds himself. The reasons for his absence are not always connected with his love of rest but in many cases absence is due to causes beyond his control such as sickness, domestic difficulties, etc. The effects which poor and indifferent housing have on his work have been dealt with in the Section on Industrial Housing.

The Factory Labour Commission of 1907 made an inquiry into the number of absent workers and came to the conclusion that the average worker took 2 days off every month and a further holiday of from 3 to 7 weeks every year. In addition, he receives the weekly holiday and from 4 to 10 Indian holidays during the year. The question of absenteeism received the attention of the Indian Tariff Board (Cotton Textile Industry) and it was urged in evidence before them that the efficiency of labour in Bombay was greatly reduced by the high percentage of absenteeism among the operatives. The Board came to the conclusion that Ahmedabad had a great advantage over Bombay in the matter of absenteeism, both in respect of a low rate throughout the year and also of the absence of the wide seasonal variations which were apparent in other centres of the textile industry. They therefore recommended that in order to minimise the effect of absenteeism

there should be a general adoption of a system already in force in a few mills in Bombay under which a certain number of spare hands are entertained in each department, except the weaving. The Board said 'The percentage of extra men in each department is not necessarily the same, but we were given to understand that spread over the whole of the mill, it usually worked out at about 10 per cent.'

Messrs L. D. Sassoon & Co. started last year in some of the cotton textile mills under their agency in Bombay, a system of decentralisation of their *badli* (or substitute) labour. By this system if absenteeism is estimated at 10 per cent on a total labour force of 1,000 for any one unit substitute passes are issued to 100 workers and substitute work is limited to these ticket holders only. The system is one which deserves to be more generally adopted.

The Labour Office of the Government of Bombay publishes in the *Labour Gazette* every month statistics of absenteeism in the textile mills at the important centres of the cotton industry in the Bombay Presidency and in Engineering workshops of the Bombay and Karachi Port Trusts. If figures of absenteeism for each day during any month are examined it is found that they are higher on days immediately following pay day. The following table gives the figures for percentage absenteeism month by month for the year 1933 with averages for the whole year for cotton textile mills in three important centres of the Bombay Presidency.

PERCENTAGE ABSENTEEISM IN THE TEXTILE INDUSTRY

Month	Bombay	Ahmedabad	Sholapur
January	9 60	3 55	13 73
February	10 31	3 54	14 69
March	10 26	3 59	14 49
April	10 41	3 93	15 00
May	9 57	3 92	14 62
June	9 16	3 55	15 43
July	8 93	3 28	12 61
August	8 85	3 55	13 09
September	8 11	3 69	12 76
October	9 21	3 62	14 03
November	7 89	3 73	13 93
December	8 40	3 36	17 07
Average for year	9 23	3 61	14 29

In the Electrical and Mechanical Departments of Railways, absenteeism generally amounts to 10 to 11 per cent. As in cotton mills, absenteeism is greater immediately after pay day. In Railways in Burma, absenteeism is lower and roughly amounts to 2.50 per cent.

Labour Turnover—A charge is very often levelled against the Indian worker that owing to his migratory character, he changes his place of employment very frequently and that this results in a high rate of labour turnover. There is, however, very little information available regarding the average period of service or the rates of turnover at important industrial centres in India. In the case of the Impress Mills at Nagpur, it has been estimated that since 1908, the average period of continuous service of the employees amounted to 7.80 years. In another cotton mill in the Central Provinces the average duration of employment worked out at about 40 months while in the case of other factories it roughly amounted to about 9 months. Out of a total number of 3,700 workers engaged in the Pench Valley Coal Mines it was found that 1,550 workers were in employment for less than a year, 650 from 1 to 2 years, 700 from 2 to 3 years and 800 workers had more than 3 years continuous service to their credit. In the manganese mines in the Central Provinces the average duration of employment comes to about 9 to 10 months for the whole of the labour force in any one year. One to two years is on an average the period of employment of workers in the Pita Iron and Steel Works. The total labour turnover during normal working for three years in the same Works amounted to 36.6 per cent, 31.3 per cent and 24.1 per cent respectively. In the Indian Cable and Construction Company in Pithur and Orissa, however, skilled labour has remained practically unchanged during the last five years but the unskilled workers recruited from the aboriginal class had changed to the extent of about 30 per cent annually. In one of the mills at Cawnpore the average period of continuous service amounted to 8.87 years.

The Labour Office of the Government of Bombay conducted a special enquiry into the length of service of cotton mill workers in Bombay City in 1927-28. A sample of 1 in 10 tenements was decided upon and the information was collected on suitable schedules by the Lady Investigators of that Office from the inmates of such tenements who were reported to be cotton mill workers. Only the predominant working class localities were visited for the purposes of the enquiry and the total number of schedules accepted for final tabulation was 1,318.

Of the 1,318 workers, 988 or 73.29 per cent were men and 360 or 26.71 per cent were women.

Nearly 21 per cent of the operatives began work in the mills before the 15th year, 38 per cent between the 15th and the 20th year, 32 per cent between the 20th and the 30th year and the remaining 9 per cent joined the first mill after they had attained the age of 30.

Sixty three per cent of the workers were born in the Konkan and 27 per cent in the Deccan while the rest came from different parts of the country. It is very significant that not a single worker gave his place of origin as Bombay City.

About 18 per cent of the workers covered by the sample continued in the employment of the same mill without change. 34 per cent served in two or three mills and 18 per cent had served in 4 or more mills. The highest number of mills served by an individual was 15. The cause of leaving the mills was 'for going to native place' in 26 per cent cases, 'low wages and for bettering prospects' in 21 per cent cases, 'absence due to illness' in 14 per cent cases and 'retrenchment' in 10 per cent cases. Other causes for leaving mills were unsuitable conditions of work, dismissal, strike, resignation, etc.

The approximate period of total service (including the period of non attendance) was reported to be less than 5 years in 37.51 per cent cases, 5 to 10 years in 23.37 per cent cases, 10 to 15 years in 15.88 per cent cases, 15 to 20 years in 9.13 per cent cases and more than 20 years in 14.05 per cent cases. The percentages of workers who had not changed mills was 67 in the case of operatives with less than 5 years' service and 42 for workers with 5 to 10 years service. In the other service groups, the percentage of operatives working in the same mill varied between 25 and 15.

The actual active service was reported to be less than 5 years in 46.51 per cent cases, 5 to 10 years in 24.26 per cent cases, 10 to 15 years in 13.95 per cent cases and 15 to 20 years in 7.20 per cent cases. In the remaining 8.08 per cent cases the actual service was more than 20 years.

A large number of workers in the age groups 15-20 and 20-25 had served for a period of less than 5 years while the most common period of service in the age group 25-30 was between 5 and 10 years. In the age group 30-35 about 30 per cent of the workers had served for less than 5 years and 19 per cent for a period of 5 to 10 years. Among workers of 35 to 40 years of age, the number of those falling in each of the first five service groups was between 16 and 20 per cent.

LABOUR IN FACTORIES

The conditions of factory labour until 1913 were regulated by the Indian Factories Act of 1881, as amended in 1891. Under the chief provisions of the amended Act Local Governments were empowered to appoint Inspectors of Factories and Certifying Surgeons to testify as to the age of children. A mid day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited subject to certain exceptions. The hours of employment for women were limited to 11, with intervals of rest amounting to at least an hour and a half, their employment between 8 p.m. and 5 a.m. was prohibited, as a general rule, except in factories worked by shifts. The hours of work for children (defined as persons below the age of 14) were limited to 7 and their employment at night time was forbidden. Children below the age of 9 were not to be employed. Provision was made for fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of overcrowding etc.

The next Factory Act to be passed into law was Act XII of 1911. This Act extended the definition of 'factory' so as to include seasonal factories working for less than 4 months in the year, shortened the hours within which children and, as a general rule, women might be employed and further restricted the employment of women by night by allowing it only in the case of cotton spinning and pressing factories. It also contained a number of new provisions for securing the health and safety of the operatives, making inspection more effective and securing generally the better administration of the Act. The most important feature of the Act, however, was the introduction of a number of special provisions applicable only to textile factories. The report of the Factory Commission showed that excessive hours were not worked except in textile factories. The Act, for the first time, applied a statutory restriction to the hours of employment of adult males by laying down that subject to certain exceptions, "no person shall be employed in any textile factory for more than 12 hours in any one day." It also provided in the case of textile factories that no child may be employed for more than six hours in any one day and that (subject to certain exceptions, which were factories worked in accordance with an approved system of shifts) no women may be employed before 5.30 a.m. or after 7 p.m. (the new limits laid down generally for the employment of women and children).

The Acts now in force—The ratification by India of the Conventions adopted by the International Labour Conference held in Washington in 1919 necessitated radical revision of the Indian Factories Act of 1911. This was undertaken during 1921 and the Indian Factories Amendment Act, 1922, introduced a series of important reforms including the adoption of a 60 hours week, the raising of the minimum age of children from 9 to 12, the prohibition of night work for women, the extension of the Act to a large number of small factories, drastic restriction of the exempting provisions, etc. The principal object of the amending Act of 1922 was the removal of a difficulty which had arisen in connection with the law relating to the weekly

holidays. The experience gained during the three years which immediately followed the revision of the Act in 1922 indicated that the amending Act had worked smoothly and that the main principles followed in 1922 commanded general acceptance. It was not considered necessary, therefore, to modify any of the main principles of the Act but several administrative difficulties had arisen in connection with some sections of the Act—one such difficulty relating to Section 21 which provided for intervals. Local Governments were asked in June 1925 to consider a possible solution of the difficulty and to bring to the notice of the Government of India any difficulties which might have arisen in connection with other provisions. On receipt of their replies, a conference of Chief Inspectors of Factories was convened. The conference recommended a number of alterations designed by allowing greater elasticity in some directions and by increasing control in others to make for smoother working. The Factories Amendment Act of 1926 was, therefore, passed on the recommendations of that conference and on the opinions received from the Local Governments. The more important alterations effected included the widening of the definition of 'factories' so as to bring within the control of the Act such establishments as Electrical Generating Stations, water works, etc., the prevention of the issue of age certificates by Certifying Surgeons to children who are not fit for employment, the prevention of cleaning machinery in motion, even by men, in cases where Local Governments were of opinion that the work is attended by danger to the operatives, a clearer definition of the periods prescribed for intervals of rest, and, while still preventing the employment of children in two factories on the same day, the permitting of women to work in two factories on the same day provided that the limits for hours of work were not exceeded.

Hours of Work—The Indian Factories Act prescribes a daily as well as a weekly limit to the hours of work in factories and provides for rest intervals and for a weekly holiday. Section 28 of the Act provides that no person shall be employed in any factory for more than 11 hours in any one day, and Section 27 provides that no person shall be employed in a factory for more than 60 hours in any one week. Section 21 of the Act makes it obligatory for the occupier of a factory to provide for each person employed a rest period of at least one hour at intervals not exceeding 6 hours, or at the request of the employees concerned two rest periods of half an hour each, at intervals not exceeding 5 hours, the total duration of the periods of rest on that day not being less than one hour for each period of 6 hours worked generally. With the previous sanction of the Local Government and at the request of the employees concerned the rest interval may also be reduced to half an hour for each male person provided that he is not employed for more than 8½ hours on each working day and is not required to work for more than five hours continuously. For children, Section 23 (c) provides that no child shall be employed in a factory for more than 6 hours in any one day. Section 21 (b) provides that for each child working more than 5½ hours in any one day a period

of rest of not less than half an hour shall be given and the period of rest has to be so fixed that no child shall be required to work continuously for more than 4 hours. Sections 23 (b) and 24 (a) further provide that no child or woman may be employed in any factory before half past five o'clock in the morning or after 7 o'clock in the evening. Under Section 25 a child cannot be employed in two factories on the same day but adults may be so employed in such circumstances as may be prescribed. Under the provisions of Section 26 every Manager of a factory has to fix specified hours for the employment of each person employed in such factory and no person is allowed to be employed except during such specified hours. The Governments of Madras, Bombay, the United Provinces, the Punjab and the Central Provinces are the only Local Governments which have prescribed the circumstances under which adults may be employed in more than one factory on the same day. The rules framed by these Local Governments invest the Inspector of Factories with the power to sanction such employment if he is satisfied that the adults concerned are not employed for more than 10 hours on any one day and that they receive the weekly holiday prescribed by Section 22 of the Act. In addition to the notice of hours of work for particular periods, every factory has to maintain a register of all persons employed in a factory in the form prescribed by the Local Government showing their hours of work and the nature of their respective employment.

Proposed Amendment of the Factories Act, following the Recommendations of the Royal Commission on Indian Labour—The Royal Commission made several very important recommendations for substantial amendments of the Indian Factories Act, 1911, as amended by the Amending Acts of 1922, 1923, 1926 and 1931, firstly, for the reduction of the maximum limits of daily and weekly hours of work in perennial factories and for the better regulation of such hours, secondly, for the improvement of working conditions in factories, and thirdly, for a more effective observance, on the part of the factory owners, of the requirements of the Act. The Government of India, in the Department of Industries and Labour, issued a circular letter, dated the 10th June 1932, addressed to all Local Governments and Administrations forwarding a draft Bill intended to consolidate the present law regarding the regulation of power using factories and incorporating the majority of the Commissioners' recommendations. All Provincial Governments were asked to submit replies to this letter by the 1st December 1932. On receipt of the local Government's replies, the Honourable Member in charge of the Department of Industries and Labour of the Government of India made a tour of the more important industrial centres in India to discuss various questions arising out of the draft Bill with the representatives of Local Governments and associations of employers and workmen. On the conclusion of this tour, the Government of India convened a conference of Provincial Chief Inspectors of Factories and a final Bill was then drawn up which was introduced in the Legislative Assembly on the 8th September 1933. At the moment of writing, this Bill is under examination by a Select Committee of the

members of both Houses in the Central Legislature and it is expected that the consolidated Factories Act will be passed during the budget Session of the Legislative Assembly in the Spring of 1934. If the Bill is passed into law it may be brought into operation either on 1st July 1934 or the 1st January 1935.

The Royal commission also made several suggestions with regard to the control of factories not using power nearly all of which are at present unregulated. The Government of India propose a new and separate Act in respect of such factories and they are at present engaged in drafting a Bill covering the Commissioners' recommendations in the matter.

The following are the more important additional matters proposed to be covered by the Consolidating Act—

(a) A distinction is to be drawn between seasonal and perennial factories. A factory which is exclusively engaged in cotton ginning cotton or jute pressing, the decortication of groundnuts, or the manufacture of groundnut oil, or the manufacture of coffee, indigo, lac, rubber, sugar (including gur) or tea is to be a seasonal factory, provided that the Local Government may, by notification in the local official Gazette, declare any such factory in which manufacturing processes are ordinarily carried on for more than 180 working days in the year, not to be a seasonal factory for the purposes of the Act. The Local Government may also, by notification, declare any seasonal factory in which manufacturing processes are ordinarily carried on for not more than 180 working days in the year and which cannot be carried on except during particular seasons or at times dependent on the irregular action of natural forces, to be a seasonal factory for the purposes of this Act.

(b) Factory operatives are at present divided into two age groups (1) Adults and (2) Children, i.e., persons over 12 and under 15 years of age. It is now proposed to introduce a third age group of "Adolescents," i.e., persons over the age of 15 years and under the age of seventeen years who have not been certified as fit for adult employment. Such "Adolescents" as have not been so certified are to be deemed to be children.

(c) It is proposed that the existing maximum limits of eleven hours per day and sixty hours per week should continue to be observed in the case of seasonal factories and that the maximum hours of work to be permitted in the case of workers in perennial factories should be reduced to ten hours per day and 54 hours per week subject to the proviso that persons employed on work necessitating continuous production for technical reasons and persons whose work is required for the manufacture or supply of articles of prime necessity which must be made or supplied every day may be employed for not more than 56 hours in any one week. The maximum hours of work permitted in the case of children is five hours per day both in seasonal and in perennial factories.

(d) The Bill proposes to introduce into the Act for the first time the principle of "spread over," i.e., the limitation of the period of the number of consecutive hours during which the daily limits of hours of work may be availed of by the owner or an occupier of a factory. The

spread over in the case of adults is limited to thirteen consecutive hours and in the case of children to seven and a half consecutive hours, but the continuous period of eleven free hours in every twenty four hours in the case of adults must include the hours between 7 p.m. and 6 a.m. in the case of women. The continuous period of sixteen and a half free hours in the case of children must include the hours between 7 p.m. and 6 a.m. Exemptions in the case of women are permitted in such cases as technical reasons require that work should be done at night, e.g., in the fish curing industry.

(c) The existing provisions with regard to the control of artificial humidification are to be expanded. And the Bill also proposes to give power to Local Governments to authorise an Inspector to call upon Managers of factories to carry out specific measures for increasing the cooling power of the air where he is of the opinion that it is at times insufficient to secure operatives against danger to health or serious discomfort, provided that the cooling power can be appreciably increased without involving an amount of expense which would be unreasonable under the circumstances.

(f) With regard to welfare, the Bill includes provisions for the maintenance of (1) a sufficient and suitable supply of water for washing for the use of persons employed in processes involving contact with poisonous or obnoxious substances, (2) adequate shelters for rest in factories employing more than 150 persons, (3) rooms reserved for the use of children of women employed in factories employing more than 50 women and (4) first aid appliances. Powers are to be given to Local Governments to frame rules in respect of the last three matters. The Government of India, however, have not accepted the recommendation of the Royal Commission with regard to giving power to Local Governments to issue welfare orders as are issued by the Secretary of State in England under Section 7 of the Police, Factories etc. (Miscellaneous Provisions) Act, 1911. They are of opinion that the matters to be covered by such welfare orders should have the approval of the Legislature and should not be imposed on factory owners by the Executive Government.

(g) Local Governments are to be given powers to make rules prescribing the fitness to be attained by children seeking employment in factories or in any class of factories, and when such a standard has been prescribed no child failing to attain it can be certified as fit for employment in a factory.

(h) Inspectors are to be granted power to call upon managers to carry out such tests as may be necessary to determine the strength or quality of any specified parts of the structure of factories if they are of opinion that, on account of any defect or inadequacy in the construction

of any factory, the factory or any part thereof is dangerous to human life or safety, and Local Governments are to be empowered to make rules for the furnishing, by factories, of certificates of stability.

(i) The maximum amount of overtime that can be worked by virtue of any exemptions granted under the Act is to be limited and a time and a half is to be allowed in all cases where a worker in a seasonal factory works for more than 60 hours in any one week or where a worker in a factory other than a seasonal factory works for more than ten hours in any one day. But where a worker in a factory other than a seasonal factory works for more than fifty four hours in any week, he is to be entitled, in respect of the overtime worked less any overtime in respect of which he is entitled to extra pay under the preceding sentence, to pay at the rate of one and a quarter times his ordinary rate of pay. Where a worker in a factory works on the weekly rest day he is to be entitled, in respect of the overtime worked to pay at the rate of one and a half times the ordinary rate of pay.

(j) No exemptions are to be granted in respect of the provisions for spreadover, prohibition of night work between 7.30 p.m. and 5 a.m. and of the weekly limits of hours of work for women and persons under the age of sixteen years, but the grant of the existing exemption in the case of women employed in fish curing and fish canning factories is to be permitted.

(k) The existing Sections 26, 35 and 36 are to be entirely recast in order to provide more effective methods for the maintenance of records and registers of employment, the posting of notices, for the benefit of the workers, of their hours of employment, the prescribed abstracts of the Factories Act, weekly holidays, etc., and for the notification of these notices and any changes proposed to be made in them to Inspectors of factories.

(l) Higher penalties and fines are to be prescribed for occupiers or owners of factories who have been previously convicted for having committed the same offences.

The Local Governments were asked to submit their replies to the above proposals incorporated in the Draft Bill prepared by the Government of India, by the 1st December 1932. On receipt of the replies of the Local Governments the Government of India received their Original Draft Bill in order to give effect to the more important recommendations made by some of these Governments and a revised consolidating Bill was introduced in the Legislative Assembly on the 8th September 1933 on a motion to refer to Select Committee. The Select Committee set in Delhi from the 18th January 1934 onwards. At the moment of writing it is anticipated that the new Factories Act will be passed during the Budget Session of the Assembly this year.

LATEST FACTORY STATISTICS.

The latest statistics available in connection with the administration of the Indian Factories Act are for 1932. The data published in connection with the normal weekly hours of work show that for the whole of British India men were required to work for more than 54 hours a week in 1,787 perennial and 2,089 seasonal factories, above 48 and not above 54

in 622 perennial and 353 seasonal factories, and not above 48 hours per week in 1,369 perennial and 1,007 seasonal factories. In the case of those factories employing women 3,029 required female workers to work for more than 54 hours per week whereas 1,857 fixed their hours at below 48 per week. 652 factories had hours above 48 but not above 54. Out of the 995

factories employing children, 384 had hours below 30 for children and 611 above 30. The details in connection with the various provinces will be found in summary form in the All-India Factories Reports or in a more detailed form in the Provincial Reports themselves. The statistics of factories do not show the hours of work in particular industries.

All railway workshops come under the Indian Factories Act. Hours of work in railway workshops in all provinces generally average 8 per day and 48 per week. In most cases the hours are so arranged as to provide for a half day off on Saturday provided that a total of 48 hours is worked during any particular week.

Employment of Children—By the Amending Act of 1922 the maximum age of children was raised from 14 to 15 years and the minimum age from 9 to 12. Section 23 of the Act provides that no child shall be employed in any factory unless he is in possession of a certificate granted by a Certifying Surgeon showing that he is not less than 12 years of age and is fit for employment in a factory and while at work carries either the certificate itself or a token giving reference to such certificate. Further, no child is allowed to be employed in any factory before half past five o'clock in the morning or after seven o'clock in the evening and no child is to be employed for more than six hours in any one day. The number of children employed in factories during the years 1922 to 1932 is shown in the following table—

Year	Total
1922	67,658
1923	74,620
1924	72,531
1925	68,725
1926	60,094
1927	57,562
1928	50,911
1929	46,843
1930	37,972
1931	26,932
1932	21,753

An examination of the figures in the above table will show that the number of children employed rose from 67,658 to 74,620 in 1923.

This was due to the fact that the tea factories in Assam which employed about 11,000 children were brought within the scope of the Act for the first time in that year. Further, the amendment of the Act in 1922 did not apply to children who were lawfully employed in a factory on or before the 1st July 1921 and it was not until 1924 that full effect was given to the new age restrictions for children.

There has been a steady decline in the number of children employed. In the textile mills in Bombay City there are none.

Employment of Women—The number of women employed in factories during the years 1921 to 1929 increased steadily from 208,887 employed in 1922 to 257,161 employed in 1929. But the number of women employed since 1929 has fallen perceptibly, the figures for 1930, 1931 and 1932 being 251,905, 231,183 and 225,632 respectively. The increase in the employment of women was due partly to the restrictions imposed on the employment of children and partly to the inclusion within the scope of the Act of all quasi agricultural factories, for example, in the tea gardens which are dependent on female labour to a larger extent than other factories. An important change which the revision of 1922 made in connection with the employment of women was the repeal of Section 27 of the Act of 1911 which permitted the employment of women at night in ginning factories. In view of this amendment the Government of India considered that they were in a position to ratify the Convention concerning the employment of women during the night adopted by the First International Labour Conference held at Washington in 1919 without undertaking any further legislation.

Overtime—Section 31 of the Indian Factories Act provides that in those factories where exemptions are granted from the provision that no person shall be employed in a factory for more than 60 hours in any one week, every person employed in such a factory for more than 60 hours in any one week shall be paid, in respect of overtime worked, at a rate which shall be at least one and a quarter times the rate at which he is normally paid. In most of those factories which work normally less than 60 hours per week overtime is paid for at normal rates up to 60 hours per week and at a time and a quarter for overtime work over 60 hours. Some factories, however, pay either the full time and a quarter rate to be granted under the Factories Act for all overtime worked over and above the normal daily hours or even grant higher rates irrespective of the weekly limitation of 60 hours under the Act. No detailed statistics are available to show the number of workers who were paid overtime during any particular period except in the case of a few Railways and some of the larger industrial organisations.

spread over in the case of adults is limited to thirteen consecutive hours and in the case of children to seven and a half consecutive hours, but the continuous period of eleven free hours in every twenty-four hours in the case of adults must include the hours between 7 p.m. and 6 a.m. in the case of women. The continuous period of sixteen and a half free hours in the case of children must include the hours between 7 p.m. and 6 a.m. Exemptions in the case of women are permitted in such cases as technical reasons require that work should be done at night, e.g., in the fish-curing industry.

(c) The existing provisions with regard to the control of artificial humidification are to be expanded. And the Bill also proposes to give power to Local Governments to authorise an Inspector to call upon Managers of factories to carry out specific measures for increasing the cooling power of the air where he is of the opinion that it is at times insufficient to secure operatives against danger to health or serious discomfort, provided that the cooling power can be appreciably increased without involving an amount of expense which would be unreasonable under the circumstances.

(f) With regard to welfare, the Bill includes provisions for the maintenance of (1) a sufficient and suitable supply of water for washing for the use of persons employed in processes involving contact with poisonous or obnoxious substances, (2) adequate shelters for rest in factories employing more than 150 persons, (3) rooms reserved for the use of children of women employed in factories employing more than 50 women and (4) first aid appliances. Powers are to be given to Local Governments to frame rules in respect of the last three matters. The Government of India, however, have not accepted the recommendation of the Royal Commission with regard to giving power to Local Governments to issue welfare orders as are issued by the Secretary of State in England under Section 7 of the Police, Factories, etc. (Miscellaneous Provisions) Act, 1911. They are of opinion that the matters to be covered by such welfare orders should have the approval of the Legislature and should not be imposed on factory owners by the Executive Government.

(g) Local Governments are to be given powers to make rules prescribing the fitness to be attained by children seeking employment in factories or in any class of factories, and when such a standard has been prescribed no child failing to attain it can be certified as fit for employment in a factory.

(h) Inspectors are to be granted power to call upon managers to carry out such tests as may be necessary to determine the strength or quality of any specified parts of the structure of factories if they are of opinion that, on account of any defect or inadequacy in the construction

of any factory, the factory or any part thereof is dangerous to human life or safety, and Local Governments are to be empowered to make rules for the furnishing, by factories, of certificates of stability.

(i) The maximum amount of overtime that can be worked by virtue of an exemption granted under the Act is to be limited to a time and a half to be allowed in all cases where a worker in a seasonal factory works for more than 60 hours in any one week or where a worker in a factory other than a seasonal factory works for more than ten hours in any one day. But where a worker in a factory other than a seasonal factory works for more than fifty-four hours in any week he is to be entitled in respect of the overtime worked by any overtime in respect of which he is entitled to extra pay under the preceding sentence, to pay at the rate of one and a quarter times his ordinary rate of pay. Where a worker in a factory works on the weekly rest day he is to be entitled in respect of the overtime worked to pay at the rate of one and a half times the ordinary rate of pay.

(j) No exemptions are to be granted in respect of the provisions for spreadover, prohibition of night work between 7.30 p.m. and 5 a.m. and of the weekly limits of hours of work for women and persons under the age of sixteen years, but the grant of the existing exemption in the case of women employed in fish-curing and fish-canning factories is to be permitted.

(k) The existing Sections 26, 35 and 36 are to be entirely recast in order to provide more effective methods for the maintenance of records and registers of employment, the posting of notices for the benefit of the workers of their hours of employment, the prescribed abstracts of the Factories Act, weekly holidays, etc., and for the notification of these notices and any changes proposed to be made in them to Inspectors of factories.

(l) Higher penalties and fines are to be prescribed for occupiers or owners of factories who have been previously convicted for having committed the same offences.

The Local Governments were asked to submit their replies to the above proposals incorporated in the Draft Bill prepared by the Government of India, by the 1st December 1932. On receipt of the replies of the Local Governments, the Government of India received their Original Draft Bill in order to give effect to the more important recommendations made by some of these Governments and a revised consolidating Bill was introduced in the Legislative Assembly on the 8th September 1933 on a motion to refer to Select Committee. The Select Committee met in Delhi from the 18th January 1934 onwards. At the moment of writing it is anticipated that the new Factories Act will be passed during the Budget Session of the Assembly this year.

LATEST FACTORY STATISTICS.

The latest statistics available in connection with the administration of the Indian Factories Act are for 1932. The data published in connection with the normal weekly hours of work show that for the whole of British India men were required to work for more than 54 hours a week in 1,787 perennial and 2,989 seasonal factories, above 48 and not above 54

in 622 perennial and 373 seasonal factories, and not above 48 hours per week in 1,369 perennial and 1,007 seasonal factories. In the case of those factories employing women 3,029 required female workers to work for more than 54 hours per week whereas 1,857 fixed their hours at below 48 per week. 652 factories had hours above 48 but not above 54. Out of the 995

factories employing children, 381 had hours below 30 for children and 611 above 30. The details in connection with the various provinces will be found in summary form in the All India Factories Reports or in a more detailed form in the Provincial Reports themselves. The statistics of factories do not show the hours of work in particular industries.

All railway workshops come under the Indian Factories Act. Hours of work in railway workshops in all provinces generally average 8 per day and 48 per week. In most cases the hours are so arranged as to provide for a half day off on Saturday provided that a total of 48 hours is worked during any particular week.

Employment of Children—By the Amending Act of 1922 the maximum age of children was raised from 11 to 15 years and the minimum age from 9 to 12. Section 23 of the Act provides that no child shall be employed in any factory unless he is in possession of a certificate granted by a Certifying Surgeon showing that he is not less than 12 years of age and is fit for employment in a factory and while at work carries either the certificate itself or a token giving reference to such certificate. Further, no child is allowed to be employed in any factory before half past five o'clock in the morning or after seven o'clock in the evening and no child is to be employed for more than six hours in any one day. The number of children employed in factories during the years 1922 to 1932 is shown in the following table—

Year	Total
1922	67,658
1923	74,620
1924	72,531
1925	68,725
1926	60,094
1927	57,562
1928	50,911
1929	46,843
1930	37,972
1931	26,932
1932	21,713

An examination of the figures in the above table will show that the number of children employed decreased from 67,658 to 21,713 in 1932.

This was due to the fact that the ten factories in Assam which employed about 11,000 children were brought within the scope of the Act for the first time in that year. Further, the amendment of the Act in 1922 did not apply to children who were lawfully employed in a factory on or before the 1st July 1921 and it was not until 1924 that full effect was given to the new age restrictions for children.

There has been a steady decline in the number of children employed. In the textile mills in Bombay City there are none.

Employment of Women—The number of women employed in factories during the years 1921 to 1929 increased steadily from 208,887 employed in 1922 to 257,161 employed in 1929. But the number of women employed since 1929 has fallen perceptibly, the figures for 1930, 1931 and 1932 being 251,905, 231,183 and 225,632 respectively. The increase in the employment of women was due partly to the restrictions imposed on the employment of children and partly to the inclusion within the scope of the Act of all quasi-agricultural factories, for example in the tea gardens which are dependent on female labour to a larger extent than other factories. An important change which the revision of 1922 made in connection with the employment of women was the repeal of Section 27 of the Act of 1911 which permitted the employment of women at night in ginning factories. In view of this amendment the Government of India considered that they were in a position to ratify the Convention concerning the employment of women during the night adopted by the First International Labour Conference held at Washington in 1919 without undertaking any further legislation.

Overtime—Section 31 of the Indian Factories Act provides that in those factories where exemptions are granted from the provision that no person shall be employed in a factory for more than 60 hours in any one week, every person employed in such a factory for more than 60 hours in any one week shall be paid, in respect of overtime worked, at a rate which shall be at least one and a quarter times the rate at which he is normally paid. In most of those factories which work normally less than 60 hours per week overtime is paid for at normal rates up to 60 hours per week and at a time and a quarter for overtime work over 60 hours. Some factories, however, pay either the full time and a quarter rate to be granted under the Factories Act for all overtime worked over and above the normal daily hours or even grant higher rates irrespective of the weekly limitation of 60 hours under the Act. No detailed statistics are available to show the number of workers who were paid overtime during any particular period except in the case of a few Railways and some of the larger industrial organisations.

LABOUR IN MINES.

The conditions of employment of labour in mines are governed by the provisions of the Indian Mines Act, 1923, which came into force with effect from the 1st July 1924 replacing the former enactment of 1901. The Act of 1901 contained provisions designed to secure safety in mines and it provided for the maintenance of an inspecting staff, but it contained no provisions regulating the employment of labour.

Section 23 of the Indian Mines Act of 1923 limited weekly hours of miners to 54 underground and to 60 aboveground but no limits were prescribed for daily hours. In a Bill further to amend the Act for certain purposes introduced by the Government of India in the Legislative Assembly in March 1927 it was proposed to fix the maximum limit for daily hours at twelve. There was a considerable body of opinion in favour of enforcing an eight-hour day and this was also the opinion of a minority of the Select Committee appointed by the Assembly to consider the Bill. The majority of the Committee however adhered to the principle of a twelve hour shift as proposed in the Bill but agreed that an eight-hour shift should be gradually worked up to. They recommended to Government that after the new provisions had been in operation for three years, the position should be again reviewed as to whether an eight-hour shift could be introduced. A daily limit of 12 hours was thus imposed by the Amending Act of 1928 and this was to be brought into effect from April 1930.

Recommendations of the Royal Commission

The Royal Commission on Labour which reviewed the whole position came to conclusions similar to those reached by the Select Committee. A minority of the Commission advocated the reduction of the daily limit to eight hours while the majority supported the recommendation of the majority of the Select Committee, and in addition suggested that weekly hours above ground should be limited to 54. In the mean while, the fifteenth session of the International Labour Conference adopted a Draft Convention concerning hours of work in coal mines, framed solely with reference to conditions in European countries. This Convention prescribes that the

hours of work should be limited to 72 per day in underground coal mine and to 8 hours a day and 48 hours a week in open coal mine. The Convention was placed before the Legislative Assembly on the 24th February and before the Council of State on the 2nd March 1932 and resolutions were adopted by both the Chambers to the effect that Government should examine the possibility of reducing the statutory limits for hours of work in mines and that the results of this examination should be placed before them.

Having regard to the above resolution and to the fact that nearly three years had elapsed since the Act of 1928 came into full effect the Government of India have taken up the re-examination of the question. They are of opinion that the present is the most opportune time for effecting a reduction in hours of work in mines, and that nine hours would be as low a daily limit as is reasonable. They are provisionally disposed to agree with the Royal Commission's recommendation that the weekly hours above ground should not exceed 54. The Government of India particularly desire opinions on the question of regulating hours in mines and they addressed a circular letter, dated the 21st September 1932 to Local Governments inviting their views in the matter.

The circular letter of the Government of India also referred to the following recommendations of the Royal Commission on Indian Labour with which they were provisionally in agreement.

(a) No child under the age of 14 years should be permitted to work in or about mines.

(b) Minor accidents should be reported weekly to the Chief Inspector through the District Magistrate and

(c) It should be made obligatory for Local Governments to publish reports of Committees and Courts of Inquiry appointed by them under the Act.

Number of Mines—The following table gives the number of mines which came under the Act each year, classified according to the minerals raised—

Year	Number of mines					Total Number of all mines
	Coal	Mica	Manganese	Tin and Wolfram	Other minerals	
1924	846	513	186	87	172	1,804
1925	810	571	214	204	212	2,011
1926	722	601	221	210	143	1,897
1927	644	630	220	200	298	1,992
1928	556	674	184	203	331	1,948
1929	548	498	125	186	375	1,732
1930	549	508	82	178	352	1,669
1931	540	342	56	186	343	1,417
1932	515	315	23	138	200	1,281

Number employed—The number of persons employed in mines during the years 1924-1932 were as follows —

Year	Total No of mines which came under the Act	Number of persons employed		
		Belowground	Aboveground	Total
1924	1 804	167,779	90,498	258,277
1925	2 011	168,554	84,303	253,857

The sex distribution of the persons employed in mines during the years 1926 to 1932 was as shown below —

Year	Number of males employed			Number of females employed		
	Underground	In open workings	On the surface	Underground	In open workings	On the surface
1926	86,343	43,306	51,967	31,889	27,833	18,775
1927	86,766	50,028	53,903	31,850	27,697	19,046
1928	86,155	51,005	52,430	31,785	28,453	17,843
1929	92,856	54,235	51,954	24,089	28,728	17,839
1930	101,649	50,396	52,709	18,684	21,186	17,043
1931	98,885	38,833	45,157	16,841	16,079	14,987
1932	96 196	30 256	39,899	14,711	10,761	12,835

Labour on Railways—All railway workshops come under the administration of the Factories Act. The Indian railways employ nearly a quarter of a million workers in other occupations for whom provision for the control of their working hours has been made under the Hours of Employment Rules, 1930, framed under the Indian Railways Amendment Act, 1929.

The Conventions adopted by the International Labour Conference in 1919 and 1921 prescribed a 60 hour week and a weekly rest of not less than 24 consecutive hours for all workers in British India employed in factories, in mines and in such branches of railway work as may be specified for this purpose by the competent authority. The Indian Factories Act which was amended in 1922 to give effect to the Conventions limited the hours of work in factories to 11 in any one day and to 60 in any one week. Provisions were also made for intervals of rest and a weekly holiday. Similar limitations were imposed under the Indian Mines Act of 1923 in respect of colliery staff. Both these restrictions apply to factories and mines controlled by railway administrations. The application of the Conventions to other departments of railway administrations was found to be a problem beset with many difficulties and has been a subject of prolonged investigations. Orders were issued by the Railway Board in 1921 that the 60 hour week should be adopted for station staff not employed in connection with the working of trains. The Indian Railway Conference Association drew up a set of rules in 1927 and these received the general approval not only of the Railway Board but also of the Boards of

Directors of the lines managed by companies. Subsequently, however, it was found that these rules while they aimed at applying the spirit of the Conventions did not adequately fulfil the statutory obligations imposed upon Government by the ratification of the Conventions. The whole question was therefore again exhaustively reviewed and a Bill amending the Indian Railways Act with the object of empowering the Governor-General in Council to make rules on the subject was introduced in the Legislative Assembly in the autumn session of 1929 and was referred for consideration to a Select Committee. The Amending Act was passed in the same year, and the Hours of Employment Rules were drawn up during the following year.

Working of overtime on Indian railways is more prevalent on construction than on the open line due to (1) the working season in the monsoon areas being confined to eight months in the year, (2) special measures taken to speed up all heavy work to avoid the locking up of capital and (3) wet foundation work in bridges which necessitate continuous work. Usually overtime in such cases is paid at a rate fixed beforehand.

Seamen—The Indian Merchant Shipping Act, 1923, provides that no seaman shall be signed on for service on a ship unless he enters into a contract in the manner specified with the Master of the ship. All agreements entered into between Masters and Seamen for service on foreign going ships have to be signed in the presence of a Shipping Master. The agreement forms contain the rules and regulations provided for under the Act for maintaining discipline and for the fines which may be inflicted for the breach thereof.

CONTRACT LABOUR

In most industrial concerns in India work in connection with building, loading and unloading carting, receiving, and despatching of goods and work involving the employment of unskilled labour over which supervision is either difficult or costly is given out on contract. In the textile cotton industry work in connection with bleaching and dyeing is also generally done on contract at all centres. In the cotton mills in Ahmedabad work in the Mixing and Waste Room and the Yarn Bundling and Baling Department in the Drawing-in Department and Beam Carrying is given out on contract in various mills. In certain printing presses in the Bombay Presidency, composing is given out on contract. In most cases no supervision is exercised over the labour engaged by the contractor to whom the contract is given. Perhaps the most efficient method of control and supervision over contract labour is that which obtains on several railways. This will be dealt with separately lower down. Exceptions to the general remarks made above are as follows:

In the coal mines in Bihar and Orissa contractors are employed by a large number of collieries to provide the labour required for cutting the coal and loading it on wagons. The contractors are paid at a fixed rate per ton for all coal loaded on wagons. In some cases, however, the rate paid per ton is increased either because coal is being extracted from difficult places in the mine or because the contractor has difficulties in maintaining his labour supply. The extent to which contractors are employed is considerable and probably more than half the coal raised in the Bihar coal fields is raised on the contract system. Definite figures are not available but the Indian Mining Association reports that 80 per cent of the coal raised in the mines belonging to that Association in the Bihar coal fields is raised by contract labour. In some cases contractors are only employed to provide the labour for cutting the coal. The contractor is generally responsible only for raising the coal while the colliery supervising staff is responsible for seeing that the mines are run safely.

UNEMPLOYMENT.

The problems connected with unemployment in India are quite different from the problems which have arisen in highly industrialised countries like England, the United States of America and Germany. In the latter countries labour is divided into two fairly distinct classes (1) industrial, and (2) agricultural. During periods of depression in industry those workers who are thrown out of employment either on account of a temporary or a partial closing down of concerns cannot fall back upon agriculture for earning their livelihood. It is necessary to repeat here, in order to understand this question clearly, that more than 70 per cent of the population of India derive their livelihood from various occupations in connection with agriculture. This does not mean that agriculture is a perennial source of employment. Considerable unemployment and distress occurs during periods when the monsoon fails. Even during those years when the monsoon is generally successful, there are usually parts of the country where the rainfall is deficient and there is not enough scope for the employment of all the labour available. Both the Government of India and the various Provincial Governments have devised various schemes for famine relief and the variations in the visitations of nature with their consequent periods of prosperity and distress have now been brought more effectively under human control than ever before in the history of India. It is not necessary to go into the details of the questions connected with famine relief in this section. The point which it is intended to bring out is that owing to the agricultural character of industrial labour in India, the problems connected with employment and unemployment are somewhat closely related to those connected with the success or the failure of the monsoon.

Speaking generally, the Indian labourer migrates to industrial centres when he finds that the yield of the land in his native place is not sufficient to maintain all the members of his family. A certain percentage of the workers employed in industry temporarily give up their employment during the sowing transplanting and harvesting seasons. During periods of depression in trade and industry, industrial workers released from employment fall back upon agriculture and thus add to the existing pressure of the population on the land. If the depression in trade and industry synchronises with the failure of the monsoon, the amount of unemployment becomes considerable and the resulting distress is enormous. Various States have devised schemes of Employment Exchanges for the purpose of studying the problems in connection with the demand and supply of labour to control the movements of labour and to place it where it is required. The Government of India and the various Provincial Governments have considered the question of creating Employment Exchanges in India several times during the last ten years, but opinion is unanimous that owing to the preponderatingly agricultural character of Indian labour it is practically impossible to devise any satisfactory scheme for the formation of Employment Exchanges.

India is a State Member of the International Labour Conference, and as such she is bound according to the terms of the Treaty of Peace, to ratify and adopt, wherever possible, any Convention or Recommendation adopted by the International Labour Conference. The consideration of industrial unemployment was thrust upon the Government of India by the Washington Convention, which was adopted

by the First International Labour Conference held in Washington in 1919. Each Member ratifying this Convention was required—

(i) to communicate to the International Labour Office all information, statistical or otherwise, concerning unemployment, including reports on measures taken or contemplated to combat unemployment,

(ii) to establish a system of free public employment agencies under the control of the central authority, and to appoint Committees, including representatives of employers and workers, to advise on matters concerning the operation of these agencies,

(iii) where systems of insurance against unemployment have been established, to make arrangements, upon terms to be agreed upon between the members concerned, whereby workers belonging to one Member and working in the territory of another shall be admitted to the same rates of benefit of such insurance as those of the latter

In addition to this Convention, the First International Labour Conference also adopted a Recommendation which advocated—

(a) the abolition of employment agencies which charge fees or which carry on their business for profit,

(b) the establishment of an effective system of unemployment insurance, and

(c) the execution of public works as far as practicable during periods of unemployment and in districts most affected by it

The draft Convention was ratified by India but, in communicating this ratification to the International Labour Organisation at Geneva, the Secretary of State for India found it necessary "in order to avoid subsequent misunderstanding" to explain at some length the peculiar position of India in this matter and to emphasise the difficulties connected with a complete ratification by India owing to the predominantly agricultural character of the country. The Government of India, in addressing the local Governments on questions arising out of the draft Convention and Recommendation adopted by the International Labour Conference, invited views on the following points—

(i) Advisability of creating Public Employment Agencies in congested areas to facilitate the migration of surplus labour to industrial areas where there is a shortage of labour

(ii) Advisability of utilising Public Employment Agencies in connexion with recruitment for Assam

(iii) Advisability of establishing Public Employment Agencies for the dissemination of information regarding employment during times of famine and scarcity to those in search of employment

(iv) Advisability of appointing Committees representing employers and workers to advise on matters concerning the operation of Public Employment Agencies

(v) Advisability of abolishing or controlling Employment Agencies which charge fees or which carry on their business for profit

The replies of the local Governments indicated that in most provinces the demand for labour exceeded the supply, that, even in provinces from which there was a large migration of labour, no difficulty had been experienced in obtaining information with regard to the areas where labour was in demand, that the establishment of public employment agencies would serve no useful purpose, and that such agencies might excite suspicion and be liable to be misunderstood by the people. With regard to recruitment of labour for Assam, the local Governments concerned were agreed that any experiment on the lines suggested would be risky. On the question of the abolition of control of employment agencies which charge fees or which carry on their business for profit, the replies of the local Governments indicated that employment agencies of this character were practically unknown in India. In the circumstances, the Government of India decided to take no further action on the draft Convention or Recommendation concerning unemployment.

Middle-class unemployment—In recent years unemployment among the educated middle classes has been assuming alarming proportions and has attracted widespread public attention. In January 1926, a Resolution was passed by the Legislative Assembly in the following terms—

"This Assembly recommends to the Governor General in Council that he may be pleased to appoint a Committee with a non official majority to investigate into the problem of unemployment in general, and among the educated classes in particular, and devise suitable remedies, whether by a system of industrial and technical education, or by a revision of the existing system of education, or by offering encouragement to the starting of new industries, or by opening new avenues of employment, or by the establishment of employment bureaux, or by all these or any other means, and that the said Committee do make a report on the latter problem as early as possible."

Similar Resolutions were also passed in some of the local Legislative Councils. The Government of India did not consider that the appointment of a Central Committee would serve any useful purpose, but in a circular letter drew the attention of the local Governments to the gravity of the problem of middle class unemployment in India. As a result of the Resolutions passed by the local Councils, Committees were appointed by some of the local Governments. The reports of most of these Committees refer almost exclusively to middle class unemployment, but the Punjab and the Bengal Committees also dealt with general unemployment. The Punjab Committee came to the conclusion that "there was no unemployment worthy of mention among the uneducated classes" whilst the Bengal Committee observed as follows—

"The labourer, if we may use the term, has not yet been divorced completely from the land, and he frequently possesses or has an interest in a small plot of land in his native place on the cultivation of which he can fall back in times of depression. Added to this is the fact that industrial labour is still comparatively scarce in Bengal and in fact had to be imported

from other provinces. The effect therefore of trade depressions on the industrial labourer in Bengal is so far very small."

Jute and Cotton Mill Industries—In the jute mill industry in Bengal a large number of mills have, during the last two or three years, changed over from the multiple to the single shift system. It is estimated that on the single shift about 25 to 33 per cent less labour force is required than on the multiple shift, but in spite of the changes no trouble has been reported with regard to unemployment. In the Bombay cotton mill industry, out of an average of about 140,000 workers employed during the years 1920 to 1927 approximately 20,000 have been thrown out of employment on account of the introduction of efficient methods of work whereby spinners are required to mind two

or three sides of a spinning frame instead of one and where the ordinary two loom weaver is required to tend three, four or six looms. The Bombay Strike Inquiry Committee dealt with this aspect of the question in their report and they recommended the creation of an Out-of-Work Donation Fund. This has been dealt with in the summary given with regard to the findings of this Committee in the Section on Conciliation and Arbitration. Owing to depression in trade and external competition several cotton mills are being compelled either to close down completely or to work with partial complements. At the beginning of February 1934, the total number of cotton mills which were closed in Bombay amounted to 27 and the number of workers thrown out of employment to 10,350.

INDUSTRIAL SAFETY AND INSPECTION.

As in other countries, the industrial progress of India has been accompanied by an alarming increase in the number of industrial accidents.

Statistics for 1932—The numbers of acci-

dents classified according to fatal, serious and minor in factories in each of the British Provinces in India in the year 1932 are shown in the following table—

Province	Total	Serious	Minor	Total
Madras	14	335	1,254	1,623
Bombay	37	1,331	4,204	5,572
Bengal	29	875	2,105	3,009
United Provinces	23	258	1,402	1,683
Punjab	6	12	1,043	1,091
Burma	17	212	1,140	1,668
Bihar and Orissa	20	320	1,465	1,814
Central Provinces and Berar	4	35	213	252
Assam	8	57	317	382
North West Frontier Province				
Baluchistan	1		39	40
Ajmer Merwara	1	11	755	767
Delhi	2	9	87	98
Bangalore and Coorg			128	128
Total	162	3,513	14,452	18,127
Total for the year 1931	174	3,603	15,040	19,807

The explanation generally offered for the increase is that the Workmen's Compensation Act is operating as an inducement both for work-people and employers to report accidents more frequently than in the past. But the increase in the number of serious accidents suggests that the problem is a serious one and that an organised 'safety first' campaign is very desirable in India. Some progress along these lines has been made in Bombay in the mills and on the railways.

Factory Inspection—The administration of the Indian Factories Act is entrusted to Factory Inspectors in each province. Where breaches of the Act are discovered the managers of factories are prosecuted and in most cases such prosecutions result in convictions. All

provinces except Assam have Factories Departments. In the Bombay Presidency the full time factory staff consists of the Chief Inspector of Factories, three Inspectors, three Assistant Inspectors and one Woman Inspector. The Chief Inspector, two Inspectors and two Assistants have their headquarters in Bombay City. An Inspector and an Assistant are stationed in Ahmedabad. The Woman Inspector has her headquarters in Bombay but has jurisdiction over the whole Presidency. She deals with problems mainly affecting women. The Bombay Presidency is the only province in India which has a Lady Inspector of Factories. A part time Certifying Surgeon is stationed in Bombay and a full time one in Ahmedabad. They have been appointed as Divisional

Inspectors with powers under the Health and Sanitary sections of the Factories Act. They have also been granted powers under the provisions of the Bombay Maternity Benefit Act. The Director and Assistant Directors of Public Health have also been appointed as Divisional Inspectors under the Health and Sanitary sections of the Act. Their reports are sent to the Chief Inspector who passes orders on the same. Local Magistrates in the districts have ex officio powers under the Employment sections of the Act.

Reporting of Accidents—Section 34 of the Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident. All classes of accidents namely, fatal, serious i.e., accidents which prevent a person returning to work for 21 days or more, and minor are to be reported to the Inspector of Factories and to the District Magistrate and in cases of any accident resulting in death to the officer in charge of the Police Station. It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act. The Act also requires notice to be given of an accident which is due to any cause that has been notified in this behalf by a Local Government, even though no injury may have resulted therefrom to any person. So far notifications have been issued under this section only in Bombay, Bengal and Burma.

Accident Prevention—The chief influences in the prevention of accidents are (a) the powers of Inspectors under the Factories Act to compel managers to erect adequate fencing and to take precautions against accidents, (b) the voluntary interest of managers in safety measures and safety precautions, and (c) the interest of insurance companies as a result of the operation of the Workmen's Compensation Act. In many provinces the existing rules made under the Factories Act cover "Safety First" measures such as compelling certain classes of workers to wear tightly fitting clothes, to prohibit children from entering into certain parts of factories, etc. Steady progress has been made in the different provinces in respect of 'safety first' propaganda, but with wide differences in caste and religion and with the low standard of efficiency the problem of organisation of safety services in industrial undertakings is a matter of some difficulty in India. Particular attention was devoted in Bengal to the safeguarding of crowded machinery in the smaller factories and orders were issued during the year 1932 in that province to 52 factories to alter, repair or reconstruct their buildings. Safety pamphlets were compiled and issued by the Factory Departments in Bengal and Madras. Continued progress in the fencing of machinery and in the use of safety posters is reported to have been maintained in all provinces and increasing attention is being paid by employers throughout India to safety measures and to the

inculcation in the factory employee of "Safety first" ideas. In Bombay a certain amount of ground had already been broken and the Factory Department in co-operation with organisations of industrial employers produced a set of four 'safety posters' some years ago and these have been very largely exhibited in the engineering workshops in the Presidency. Posters were also produced for the carding and spinning departments of cotton mills. The Red Cross Society was assisted in producing an All-India poster dealing with a universal risk connected with the wearing of loose clothing which is ordinarily worn by the average Indian worker. Encouraged by the results of the posters introduced in Carding and Spinning sheds the Millowners' Mutual Insurance Association, Bombay, produced a set of posters for the weaving department early in 1931 and these are now in fairly general use. Little has, however, been done in the factories of the Bombay Presidency in the way of specific organisations to further the cause of safety. Factories, too, are not sufficiently large to warrant the employment of a safety engineer and reliance has almost totally been placed on the activities of the inspectorate in this particular direction. Safety Committees have, however, been established in two cotton mills representative of the two largest groups in Bombay, as an experimental measure. Similar Committees have been brought into existence in five mills in Ahmedabad and the Factory Department has secured promises from other factories to establish safety committees.

The railways are of course pioneers in the introduction and the continuance of active propaganda in "Safety-First" work in all departments. These activities cover railway workshops (which come under the Indian Factories Act) as well. There was marked improvement as regards minimising accidents in railway workshops as a result of the activities of safety committees which have been established in some of them. The success of safety committees which were established at the S I Railway workshops at Perambur and Golden Rock was demonstrated by the fact that at the latter works accidents decreased by 53 per cent in 1932 as compared with 1931. A very comprehensive Safety First Organisation was established in the Parel, Matunga and Manmad Workshops of the G I P Railway in 1929. The Railway administration has also distributed to the employees an illustrated pamphlet on 'Safety First' in which a chapter on workshop safety is included. The G I P Organisation is stated to be the best of its kind. Safety Committees have also been formed in the R I M Dockyard and the Bombay Electric Supply and Tramways Company. In the United Provinces no industrial undertaking has yet introduced a safety service organisation. The Welfare Committees of the E I Railway Locomotive and Carriage Workshops, Lucknow, do at times discuss at their monthly meetings questions of safety brought forward by members. Safety posters, published by the Railway Administration, are displayed in all their workshops and the Indian Red Cross Society posters in all factories in the province. In furtherance of the 'safety first' movement in Bengal warning hooters or sirens have been installed in the

textile factories so as to warn employees before the power plant and machinery is set in motion. An instructive handbook entitled "Safety in Factories" dealing with general matters concerning the safety of factory operatives has been compiled and published. An agreement in regard to standard guards and safety devices for jute machinery has been signed by the Indian Jute Mills Association in regard to new machinery to be installed after July 1932. Posters supplied by the Indian Red Cross Society illustrating the suitable type of dress to be worn by operatives while working on transmission machinery were distributed to factories in the different provinces, and safety propaganda of various kinds is receiving increasing attention from the large factory owners and the inspecting staff. Perhaps the best known instance where first class "safety first" work is being carried on in India is that done by the Tata Iron and Steel Company at Jamshedpur. The Company has since 1920 subscribed to the British Industrial Safety First Association and has installed notice boards all over the plant exhibiting the posters supplied by that Association. The literature received from the Association is periodically broadcast throughout the world.

First-Aid and Medical Relief—Some of the Local Governments have framed rules requiring the provision, under the charge of responsible persons and in readily accessible positions, of first aid appliances containing an adequate number of sterilised dressings and some sterilised cotton in all factories employing 500 and more operatives. Most of the factories are situated within easy reach of Government hospitals or hospitals maintained by Local Authorities but many of the larger and enlightened employers are already maintaining their own medical staff and equipment which are easily available in cases of accidents. The Millowners' Association, Bombay, started classes for First Aid training in conjunction with the St. John Ambulance Association in 1931. These classes have been successful and facilities have since been provided for the training of men deputed by the Engineering Safety Committee also. In the Tata Iron and Steel Works at Jamshedpur boxes with first aid supplies are maintained in each department and two first aid hospitals in different parts of the plant are staffed with doctors and compounders in readiness to render first aid to injured persons.

Mines—The Indian Mines Act of 1923 empowers the Governor General in Council to frame regulations for the safety of persons employed in mines (Section 29, clauses (k) to (p)). Local Governments are also empowered to frame rules under the Act to ensure the proper fencing of a mine for the protection of the public. In addition, the Chief Inspector of Mines may call upon the owner, agent or manager of a mine to frame bye laws which are not inconsistent with the provisions of the Act, regulations or rules to prevent accidents and to provide for the safety, convenience and discipline of the persons employed in the mine (Section 32). The bye laws, when approved by the Local Government, have effect as enacted under the Act. Further, Section 19 of the

Act gives special powers to the Inspector of Mines to take action when any danger is apprehended which is not expressly provided for by the Act, regulations, rules and the bye laws. The Governor General in Council has framed two sets of regulations, namely, the Indian Coal Mines Regulations, 1926, which apply only to coal mines and the Indian Metalliferous Mines Regulations, 1926, which apply to all other mines. These regulations provide for the proper maintenance of shafts and outlets, roads and working places, haulage arrangements, fencing and gates, for the restrictions which have to be observed in raising or lowering persons or materials, for the precautions to be taken in the use of explosives, and for adequate ventilation and lighting.

During the year 1932 at Mines regulated by the Indian Mines Act, 1923, there were 163 fatal accidents, which is 26 less than in 1931, and 48 less than the average number in the preceding five years. In addition to the fatal accidents there were 600 serious accidents involving injuries to 613 persons, as compared with 591 serious accidents involving injuries to 613 persons in the previous year. No record is maintained of minor accidents. 200 persons were killed and 649 persons were seriously injured. The latter figure includes 36 persons injured in fatal accidents. The number of persons killed is 27 less than in 1931. 182 of the persons killed were men and 18 were women. In one case nineteen lives, in one case five lives and in sixteen cases two lives were lost. The causes of the fatal accidents have been classified as follows—

	Number of fatal accidents	Percentage of total number of fatal accidents
Misadventure	110	67.48
Fault of deceased	22	13.50
Fault of fellow workmen	10	6.13
Fault of subordinate officials	14	8.59
Fault of Management	5	3.07
Faulty Material	2	1.23
Total	163	100.00

Deaths occurring in each class of mines were as follows—151 in coal mines, 24 in mica mines, 5 in silver-lead mines, 4 in tin and wolfram mines, 3 in limestone mines, 2 in stone mines, 4 in copper mines, and one each in Chromite, Iron, Salt and Manganese mines. Fifty-two persons lost their lives by falls of roof, 53 by falls of side, 29 by haulage, 19 on account of suffocation by gases, 13 by explosives, 7 by explosives and ignitions of fire damp, 6 in shafts, one by electricity, 7 by other accidents under ground and 13 on the surface.

Railways—The Railway Department conducts an intensive "Safety-First" propaganda every year which embraces the following among other activities —

- (1) Safety posters and safeguards are put up on prominent points both in English and in the vernacular. Some of these, *e.g.*, on the Bombay, Baroda and Central India Railway, are prepared from actual photographs of safe and unsafe methods of working in selected branches of manufacture and maintenance work in the railway workshops
- (2) An illustrated booklet was compiled by the Great Indian Peninsula Railway during the year 1926-27 which has been translated into a number of vernacular languages and distributed throughout the line on certain railways

- (3) Photographs and special articles are published in the Railway magazines for the instruction of the staff
- (4) Inspecting subordinates are instructed to take the opportunity, while visiting stations, of addressing the staff on "Safety-First"
- (5) Coloured pictures showing the right and wrong way of doing a job are posted at various places for the benefit of the illiterate staff
- (6) A "Safety-First" film was prepared by the Central Publicity Bureau during the year 1927-28 and copies distributed to railways. The film is displayed weekly by the travelling cinemas of the railways
- (7) A "Safety-First" pamphlet has been prepared by the Central Publicity Bureau and is being issued to all railway administrations

WORKMEN'S COMPENSATION.

The Workmen's Compensation Act of 1923 which was the first piece of social insurance passed in this country, came into force on July 1st, 1924. The Act covered ten classes of workmen. Some of these, such as members of fire brigades, telegraph and telephone linemen, sewage workers and tramwaymen are small, and as the definition of seamen was limited to those employed on certain inland vessels, only a very small proportion of Indian seamen came under the Act. Compensation for seamen, however, has been secured by agreement between the Government of India and foreign steamship companies, under which the latter agree to the insertion in the ships' articles of a clause whereby the companies agree to pay compensation to injured Indian seamen on the same basis as if they were covered by the Act and all questions as to compensation are decided by Commissioners of Workmen's Compensation in India. An Indian seaman employed on a British ship legally comes under the English Act and the insertion of the clause referred to above does away with the practical difficulties which would arise if Indian seamen had to claim compensation in the English or other foreign courts. The five main classes of workmen covered by the Act are workers in factories, mines, docks and on railways, practically all of whom are included and those engaged in certain types of building work, notably the construction of industrial and commercial buildings and any other buildings which run to more than one storey. The most important classes excluded altogether are agricultural workers and domestic servants. Non manual labourers getting more than Rs 300 a month are excluded, except on the railways. Power was taken to include other hazardous occupations by notification from time to time. All occupations involving blasting operations were thus declared by the Governor-General in Council as hazardous occupations. Compensation is to be given

as in the English Act, for personal injury by accident arising out of and in the course of employment. It is also to be given for diseases in certain cases. The provisions for diseases have been so framed that if a certain class of workmen contracts a scheduled disease, it will usually be extremely difficult for the employer to defeat a claim for compensation. On the other hand, other workmen will find it equally difficult to get compensation for disease, as they will have to prove that the disease arose "solely and directly" from employment. The diseases scheduled were anthrax, lead poisoning and phosphorous poisoning, but the list was made capable of extension. Mercury poisoning was thus added to Schedule III by notification, dated 28th September 1926.

In order to bring the Indian law into conformity with the provisions of the Draft Convention concerning Workmen's Compensation for Occupational Diseases adopted at the Seventh International Labour Conference held at Geneva in 1925, which had been ratified by India, necessary changes were made in sub section (2) of section 3 and in the list of occupational diseases given in Schedule III of the Act. Certain occupations in connection with operations for winning natural petroleum or natural gas and in connection with the loading, unloading and fuelling of a ship in a harbour, roadstead or navigable water were also brought within the purview of the Act by notification issued by the Governor-General in Council in exercise of the powers conferred by sub section (3) of section 2 of the Act.

The Amending Acts of 1929 and 1931—The main features of the Amending Act of 1929 were (1) that the discriminating restrictions placed on workmen employed in the construction, repair or demolition of a building or bridge with regard to their eligibility for compen-

sation except in the case of death or permanent total disablement has been removed, (2) that all payments to dependants of the deceased workmen (except advances to the extent of Rs 50 for funeral expenses of the deceased workman and to the extent of a hundred rupees on account of compensation to any dependent) and any lump sums payable to minors should be paid through the Commissioner, (3) deposits of trivial amounts, i.e. less than Rs 10 have been done away with, (4) provision is made for the protection of lump sums payable to a woman or a person under legal disability by empowering the Commissioner to invest, apply or otherwise deal with them for the benefit of the woman, or of such person during his disability, (5) powers are vested in the Commissioner to recover any amount obtained by any person by fraud, impersonation or other improper means and (6) the benefits of the Act are extended to (a) any person employed for the purpose of loading, unloading, fuelling, constructing, repairing, demolishing, cleaning or painting any ship of which he is not the master or a member of the crew, or (b) employed on a railway as defined in Sections 3 (1) and 118 (1) of the Indian Railways Act, 1890, by a person fulfilling a contract with a railway administration or (c) employed as an inspector, mail guard, sorter or van peon in the Railway Mail Service, or (d) employed in connexion with operations for winning natural petroleum or natural gas, as a rig builder, driller, driller's helper, oil well puller or bailing or cleaning oil wells or putting in and taking out casings or drill pipes in oil wells or (e) employed in any occupation involving blasting operations.

In 1931 the Act was further extended to cover workmen engaged in the construction, etc., of aerial ropeways.

The Amending Act of 1933—The Royal Commission on Indian Labour made a number of recommendations for expanding the scope of the Workmen's Compensation Act, 1933 and on effecting improvements in it. The Government of India, in the Department of Industries and Labour, introduced a Bill in the Legislative Assembly on the 22nd February 1932 giving effect to the Commission's recommendations. The Bill was circulated for opinion to Local Governments in March 1932 and was referred to a Select Committee of the Legislative Assembly on the 23rd Sept 1932. The Select Committee submitted its report in February 1933. The Bill was passed by the Legislature and the Act received the assent of the Governor General on 9th September 1933. It came into force on 1st July 1933 but certain sections of the Amending Act were brought into operation from 1st January 1934 in order to give time to the industries covered for making the unnecessary insurance arrangements in view of the alterations made in the amounts of compensation payable. The principal amendments made in the Act are as follows—

(a) The definition of "dependent" has been recast so as to divide dependents into two categories, placing in the first those who are in practically all cases actually dependent and in the second those who may or may not be in that position. Widowed daughters, widowed sisters

and widowed daughters-in-law as well as all legitimate children have been included in the list of dependents.

(b) The scope of the Act has been extended so as to cover as completely as possible all workers in organised industries whether their occupations are hazardous or not and a step has been taken in the direction of extending the benefits of the Act to workers in less organised industries when employment is subject to much risk. The distinction which existed between seamen employed in the ships registered in India and those in ships registered in foreign countries has been removed. Any person employed as the master or a seaman of any ship which is propelled by mechanical power or towed by a ship so propelled as well as in any other kind of ship whose net tonnage is 50 tons or more are brought within the scope of the Act. Not only workmen employed within the precincts of a factory but also men engaged in any kind of work incidental to or connected with work in a factory are entitled to the benefit of the Act. Other classes of workers included within the scope of the Act are, drivers of private motor cars, workers employed in handling explosives or in the construction of any building twenty feet or more in height or in the construction, working, repair or demolition of any aerial ropeway or in any occupation ordinarily involving outdoor work in the Indian Posts and Telegraphs Department, or in the operation of any ferry boat capable of carrying more than ten persons or in any estate which is maintained for the purpose of growing cinchona, coffee, rubber or tea, or in a lighthouse as defined in clause (d) of section 2 of the Indian Lighthouse Act, 1927, or in producing or exhibiting cinematograph pictures, or in the training, keeping or working of elephants or wild animals or employed as a diver.

(c) The waiting period has been reduced from ten to seven days.

(d) The scales of compensation for death and permanent total disablement which are graded according to seventeen wage classes, have been considerably enhanced and the minimum rate introduced represents an increase of over 100 per cent on that given under the original Act, while the maximum is increased by 60 per cent. The basis of calculation of the amount of compensation in the case of deaths or permanent total disablement is the same as before, i.e., 30 months' wages for the former and 42 months' wages for the latter for adults. The maximum amounts of compensation for deaths and permanent total disablement have been increased from Rs 2,500 and Rs 3,500 to Rs 4,000 and Rs 5,000 respectively. In the case of minors there is no change in the amount of compensation for death but the maximum compensation for permanent total disablement has been prescribed at a uniform rate of Rs 1,200 as against 84 months' wages or Rs 3,500 whichever is less, in the original Act. The maximum limit to the amount of half-monthly payments in the case of temporary disablement to both adults and minors has been raised from Rs 15 to Rs 30.

(c) New provisions have been inserted into the Act enabling the interests of dependents in cases of fatal accidents to be better safeguarded by ensuring that (i) in as many cases as possible, fatal accidents are brought to the notice of Commissioners, (ii) where the employer admits liability, compensation is to be deposited promptly, and (iii) where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not

(f) A contractor has the right to be indemnified by his sub-contractor if he has had to pay compensation either to the principal or to the workman

(g) An employer may make to any dependant advances on account of compensation not exceeding in aggregate of one hundred rupees, and so much of such aggregate as does not exceed the compensation payable to that dependant shall be deducted by the Commissioner from such compensation and repaid to the employer. Further, the Commissioner may deduct Rs 25 from the amount of compensation payable,

for the funeral expenses of a deceased workman and pay the same to the person by whom such expenses were incurred

(h) The following four new industrial diseases have been added to Schedule III of the Act — (1) Mercury poisoning or its sequelæ, (2) poisoning by benzene and its homologues, or the sequelæ of such poisoning, (3) chrome ulceration or its sequelæ and (4) compressed air illness or its sequelæ

Statistics—The statistics regarding cases disposed of under the Act have been collected and published since 1st July 1924 on which date the Act came into force. These statistics relate to the more important classes of workers, i.e., workers in factories, mines and docks and on railways and tramways. The total amount of compensation paid to these classes of workers was about 6½ lakhs of rupees in 1925, 8½ lakhs in 1926, 11 lakhs each in 1927 and 1928, 12½ lakhs in 1929 and 1930, 10½ lakhs in 1931 and 8½ lakhs in 1932. The following table shows the number of cases, classified by nature of injuries, and the amounts of compensation paid in each year since 1924 —

Year	Number of Cases			Amount of Compensation paid for		
	Fatal	Non-Fatal	Total	Fatal Cases	Non-Fatal Cases	All Cases
1924*—				Rs	Rs	Rs
Adults	249	3,898	4,147	82,085	66,248	1,48,333
Minors	2	19	21	375	1,516	1,891
1925—						
Adults	583	10,751	11,334	3,45,995	2,95,535	6,41,530
Minors	7	30	37	200	2,391	2,591
1926—						
Adults	651	13,387	14,048	4,25,935	3,94,385	8,20,320
Minors	3	45	48	460	695	1,155

* The figures for 1924 relate to only the six months from 1st July to 31st December

Workmen's Compensation

The following tables set out the proportion of contested cases out of the total number of applications received by the Commissioners in each year —

Year	No. of Applications disposed of	Number of contested Cases	Percentage of contested cases to total disposed of
1924	92	14	15.2
1925	579	100	18.6
1926	835	198	23.7
1927	1,224	281	22.9
1928	1,066	309	28.7
1929	1,385	275	20.7
1930	1,118	90	21.48
1931	1,367	296	21.66
1932	1,661	328	21.01

The details of agreements (i) disposed of, (ii) registered as filed and (iii) rejected on account of inadequacy are given below for each year —

Year	Number of Agreements			
	Disposed of	Registered as filed	Registered after modification	Not registered on account of inadequacy, etc
1924	41	53	1	7
1925	599	90	3	6
1926	991	25	5	3
1927	701	182	12	7
1928	887	85	25	7
1929	1,066	1,024	14	8
1930	1,007	940	20	28
1931	1,060	1,018	18	24
1932	993	942	22	29

Effect on Industry—A compulsory system of workmen's compensation enhances the cost of production but not to any appreciable extent. In the case of coal mines, the increase in cost has been estimated to be not more than annas four per ton of coal (*vide* para 39 of the Report of the Indian Coal Committee, 1925). However, the owners of many of the smaller coal mines have been compelled to close down their mines due mainly to the severe depression with which the industry has been faced. In the Punjab the proprietors of the coal mines in the Jhelum District are reported to be not satisfied with the privileges enjoyed by the miners under the Act as some of them have had to pay as compensation on a single accident more than they could earn during a month. An unexpected increase in the number of serious and fatal accidents may undoubtedly make a big hole in the profits of a concern but the remedy for this lies in accident insurance. Facilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureau in Calcutta and Madras. The Calcutta Claims Bureau which represents many of the leading insurance companies operating in India deals with a large number of claims and offers valuable co-operation to the authorities in settling compensation claims. In Bombay, insurance companies were concerned with half the number of cases that came up before the Commissioner. Insurance Companies as a rule contest only cases involving questions of law or principle and are of benefit to all concerned. In these provinces insurance is widely resorted to by the employers especially in the Textile Industry. The Millowners' Mutual Insurance Association, Ltd., Bombay, is an organisation of employers one of whose objects is the Mutual insurance of members against liability to pay compensation or damages to workmen employed by them, or their dependants for injuries or accidents, fatal or otherwise, arising out of or in the course of employment. The Association has about 60 members and is controlled by a Board of Directors. In other Provinces accident insurance does not appear to have made much progress.

INDUSTRIAL HOUSING

One of the most vital problems facing industrial employers in India to-day is that connected with the housing of the labour which they employ. The importance and the urgency of providing decent housing cannot be sufficiently emphasized.

The conditions of industrial housing in India are in many cases, appalling and the majority of buildings, tenements or huts in which industrial labourers are housed are insanitary and more or less uninhabitable from Western points of view. Provincial Governments, Municipalities, Improvement Trusts and the larger employers have done a great deal to mitigate the evils resulting from an insufficiency of decent sanitary housing for labour, but a considerable amount still remains to be done before this question can be considered to have been satisfactorily solved.

Several commissions and committees of inquiry appointed by the Government of India and the Provincial Governments in connection with various subjects have dealt with the question of industrial housing. The Industrial Commission in 1918 urged that, in addition to the scheme followed by the Improvement Trust in Bombay, other measures should be adopted such as the refusal of permission with a few exceptions, to fresh industrial concerns to be established, the setting up of a special area for industrial development, the removal of the existing railway workshops from the City, supply of housing accommodation to employees by railways, Government departments and public bodies, improved communications with a view to creating industrial suburbs, and a definite programme of construction to be taken up by local authorities. The findings of other commissions and committees with regard to this question follow similar lines.

Labour Commission's Recommendations—The Royal Commission on Indian Labour have made several recommendations in connection with Industrial Housing. These recommendations fall under various categories, (1) Legislative Action by the Central Government, (2) Administrative Action by the Central Government, (3) Legislative Action by Provincial Governments, (4) Administrative Action by Provincial Governments, (5) Administrative Action by public bodies such as Municipalities, Improvement Trusts, etc., and (6) Action by Employees and Workers organizations. The recommendations under the first head included a suggestion to amend the Land Acquisition Act in such a way as to enable owners of industrial concerns to acquire land for the erection of workers dwellings. The Government of India introduced a Bill in the Legislative Assembly to amend the Land Acquisition Act in the manner suggested and this Bill was passed into law in 1933. The Commission's recommendations under the second head mostly concern Railways, and although the Railway Board agrees on the vital urgency

of providing greater facilities for adequate housing it has come to the conclusion that no material advance can be made in this direction at present owing to financial stringency.

The Commission's recommendations with regard to legislative action by Provinces are of a very ambitious character. They include Town Planning Acts for the Bombay and the Bengal Presidencies providing for the requisition and lay out of suitable areas for working class housing, the opening up and reconstruction of congested and insanitary areas, the "Zoning" of industrial and urban areas and Government grants and loans to approved schemes. For administrative action by Local Governments, the Commission recommend that they should make surveys of urban and industrial areas to ascertain their needs in regard to housing, and that they should then arrange for conferences with all interested parties in order that decisions may be taken as to practicable schemes and the methods whereby their cost should be shared. Where suitable Government land is available, Government should be prepared to sell or lease to those who agree to build houses within a specified period, and Government should announce their willingness to subsidise in this or other ways employees housing schemes approved by them. The Commission further recommend that Government should insist that all local authorities should frame bye laws laying down minimum standards in regard to floor and cubic space, ventilation and lighting and that the Governments themselves should draw up regulations for water supplies, drainage schemes and standards for latrines. For action by Public Bodies, the Commission recommend that the provision of working class housing should be a statutory obligation on every Improvement Trust and that it should be possible for Improvement Trusts to provide land, roads, sewers and sanitary conveniences for new areas but that street lighting and water mains should be a charge on Municipalities. Improvement Trusts should be placed in a position to recoup themselves from the enhancement of land values resulting from their activities. It has also been suggested that co-operative building societies and similar activities should be encouraged. In view, however, of the present acute financial stringency prevailing in all Provinces it is very doubtful whether most of the Provincial Governments will be in a position to do much in the matter of Industrial Housing.

Bombay Presidency—The first attempt to improve housing conditions in Bombay City was made after the plague of 1896 when the heavy mortality and the great exodus that followed paralysed the trade and industry of Bombay. The Bombay Improvement Trust was established in 1898 "for the work of making new streets, opening out crowded localities, reclaiming lands from the sea to provide room for the expansion of the city and constructing sanitary dwellings for the poor and the police." Owing to its limited powers and the various

difficulties which it encountered the Trust had to content itself for the first few years of its existence with "slum pitching," the development of a few building sites, the construction of a few chawls and the development of main roads. In more recent years, however, the Trust has been able to do a considerable amount of good work in the direction of industrial housing and has built over 1,300 tenements for housing its own labour and 99 chawls containing about 9,000 tenements in all for housing labour in general. The Bombay Port Trust which engages on an average about 8,000 manual workers in all its departments has provided accommodation for a little over 3,000 of its workers. The Bombay Municipality has provided a large number of chawls for its employees as will be evidenced by the fact that nearly 75 per cent of the seven and a half thousand scavengers employed are provided with quarters. Varying proportions of the numbers of employees in the other departments of the Municipality are also provided with adequate housing. According to the information collected by the Bombay Labour Office in 1925, 28 out of the 76 textile mills in Bombay City which furnished information for the enquiry had provided housing for their operatives. 7 out of these mills provided residential accommodation only for employees in the Watch and Ward Department and the rooms provided were given free of rent. In the 22 mills which provide partial housing for all classes of operatives, the number of workers who lived in the tenements provided amounted to 12,149 out of 64,720 employed. More recent information collected by that office during the year 1933 shows a position of *status quo*. The G. I. P. Railway owns 20 chawls containing 841 one room tenements and the B. B. & C. I. Railway owns more than 300 one-room tenements for housing their employees.

No action was taken by the Local Government in Bombay City for housing general industrial labour till after the end of the war. A broad and comprehensive policy was drawn up just after the end of the war by the Government of Bombay under the personal inspiration of Lord Lloyd, then Governor of Bombay, for dealing with the problem. A Development Directorate was formed in 1920 to co-ordinate the various housing activities of Government, the Municipality, the Improvement Trust and the larger labour employing organisations. The original intention of the Directorate was to construct 625 chawls located in 3 industrial centres and to comprise of 50,000 tenements for working classes, within a period of 9 years from 1921 to 1929. The original estimated cost was 5½ crores of rupees and a town duty of a rupee per bale of cotton on all cotton entering Bombay was imposed under the City of Bombay Municipal and Improvement Act of 1920. The scheme was launched at a time when the industrial prosperity of the country was at its zenith and labour conditions in the City were abnormal. By the end of 1927, 207 chawls with 16,524 tenements were constructed but only 123 chawls with 8,234 rooms were occupied. These chawls unfortunately do not attract industrial labour in Bombay to live in them, the reasons attributed to the failure being the

distance of the chawls from the mills, the absence of travelling facilities and other amenities of city life. The average economic rent per tenement worked out at Rs 16 per month but the actual rents charged were fixed, on an average at barely 50 per cent of the economic rent and accommodation can now be had in the chawls at Worli at Rs 5 per room on all floors, except for a corner room for which an extra rupee is charged. The rents in the Naigram and Sewai chawls are Rs 7 per room on all floors and for those in the chawls at DeLisle Road Rs 8 per room per month on all floors. One rupee extra is charged for corner rooms. The rents charged prior to 1st April 1929 were, however, higher for all centres. Frequent strikes in the cotton textile mills and general industrial unrest in Bombay City have been largely responsible for the non-occupation of the rooms in the chawls of the Development Department during the last two years and the figure for the number of tenements occupied on the 31st March 1933 was only 8,730 out of 16,524 rooms available.

Ahmedabad City—Probably in no other industrial centre in India is the condition of the housing of the working classes so bad as it is in Ahmedabad. The Textile Labour Union at Ahmedabad published a pamphlet entitled "A plea for Municipal Housing for the Working Classes in the City of Ahmedabad" a couple of years ago for submission to the Ahmedabad Municipality. In this pamphlet the Union deals with 23,706 tenements observed and studied by it. The Union reports that there is absolutely no provision of water in the case of 5,669 tenements, 3,117 tenements have a supply of some sort from wells. Even those which are supposed to possess the advantage of Municipal water have a hopelessly inadequate arrangement in this respect—a tap or two in a compound for a group of 200 or more families. Bathing and washing accommodation has not been thought of except in one or two chawls erected by mills. 5,360 tenements had no latrine accommodation. In most of the remaining tenements the Union reports that the arrangements are miserable in quality and grossly insufficient in quantity and that urinals are conspicuous by their absence. Only a few tenements are provided with any sort of drainage. No other drainage arrangement exists.

The evils of bad housing in Ahmedabad were considerably aggravated as a result of the flood of July 1927 in Gujarat which destroyed over seven thousand houses in the City of Ahmedabad. The bulk of these houses belonged to the working classes. The Union in the pamphlet referred to, reports that the situation which had arisen in consequence of the flood was grave beyond words. Of the thousands who had been unhoused many came to share with their relatives and friends the accommodation that was already heavily overcrowded. Hundreds were altogether without shelter. The relief operations that were then carried out included the construction of huts intended to provide temporary accommodation to a number of those who could make no arrangement of their own. The Relief Committee set up by the leading citizens of Ahmedabad for reconstruction work

recommended that the Municipality should take as early steps as possible to construct 5,000 sanitary tenements by raising a loan for the purpose

In the opinion of the Labour Union the solution of the question of housing constitutes one of the obligatory duties of the Municipality and a growing appreciation of this aspect of the housing question on the part of the authorities has led to the incorporation in the City Municipalities Act (1925) under section 71, of a provision permitting City Municipalities to undertake provision of sanitary dwellings for the proper classes. Owing mainly to the efforts of Mr Guzarilal Nanda, Secretary of the Ahmedabad Labour Union, the Ahmedabad Municipality has recently decided to construct model dwellings for the working classes and considerable progress is being made on co-operative lines to provide industrial labour in Ahmedabad with better housing

A Census taken by the Bombay Labour office in the early part of 1931 showed that of 69 mills working in Ahmedabad, 34 provided housing accommodation for about 18 per cent of their employees, the total number of tenements being 3,708 of which 3,057 are one roomed, mostly 144 square yards in area with a cubic space of 1,592 cubic feet, the average rent of which was Rs 3-5 3 per month

Bengal Presidency—Housing is generally provided in Bengal by employers but the extent and quality of the housing depend on the cheapness and availability of land. In the more congested areas in Calcutta, Howrah and the nearer neighbourhood housing facilities are not provided on so big or so good a scale as in other areas. Most jute mills provide for their workers rooms constructed in the neighbourhood of the mills at rents varying from annas 8 to Re 1 per room per month. The sizes of the rooms vary from 8' x 8' to 10' x 10' and in some cases to 12' x 10'. In nearly all cases the rooms are constructed back to back and in most *pucca* floors and tiled roofs have been provided with narrow verandahs generally 4' wide used for cooking purposes. Very often the rooms are dark and in none of them can sun light penetrate through. Ventilation is unsatisfactory owing to the method of construction and the only openings in the rooms are the doors. If windows are provided they are kept shut. No chimneys or openings are provided for the escape of smoke in the majority of the houses. Recent enquiries made into the condition of housing in Bengal show that drainage, water supply and conservancy arrangements in *bastis* are abominable. Government and other public agencies do not provide housing, as in Bombay, for industrial purposes but some Government and public concerns do provide quarters for their own employees

Madras Presidency—As a result of the exertions of the Labour Department of the Government of Madras, Co-operative Building Societies and a number of local authorities some houses have been built for poor workmen in Madras City. Out of 1,530 registered factories a little over 200 factories are reported to have provided housing for a small number of their employees. Almost all plantation estates

in the Nilgiris, Malabar and Coimbatore provide "lines" for the coolie labour employed

United Provinces—Out of 330 regulated factories some 80 make provision for the housing of workmen and their families. Altogether about 5,400 single room and 1,045 double room tenements are provided by the employers. The McRobertsganj and Allenganj settlements of the British India Corporation at Cawnpore are about the only important examples of housing provided by employers for their workmen in that city. A scheme has however been launched by some of the owners of factories in Cawnpore for providing housing for some twenty thousand workmen and their families but it is still under discussion. Except as employers the Government of the United Provinces has done very little in connection with industrial housing. The Improvement Trust of Cawnpore has put up some temporary housing and the Improvement Trust of Lucknow has put up a model barrack in the area set apart as an industrial area. In the *bastis* or *hatis* where housing is provided by private landlords the type of tenement available is usually a small mud hut with a room at the back and a room or a verandah in front. The size and height vary. The usual size is 10' x 8'. The normal height is 6' to 8'. The only outlet for ventilation is the small main door. Even such tenements are reported to be shared by 2, 3 or even 4 families and as many as 10 persons may be found as inmates.

Central Provinces—Housing is provided for about 7,500 workers by some of the larger factories and mills in the Central Provinces. Nineteen per cent of textile labour and 7.5 per cent of the labour employed in minor industries is housed. The Pulgaon Cotton Mill maintains a settlement covering an area of 15 acres on which the millhands are allowed to build their own houses on payment of a nominal ground rent of annas 4 per annum per 100 sq ft. Probably the most magnificent scheme of industrial housing conceived in India is that launched by the Empress Mills under the agency of Messrs Tata Sons Limited at Nagpur. These mills have leased a plot of 200 acres at Indora, a suburb of Nagpur, two miles from the mills. The scheme is based on a desire to establish a model village. The idea is to build houses of the bungalow type standing on their own ground in plots measuring 36' x 53' with the limitation that building will not be allowed on more than one third of the space provided. The houses are let to the workers on the hire purchase system and it is expected that many of the workers will ultimately own them.

Bihar and Orissa—All the collieries in the Jharia coal field are amply and efficiently equipped with approved types of houses. Their design, construction, ventilation and general amenities are governed by the Jharia Mines Board of Health. Workers recruited from villages within five miles from the mine frequently prefer to live in their own villages and walk backwards and forwards to their work. In five collieries employing about ten thousand workers 4,775 houses are provided, five of the worst equipped mines employing 424 workers

provide 156 houses and five normally equipped mines employing 3,081 workers provide 1,162 houses. In many cases more than one employee is accommodated in one *dhoura* or house. Very frequently a man and his wife and his family all of whom may be recorded as separate labourers in the figures of the mining population occupy one house. Every house must be licensed. Licenses are not given unless the standards are complied with. If labourers are found in occupation of unlicensed premises the management is liable to prosecution. No rent is however charged and subletting is not known.

The Tata Iron and Steel Works at Jamshedpur have built nearly 5,000 residential buildings. Of these, 301 are rented at over Rs 20 per month. Sixteen are rated as hotels. The accommodation provided at present is insufficient and one of the problems the Company will have to face is the provision of a larger amount of housing.

Assam—Free quarters are provided for all residential employees on tea estates. Such non-resident labour as is employed is casual labour which comes from the adjoining villages and lives in its own houses. In the mines and oil fields free quarters are provided for the labour force employed. A Committee of Inquiry appointed in 1921-22 recommended that endeavours should be made to house immigrants from different provinces together in hamlets instead of putting workers from all provinces indiscriminately into barracks or lines. The main objection to this recommendation is the want of land as all available land is under tea. The housing conditions in the coal and oil fields are reported as being quite satisfactory. In Assam the tea estates are regularly inspected by District and Sub-Divisional officers. Although the legal powers of

interference have been curtailed by the abolition of indentured labour and the repeal of so much of Act VI of 1901 as related to such labour, still in practice the inspecting officers do invariably report on the condition of the lines. They call attention to the need of improvement and the management is generally ready to effect such improvements as are considered necessary.

Other Provinces—No special remarks are necessary in connection with the question of industrial housing in other provinces. Generally speaking no industrial slums as such or any big urban inflammation due to the presence of agglomerations of factory or other workers is particularly noticeable and the housing of labour is not to be differentiated from the ordinary poor citizen. Except in those cases where Government action has been definitely indicated, the governments of the various other provinces in India have done nothing for the improvement of industrial housing.

Railways—The general policy on railways is to provide residential quarters where it is necessary for special reasons to provide accommodation for certain classes close to their work and where conditions are such that private enterprise does not adequately meet the demand for housing the staff. The total expenditure incurred on housing provided by the principal railways since the commencement of operations amounts to nearly twenty-five crores, while the expenditure incurred during the last five years amounts to over seven crores. Notwithstanding this expenditure there is, at present, a considerable dearth of quarters on most railways. Endeavours are, however, continuously made to construct new houses in accordance with an annually pre-arranged programme as funds permit.

HEALTH

No satisfactory statistics are available regarding health conditions of industrial workers, e.g., morbidity rates among the workers, their average weight, height, etc., and in the absence of any sound statistical data it is not possible to generalise about these matters. The problems associated with health are always difficult they are much more so in a country where both climate and the poverty and ignorance of the people contribute to recurring outbreaks of tropical and other epidemic diseases. The main cause of ill health particularly among the workers in Bombay and Bengal, appears to be the prevalence of malaria in the localities in which they live. Major Covell, the Special Officer appointed by the Government of Bombay to enquire into Malarial conditions in Bombay City who submitted his report in 1928, says "It (Malaria) is still present in certain quarters of the southern portion of the City to a serious extent, but the most intense malaria at the present time exists in the vicinity of the mills more especially in Worli and Parel sections. In the northernmost portion of

Worli section, malaria is also slight, but as soon as the edge of the mill area is reached the incidence of the disease rises abruptly and extends over the greater part of Worli and Parel. The correlation between the intensity of Malaria and the proximity of mills was most striking, especially in certain cases where a single isolated mill happened to be present, e.g., the Victoria Mill in Chowpatty and the Colaba Land Mill in Colaba. The vast majority of the mills in Bombay are situated in the highly malarious area." The anti-malarial measures taken by the City Municipality have however resulted in a gradual reduction of the number of deaths from malarial attacks.

In the mines in the Madras Presidency, Malaria prevails in the Cuddapah district and at every change of season there is a prevalence of widespread fever. Malaria also prevails in the Thummaragudi mines throughout the year and the cold winds during the rainy season from Sandur Hills affect the health of the labourers in the mines of Tonaigiri. Tuberculosis prevails among industrial workers in the United

Provinces and Bihar and Orissa, and *Kala Azar* is common among workers in certain tracts like Bihar and Orissa

The following table gives the birth and death rates and the rate of infant mortality per thousand of the population for some of the important industrial centres. The figures, however, relate

to the whole population in most cases and as such are not likely to give an adequate idea regarding mortality, etc., among industrial workers. Besides, in certain cities like Bombay, it is customary for married working class women to leave the city for their confinement and register births in the mofussil.

A table showing (a) Birth rate and (b) Death rate per thousand of population and (c) Infant mortality for 1,000 registered births for certain important industrial centres

Centre	Period	Birth-rate per 1,000 of population	Death rate per 1,000 of population	Infant mortality per 1,000 registered births
Bombay	1932	24.8	19.7	218.00
Ahmedabad	1929	47.02	49.90	331.65
Sholapur	"	44.03	34.53	228.73
Karachi	"	55.83	30.97	230.55
Nagpur	"	50.63	52.24	290.77
Amraoti	"	59.60	49.14	330.91
Akola	"	41.73	35.36	251.27
Cawnpore	"	36.94	52.70	420.34
Lucknow	"	43.98	75.81	469.22
Allahabad	"	46.31	38.44	253.70

The relation between overcrowding and infant mortality is brought out in the following table extracted from the annual report of the Municipal Commissioner for Bombay City —

Infant Mortality by the Number of Rooms occupied in 1932

Number of rooms	Births		Deaths		Infant mortality per 1,000 births registered	
	Number	Percentage	Number	Percentage	1931	1932
1 Room & under	10,201	35.3	4,472	71.0	438	529
2 Rooms	2,401	8.3	638	10.1	265	412
3 "	348	1.2	92	1.5	264	372
4 or more Rooms	558	1.9	72	1.2	129	228
Hospitals	15,384	53.3	1,009	6.0	66	74
Board side	2	0.0	15	0.2		
Total	28,894	100.0	6,295	100.0	218	272

Working conditions—The factory department in Bombay has done much work in investigating the efficiency of different humidifying and ventilating plants in the weaving and spinning departments of Mills in Ahmedabad. As a result, all the new textile mills which have been constructed in Ahmedabad during the last five years are equipped with efficient ventilating and cooling systems and the benefits both to the workers and the processes involved are well recognised at that centre. There has been an extensive 'uplift' in the older mills and there is hardly a mill that has not made efforts in the direction indicated. There has latterly been a marked tendency to increase the pace of improvements in the spinning departments and one group of mills has installed 12 expensive plants that effectively cool and humidify the atmospheres of the spinning as well as of the weaving departments. A few mills in Bombay City have also installed new cooling and humidifying systems. A few other mills provide vacuum stripping apparatus in the carding departments. A plenum system of blowing external air near the workers in the boiling department of a soap factory produced results gratifying both to the worker and the management and it is hoped to extend the method to a few industries where the removal of surplus heat is a difficult matter. An enquiry made into the effect of employment on the health of the dhobi bleachers in Ahmedabad revealed that although there was little history of rheumatism, some are adversely affected by working with bleaching solutions. Several workers were found to be suffering from hyperæmia of the legs, but it was obvious later on that more care was being exercised by the contractors. Most of the dhobi work is done in uncovered tanks in the compounds and no shelters have been provided. It is said that the men are used to working in the hot Ahmedabad sun, but even the donkeys used so freely for load carrying take advantage of the shade when they are permitted to do so. The Bengal Report refers to the question of dust removal in Jute Mills and Text factories and to the investigations made to determine at what stage dust or fluff impregnation could be regarded as definitely injurious. It is considered that where exhaust trunk extracting systems are deemed to be essential in all factories in an industry the necessity to instal such equipment should be promulgated by rule. The continued trade depression, however, precluded the issue of a general order by Government. The majority of firms find the initial cost of such installations prohibitive but a few concerns have provided mechanical ventilation in their factories. Although some improvement in ventilation has been effected during the year 1932, the bad design and unsuitability of the majority of the buildings occupied by the smaller factories is stated to be still the chief obstacle to all round progress. In regard to Cotton ginning factories the Punjab Report states that ventilation was again far from satisfactory but apart from a drastic alteration in the method of ginning little can be done to improve ventilation sufficiently to dispose of the dust in ginning rooms, the cost of such alteration is at present prohibitive. The Central Provinces Report mentions that ventilation arrangements have

on the whole, shown satisfactory improvement in most perennial factories. In the present conditions, owners of ginning factories are unable to adopt the expensive system of ducts and exhaust fans to overcome the dust nuisance. The provision of ridge ventilation in cotton ginning factories has been a standard practice in the United Provinces in respect of new factories and is reported to have proved satisfactory when combined with a reasonable height of roof. Ventilation in other factories is steadily improving though the progress is not quite rapid due to depressed trade conditions. The extended use of electricity is steadily improving the general standard of lighting and is commended on with approval in the Provincial factory reports for the year 1932. The factory department in the province of Bihar and Orissa has compiled a little guide book to "Safety, Lighting and Ventilation in small factories," based on photometric observations, in order to help interested persons and builders of factories to so adjust the window areas as to secure sufficient amount of natural lighting.

Extent of Medical Facilities provided—The results of a recent enquiry into Welfare work conducted by the Labour Office shows that the provision of facilities for medical attendance and the supply of medicines is fairly general in all the larger labour-emplying organisations in the Bombay Presidency. The Textile Labour Union in Ahmedabad is the only association of employees which provides medical facilities for its members. There are also Government, Municipal or charitable hospitals and dispensaries which are open to the public and which are used by the labouring classes. In the United Provinces, many of the larger employers maintain dispensaries but no hospitals. The Dufferin Fund, a private organisation aided by grants from Government and local bodies, maintains female hospitals at the more important towns. The Lady Chelmsford Maternity and Child Welfare League maintains a number of centres for child welfare and the treatment of maternity cases. Many of the employers in the Central Provinces and Berar have provided well equipped dispensaries and medical facilities are within easy reach of the workers in almost all the factories and every important mining area in the Province. Some of the larger concerns in Bihar and Orissa and in the Punjab also provide medical facilities for their employees. In Madras only a few large factories provide dispensaries. Medical facilities in the plantations are fairly good. All the jute mills in the neighbourhood of Calcutta provide dispensaries but most of the doctors in charge are not registered medical graduates. Owing to financial stringency the Indian Jute Mills Association were unable to take any action on the welfare survey conducted by a lady doctor in the mill area and leprosy survey carried out by the school of tropical medicine. In spite of the general depression, the Julta Iron Works built a hospital with up to date equipment. In all the tea gardens in Assam and in Bengal medical attendance and medicine are provided for all classes of employees. The medical arrangements in a large number of estates are supervised by European medical officers. Well-

equipped hospitals are also provided for the labour force in the mines and oil-fields in Assam. Part-time medical attendance and medicines are provided by the employers in the Assam Mines Board Area. Medical facilities are also provided in the mines in Madras. In the Jharia Mining Settlement eight hospitals are maintained by employers, the number of beds varying from 6 to 12 in each ward.

All the Provincial Factory Reports for the year 1932 record a year of normal health amongst factory workers. There was no dislocation of industry anywhere on account of epidemics during the year 1933 except perhaps to some extent in Poona on account of the severe epidemic of plague in that City which lasted from July to October. Continued improvement in general sanitary conditions in the larger factories is reported in all provinces. In Bombay concentration on several factories of the bazaar type has led to considerable improvements and a rise in the standard of neighbouring smaller concerns not yet amenable to this Act. The lack of municipal facilities for the disposal of trade waste in Ahmedabad is stated to be a cause of insanitary factory surroundings in that area. Conditions in the Dharran Tanneries in the Bombay Presidency were investigated during 1932 and considerable improvements were effected. There was marked improvement in the sanitary conditions of factories in the Titaghar area in Bengal on account of the successful installation of a sewerage scheme. The Bihar and Orissa report states that the advisability and possibility of appointing Medical Inspector of Factories was under consideration of the local Government. The United Provinces Report refers to occasional cases of persons suffering from obvious diseases being employed in food product factories and states that the Medical Officers of Health were asked to give this question attention in their capacities as Additional Inspectors of Factories with a view to stopping the practice.

Maternity Benefits

In September 1924, Mr N M Joshi made the first attempt in the Legislative Assembly to introduce a Bill to make provision for the payment of maternity benefits in certain industries. Under this Bill, the Local Governments were to be asked to establish a Maternity Benefit Fund and to make payments out of this Fund. The Bill, after circulation, was thrown out by the Assembly in August 1925.

The first Province in India to pass a Maternity Benefit Act was Bombay. The Act came into force on 1st July 1929. According to this Act, the payment of maternity benefits is an obligation which is imposed directly on the employer. The Annual Report on the administration of this Act for the year ending 30th June 1933 shows there were 117 claims paid per 100 women employed and the total amount of maternity benefit paid under the Act was Rs 1,35,813. The Bombay Municipality has started since February 1928 a maternity benefit scheme by which benefit is given to halalkhore and scavenging women in the form of leave with full pay not exceeding 42 consecutive days, including the date of confinement, as

certified by the Executive Health Officer, if the birth takes place in Bombay, and by a Police Patel or by hospital authorities if it takes place out of Bombay.

An Act was passed by the Central Provinces Council in 1930 on the same lines as that in Bombay. During the year 1932 benefits amounting to Rs 12,394 were paid to 605 women workers.

In Assam, voluntary maternity benefit schemes have been adopted by almost every tea estate of repute. While pregnant women remain at work, they are put on light work on full rates of pay. During the period of advanced pregnancy and after childbirth leave on half pay is usually granted and in some cases full pay is allowed and a bonus at childbirth is often granted in addition. The bonus is in some cases conditional on the child being healthy. The Assam Railways and Trading Company, the next largest employers of labour in Assam, grants six months leave on half pay provided the women have been examined by the medical officers and attend hospital once a week. The Assam Oil Company grants leave on half pay for three months. On some estates in Coimbatore District female coolies are fed free for a month before and a month after confinement. On other estates maternity benefit ranging from Rs 3 to Rs 5 is paid and in some other estates free feeding of the women for two weeks before and three weeks after confinement is arranged.

Labour Commission's Recommendations — Among the more important recommendations made by the Royal Commission on Indian Labour in connexion with the health of the industrial worker are the following —

- (a) India should have an Institute of Nutrition
- (b) Local authorities should construct sanitary markets in all urban and industrial areas
- (c) Adulteration of Foods Acts should be in force in all Provinces
- (d) In industrial provinces Public Health Departments should be strengthened to deal with industrial hygiene and industrial disease
- (e) Women should be appointed to public health staff particularly in the more industrialised Provinces
- (f) Comprehensive Public Health Acts should be passed in all Provinces
- (g) Where piped water supplies are not available special precautions as to purity should be taken
- (h) Every provincial health department, every railway administration and all Boards of Health and welfare in mining areas should employ full time malariologists
- (i) A Government diploma for health visitors should be instituted as the recognised qualification required of all women aspiring to such posts
- (j) In the larger industrial areas Governments, local authorities and industrial management,

music, etc., are arranged for in a few mills while in a few others annual social gatherings are held. Tea shops are provided in a good number of mills while cheap grain shops for the benefit of the workers are run by four mills. The Sassoon group of mills allow their workmen to make purchases from their cloth shops at 10 per cent discount on credit, recoveries being made from wages. The employees of 17 mills enjoy the benefits of provident funds while pension schemes for employees are in force in 9 mills. Co-operative credit societies are established in 23 out of the 65 working mills studied.

The Royal Commission on Indian labour have recommended that there should be a more general extension on the part of the employer of welfare work in its broader sense, and that in the larger jute and cotton industrial areas, mills and factories should organise in groups, each establishment having its own welfare centre and health visitor under the supervision of a woman doctor employed by the group.

Employment of Welfare Officers and Workers—The All-India Industrial Welfare Conference of 1922 passed a resolution that social service organisations should be asked to take up the work of training welfare workers. The establishments of workers' committees in all industrial establishments was also urged but very little progress appears to have been made so far in this direction.

In the Bombay Presidency except in the case of the Sholapur Spinning and Weaving Mills in Sholapur and the Currumbhoi Ebrahim Workmen's Institute at Bombay, no other employers have employed any special welfare officers or workers to conduct their welfare activities. But Messrs E. D. Sassoon & Co. Ltd., have appointed an England returned B.Sc. of the London University as a Labour Officer for all their eleven Textile Mills in Bombay City.

In Bihar and Orissa, the Tata Iron and Steel Company has recently appointed a welfare officer with an office and staff to co-ordinate the various welfare activities that have been carried on by the Steel Company.

In the Central Provinces and Berar, except at the Empress Mills, no regular staff of welfare officer and workers has been appointed.

In the United Provinces, the British India Corporation employ a full time welfare superintendent and a trained staff consisting of 4 doctors, 5 nurses, 8 matrons, 8 compounders, about a dozen midwives, 19 teachers and 2 sergeant patrols.

In Bengal, attempts have been made by some mills to set up day and night schools but many of these schools are reported to have been closed owing to the lack of interest shown by the employees. Except for the facilities for technical training that are provided at the Ichhapur Rifle Factory, the Cossipore Gun and Shell Factory and the Government Weaving School at Serampore there is little or no organised provision for industrial and vocational training in the industrial centres in Bengal.

The welfare centre inaugurated in Clive Jute Mills made good progress during the year 1932. The Indian Iron and Steel Company, Hirapur, established a Baby Clinic in the charge of a

qualified nurse. The Burmah Shell Company's labour bureau and welfare department at Budge Budge continued to do excellent work. An instance of the progress made is stated to be the success of the night school conducted by the department. A number of workmen who attend the school were, until recently, absolutely illiterate but now many of them are able to fill up money order forms, write out an address, and read a telegram.

In Bombay, the Bombay Municipality has introduced compulsory education in F and G Wards which are chiefly peopled by millhands. In the Government factories at Kirkee, the Kirkee Education Society which is well supported by the factory authorities conducts six night schools. The Gokak Falls Mills Company maintains one night school for adult workers. In Ahmedabad one mill runs a school for half-timers and eight mills maintain schools for workers children. Three mills in the Sholapur district and the Government workshop at Dapuri provide for the primary education of half-timers.

The Social Service League, Bombay, maintains 9 night schools and a Textile Technical School at Parel, for imparting practical and theoretical training to actual mill workers. The Bombay Y.M.C.A. conducts 14 night schools with an average daily attendance of about 200. The Ahmedabad Labour Union conducted in 1933, 16 day schools, 10 night schools, one Nursery school, one boarding school for boys and one boarding school for girls.

In Bihar and Orissa, the Tata Iron and Steel Company has established a Technical Institute at Jamshedpur to train in theory and practice certain selected students for positions in the operating departments. The Company also maintains twenty-two schools for the education of the children of its employees.

In Madras, seventy factories registered under the Indian Factories Act have provided schools for half-timers and in some cases for employees' children also. The Buckingham and Carnatic Mills maintain a day as well as a night school. The day school is an elementary school with 5 standards and has a technical section attached to it.

In Burma, very few firms provide facilities for education. The Burma Oil Company maintains schools in the Yenang-Yaung Oilfield for about 800 children and proposes to start a night school for its employees. The Burma Corporation makes an annual donation of Rs. 1,000 for the maintenance of the Anglo Vernacular Middle School at Nyaung-U and is also constructing a school at Baldwin for the education of the children of its employees.

In the United Provinces, the British India Corporation maintains four day schools for boys and girls, two night schools and two industrial classes, for employees. The Elgin Mills at Cawnpore, the United Agra Mills, Agra and the B.N.W. Railway Workshops at Gorakhpur also provide for the education of the children of their employees. The Elgin Mills have built a permanent stage for dramas and purchased a cinema machine for the entertainment of their workers. Messrs Begg Sutherland & Co.

who are the managing agents for several large concerns, carry on welfare activities in providing schools, free milk to supply pupils, dispensing gymnasium and sports, library, recreational programmes, etc

In the Punjab, only the new Egerton Woollen Mills Company, Dhurawal, maintains a school

In the Central Provinces and Berar, the Empress Mills in Nagpur have Nursery and primary classes for the children in the crèches. During the year 1932, 552 children received primary education in factory schools as against 765 in the previous year the fall in attendance being due to a general reduction in the number of children employed. Crèches are attached to six cotton mills and one pottery works in this province. The educational work outside the mills is conducted by the Young Men's Christian

Association which has established 9 centres where the mill workers reside. Of these, 8 centres have night schools. The Impress Mills also make annual contributions of about Rs. 3,500 to other schools where the children of the work people study.

In Assam some of the tea gardens maintain schools for children, but these schools are not popular as the labourers are generally recruited from the aboriginal tribes with whom education is at a discount particularly as it interferes with the earnings of their children who find employment in the gardens. The Assam Oil Company maintains a Middle English School and the Assam Railway and Trading Company provides a Middle English and a Primary School for the children of their employees. No industry provides schools for adult labourers.

Welfare Work on Railways.

Recreation—Railways as a group are the largest employers of labour in India and their welfare work is therefore being dealt with separately. All Railways provide facilities for

recreation for their employees and their children. The number of recreational clubs or institutes provided on each railway are shown in the following table—

Name of Railway	Number of Institutes for	
	Europeans and Anglo Indians	Indians
North Western Railway	32	19
East Indian Railway	33	26
Eastern Bengal Railway	11	14
Burma Railways	15 in all	
Great Indian Peninsula Railway	27	29 (2 for all nationalities)
Bombay, Baroda and Central India Railway	17	12
Bengal Nagpur Railway	11	19
Madras and Southern Mahratta Railway	21	7
South Indian Railway	19 in all	

Each institute is regarded as a club provided by the Railway free of rent. The institutes provide a reading room, indoor and outdoor games, etc., and are generally self supporting although grants are made from fines' funds to meet the recurring expenses in deserving cases. The railways also undertake to recover the subscriptions of the members through the paysheets and to remit them to the manager of the institute. The membership of the institutes is compulsory on some railways.

Sports committees and athletic clubs have been formed on several railways, e.g., the G.I.P. and the East Indian Railways with the object of promoting athletic sports among the employees and organizing tournaments. The Indian Railway Athletic Association formed for the promotion and development of inter railway athletic competitions of all

kinds is a registered association and its membership is open to the Railway Board and its subordinate offices as well as to railways which are parties to the Indian Railway Conference Association. Inter district or inter divisional competitions are also run by local sports committees with the idea of encouraging sports among all classes of staff. The inter railway boxing, wrestling and football competitions are arranged in four groups. In 1931 the North Western Railway provided a stadium within easy reach of the living quarters of the Railway employees at Moghulpura.

The cinema shows and magic lantern lectures which have been recently organized for the recreation of railway employees are growing in popularity with the staff.

The East Indian Railway locomotive and carriage and wagon workshops, Lucknow, have Welfare Committees which meet monthly and dispose of matters brought forward by the various delegates. Such Committees have also been formed in the Perambur as well as the Golden Rock workshops of the South Indian Railway.

Education—Almost all Railways provide facilities for the education of their illiterate staffs as well as the children of Railway employees. The progress made in this direction on each railway may be briefly stated as follows—

The N W Railway have started three experimental schools for adult workers in the running locomotive sheds at Lahore, Sibsund Kotri. The experiment has so far been confined to the locomotive staff as the majority of the staff in this branch are illiterate and education provides a great inducement in that wages can practically be doubled by qualifying for promotion to the higher grades of running staff. The East Indian Railway provide 37 schools for the employees of the Operating Department. The Eastern Bengal Railway provide 9 night schools for adult employees, the daily average attendance at these schools being 309. On the Burma Railways educational facilities for adult workmen have hitherto proved a failure and another experimental school has recently been opened for firemen.

The B B & C I Railway has recently opened classes for imparting instruction in the three R's at 3 centres on the Broad Gauge and 3 on the Metre Gauge systems. As an inducement to study, a bonus of Rs 5 is paid to each man passing a simple test. On the E B Railway, the Locomotive Department holds classes at Lunding, Badarpur and Chittagong to assist drivers to qualify as "English speaking" which grade carries a higher pay. The only facilities given by the B & N W Railway are first aid classes and subjects of a technical nature in the Locomotive Department. The Bengal Nagpur Railway provides 14 schools for imparting elementary training in reading, writing and rudimentary arithmetic to Indian drivers, shunters and firemen so as to enable them to make themselves personally acquainted with the rules and orders affecting train working. On the M & S M Railway there are two night schools at Hubli and Guntakal respectively both of which receive financial support from the Company.

Schools for the education of adult workmen do not exist on the G I P Railway but a school is established at Bina for imparting technical instruction and conducting refresher courses in Railway working.

For Workers' Children—The facilities provided for the education of the children of railway employees are as under—

About 100 schools for European and Anglo-Indian children and 130 schools for Indian children are maintained at suitable centres and the total number of pupils on the rolls is

about 5,000 and 16,000 respectively. The total expenditure from revenue on the European and Anglo Indian schools is Rs 4 lakhs per annum and on the Indian schools Rs 1.4 lakhs. The Railway Department also aids certain schools for children of railway employees. The total number of children in railway aided schools is about 4,000 (European and Anglo-Indian) and 8,000 (Indian) and the total annual grants made by the Railway are about Rs 50,000 to each group. The Railway Department also gives direct financial assistance to its employees towards the education of their children in certain hill schools. The total expenditure on this account in 1927-28 was Rs 3.5 lakhs for Europeans and Anglo Indians and Rs 28.8 thousands for Indians.

Facilities are also afforded by the grant of passes and concession tickets to enable the children to attend schools.

The present methods of assistance have recently evoked public criticism on the score of their being more favourable to European and Anglo-Indian employees than to the Indian and with a view to eliminating all trace of racial discrimination the Railway Board placed Mr C E W Jones, C I E, I E S, on special duty in 1927 with instructions to collect all facts and figures regarding the assistance given by railways for the education of the children of their employees. On a consideration of Mr Jones' report the Board have now formulated their future policy on the following lines—

All railway schools would be transferred to local authorities or private bodies, special grants being given out of railway funds where necessary. The assistance given by the Railway Department would be confined to employees who draw pay below a prescribed maximum and to parents who are obliged to send their children to boarding schools. The assistance would take the form of grants to the employees of a fixed proportion not exceeding one-half of the board and tuition fees, the proportion depending upon the pay drawn by the parent and falling with the increase in pay. The assistance would be open to all employees without distinction of community, race or creed.

Several company managed railways have also signified their willingness to adopt a similar policy. But the question is still receiving further consideration because of the representations received in connexion with the scheme.

Co-operation—The Railway Administration have noticed that heavy indebtedness degrades the employee and impairs his efficiency and they have therefore encouraged the formation of co-operative credit societies and co-operative stores for all grades of employees.

Co-operative Credit Societies have been formed on all railways and are managed by committees generally elected from among the shareholders. But in some cases, the heads of the departments are required to be the chairmen of the committees and they have power to nominate some of the members of the committee.

WAGES

It was in 1873 that one of the earliest attempts to collect wage statistics in India was made by issuing instructions to District Officers to submit half yearly returns showing the average monthly wages of certain classes of skilled and unskilled labour. The returns thus collected were utilized for compiling a series of comparable statistics of wages for selected Districts in each Province and these statistics were published in the publication "Prices and Wages" issued annually by the Director-General of Commercial Intelligence and Statistics. A reference, however, to Mr Dutt's Report on an Enquiry into Rise of Prices in India would show that these statistics were found to be wholly unreliable and consequently these half yearly returns from District Officers have been discontinued since 1910. In their place a quinquennial wage census was adopted in all Provinces, except in the Central Provinces where an annual return was obtained from District Officers. The first quinquennial wage census was held in 1911-12 and the second in 1916-17. The statistics regarding wages continued to be published in "Prices and Wages" which gave the results of the quinquennial wage censuses in respect of a few urban and rural occupations. As the statistics were still far from satisfactory the third wage census, which was due in 1921-22 was abandoned except in Madras and the Punjab. In 1921 an attempt was made by the Government of India to hold an All-India census of industrial wages with the active and voluntary co-operation of employers, but nothing could be done partly because a number of employers either failed to submit returns or submitted incomplete returns and partly because neither the Central nor the Local Governments were able to provide the staff required for the purpose owing to financial stringency. The annual issues of Prices and Wages were also suspended in 1923 as a result of retrenchment and no regular official wage statistics are now published for British India as a whole.

In the United Provinces a scheme for a census of Industrial Wages to be taken along with the regular census was considered but was not carried through. A periodical survey of wages has been carried out every five years since 1912 in the Punjab. These surveys deal with the wages of certain classes of workers in three principal towns, in selected villages unaffected by urban conditions, and at certain Railway stations to secure a means of comparison with

rural wages in the same neighbourhood. Beyond the figures of average monthly wages of certain classes of labour submitted by factories in all Provinces every year for inclusion in the annual Reports on the Administration of the Indian Factories Act, no regular and detailed statistics of industrial wages are available. In Madras quinquennial wages censuses have been conducted since 1908 showing the average wages of certain artisans (as well as farm servants employed in agricultural labour) in respect of homogeneous tracts and districts. These censuses, however, only relate to rural and urban wages and not to industrial wages. A thorough investigation of the conditions of labour, and particularly the rates of wages on tea estates in Assam, was made in 1921-22 by a Committee appointed by the Government of that Province. The Labour Office of the Government of Bombay conducted three enquiries into the wages of workers in the cotton mills in the Bombay Presidency in 1921, 1923 and 1926 respectively. Apart from these enquiries, the Labour Office has also conducted enquiries into (1) Wages of peons in Bombay, (2) Agricultural Wages, (3) Wages of Municipal workers, (4) Clerical Wages in Bombay City and (5) Wages of Printing Press Workers in selected Printing Presses in Bombay City. The results of all these enquiries have been published either in the form of special Reports or in the "Labour Gazette."

The Government of Bombay have now launched a general wage Census which is intended to cover in about two years, all factories, transport workers, workers in docks, municipalities and building trades, etc. The first part of the Census will be held for the month of May 1934 and will cover every perennial factory in the Bombay Presidency. The enquiry is to be conducted on the basis of the muster roll and essential information regarding the number of days worked during a pay period by each worker, his rate of wages and his earnings will be called for. Seasonal factories will be covered for one month of intensive working during the winter of 1934-35 and all non factory industries and organisations will be covered between March and December next year. To the best of the knowledge of the Labour Office no other country in the world has attempted an enquiry into wages on such a gigantic scale and the results of the Census will be of a far reaching character.

WAGE RATES

Agriculture—Whether wages paid to agricultural labour in India have kept pace with the increase in the cost of living is, for several reasons, a very difficult question to answer. Firstly conditions vary so markedly between province and province that it is almost impossible to obtain accurate and comparable figures of wages for different classes of agricultural labour. Secondly there exists a variety of methods adopted for remunerating the workers engaged in different agricultural areas in India. For example, in the Punjab, there are four forms of wages, such as (a) purely cash wages,

(b) cash wages with supplements which may consist of food, tobacco, lodging, bedding, clothing, etc., (c) purely grain wages, and (d) wages other than in cash or grain. In the Punjab the results of the last quinquennial wages survey which was held in December 1927 show that the following were the average daily wages of the three important classes of agricultural labour in rural areas in the Punjab —

Carpenters	16 to 32 annas a day
Masons	16 to 38 annas a day
Unskilled labourers	5½ to 16½ annas day

As regards the last occupation it may be pointed out that the most frequent wage was between 7½ to 8½ annas. The Labour Office of the Government of Bombay published a Report in 1924 of an Enquiry into Wages in Agriculture which give the average daily earnings of three classes of agricultural labour, viz., skilled labour, ordinary labour and field labour in each of the 26 districts of the Bombay Presidency separately for urban areas and rural areas for each of 23 years from 1900 to 1922. The figures for each year from 1923 to 1932 have been published in the Bombay Administration Reports. The wages prevailing in other provinces for similar types of labour do not compare very unfavourably with wages in the Bombay Presidency for any particular year for which a comparison is made. This statement requires an important qualification. It is not meant that the money amounts actually paid are similar. The rates of wages in different provinces vary according to the extent of their industrialisation and money wages in provinces which are mainly agricultural are on a lower

level than the money wages in Provinces which are highly industrialised such as Bombay and Bengal. There is no doubt whatever that wages considerably improved in all parts of India between 1918 and 1925. Taking the Bombay Presidency as a whole the downward tendency in the level of wages which set in 1925 and continued up to the end of 1927 was checked during the year 1928 during which period wages of all classes of agricultural labour, except field labour in urban areas and ordinary labour in rural areas, either remained stationary or showed a definite upward tendency, but there has been a sharp fall in agricultural wage rates during the last three years.

Comparison of conditions in India today with the pre-war year shows that during this particular period the condition of the Indian labourer has undoubtedly improved. This is amply proved by the figures given below showing the index numbers of daily average wages of skilled labourers, ordinary labourers and field labourers for urban areas and for rural areas for the Bombay Presidency.

AGRICULTURAL WAGES (NOMINAL)

Index Numbers for the Bombay Presidency (including Sind) 1913-100

Year	Urban areas			Rural Areas		
	Field Labour	Ordinary Labour	Skilled Labour	Field Labour	Ordinary Labour	Skilled Labour
1922	189	192	195	170	162	179
1923	200	200	196	171	171	187
1924	195	196	209	176	181	191
1925	221	203	224	206	181	211
1926	221	204	216	198	181	215

1931	153	157	185	139	143	172
1932	144	151	180	131	135	165

The Cotton Textile Industry—The most important centres of the cotton textile industry in India are situated in the Bombay Presidency. The main sources of information as regards the wages paid in this industry are the Reports of three Enquiries conducted by the Labour Office of the Government of Bombay, into Wages and Hours of Labour in the Cotton Mill Industry in the Bombay Presidency.

It is claimed that the 1926 Enquiry as compared with the previous two Enquiries, was more satisfactory in its method, more detailed in its scope and more accurate and reliable in its results as the information collected related to

each individual worker and not to groups of workers in each occupation as was the case in the previous Enquiries. The results of this Enquiry give among other things, figures for average daily earnings of all occupations of cotton mill operatives, average monthly earnings for operatives covered in Bombay and Sholapur, the average number of days worked, the number of operatives working full time, i.e., working on all the working days during the Census month, the average earnings of those working full time, frequency of attendance for the mills in Bombay, the percentage absenteeism by departments and details regarding amounts of bonuses secured by the workers.

Jute Industry

The jute industry holds the premier position among the industries in the Bengal Presidency. The following table gives the average monthly wages of some important occupations in a jute mill. The figures are not the exact averages of wages of the total number of employees in the industry. They are averages obtained from the actual payments made in some representative mills.

Department	Designation	Average monthly wages	
		Multiple shift	Single shift
Men			
Looming Machines	Rovers	12 15 0	14 7 0
	Shuttles	12 6 0	14 2 0
Spinning Frames	Warp spinners	1 4 0	16 13 0
	Weft spinners	16 0 0	17 10 0
Winding	Bobbin cleaners	10 0 0	11 0 0
	Warp winders (piece workers)	21 6 0	2 0 0
Weaving	Weft " " (" ")	26 5 0	28 2 0
	Head loom weavers (" ")	28 5 0	1 0 0
Dressing and Beaming	Sacking weavers (piece workers)	20 7 0	22 1 0
	Beamers and dressers	28 5 0	22 0 0
Sack sewing workers	Sewing machine	21 11 0	22 16 0
Engineering Section	Engine Staff	19 0 0	22 8 0
Workshop hands—	Turnmen	28 1 0	0 2 0
	Mason	1 0 0	1 0 0
Machine shop fitting	Carpenters (Chinese)	85 0 0	92 5 0
	Carpenters (Indian)	50 0 0	2 0
Tin Smithy	Turners (Metal)	40 0 0	30 0 0
	Tin Smith	50 0 0	0 0 0
Black smith shop	Black smith	56 0 0	56 0 0
Women			
Batching Softners	Feeders	11 12 0	13 5 0
	Receivers	11 8 0	13 5 0
Teasers Preparing Breaker Carding Machines	Feeders	9 6 0	12 9 0
	Receivers	9 8 0	11 13 0
Finishing Carding Machines	Feeders	9 0 0	11 2 0
	Receivers	10 6 0	11 7 0
Drawing machines	Feeders	9 7 0	11 0 0
	Receivers	10 0 0	11 2 0
Roving machines	Feeders	10 0 0	11 2 0
	Sweepers	10 6 0	11 6 0
Twist Frames Weaving	Twisters	9 6 0	11 2 0
	Sweepers	13 8 0	14 15 0
Sack Sewing	Hand Sewers	12 1 0	12 10 0
		13 5 0	14 11 0

It will be seen from the above table that there is an appreciable monetary advantage to workers in the single shift system.

Wages in Mines

The tables given below show the daily earnings in the month of December for each of the two years 1931 and 1932 for workers in the main occupations in coalfields and the other important mines in British India

Gins and Presses

The male coolies in the gin factories in Madras and the Punjab earn on an average annas 8 per day while the female coolies get only as 5 1 and as 6 respectively. In the Central Provinces the average daily earnings of male and female coolies are as 10 2 and as 5 10 respectively.

The average daily wages of female press coolies in Madras and the Central Provinces amount to annas 5 10 while those of male coolies amount to annas 9 6 and annas 13 10 respectively.

The Plantations—Labour in the tea gardens in Assam is paid on a piece work basis.

In addition to the standard daily task which the worker must execute in order to earn his wages (called *Harira*) the labourer is given an opportunity at certain seasons to supplement his earnings by the performance of a second task the payment for which is known as *acca*. In some cases where it is impracticable to prescribe a definite task as in leaf plucking at the beginning and the end of the season payment is made by time. A distinctive feature of work in the gardens is that the labourer usually brings his family with him and the wife and sometimes the children are also wage earners. The joint earnings of a family must always be taken into consideration. The average family of a labourer

has been calculated as consisting of one working man, one working woman, about three tenths of a working child and non-working child and about two-tenths of an adult non-working dependant. The following table gives the average monthly earnings of the labourers in the tea gardens in Assam

Table showing the average family monthly earnings in the tea gardens in Assam calculated on the average daily strength in 1914, 1922 and 1928

Periods of Wage Payment—There is a complete absence of uniformity as regards the periods for which payments of wages are made in the various important branches of organised industry in India. In scarcely any industry is there a single period of wage payment. Different systems are found in establishments belonging to the same industry and in the same district and within the same establishment different classes of workers are frequently paid for different periods. The month, the fortnight and the week are generally the periods of wage payment in Cement and Brick Works, Cotton Ginning and Pressing Factories Flour Mills and Engineering Works. Monthly payment of wages is mainly adopted for workers in Printing Presses, Municipalities, Tramways and Railways. In the Cotton Mill industry wages are calculated on a monthly basis in all the mills outside Ahmedabad. In the case of the Ahmedabad mills, wages of piece operatives are calculated on a fortnightly basis and of workers in the maintenance department on a monthly basis.

In mines, tea gardens and rice mills the predominant periods of wage payment are a month and a week. In jute mills wages are calculated per week. Wages are calculated on both the monthly and the fortnightly basis in the Iron and Steel Industry, Sugar Mills and in Tanneries. The system of monthly payment appears to be universal in its application to supervisory and clerical staffs engaged in all different industrial establishments, while the most general system in the case of casual labour is of a daily payment of wages.

Periods elapsing before payment—The "waiting period" or the time which elapses between the end of the period for which wages are earned and the date of payment varies considerably from industry to industry and from establishment to establishment in the same industry. It may be generally stated that the longer the wage period the more delayed is the payment of wages. Monthly wages are not paid so promptly as fortnightly wages, weekly wages are withheld for still shorter periods and daily wages of casual labour are nearly always paid on the day on which they are earned or on the following day. Speaking generally the average period of waiting may be considered to be 10 to 20 days in the case of monthly payments, 5 to 7 days for fortnightly payments, and 2 to 4 days in the case of weekly payments. Another factor which affects the period of waiting is the method of payments. Where workers are paid on piece rates, intricate calculations are required to ascertain the amount due, and consequently piece rate wages cannot be paid so promptly as wages of workers on fixed time rates of pay.

Indebtedness prevails to a very great extent among the labourers, but no reliable figures are available except those for the Bombay Presidency which were collected by the Bombay Labour Office during its enquiries into the workers' family budgets for different centres. From the statistics of the Empress Mills the percentage of labourers indebted appears to be more than 50. Though exact figures for the Punjab are not available it is reported that the volume of indebtedness amongst the agriculturists is greater than anywhere else in India. As regards urban and industrial labourers it may safely be assumed that a greater majority are in debt to their food suppliers. In Madras the indebtedness of the worker is heavy especially in the case of plantations where it is reported that 75 per cent of the wages of the labourers are taken away by money lenders on pay days. The mine managers of the Jharia coalfields in Bihar and Orissa generally put this figure at one week's wages. It is also stated that the extent of indebtedness varies with caste and social custom. In Bombay City, interest on debts forms nearly three per cent of the total monthly expenditure. Of the families considered for the Labour Office enquiry no fewer than 47 per cent were in debt. The extent of the indebtedness of the family in debt is ordinarily the equivalent of two and a half months earnings. The extremes were 14 months and one third of a month's earnings respectively. As regards single men, for whom 603 budgets were collected, 45 per cent were in debt the average expenditure on interest being as 12-3 and the average expenditure on interest for those in debt being

Rs 1-11-2 per month. Enquiries for the Bombay Port Trust workers showed that over 80 per cent of the families considered were found to be in debt. In the majority of cases the amount of debt varied from a month's income to four months income. In Ahmedabad during 1926 about 60 per cent of the families were in debt. The amount of debt varied from a few rupees to many times the monthly income. According to an enquiry made by the Labour Office in the year 1925 into the family budgets of cotton mill workers in Sholapur City, 61 per cent of the cotton mill workers' families in Sholapur were in debt the extent of which varied from less than a month's income to many times the monthly income. In 19 per cent of cases, however, a family's debt was equal to between one and four months of its income.

Bonus and Profit Sharing Schemes—“The successful working of a profit sharing scheme pre-supposes the realisation by the worker of an identity between the various interests engaged in the concern and a conscientious effort on their part to do their best for its maximum success. The employer of labour do not feel that labour conditions in India are such as to justify the hope that this high ideal of co-operation will be realised in a substantial measure in practice. The only solitary concerns in which profit sharing schemes have been tried are the Tata Iron and Steel Company, and the Buckingham and the Carnatic Mills. In 1928 the Tata Iron and Steel Company introduced a scheme under which a monthly bonus based on production is paid to all men drawing less than Rs 300 per mensem or Rs 10 per day, whose work contributes to the production obtained and who have been in the Company's service for at least six months. In the Buckingham and the Carnatic Mills a bonus is paid to the workmen on a basis relative to the dividend declared.

Bonuses are paid for a variety of reasons. Some concerns grant bonus for regular attendances and for economical utilization of material. In some collieries in Bihar and Orissa a worker is paid a sort of bonus for working six days a week. A bonus is also being granted for raising and loading extra tubs. The Tata Iron and Steel Company grant bonuses (1) for general production, (2) for departmental output and (3) regular attendance. This is paid to all employees drawing less than Rs 8 per day. The Company has also introduced a 'Jack pot

scheme. The idea of this scheme is that if 50 men are required to perform certain duties connected with the operation of any unit and the full force is not present, the wages which would have been payable to the absentees are distributed amongst those present.

The system of paying bonus in addition to a cash wage either for better work or for better attendance used to obtain in several industrial concerns in the Bombay Presidency especially in cotton textile mills but except in Ahmedabad where bonuses are paid for better attendance and for better efficiency, the majority of the mills which used to pay such bonuses have either abolished the bonuses with pay or have abolished them altogether. In countries which have no legislation for the control of deductions, which may be made from wages on account of fines, the bonus might be regarded as a voluntary gift paid by the employer to the worker who attends regularly without absence or produces work better than specified standards but in countries where a trade legislation exists, the bonus easily degenerates into a device whereby an employer tries to get round the Act which lays down percentages of wages beyond which deductions on account of fines shall not be made by dividing the wages into part wages and part bonus. In the Ahmedabad textile mills all weavers who produce 80 to 85 per cent efficiency on quantity production are paid a bonus of eight annas per loom per fortnight. In this centre all damaged cloth is handed over to the weavers and its cost at whole sale price is deducted from their wages. In the case of minor defects the weaver are fined. As the total estimated bonus of the deductions made from the Ahmedabad weavers' wages both on account of fines and damaged material handed over amounts to more than Rs 15 lakhs annually, the efficiency bonus is not so profitable to the worker as it would appear to be. The good attendance bonus also operates very harshly in certain cases. In one mill in Western India, workers earning Rs 30 or under a month are paid a bonus of 4 annas a week for a complete week's work and a further bonus of eight annas a month for a complete month's work. If a worker loses a day he loses twelve annas and if the day lost be a Saturday preceding a closed day he loses two thirties of his monthly wages.

Good attendance and efficiency bonuses are not granted in Government, local board and public utility concerns.

WAGES ON RAILWAYS

No information more recent to that for the year 1929 is available regarding wages paid on Indian Railways. In that year every individual system and the Railway Board in the evidence submitted to the on Indian labour give of pay. The following information, therefore relates to the year 1929 but it is understood that all round reductions have been made on almost all railway systems during the last two or three years.

Owing to the different types of grades of pay which are prevalent on the Railways it is not possible to give particulars for all of them. Scales of pay of some important classes of railway servants on some principal railways have therefore been set out in the tables below. The limits of pay given in the tables show the minimum of the lower grade and the maximum attainable in the higher grade.

Name of Railway System	ENGINEERING				Trolley men

Lucknow	7 6	,, 10 9	10 0	,, 18 0	16 0	,, 36 0

Besides the usual pay the employees of the railways are granted allowances and perquisites for special work, climatic and local conditions, etc

Amount sent to villages—In the absence of a completely urbanised industrial labour force in India, the practice of remitting part of the wages earned by workers in industrial centres to their place of origin appears to be very common. But no authorised or statistical information for a definite period of time is available as regards the amounts sent by workpeople in this manner. If statistics pertaining to this subject were compiled, it would help a good deal in estimating the agrarian content of Indian industrial workers. In the Central Provinces and Berar 80 per cent of immigrants from the United Provinces leave their families behind in their villages to look after cultivation. These labourers are reported to be remitting more than 50 per cent of their income home. The other immigrants in that province from Central India and the Bombay Presidency are said to be sending 25 per cent of their earnings to their homes. Estimates of amounts sent by money order by the various post offices in the jute mill areas in Bengal are annually published in the reports of the Indian Jute Mills Association. The figure for 1928 comes to Rs 1,73,57,816 1 2, but it does not purely represent the amounts sent by Jute mill employees only. Labourers from coal mines in Bengal coming from outside the coal fields are reported to send or take home to their villages from 30 to 40 per cent of their earnings. In the case of the miner in the mining fields of Bihar and Orissa it is roughly estimated that he sends home all his savings which amount to about 8 annas to Rs 1 8 0 per week. Results of a special enquiry made in the case of an important cotton mill at Cawnpore in which wages are paid fortnightly showed that during the particular period of two weeks covered by the enquiry, 3 8 per cent of the wages received by workmen was remitted by money orders through the office attached to that mill. In the course of its family budget investigation,

the Labour Office of the Government of Bombay collected some information regarding remittance of amounts by workers' families. In Bombay City a large number of workers do not maintain an establishment, but live as boarders and though married keep their dependants in their villages. In the case of resident families the average monthly amount remitted comes to Rs 1-11 1 which constitutes 3 2 per cent of the family income which is Rs 52 4 6 per month. In the case of persons living singly in Bombay City, the average monthly remittance comes to Rs 11 7-1 which constitutes 36 2 per cent of their monthly income. The labour force in Ahmedabad is not immigrant to the same extent as in Bombay and therefore remittances to dependants is not an important item in the worker's budget. It appears that nearly 7 per cent of the working class families in Ahmedabad remit money to their dependants living away from them. The average for only those families remitting money comes to Rs 6 6 9 per month. Sholapur draws its labour force from the immediate neighbourhood and the labour there is not of the same cosmopolitan character as in Bombay. Of the total number of families whose budgets were collected during the family budget enquiry at that centre only 6 per cent reported that they had to remit money every month to their dependants in villages. The average of the amount remitted by such families comes to Rs 4 12 7.

Deductions—Deductions from wages on account of fines and for services rendered by an employer to his workmen is a subject which has been engaging the attention of the Government of India since 1926. In that year, the Government of India requested all local governments to make enquiries, in their respective administrations, as to the extent to which fines and other deductions were being realised by employers in India from their workpeople.

The views of the local governments were also invited on the desirability of taking any action, legislative or otherwise to counter any abuses which might be found to prevail. The Labour Office of the Government of Bombay conducted a very comprehensive enquiry into the subject covering all factories, railways, municipalities, transport services, commercial houses, shops, hotels, etc., and the results were published in the form of a special report. As a result of its investigations that Government came to the conclusion that fining was in abuse grave enough to require legislation for its control and recommended accordingly. The subject was again examined in 1928-29 by the Bombay Strike Enquiry Committee (The Fawcett Committee) in connexion with the standardised rules put up by the employers and the demands put up by the workers during the prolonged general strike in the cotton mills in Bombay City in 1928. The Committee recommended *inter alia*, that deductions from wages on account of fines should not exceed two per cent of an operative's earnings during a particular pay period. The Millowners Association Bombay, accepted this recommendation and it is very noteworthy that almost all textile mills in Bombay which are affiliated to the Association have limited their monetary punishments within this limit. There is, however, no control on fining in textile mills in Ahmedabad. In that centre the work of 'cutlooking' or scrutinising manufactured cloth is often entrusted to contractors who often pay a lump sum every year to the mills for this privilege. Commissions varying from six annas to twelve annas in the rupee on all fines inflicted is paid by the mill to the contractor. The system is also closely linked up with that of handing over damaged cloth to the worker concerned and deducting its value at cost or wholesale price from the worker's wages. The cutlooker also receives commissions on the value of the cloth handed over. It is estimated that these deductions in the Ahmedabad cotton mills amount to nearly if not more than fifteen lakhs of rupees every year. The matter is a grave abuse and a scandal which calls for immediate legislative action. The action already taken by the Government of India in implementing the

recommendations of the Royal Commission on Indian Labour on the subject have already been dealt with elsewhere in this section.

The Royal Commission on Indian Labour have made several important recommendations in connexion with the income of industrial workers and the question of their indebtedness. In discussing the possible application to India of the minimum wage Convention adopted at the 1928 session of the International Labour Conference, the Commission are of opinion that the convention, "in referring to trades in which wages are exceptionally low, must be regarded as having in view trades in which wages are low, not by comparison with western or other foreign standards but by comparison with the general trend of wages and wage levels in kindred occupations in the country concerned." If the principle of the minimum wage is to be applied to India, they consider that it would first be necessary to create machinery for fixing minimum rates of wages in those trades in which wages are lowest and where there is no question of collective bargaining. The industries indicated for a careful study of conditions are mica, wool cleaning, shellac, bidi (the indigenous cigarette) manufacturing, carpet weaving and tanneries and those in which there is a strong presumption that the conditions warrant detailed investigation. Full information re wages and conditions should be collected and if the surveys indicate 'Swearing' the trades should be demarcated and the number and the composition of wage Boards should be decided. In the setting up of wage boards important criteria for consideration should be the cost of enforcement, and a policy of gradualness should not be lost sight of. If the investigations appear to warrant minimum wage fixing machinery, the necessary legislation for setting up such machinery should be undertaken. These recommendations are under the consideration of the various Provincial Governments and the Government of Bombay have already initiated a general wage census to be completed in about two years in order to collect all possible information on the subject of wages in all types of industrial concerns in the Bombay Presidency.

COST OF LIVING AND STANDARD OF LIFE.

The publication of a cost of living index with a pre-war base for the working classes in Bombay City was started in the *Labour Gazette* from September 1921 and the scope and method of its compilation are described in the issues of the *Labour Gazette* for September 1921, September 1923 and April

1929. The index number is based on what is known as the aggregate expenditure method and includes in all 24 items representing food, fuel and lighting, clothing and rent. The table below gives the Bombay working class cost of living index numbers month by month from January 1918

The Labour Office conducted in the year 1926 an enquiry into working class budgets in Ahmedabad and the results of this enquiry have been used in the construction of a cost of living index for that centre. The Ahmedabad working class cost of living index number has been compiled on a post-war base and has been

published in the *Labour Gazette* since January 1930. Items representing food, fuel and lighting, clothing, house rent and miscellaneous groups have been included in the index. The following table gives the index numbers from August 1927 to November 1933 —

Ahmedabad working class cost of living index numbers by months
(Average prices from August 1926 to July 1927=100)

Month	1928	1929	1930	1931	1932	1933	Month	1928	1929	1930	1931	1932	1933

Average for year			91	92	92	89

Standard of Life—Very little information is available regarding the standard of living of the working classes in India. The most satisfactory method of obtaining this information is by means of a family budget enquiry in which information is collected regarding the composition, income and expenditure of the family.

Conclusions to be drawn from type it is always necessary to be guided by what is known as the extensive method, an attempt being made to secure the information from a large number of families so as to minimise the effect of the peculiarities of exceptional cases. The sampling method is often resorted to in conducting extensive family budget enquiries because of the impracticability of collecting data by the census method. It is essential that the sample should be representative in order to yield reliable results.

At the Third International Labour Conference of Labour Statisticians held at Geneva in October 1926, the Committee on family budgets passed a resolution that in order to provide adequate information with regard to actual standards of living, enquiries should be conducted generally at intervals of not more than ten years into the income, expenditure and conditions of living of families representative of large homogeneous sections of the population. It was also decided that for a complete enquiry information should be collected as to the district in which the family resides the composition of the household, the industries and occupations of members of the family, the nature of the housing accommodation and the amount of each important item of family income and expenditure together with quantities of purchases, where practicable. It was agreed, however, that a less detailed investigation omitting the particulars of the family income would be sufficient where the sole object of the enquiry is to provide weights for the calculation of cost of living index numbers.

Family budgets were collected by the Labour Office for 3,076 working class families in Bombay City in 1921-22 and the report based on the

results thereof was published in 1923. A new family budget enquiry in Bombay City was undertaken by the Bombay Labour Office in 1932-33 and the results are in the process of tabulation. It is expected that the report of the enquiry will be published during the summer of 1934. Weights based on the results of this enquiry are to be used in compiling a fresh cost of living index number for Bombay on a new base period. The Labour Office collected 985 budgets of working class families in Ahmedabad in 1926 and 1,133 budgets of cotton mill workers in Sholapur in 1925. The reports based on the results of these enquiries were published in 1928. A small family Budget investigation for cotton mill workers in Bombay City was also conducted by the Labour Office in 1930 but the results of this investigation have not been published so far.

In the United Provinces a number of budget were collected at Cawnpore with the object of compiling a cost of living index number. But the results of the enquiry were not found to be satisfactory and the province has not been compiling any cost of living index number.

The Labour Statistics Bureau, Rangoon, which was established by the Government of Burma in 1926, has made an extensive enquiry into the Standard and cost of living of the working classes in Rangoon and the report based on 4,309 budgets was published in 1928. The results of this enquiry have been separately analysed for Burmese, Telugu, Tamil, Urdu, Hindustani, and Chittagonian workers. Separate index numbers for each of the different classes of workers have also been published at the end of the report. 1,002 budgets for the working class families in Nagpur and 507 budgets for working class families at Jubbulpore were collected between September 1926 and January 1927 for compiling cost of living index numbers for these two centres. The figures for the Nagpur, Jubbulpore and Rangoon Indexes for the year 1933 have been given in the above table.

TRADE UNIONS.

The history of trade unionism in India is a history of recent years. It was not until 1918 that labour had begun definitely to organise itself. Previous to that year very little effort appears to have been made to establish organisations of labour. The earliest association of workers in India was the Amalgamated Society of Railway Servants of India and Burma which had been registered under the Indian Companies Act and its main activities were in connexion with the provision of various benefits to its members such as Legal Defence, Sickness Insurance, Life Assurance, etc. After the Indian Trade Unions Act 1926, came into force this Association registered under it as a Trade Union with the new name of the National Union of Railwaymen of India and Burma. The Bombay Postal Union, founded in 1907, mainly

for the clerical classes employed in the Bombay Post Offices, a Union of workers in the Ahmedabad cotton mills formed in 1917, the Clerks' Union, Bombay, established in April 1918 in order to organise the various classes of clerical labour employed in commercial and other offices in Bombay city, and the Madras Labour Union formed in 1918 for the textile workers in the three mills in the city of Madras, were the main labour organisations in existence at the end of the year 1918. In addition, there existed certain benevolent social institutions such as the Kamgar Hitwardhak Sabha and the Social Service League whose activities were directed towards the betterment of the condition of the working classes. But these Societies were not composed of workers themselves.

improvement in the conditions of life and work of the labouring classes. During the last few years, however, the principles of communism have been disseminated amongst the masses of India by the members of the Workers and Peasants Party which is an agent in India of the Communist International. The Communists took advantage of the economic unrest prevalent in the country early in the year 1928 and usurped the leadership of the working classes within a short period of time and were able to assume control over the executives of the principal textile and railway unions in Bombay, Madras and Bengal. They captivated the minds of the workers by painting the existing conditions as black as possible and contrasting them with a supreme state of wealth and happiness which is promised under the regime of a dictatorship of a workers proletariat. The discontentment amongst the workers over conditions of work was aggravated by the incessant preachings of revolutionary doctrines. The credulity of the Indian labourer has been of great advantage to these emissaries of revolution in creating in him a class hatred against the employers and also in instilling in his mind an abhorrence for the Government established by law in the country. These agitators, occupying positions of vantage, instigated several disastrous strikes in pursuance of purely political ends often with a callous disregard of the subsequent sufferings and losses inflicted on their ignorant and hapless dupes. But during the years 1929 and 1930 the workers began to lose their faith even in these Communist leaders after the failure of the prolonged general strike of the year 1929 in the majority of cotton mills in Bombay City. The sanity and sobriety of moderate leadership have no great attraction for the large majority of the labourers. The moderate leaders have, however, been fighting their battles for leadership with the extremist revolutionaries, and were for a time successful in keeping the latter under control. At the moment of writing, it has become impossible for the moderates and the vowed Communists to work shoulder to shoulder in the labour movement, and a split has occurred between the two, the Unions standing for constitutional progress rallying under the banner of the Moderates whilst those in favour of Communist principles have accepted the leadership of the Red Flag Organisations.

Perhaps the most important factor which retarded the growth in the movement immediately following the successes which met the earlier formations or Strike Committees, which they really were was the definitely hostile attitude of the employers to all combinations of their employees. It was not until the passage of the Indian Trade Unions Act which made it morally obligatory on employers to recognise those Unions of their employees which had registered under the Act, that a change in the angle of vision was noticeable.

Nature of leadership—The Indian Trade Union movement, in its early beginnings, was essentially an economic one, and to regard labour unions as being engineered solely by politicians is the result of their propaganda is to misread the origin of this movement. The Indian workman is predominantly illiterate and has even now few leaders from his own class to whom he can turn for guidance. In consequence, trade unions in India have been led by middle class men, especially professional lawyers and others, who have not perhaps in all cases made a distinction between economic and political considerations. In the words of Mr A R Burnett Hurst, "social workers did not take the initiative" but "allowed the lawyer politician class to capture and control these bodies". Many of the so called leaders of Indian Labour who were drawn from the lawyer politician class often exploited the ignorance and credulity of the labour force for their own material advantage, or for the propagation of their pet political doctrine, in addition to looking after the welfare of the labourers. There were, however, several notable exceptions. Leaders like Mr N M Joshi, Dewan Chaman Lal, the Rev C I Andrews, Mr M K Gandhi, Mr V V Giri, Mr B Shiva Rao, Mr R R Bakhshi, M.L.C., Mr Syed Munawar, M.L.C., and Miss Anasuya Sarabhai endeavoured to create Unions for the benefit of the workers and for the general

Progress of Trade Unions since 1918 —
The trade union movement spread to various industries and occupations in India during the years following the Armistice, but a number of them passed out of existence very soon after they were started. The more stable Unions were of clerks, railway workers, postal employees, seamen and textile workers, in Ahmedabad. The peculiar feature of the trade union movement in India is that it did not in the early stages of its progress make much headway in the more important manufacturing industries and thus constituted a weak point in the movement. Whereas in other countries, the clerical employees organised themselves on the model of the industrial workers long after the latter had well organised themselves in strong Unions, in India the former have come up if not first, at least simultaneously with industrial unions and have established themselves more permanently.

The following figures illustrate the progress of the Trade Union Movement in the Bombay Presidency —

Year	No of Unions	No of Members	Year	No of Unions	No of Members
1922	22	51,472	1928	94	198,072
1923	19	46,037	1929	99	196,748
1924	36	52,227	1930	93	128,393
1925	38	49,318	1931	97	115,657
1926	56	74,875	1932	100	111,526
1927	72	87,340	1933	105	111,469

The distribution of the membership as at 1st September 1933 by classes of industries was as follows —

Class of Industry	No of Unions	Membership	Percentage of membership to total
Textiles	17	40,116	34 74
Railways (including railway workshops)	8	21,909	18 97
Seamen	3	29,138	25 24
Posts and Telegraphs	34	8,136	7 05
Municipal	6	2,495	2 16
Miscellaneous	37	13,675	11 84
Total	105	115,469	100 00

There are in addition two federations of Postal Unions, one of Railway Employees' Unions and a fourth which is a Central Union governing a number of individual Unions of textile workers in Ahmedabad (For the constitution, membership and other particulars regarding these organisations, reference may be made to the issues of the Bombay *Labour Gazette*). The Central Labour Board and the Bombay Trades Council which had been included in the list of Federations in the Bombay Presidency are now defunct.

The Punjab has no heavy concentration of industrial labour and consequently the extent of organisation among both employers and employed is up to the present little. There is, however, a vague striving among the employed towards co operation and combination especially for the purpose of demanding better remuneration and considering the question of resorting to direct action for enforcing their demands on their employers. No Communist influence has been noticeable in the Punjab where industrial disputes have been stated to have occurred as a result of the normal antagonism between employers and employed. The only large employers of labour in the Punjab are the N-W Railway Administration, and four out of the 19 registered Unions are of the employees of the various departments of the N-W Railway and cover, in all, about 13,000 members.

In the United Provinces, the number of Associations of workers is rather small, compared to its industrial importance. There are in all

Councils which, under the Executive, are responsible for co ordinating the work in the about 10 Unions, all of recent growth. Some of the Associations formed during the general upheaval following the War and especially during the days of Non Co operation have since died or become moribund. Organised labour forms a very small proportion of the total Organisation of labour outside Cawnpore is almost non-existent and even in Cawnpore only about 10 per cent of the labour is organised. There has been a growing interest of labour in trade unionism which appears to have the prospect of a rapid development in the future.

The Central Provinces and Bihar have seven registered trade unions. The classes of workers who have been embraced by the Trade movement in this part of Indian are (1) Textile workers, (2) Press employees, (3) Scavengers, (4) Motor drivers, (5) Railway workers, (6) Postal employees and (7) Clerks. Trade unionism is stated to be yet in its infancy in this Province and the Labour Unions appear to have done little to improve the conditions under which their members work.

The trade union movement in Madras received a setback in 1921-22 as a result of the failure of the strike in the Buckingham and Carnatic mills. During the year 1922-23 most of the Unions were dormant and the only Union which showed signs of activity was the M and S M Railway Workshop Employees' Union, Perambur. The trade union activities were revived in 1923-24 and the following Unions became once more active — (1) The Madras Labour Union, (2) The Madras Tramwaymen's

Union, (3) The Corporation Scavengers Union, (4) The S I Railway Employees Union and (5) The Combaitore Labour Union. The Madras Harbour Port Trust Workmen Union was revived in 1925-26. A section of the workmen of the Buckingham and Carnatic mill organised a separate Union in 1925-26 called the Buckingham and Carnatic Mills Employees Union as a rival to the Madras Labour Union which is an old organisation in the same industry. The Cordite Factory Labour Union, Aruvankudus came into prominence during 1926-27. Unions were newly formed for the employees of the Public Works Department workshops and the Government Central Press, Madras while the Doosan Press Employees Union which had remained dormant was revived. The labourers working in the cotton ginning and pressing factories in Tiruppur, Combaitore District, started a Union for their benefit. Most of the Unions included in their programme a demand for separate representation for labour in the Legislative Council. The Oil Workers Union and certain other Unions came into prominence only when there was an impending labour dispute. There were nineteen registered trade Unions in the Madras Presidency at the end of March 1921.

Railways—Labour Unions are or have been operation on ten of the Class I railways on some of which as many as three or more operate at the same time. Most of them are registered trade unions and the majority have secured some measure of recognition from the respective railway administrations. Many railway trade unions came into existence during the period 1918-1921 but several of them were short lived. Those unions which have managed to survive are actively looking after the interests of their members and show signs of improved organisation and usefulness especially in those where union committees are not dominated by communists. A noteworthy feature is that there is an increasing tendency in many railway unions to look for office bearers and leaders from amongst members who are actually engaged in railway work. There can be no doubt that within the last few years the appointment or establishment and employment officers and special attention to welfare of railway labour have been due largely to trade union propaganda.

All-India Labour Association—The following is a list of such All-India Federations or Trade Unions or All India associations of workers for which some information is available.

The All India Railwaymen's Federation—Though not a registered body under the Indian Trade Unions Act this Federation has been taking an active part in collective bargaining with railway authorities. Having affiliated to it about twelve unions or men working on all but two of Class I railways and with a membership of nearly 1,00,000 it has been able to exercise considerable influence with the Railway Board and arrangements have been made for half-yearly conferences with the Board for the discussion of matters affecting wages and conditions of service of railway employees as a whole. The federation is taking continuous interest in bringing railway employees closer together and securing greater unity in the trade union movement in the

country. At the last annual convention held in February 1933 and again at a special convention held in November 1933 the Federation devoted special attention to the question of reinstatement of retrenched staff wage-cuts, the proposed statutory Railway Board etc.

The National Union of Railwaymen of India, Burma and Bombay—This Union was started by the Amalgamated Society of Railway Servants of India and Burma which came into existence as a sequel to the Great Indian Peninsula Railway Guards' strike in 1897. It was at first registered under the Indian Companies Act, but after the Indian Trade Unions Act came into being it altered its name, redrafted its constitution and registered as a Trade Union. It has a membership of about 2,700. It provides for its members various voluntary and other benefits such as death sickness unemployment and life insurance benefits. It is the only trade union in Bombay which maintains a political fund.

The All-India and Burmah Covenanted Non-Gazetted Railway Services Association—This Association, whose membership is limited to covenanted Europeans employed as foremen in railway workshops in India, was started in October 1926 with the object of securing for its members the benefits of the Lee Commission's recommendations. It submitted a memorial to the Viceroy on this question in November 1926. It has a membership of about 300 employees scattered all over India and it originally had its Head Office in Bombay. The Association registered with the Registrar of Trade Unions, Bombay Presidency, in March 1928, but transferred its Head Office to Punjab in 1929 and again to Madras during the year 1932-33.

The All-India Trade Union Congress—This organisation was inaugurated in 1920 for two main purposes: (1) to co-ordinate the activities of the individual Labour Unions in India which till then remained inchoate and were unable to take concerted action and (2) to recommend workers' delegates to the International Labour Conferences. When the Government of India had to select a Labour representative to attend the Washington Conference in 1919 there was no representative body of labour in India to be consulted and they therefore appointed Mr N. M. Joshi as the Workers' Delegate. In order therefore that responsible Labour opinion in India might have a voice in the selection of the delegates to the International Labour Conferences, the All India Trade Union Congress was organised and the first session of the Congress was held in Bombay on the 31st October 1920. Eight hundred delegates from different parts of India were present and sixty Unions were affiliated and 42 others expressed their sympathy with the Congress. It became a central organisation of the trade union movement in India but from the beginning it had a strong political colour. Its presidents and secretaries have all been politicians first and labour leaders next, with the exception of a few persons like Mr N. M. Joshi. The Congress appointed itself a permanent body to meet once a year. It has a definite constitution, an elected Executive to carry on its work, and Provincial

respective provinces. The main object of the Congress is 'to co ordinate the activities of all the labour organisations in all the provinces in India and generally to further the interests of Indian labour in matters economic, social and political. It may also co operate and federate with organisations of labour having similar objects in any part of the world'.

The Executive Council of the Congress consists of a Chairman, the Vice Chairman or Vice Chairmen, the Treasurer, the General Secretary or General Secretaries, the Secretary or Secretaries and the Assistant Secretary or Assistant Secretaries as ex officio members and not more than ten additional members including the ex-Presidents of the All India Trade Union Congress, elected at the annual session of the Congress and the representatives elected by the affiliated unions on the following basis —

- 1 Representative for unions with a membership upto 1,000,
- 2 Representatives for unions with a membership between 1,000 and 3,000
- 3 Representatives for unions with a membership between 1,000 and 3,000
- 4 Representatives for unions with a membership above 3,000

The individual Unions affiliated to the Congress are conceded full autonomy with regard to the management of their own affairs according to their rules.

The second Session of the Congress was held in 1921 at Jharia under the Presidentship of Mr Joseph Baptista. The third Session was held at Lahore in 1923 with Mr C R Das as President. The fourth Session held at Calcutta in 1924 was also presided over by Mr C R Das. Out of the 43 resolutions passed at this Session some dealt with the recruitment of Seamen and their eligibility for securing compensation under the Workmen's Compensation Act. The fifth Session was held in Bombay in 1925 with Mr Dhundiraj R Thengdi of Nagpur in the chair. Mr V V Giri of Berhampur was the President of the sixth Session held in Madras in 1926. Delhi was the centre where the seventh Conference of the Congress was held in 1927 and the President was Rai Sahab Chandrika Prasad Dwarkan Chamrao Lall, M L A, was the President of the Calcutta Session of the Congress held in 1927. The ninth Session was held in 1928 at Jharia with Mr M Daud in the chair. It is significant that at this Conference Pandit Jawaharlal Nehru moved a resolution protesting against imperialism.

The tenth assembly of the Trade Union Congress which met at Nagpur in 1929 under the presidentship of Pandit Jawaharlal Nehru will remain as the most important landmark in the history of organised labour in India. It marked the culmination of a long period of mischievous activity inspired by Moscow and fomented by Communist Agents in India resulting in a split between the genuine trade union

leadership on the one hand and the votaries of communism on the other. The fundamental issue upon which the split in the Trade Union movement occurred was whether the labour movement in India shall be inspired and conducted for the betterment of the industrial workers or whether it shall be utilised as a means to promote and bring about revolution in the country. The proceedings at the Session made it impossible for the rival forces to carry on any longer under a common organisation. The reasons contributing to the ultimate split were as follows — The Bombay Girm Kamgar Union and the G I P Railwaymen's Union applied for affiliation, the former with a membership figure of 54,000 and the latter 45,000. The Bombay Girm Kamgar Union could produce no audited documents as required. However it was admitted a member on the basis of a membership of 40,000. The G I P Railwaymen's Union was affiliated on a strength of 30,000 members. This meant that a large part of the voting power was vested in the representatives of these two Unions which were of communist persuasion. The Executive of the Congress was also captured by the revolutionaries, and resolutions for the boycott of the Royal Commission on India Labour, affiliation of the Congress to the League against Imperialism, the appointment of the Workers' Welfare League, a Communist organisation in England as Agents of the Congress for Great Britain and the boycott of the International Labour Conference at Geneva were passed both by the Executive Committee and the open session of the Congress. The moderate leaders of labour, including Messrs N M Joshi, V V Giri, B Shiva Rao, R R Bakhare and Dwarkan Chamrao Lall seceded from the Congress and set up a separate federation under the name of the 'All-India Trades Union Federation' in order to co ordinate the activities of non communist Trade Unions in India. Endeavours made to draw the seceders back into the fold of the All-India Trade Union Congress have not met with any success. The Labour Unions in Ahmedabad which draw their inspiration mainly from Mr M K Gandhi and are the best organised and most successful trade unions in India have not during the fifteen years of the Trade Union movement in India shown any desire to become affiliated to the Congress.

The eleventh Session of the Trade Union Congress, held in Calcutta in July 1931, led to further disintegration in the ranks of labour and once again the Communists from Bombay were responsible. The Girm Kamgar Union had split into two parts, both bitterly opposed to each other. One led by Mr S V Deshpande, General Secretary of the Trade Union Congress and the other by Mr G H Kandalkar, President of the G K U and a Vice President of the Congress and both groups claimed to be the Girm Kamgar Union and therefore entitled to vote at the Congress. The President, Mr S C Bose, a Congress politician, decided in favour of Mr Kandalkar whereupon Mr Deshpande and the representatives of a few other unions broke away from the Congress with the result that this organisation which should guide and control the Trade Union movement in India is a useless and effete body with no influence and a trifling membership.

The twelfth Session of the Congress was held at Madras on 10th and 11th September 1932 under the presidentship of Mr. J. N. Maitra. The report of the General Secretary stated that twelve new Unions from Madras affiliated themselves to the Congress and that the membership of the Congress covered Unions with more than a lakh of organised workers. The Conference adopted resolutions demanding the immediate and unconditional release of all the political prisoners including the Merut undertrials, condemning leaders like Messrs. Jinnah and M. Mehta, V. V. Giri and N. M. Joshi for postponing a general strike on railways and adopting the platform of unity formulated by the Bombay Girm Kamgar Union which included class struggle as one of its main planks.

The thirteenth Session opened at Cawnpore on 23rd December 1933. Mr. G. I. Khandekar of the Bombay Girm Kamgar Union presided. The president declared that the Trade Union Congress would participate in the political movement only on condition that key industries like Railways and Banks were nationalised and their control transferred to councils of workers. There was a free fight between the votaries of the Indian National Congress which is a purely political body, and labour leaders and a pandemonium resulted. Several resolutions were passed at this session one of which authorised the Bombay Girm Kamgar Union to take steps to organise an All India Textile Workers' Conference in Bombay to consider the question of wage cuts in the textile industry and concert measures to defend the cause of the workers. Pandit Hariharanath Shastri of Cawnpore was elected President for 1934.

The National Trades Union Federation—The Indian Trades Union Federation which was formed in 1929 by moderate leaders of labour like Mr. N. M. Joshi and others after the split in the Nagpur session of the All India Trade Union Congress, held its first annual session at Madras on July 16 and 17, 1932 with Mr. V. V. Giri as President. The Federation claimed the allegiance of 40 unions in various parts of the country including Native States and a total membership of 78,000. The Conference adopted the provisional constitution of the Federation framed by the Committee of management and also considered the question of trade union unity.

Almost from the time of the unfortunate split which occurred at Nagpur in 1929, the necessity of bringing about trade union unity has been felt in almost every quarter. Efforts have been made since 1930 to bring the different groups together informally and to try to find a reasonable basis of agreement. Some Bombay unions formed a platform of unity the main planks of which were (1) that the Trade Union is an organ of class struggle involving purely direct action, (2) that the Trade Union Congress should not be affiliated to the International Federation of Trade Unions, Amsterdam, and (3) that delegates should not be sent to the International Labour Conferences. In these efforts the railway unions which had remained aloof from the two rival national organisations took very great interest and the All India

Railwaymen's Federation convened in Bombay a representative conference in May 1931 when a committee was appointed for the purpose of considering and reporting upon the best methods of bringing about unity in the ranks of Indian labour. The platform of unity referred to was particularly examined by this committee whose suggestions for amendments were not approved by the extremist labour leaders belonging to the All India Trade Union Congress. The All India Trade Union Federation at its first session held in Madras however welcomed the efforts made by the Trade Union Unity Conference held under the auspices of the All India Railwaymen's Federation and authorised its working committee to co-operate with other unions in facilitating the reconciliation of differing points of view. A special session of the All India Trades Union Federation was held at Calcutta in April 1933 for the purpose of considering the question of Trade Union unity amongst other subjects and a resolution was passed authorising the General Council to negotiate with the Provisional Committee of the National Federation of Labour (a new national trade union organisation formed by certain leaders of labour) on the question of trade union unity with a view to bring about amalgamation between the two organisations on a fair and equitable basis. As a result of these negotiations the National Trades Union Federation came into existence on and from 10th May 1933 in place of the All India Trades Union Federation and the National Federation of Labour.

The main objects of this Federation are (a) to establish a socialist State in India, (b) to socialise and nationalise the means of production, distribution and exchange as far as possible, (c) to ameliorate the economic and social conditions of the working classes and (d) to support and actively participate in the struggle for India's political freedom from the point of view of the working classes by all legitimate, peaceful and democratic methods such as legislation, negotiation, propaganda, etc., and, in the last resort, by strikes and similar other methods. Each affiliated union has to pay to the Federation an annual fee of Rs. 20 for 2,000 members and below, Rs. 10 for every additional 1,000 members or less upto 10,000 and Rs. 5 for every additional 1,000 members or less above 10,000.

The first session of the National Trades Union Federation was held in Bombay on the 24th to 26th Dec 1933 with Mr. Minnal Kanti Bose, the President of the Federation, in the chair. The number of unions affiliated to the Federation was reported at 50 and the total membership of individual members at 1,37,000. It was resolved to organise an All India Textile Labour Federation to assist the employers' attacks on the workers in the textile industry, and to provisionally affiliate the National Trades Union Federation with the International Federation of Trade Unions for a period of two years in the first instance.

There was a split in the Federation at its first session held in Bombay. The representatives of several Bengal Unions walked out of the conference on the 26th December 1933 in

consequence of differences of opinion between them and Mr N M Joshi and held a meeting on the same day under the presidency of Mr Abdul Gham and resolved to form an All-India federation of labour with the name and style of the *All-India Trades Union Federation* with headquarters at Calcutta. Mr M Daud, M A, Bir at-Law, was elected President. It was proposed to draft a constitution and place it for adoption before the next session to be convened at an early date. Six unions, all situated in Bengal, with a total membership of 15,000 promised affiliation to the new body.

There are, in addition, the following All India Associations in existence —

(1) The All-India Postal and R M S Association, (2) The All India Postmen's and Lower Grade Staff Union, (3) The All India Telegraph Union, (4) The All India Post and Telegraph Administrative Offices Staff Association, (5) The All-India Government Employees Federation, (6) The All India Currency Association, (7) The Central Body Military Accounts Association and (8) The National Federation of Textile Labour in India.

Trade Union Legislation

In 1920 a Company owning a mill whose workers were on strike brought a suit against the leader of the local labour union which was conducting the strike and others, seeking to restrain them from inducing the plaintiffs workmen to break their contracts, and suing for damages for their actions in this respect. The Madras High Court to whom the suit was referred gave their decision granting an *interim* injunction restraining the defendants from inciting the plaintiffs' employees to continue the strike. The case was eventually withdrawn but the proceedings suggested that, in the absence of legislation, even legitimate trade union activity was attended by considerable peril. As a result of a resolution moved by Mr N M Joshi and accepted by the Legislative Assembly in March 1921, Government were committed to take steps as soon as practicable to introduce such legislation as might be necessary for the registration and protection of Trade Unions. The Government of India, accordingly, formulated certain tentative proposals and circulated them for eliciting public opinion. The opinions expressed were by no means unanimous,—some considered the proposed legislation premature, while some others realised that legislation was necessary but at the same time considered Trade Unions as a pernicious and dangerous growth which should be rigidly controlled, and others again urged that sufficient protection should be granted to them. In August 1924, the Government of India circulated a draft Bill for opinion. The Bill conferred certain privileges only on registered Trade Unions and left the question of registration at the option of Trade Unions themselves. Provision was also made to ensure that the funds of a registered Trade Union are not expended on causes in which the bulk of the members have little interest. A regular audit of the funds was proposed to be made compulsory and the manner in which the executive should be composed was also provided for.

A number of amendments were made by the Select Committee and in the Legislative Assembly. A clause permitting registered Trade Unions to maintain funds for political purposes was added. The provision was on the model of the British Law on the subject and those members who contracted out of the liability to subscribe were not to be compelled to contribute to the Political Fund nor did failure to contribute involve any disability or disadvantage except in so far as the control and management of the Political Fund was concerned. The Bill was passed on the 8th February and received the assent of the Governor-General on the 25th March 1926. The Indian Trade Unions Act came into effect from the 1st June 1927.

Mr N M Joshi introduced in the Legislative Assembly on the 9th February, 1928, a Bill to amend Section 43 of the Indian Penal Code in order to extend to the officers and members of unregistered Trade Unions the protection afforded by Section 17 of the Indian Trade Unions Act, 1926, which lays down that no officer or member of a registered Trade Union shall be liable to punishment under sub section (2) of section 120B of the Indian Penal Code, in respect of any agreement made between the members for the purposes of furthering any such object of the Trade Union as is specified in Section 15, unless the agreement is an agreement to commit an offence. The Assembly, however, threw out the Bill.

A Bill was introduced in the Legislative Assembly on the 4th September 1928 with a view to amending Section 11 of the Indian Trade Unions Act, 1926. It was pointed out in the Statement of Objects and Reasons that the existing section 11 of the Act admitted of doubt in two respects namely (1) It did not indicate clearly whether the first appeal lay to the judge appointed for the area within which the Registrar's office is situated or to the judge appointed for the area within which the head office of the trade union is situated. The amendment was intended to make it clear that the latter is the competent court, (2) It did not indicate clearly what judge might be appointed to hear appeals in the Presidency towns and in Rangoon. The amendment was designed to make it clear that in such areas the appeal lies to the High Court and there is no second appeal. The opportunity was also taken to define clearly the powers of the High Court in second appeals. The Bill was passed and received the assent of the Governor General on 25th September 1928.

Working of the Act—The Act has now been in operation for nearly seven years. All-India Statistics on the working of the Act for the year ending 31st March 1932 published in July 1933 show that there were 131 registered trade unions in the British Provinces in the whole of India during the year ending March 1932 as compared with 119 registered unions during the year ending 31st March 1931. The distribution of the registered Trade unions together with the figures for total membership

for all unions which submitted returns is as follows —

Provinces	Total No of Unions registered	Total membership of registered Unions
Ajmer Merwara	2	4
Bengal	28	81,720
Bihar and Orissa	9	1,378
Bombay	52	68,006
Burma	1	56
Central Provinces	10	6,788
Delhi	4	1,182
Madras	23	42,402
Panjab	22	21,627
United Provinces	6	9,890
Total	131	2,00,693*

*These figures are for the Unions which submitted returns of membership. Ten Unions did not submit their returns in time for their membership figures to be included.

Only a few associations of employers have yet applied for registration. No Trade Union was registered in the provinces of Assam, Baluchistan and Coorg up to the end of March 1932. The great inducement to register has been the predisposition of employers generally to recognise Unions that are registered. In the case of Associations of Government Servants, one of the conditions of their recognition by Government was that they should get themselves registered when the Trade Unions Act was brought into force. In view of the fact, however, that certain difficulties have arisen in connexion with the application of the Act to Government servants, the question is under the consideration of the Government of India who have not yet formulated any definite conclusions. Pending the consideration of this question, Government have relaxed the provision contained in the existing rules for the recognition of Associations of Government servants which requires them to register under the Act.

A few Associations of Government employees have pressed for their registration under the Act and such of them as had complied with

the requirements of the Act were duly registered in the Bombay Presidency and in certain other provinces also.

The registration of Trade Unions is not compulsory and although there is an increasing resort to registration there are still a large number of Unions which apparently regard the benefits of registration as an insubstantial return for the obligations imposed on registered Trade Unions by the Act. Some progress as a whole, was, however, visible in the trade union movement in India. Not only has the membership of the Union increased but their financial position is also satisfactory. Organisation among women workers in India continues to be slow. The figures for female membership of registered Trade Unions in successive years were as follows —

Year	Membership
1927-28	1,166
1928-29	812
1929-30	1,209
1930-31	1,151
1931-32	1,151

The figure for 1931-32 represents 1.5 per cent of the total membership of registered trade Unions.

Royal Commission's Recommendations — With regard to Trade Unions the Labour Commission recommended that every employers' organisation should set up a special committee for the purpose of giving continuous consideration to the improvement of the well being and efficiency of the workers in establishments controlled by its members, and that recognition of a Union should mean that the Union has the right to negotiate with the employer in respect of matters affecting either the common or individual interest of its members. The fact that a Union exists only of a minority of employees or the existence of rival Unions are not sufficient grounds for refusing recognition. With regard to the internal administration of Trade Unions the Commission recommended that Union leaders should endeavour to give as many members as possible some share in the work of the Union and that Trade Union organisers should endeavour to find suitable men within the Union to act as officials and should train them for the position.

With regard to the Trade Unions Act the Commission recommended that it should be re-examined during the year 1934 and that all limitations imposed on the activities of registered Unions and their officers should be reconsidered so as to ensure that the conditions attached to registration are not such as to prevent any well conducted *bona fide* Union from applying for registration. Section 22 of the Act should be amended so as to provide that ordinarily not less than two thirds of the officers of a registered Trade Union shall be actually employed or engaged in an industry with which the Union is concerned.

INDUSTRIAL DISPUTES.

The weapon of the "strike" in industry first came into prominence in India during the period immediately following the close of the War when the majority of the strikes as shown in the introductory Section were designed to secure increases in wages commensurate with the rise in the cost of living. The epidemic of industrial strikes which characterised the period 1919-20 reached a climax in the winter of 1921. During this period strikes took place purely from economic causes and most of them ended successfully from the view point of the workers, after a short struggle. After this period, however,

they tended to be more prolonged and less successful and, partly owing to political causes, there were a number of fairly serious disputes in public utility services. In more recent years the machinations of the Communists have been increasingly responsible for the calling of general strikes and their undue prolongation.

Extent of Disputes—All-India statistics of industrial disputes for each quarter and for each year have been compiled and published since 1920 by the Government of India in the Department of Industries and Labour.

The following tables show the number of disputes which occurred during the eight years 1925-33 in each province and in each class of industry respectively —

Provinces	No. of disputes in								
	1925	1926	1927	1928	1929	1930	1931	1932	1933
Bengal	43	57	34*	60	35	34	47	27	29

Total	134	128	129	203	141	148	166	118	146

The peak in respect of the number of industrial disputes (203) was reached in the year 1928. More than 50 per cent. of these disputes occurred in the Bombay Presidency while only about 30 per cent. occurred in Bengal. In none of the other provinces was there an average of at least one dispute per month during that year. The industry which was hit hardest was the cotton and woollen mill industry in which no less than 110 disputes took place during the year.

In 1933, 164,938 work people were involved in the 146 disputes and 2,168,961 working days were lost.

CONCILIATION AND ARBITRATION MACHINERY

Prior to the passing of the Trade Disputes Act as an All India measure early in the year 1920, there was, with the exception of a conciliation panel in Bengal, which will be dealt with lower down, no official machinery for conciliation and arbitration in industrial disputes in India. The Employers and Workmen's (Disputes) Act which was passed in 1860 to make provision for the speedy termination of certain disputes between workmen engaged in railway and other public works and their employers and which was extended, in case of the Bombay Presidency, to the districts of Ahmednagar, Broach, Ahmedabad, Kaira, Poona, Sholapur, Surat and Thana in 1860 and 1861 and to Sind in 1873 dealt with individuals and did not provide any machinery for the settlement of disputes in other trades or industries. No records are available to show the extent to which this Act was made use of in India. The Act was repealed in March 1932. The only provinces in which *ad hoc* committees have been appointed during the past fifteen years either to enquire into the question of providing machinery for the settlement of disputes or to deal with specific strikes are the Bengal and the Bombay Presidencies.

Bombay Presidency—The first Committee to be appointed in the Bombay Presidency was the Industrial Disputes Committee appointed on the 18th November 1921 with Sir Stanley Reed as Chairman to consider and report on the practicability or otherwise of creating machinery for the prevention and early settlement of industrial disputes. This Committee made several recommendations with regard to the standardization of wages, trade unions, the attitude employers should adopt towards Unions of their workers and the recognition of Unions, Works Committees, Welfare Work, Co-operative Societies, Housing of Labour, etc. Their recommendations were in the nature of measures that might contribute to the prevention of industrial disputes. With regard to the methods of settlement when such disputes either develop irreconcilable differences between capital and labour or else become a menace to the community, the Committee recommended the formation of an Industrial Court of Enquiry to be followed, if necessary, by an Industrial Court of Conciliation.

In pursuance of the recommendations made by the Industrial Disputes Committee, the Government of Bombay published a Bill to provide for enquiry into and settlement of trade disputes in the *Bombay Government Gazette* in May 1924. It was intended to introduce this Bill in the Bombay Legislative Council at the Poona session in July of the same year, but, in the meanwhile the Government of India asked the Local Government not to proceed with this measure because they themselves intended to introduce similar legislation for the whole of India. This, however, was not the first occasion on which the Government of India considered the question of the advisability of introducing legislation to provide for the settlement of disputes. In 1920 they circulated all Local

Governments asking their opinions as to the advisability of providing legislation on the lines of the Industrial Courts Act 1919. The opinions obtained by provincial Governments were almost unanimous that labour was not properly organised and that therefore no useful purpose would be served by such legislation. The majority of the provincial Governments adopted the same view.

Bonus Dispute Enquiry Committee—The next Committee to be appointed by the Government of Bombay was the Committee of Enquiry with Sir Norman Macleod, as Chairman to enquire into the general strike of the Bombay cotton mill workers of the year 1924 in connexion with the non payment of an annual bonus for the year 1923 by the Bombay mills.

The findings of the Committee were —

- (1) That the mill workers had not established any enforceable claim, customary, legal or equitable, to the annual payment of a bonus, and
- (2) that the results of the working of the mill industry as a whole for the year 1923 were such as to justify the contention of the millowners that the profits did not admit of the payment of a bonus.

Bombay Strike Enquiry Committee—The third *ad hoc* Committee to be appointed in the Bombay Presidency was the Bombay Strike Enquiry Committee under the Chairmanship of Sir Charles Fawcett, Judge of the Bombay High Court, in connection with the general strike of the cotton mill workers in Bombay city of the year 1928 in pursuance of the agreement arrived at between the Bombay Millowners Association and the Joint Strike Committee at a conference held under the Chairmanship of the Hon. Sir Ghulam Hussain Hidayatullah, General Member of the Government of Bombay, on the 4th October 1928.

This Committee sat for a continuous period of five and a half months and its Report was published on the 26th March 1929.

Some of the conclusions and recommendations of the Bombay Strike Enquiry Committee were as follows —

- (1) The proposals of the Millowners Association (a) for standardization of wages duties and numbers of operatives in a mill and (b) for Standing Orders for the operatives about the conditions of their employment were in the main fair and reasonable.
- (2) While there was justification for the Association's proposal to make a cut of 7½ per cent in weavers' wages, there were reasonable objections to be urged against its adoption in the present circumstances and it was recommended that it should be dropped by the Association provided the Labour leaders undertook to co-operate in working the scheme for the standardization of wages.

- (3) That part of the standardization scheme which is called the 'Rational' or 'Efficiency' system and which aims at reducing the number of operatives employed in mills while raising their wages and providing conditions favourable for the extra efficiency expected from the operatives was fair and reasonable
- (4) With regard to the Seventeen Demands submitted by the Joint Strike Committee some of the demands which were considered to be fair and reasonable were—
 - (a) That the Millowners shall not vary any of the present conditions to the disadvantage of the workers before securing the approval of the workers through their organisations
 - (b) That the Millowners' Association shall not permit its individual members to vary the conditions of service to the disadvantage of the workers without the sanction of the Association
 - (c) The rates of new varieties shall be fixed by the Millowners' Association in consultation with the representatives of the Workers' organisations
 - (d) Notices in vernacular showing the rates of piece work in detail should be posted in the Departments for the information of the workers
 - (e) That there should be no victimisation of men who had taken part in the strike or any Union activities

Most of the above were eventually conceded by the Millowners' Association
- (5) The following demands were held to be unfair and unreasonable—
 - (a) The wages of those workers whose average monthly wage is less than Rs 30 should be raised substantially
 - (b) The newly introduced system of compelling the workmen (1) to take out and present tickets of attendance and (2) to clean machinery daily should be discontinued
- (6) The recommendations of the Committee for alleviating unemployment consequent on the introduction of efficiency methods of work were as follows —
 - (a) The millowners should set up some machinery for taking note of all cases where workers are discharged on account of reduction of staff, and help them as far as possible to get suitable employment either in some other mill or in some other industry
 - (b) The Millowners' Association should consider the advisability of a scheme for the payment of a gratuity to a worker, which may amount to say, four weeks or six weeks' wages according to his length of service

payable in suitable cases to discharged employees who may need help during the waiting period while they are seeking employment. The formation of an Out-of-Work Donation Fund on a voluntary basis to be created by a system of setting aside a contribution by the Millowners of one anna per operative per month to which fund the operatives through their representatives should be invited to contribute one anna or at least half an anna per head per month was suggested

- (7) The Trade Unions should combine to arrange for the assistance of an expert technical adviser in dealing with disputes arising under the Standardisation Scheme
- (8) In view of the fact that several matters required adjustment in connexion with the scheme for wage standardisation after it had been brought into operation and with a view to avoiding strikes and lockouts, machinery was provided by 'Mediation Rules' agreed to by both sides for setting up joint Committees to enquire into disputes arising under the scheme and to endeavour to arrange for their settlement

Owing to the undue prolongation of the general strike in the Bombay Cotton Mills of the year 1929 and the consequent disruption of labour, it was not possible for the Bombay Millowners' Association to bring into operation the Mediation Rules recommended by the Bombay Strike Inquiry Committee for the simple reason that there are no recognised Unions representatives of Bombay Cotton Mill workers in the City. The Bombay Textile Labour Union, of which Mr N M Joshi, M L A, is the President has barely 400 members. The recognition accorded by the Bombay Millowners' Association to the Bombay Gurni Kamgar Union which claimed a membership of over fifty thousand after its registration in May 1928 was withdrawn by the Association on the publication of the reports of the Court of Inquiry appointed under the Trade Disputes Act to inquire into questions connected with the general strike of the year 1929 and the Riots Inquiry Committee. The Association has been giving anxious consideration to the practical steps which might be taken by mills to bring about better relations between employers and their workmen and for the prevention of accumulation of grievances. In a circular letter dated the 8th January 1930 addressed by the Association to all the mills affiliated to it, they issued instructions that all mills should take immediate steps whereby complaints and grievances of the workers may be attended to by the management concerned at once. For this purpose complaint boxes were to be placed in the compounds of all mills in which workers are invited to put in petitions regarding their grievances or suggestions for improvement of conditions of work. The mills have been requested to give sympathetic consideration to any complaints or suggestions made and to redress or give effect to them wherever possible. Further measures calculated

to improve the relations between the employers and the employed are under consideration. The Association have also devised measures for joint discussions between managers of mills and the Association on general questions relating to the internal administration of the mills.

The next Committee to be appointed in the Bombay Presidency was a Court of Enquiry appointed under the Trade Disputes Act in connexion with the general strike of cotton mill operatives in Bombay City of 1929. After a prolonged enquiry into the causes of and the conduct of this strike which lasted for nearly four months, the Pearson Court of Enquiry came to the unanimous conclusion that the whole of the blame for the calling and the continuation of the strike rested with the Bombay Ginni Kamgar Union. The Report of the Court was published on the 16th Sept. and its moral effect was so great that the union called off the strike unconditionally on the next day.

Bengal—Several special Committees were appointed by the Government of Bengal during the period of intense industrial unrest during the years 1920-21.

(1) As the result of a strike of taxi drivers and professional drivers of private cars in Calcutta which was caused by objections to certain rules, particularly (a) a new rule requiring medical examination of applicants for professional driver's license, and (b) another rule forbidding the carrying of attendants in taxis, Government appointed a Committee of Enquiry into the existing licensing regulations and the control of taxi cabs generally. The strike lasted from the 12th to the 20th January 1921, and ceased as a result of the institution of the inquiry. The Committee made a number of proposals for amendments in the existing regulations. These proposals were ultimately accepted and brought into effect on the 12th October 1921.

(2) As the result of a strike of drivers and conductors of Calcutta and Howrah tramways, which lasted from the 27th January to the 24th February 1921, Government appointed a Committee of Enquiry after the resumption of work by the strikers on the 8th March 1921. The men resumed work towards the end of February on condition (a) that the Calcutta Tramways Company would investigate their grievances and announce their decision within a week, and (b) that if the men were dissatisfied with the Company's decision, Government would appoint a Committee of Enquiry. There was general agreement between the Company and the men's representatives in regard to the majority of the Committee's recommendations. Some, however, of the Directors of the Company did not accept the terms. Another strike of the tramway employees of a much more protracted character broke out in 1922. It lasted from 20th December 1922 to 27th January 1923. No Committee of Enquiry was appointed, although the representatives of the men raised several points which arose from the previous inquiry. Work was resumed unconditionally.

(3) During a strike on the light railway of Messrs Martin and Company in the 24 Parganas and Howrah which lasted from the 15th June to the 2nd July 1921, a special Conciliation Board was constituted by Government by a special resolution at the joint request of the employers and the employees concerned. The result of the Board's efforts was a compromise on most of the points raised by the workers, and as a result of the Board's recommendations it was agreed that joint works committees should be set up on the Howrah Amta and Howrah-Sherkhali Lines. Works Committees were established soon after the Board's report was published, but they failed to function owing to the men's indifference.

(4) The Bengal Legislative Council passed a resolution on the 4th March 1921 to the effect that Government should appoint a Committee to enquire into the general causes of the prevailing unrest and to suggest remedial measures. The report of the Committee was published on the 18th June 1921. The main recommendations of the Committee were—

- (a) the establishment of joint works committees in industrial concerns
- (b) non intervention of Government in private industrial disputes which it was considered should be settled by voluntary conciliation,
- (c) the constitution by Government of a conciliation panel to deal with disputes in public utility services, and
- (d) the appointment by Government of special conciliation bodies in the case of private industrial disputes, if both parties desired outside intervention.

As the result of the recommendations of this Committee, a conciliation panel was constituted under Government resolution dated the 29th August 1921. The panel contained thirty names, and was composed on a representative basis, leading public bodies being asked to recommend persons to serve on it. The panel was reconstituted every year till 1929, when it was superseded by the Trade Disputes Act. Several applications for Government intervention were received during the period of the panel's existence but in no case did Government consider that intervention was justified.

The Government of Bengal agreed with the Committee's view that there was no reason why voluntary conciliation boards, wisely constituted, should not achieve a large measure of success in labour disputes affecting public utility services, where the parties had come to a deadlock, and a solution of the disputes could only be found in the intervention of outsiders. The panel was intended to deal only with disputes affecting public utility services in Calcutta and its neighbourhood. In the settlement of ordinary labour disputes not directly affecting the public, the Committee held that it was not ordinarily the duty of Government to intervene in such disputes either directly or indirectly, but if both parties express a desire that their differences should be investigated by an impartial authority, the Governor in Council should be prepared to establish a conciliation board to deal with the matter, or to take such other action as might be suitable in the circumstances of the case.

TRADE DISPUTES LEGISLATION

The history of the various proposals for legislation providing machinery for the prevention and settlement of industrial disputes in India covers a period of about ten years. The findings of the Industrial Disputes Committee appointed by the Government of Bombay in the year 1921 in pursuance of a Resolution moved in the Bombay Legislative Council for the appointment of a Committee "to consider and report on the practicability or otherwise of creating machinery for the prevention and early settlement of industrial disputes" has already been dealt with above. Mention has also been made of the action taken by the Government of Bombay under circumstances which led to its abandonment owing to the Government of India circularising a draft Bill as an All India measure. The Bill circulated by the Government of India in August 1924 was very wide and comprehensive in scope and extent.

Nothing further was heard about this Bill until the end of 1925 when His Excellency the Viceroy in a speech at the Annual Meeting of the Associated Chambers of Commerce of India and Ceylon, at Calcutta, said: "The question of providing means of conciliation of trade disputes has been thoroughly explored but it would be premature to legislate on this question until the Trade Union Bill has become law." The Trade Unions Act was passed in the Legislative Assembly in March 1926 and was brought into operation with effect from the 1st June 1927.

In August 1928 the Government of India published their second Bill making provision for the investigation and settlement of trade disputes and for certain other purposes. This Bill was introduced in the Legislative Assembly with a motion for circulation on the 21st September 1928. The Bill differed in several important respects in comparison with the Government of India's original Bill of 1924. The main part of the Bill falls into three parts. Clauses 3 to 14 of the 1928 Bill related to the establishment of tribunals for the investigation and settlement of trade disputes. This part of the Bill was based generally on the British Industrial Courts Act of 1919 and its detailed provisions were adopted for the most part from clauses in that Act. The main difference was that, whereas the British Act sets up a Standing Industrial Court, the Conciliation Boards which the Bill proposed to establish were intended to be appointed *ad hoc* like the Courts of Inquiry, in order to deal with particular disputes. The object of Courts of Inquiry which would ordinarily be composed of persons having no direct interest in the disputes would be to investigate and report on such questions connected with the dispute as might be referred to them. The objects of Boards of Conciliation which would ordinarily include representatives of the parties to a dispute would be to secure a settlement of the dispute. Provisions were made so as to enable both Courts of Inquiry and Boards of Conciliation to enforce the attendance of witnesses and the production of documents.

Neither party would be under any obligation to accept the finding of the Court or the advice of the Board, and in cases where the dispute is not brought to an end during the deliberations of the tribunal that had been appointed, reliance was to be placed on the force of public opinion which would be enabled by the publication of the report of the tribunal to arrive at just conclusions on the merits of the dispute.

The second part of the Bill consisted of clause 15 which related to public utility services. In accordance with the definition of "Public Utility Services" in clause 2 of the Bill, Clause 15 would be applicable to such railway services as would be notified by the Governor General in Council. The clause made it a penal offence for workers employed on monthly wages in public utility services to strike without previous notice and also provided heavy penalties for persons abetting such an offence. The clause was based on the principle that persons whose work was vital to the welfare of the community generally should not be entitled to enter into a strike before sufficient time had been given to examine the merits of their grievances and to explore the possibilities of arriving at a possible settlement. Provisions of a somewhat similar type already exist in the Indian Post Offices Act, in a number of Municipal Acts in India, and the principle is one which is widely accepted in other countries.

Clauses 16 to 20 of the Bill contained certain special provisions relating to illegal strikes and lockouts. These clauses followed closely the provisions of sections 1, 2 and 7 of the British Trade Disputes and Trade Unions Act, 1927. They were to be applicable only in the case of the strikes and lockouts which satisfied both of two conditions. In the first place, the strike or lockout must have other objects than the mere furtherance of a trade dispute within the industry to which the strikers or employers belonged, and, in the second place, the strike or lockout must be designed to coerce Government either directly or by inflicting hardship on the community. If these conditions were satisfied, the strike or lockout would become illegal. Persons furthering the strike or lockout were liable to punishment and would be deprived of the protection granted to them by the Indian Trade Unions Act, while persons refusing to take part in it would be protected from Trade Union disabilities to which they might otherwise be subjected.

The motion for circulation was adopted in the Legislative Assembly and the Bill was circulated to all Local Governments for opinion. Some Provincial Governments recommended that questions connected with picketing and intimidation of the type which were entirely responsible for the undue prolongation of the general strikes in the cotton mills of Bombay City of the years 1928 and 1929 and the rioting in Bombay in the year 1929, should also be covered. The Bill was referred to a Select Committee of the Legislative Assembly in February 1929.

The Select Committee decided to limit the duration of the Act to five years. In connection with the definition of the term "Public Utility Services" they were of the opinion that the wide power enabling the Government to declare any industry, business or undertaking to be a public utility service was undesirable as well as unnecessary and the provision made for this in the draft Bill was omitted. Various proposals designed to lay upon the Government a definite obligation to convene a Court of Inquiry or a Board of Conciliation in cases where one of the parties so required were considered. But the Committee thought that unless both parties were agreed in desiring a reference it would be useless to fetter the discretion of the Government as to the time at which the matter was reported for action under clause 3. At the same time they held that no option should be left to the Government to refuse to appoint a Court or Board where the Government was assured that both parties were agreed as to the necessity as well as to the form which it should take. They therefore considered it necessary to provide that in every case a Court of Inquiry, where it consisted of one or more persons, should not include persons having an interest in the dispute or in any industry affected by it, and in this connection the Committee proposed a further definition of the term "An independent person". The clause relating to the publication of the findings of Courts and Boards was maintained on the lines of the English Act so as to make it quite clear that every report of a Court or Board, whether final or *interim*, must be published and that only the publication of such information or evidence as the appointing authority thought fit should be left to its discretion. It was considered inadvisable to forbid the representation of parties before Courts and Boards by legal practitioners subject only to exceptions and they redrafted the clause in such a manner as to permit that such representation would ordinarily be permissible subject, however, to such conditions and restrictions as might be provided by the rules.

The Select Committee accepted the principle underlying the clause in connection with strikes in public utility services but they held that the clause as originally drafted was open to certain criticisms. For example, it was pointed out that many persons are actually employed upon a daily wage which is in practice paid monthly, also that the clause as provided would appear to penalise abstention from work on the part of a particular individual, and further that the clause was one-sided and inflicted no penalty upon an employer who locks out his workmen. The latter point was considered as one which should certainly be met as by the nature of his employment a casual or day to day labourer must be entitled to cease work at any moment and be similarly liable to dismissal and it was agreed that he should therefore be excluded altogether from the operation of this clause. The Committee adopted a suggestion made by the Government of Bombay which made it clear that the cessation of work must be in the nature of a strike as defined in the Bill and it was provided that in order to render it a penal offence the strike must be in breach of a definite contract between the employer and the workmen. The Committee added a collateral provision penalising

an employer for locking out his workmen in breach of any contract. The Committee adopted the clause in connection with illegal strikes but with some amendments which, in their opinion, would restrict its scope without materially impairing its effectiveness. In sub clause 2 of this section they made it clear that, for the application of money to be illegal it must not merely tend to further or support the strike, but have the direct effect of so doing. This was intended to exclude a case in which money is spent upon the relief of the dependants of strikers. A further sub clause, borrowed from a similar provision from the English Act of 1927 explaining the circumstances in which a group of workmen should be deemed to be within the same trade or industry was added. The penalties provided for the instigation of an illegal strike were modified. With regard to clause 20 of the draft Bill, the Committee held that there was no sufficient justification for giving an option to the Government to apply for injunctions restraining the expense of the funds of a Trade Union in connection with an illegal strike. It was considered that under clause 16 such expenditure had been declared illegal and the persons properly interested in seeing that the funds were not mis-spent are the members of the Trade Union concerned. The Committee were of the opinion that the Bill had not been so altered as to require republication and they recommended that it should be passed as duly amended by them.

The Select Committee as such did not deal with the question of making provision for picketing and intimidation in their report but in a minute of dissent Sir Victor Sassoon, Bart., stated that the alteration of the law relating to picketing was one for which, in his opinion, the time was ripe. Picketing of any kind should be rendered illegal while a Court or Board is sitting and the law on picketing at any time should be altered to render it illegal at or near a workman's house as under the English Law. There appeared to be some doubt as to whether legislation of this kind should take place in this Bill or by an Amending Bill to section 503 of the Indian Penal Code. It had been stated that if an amendment of this kind were passed in the Select Committee it would delay the Bill. As he did not desire to delay the acceptance of the provisions of this Bill he did not press the point which was raised by other members of the Select Committee. Sir Victor Sassoon, however, thought that suitable action should be taken by Government either when the Bill came up before the House or by bringing out an amending Bill to the Indian Penal Code to deal with this most important and necessary point. The action taken by the Government of Bombay in connection with the passing of an Intimidation Act has been dealt with in the chapter on Industrial Disputes.

The Bill as amended by the Select Committee was passed by the Legislative Assembly on the 8th April 1929 without any change and received the assent of the Governor General on the 12th April 1929.

During the period of nearly five years for which the Act has been in operation, it has only been made use of on four occasions.

on the State Members, but they have to be submitted to the Legislature of each country, and this secures the regular examination both by the Executive Governments and the Legislatures of schemes which international opinion considers necessary and desirable for the amelioration of labour conditions. During the seventeen Conferences that have been held 40 Conventions have been adopted. Out of these the following thirteen have been ratified by India —

- 1 Hours of work (1919)
- 2 Unemployment (1919)
- 3 Night work of Women (1919)
- 4 Night work of young persons in Industry (1919)
- 5 Rights of Association (Agriculture) (1921)
- 6 Weekly Rest in Industry (1921)
- 7 Minimum age of stokers and trimmers (1921)
- 8 Medical Examination of Young Persons employed at Sea (1921)

- 9 Workmen's Compensation (Diseases) (1925)
- 10 Equality of Treatment (Accidents) (1925)
- 11 Inspection of Immigrants on board ship (1926)
- 12 Seamen's Articles of Agreement (1926)
- 13 Weight of Packages transported by vessels (1929)

In addition to the Conventions dealt with above, the International Labour Conferences have also adopted numerous Recommendations.

The Seventeenth Session of the International Labour Conference held at Geneva from the 8th to 30th June 1933 adopted conventions in respect of (a) employment agencies, (b) widows and orphans insurance and (c) invalidity and old age insurance. It also adopted Recommendations in connection with the first two subjects.

GOVERNMENT ADMINISTRATION

During pre Reform days Labour was not a question to which the Central or Provincial Governments in India gave the same attention as they did to such subjects as education, health or justice. After the amendment of the Indian Factories Act of 1891 in 1911, the appointment of the **Indian Industrial Commission** in May, 1916, may be considered to be the first milestone in the progressive interest taken by Government in questions connected with labour. The active participation of India in the Great War led to the creation of an unprecedented opportunity and the emergence of an unprecedented need for a definite industrial policy for India as a whole. The examination of various industrial questions by the Industrial Commission included, to a certain extent, the examination of questions connected with labour as well. Previous to this date no provincial or All India inquiries of a general character were held into conditions of labour with the exception of some quinquennial censuses into agricultural wages. No information was available in 1919 as to the rates of wages which were paid in industry, and, for that matter, very little information in this direction is available even to-day. Indian labour secured its first opportunity with her participation in the signing of the treaty of peace and her becoming a live member of the international comity of nations. The participation by India, in the first International Labour Conference held at Washington in the year 1919 made it necessary for the Government of India and the Governments of the more industrialised provinces not only to consider the question of the representation of labour in the Central and Provincial Legislatures but also to allocate to special departments or offices the administration of labour questions.

Under the Devolution Rules (Schedule I, Part 2, Rule 26) industrial matters included under the heads factories and welfare of labour fall within the scope of the provincial legislatures. Under the same rules 'regulation of mines' and 'inter provincial migration' are central subjects. A Labour Bureau was established by the Government of India in the year 1920 but it was abolished in March 1923 on the recommendation of the Indian Retrenchment Committee. The administration of labour matters since then has been in the hands of the Department of Industries and Labour with a Member of the Viceroy's Council holding the portfolio. Amongst Local Governments, the Bengal and the Madras Presidencies were the first in the field for the creation of special Labour Officers, but it was the Government of Bombay who took the lead in the field for the creation of a proper Labour Office for the collection and compilation of all kinds of statistics in connection with prices, cost of living, wages, etc.

Bengal

The Government of Bengal appointed a Labour Intelligence Officer in the year 1920. Labour laws were to be administered in the Commerce Department, but the Revenue Department continued the administration of the Assam Labour Immigration Act. The Labour Intelligence Officer was to keep a record of industrial disputes in the Presidency and also the number of labour organisations. From time to time, as circumstances permitted, he was to conduct special inquiries. He was, however, not provided with an adequate staff for the purpose. The Labour Intelligence Officer is also the Deputy

Secretary to the Government of Bengal in the Commerce Department and since the bringing into effect of the Indian Trade Unions Act, 1926, he has also been appointed Registrar of Trade Unions. The Royal Commission on Indian Labour have recommended that Bengal should have a properly staffed Labour office on the same lines and with at least the same staff as the Labour office of the Government of Bombay.

Madras

The Government of Madras appointed a Labour Commissioner in the same year, viz., 1920, to watch and study at all times the conditions of labour particularly industrial labour throughout the Presidency and to keep Government informed by periodical reports of its movements and tendencies and of the existence of any disputes between employers and employed. The settlement of labour disputes and prevention of strikes are features of his work but his interference in such disputes is limited to tendering his offices to settle them. In the case of disputes affecting the internal administration of a railway he may interfere only if both sides agree to his intervention but he must obtain the previous sanction of Government in each case. He is also the Protector of Depressed Classes in which work most of his time is occupied. On a par with the Labour Intelligence Officer, Bengal, the Labour Commissioner in Madras has also no special statistical office to deal with labour statistics and no reports have been published of any special inquiries into questions connected with industrial labour in the Presidency. Since the creation of the Office the conduct of periodic censuses into agricultural wages is, however, placed in his hands.

The Bombay Labour Office

The real pioneer work in the field of labour information and statistics in India during the last thirteen years has been done by the Labour Office of the Government of Bombay which was established in April 1921. In the Government resolution announcing the establishment of this office the following were declared to be its functions—

“(1) *Labour Statistics and Intelligence*—These relate to the conditions under which labour works and include information relating to the cost of living, wages, hours of labour, family budgets, strikes and lockouts, and similar matters,

“(2) *Industrial Disputes*—As experience and knowledge are gained and the activities of the Labour Office develop it will promote the settlement of industrial disputes when these arise, and

“(3) *Legislation and other matters relating to labour*—The Labour Office will advise Government from time to time as regards necessary new legislation or the amendment of existing laws.”

When the Labour Office was first started it was placed in charge of Director of Labour. The post of the Director of Labour was, however, abolished in 1926 and the labour office was placed under the charge of the Director of Information whose designation was changed to Director of Information and Labour Intel-

ligence. With a view to implementing the recommendation of the Royal Commission on Indian Labour in the matter, the Government of Bombay in May 1933 again changed the designation of the Director of Information and Labour Intelligence to ‘Commissioner of Labour and Director of Information’. With this change in designation the administrative control of the Factory and Boiler Departments was transferred from the Collector of Bombay to the Commissioner of Labour and the Commissioner of Labour was also appointed ex officio Commissioner for Workmen's Compensation and Registrar of Trade Unions. In addition to the Commissioner there are three gazetted officers attached to the Labour Office. Two of these are Assistant Commissioners of Labour at headquarters in Bombay and the third who is called the Labour Officer at Ahmedabad is stationed at that centre. There are also three full time Lady Investigators but these are not gazetted appointments. The Assistant Commissioners, the Labour Officer and all the Investigators receive conveyance allowances. The office staff contains two Statistical Assistants, three senior clerks, eight junior clerks, two stenographers, one typist, one cashier, one despatcher, one daffari and five peons in Bombay and one peon in Ahmedabad. The activities of the office comprise (1) prices and cost of living, (2) wages and hours of labour, (3) rents, (4) economic and social conditions of various communities, (5) unemployment, (6) industrial disputes, (7) trade unions, (8) other industrial and labour intelligence, (9) international labour intelligence, (10) labour legislation, (11) the *Labour Gazette*, (12) library, and (13) office organisation.

The *Labour Gazette* has been published monthly from September 1921. It is intended to supply complete and up to date information on Indian labour conditions and especially the conditions existing in the Bombay Presidency, and to supply to local readers the greatest possible amount of information regarding labour conditions in the outside world. The *Labour Gazette* circulates to many different countries and is perhaps the only publication of its kind in India from which foreigners interested in labour and economic conditions in India can obtain accurate and up to date information. It has also hitherto been practically the only medium through which the work and publications of the International Labour Office have been made regularly available to people in India. A substantial grant is allowed by the Local Government to the Labour Office for the purchase of books and the Labour Office has accumulated a very useful and fully catalogued library on labour, industrial and economic matters. The Labour Office library is open to research workers in Bombay. In addition to books, the library contains bound copies of all the more important periodicals received from Labour Ministries, International organisations and research organisations in various parts of the world.

The Labour Office has conducted several special inquiries the results of which have either been published in the form of special reports or as special articles in the *Labour Gazette*. Among the inquiries the results of which have been published in the form of reports

Central Provinces, Mr R W Fulay, a Nagpur pleader, has been nominated as a representative of urban factory labour. In Bengal there have been two nominated members to represent labour interests since the introduction of the reforms. The Assam Government reserves one seat for the nomination of a member to represent labour but it has been found impracticable to find any one who could adequately represent this constituency and therefore the seat is vacant in the present Assam Legislative Council.

Relation between Central and Local Governments—It has already been stated above that under the Devolution Rules, factories, settlement of labour disputes and welfare of labour are reserved subjects. These subjects are, however, subject to central legislation. The provincial legislatures are not debarred from initiating legislation on these matters but they can only do so with the previous sanction of the Governor General in Council. The actual administration of the Acts passed by the central legislature under the above heads falls on the Local Governments who have to bear the entire cost of administration, as it is not permissible under the constitution to incur any expenditure from central revenues on the administration of provincial subjects. This constitutional position is perhaps, to some extent, responsible for the opposition shown by some of the Local Governments to labour measures on which their opinions have been invited by the Government of India during recent years. The Governor General in Council exercises control over the administration of the Acts passed by the legislature in two ways: in the first place he is vested by Statute with the general power of superintendence, direction and control, and, secondly, these Acts in most cases either reserve certain powers to him to make the powers conferred on Local Governments subject to his control. The general principle observed by the Government of India has been to grant to the provinces as free a hand as possible in the administration of the various All India Acts.

Effect of differences in Law in Indian States and British India—Few Indian States have any labour legislation but most of them are of little industrial importance. The only States which have more than 8,000 persons employed in factories and mines are Hyderabad, Mysore, Indore, Baroda, Jammu and Kashmir, Gwalior and Travancore. Most of these States have a Factories Act which, however, is much below the standard of the corresponding Act in British India. In recent years there has been a tendency on the part of certain capitalists to endeavour to evade the provisions of the Factory Law in British India by establishing mills or factories in the territories of Indian States.

Recommendations of the Royal Commission—The most important recommendation made by the Royal Commission on Indian Labour in connexion with Government administration of matters connected with labour is for the setting up of an Industrial Council which would enable representatives of employees of labour and of Governments to meet regularly in conference to discuss labour measures and labour policy. It is suggested that the Council should meet annually and its President should be elected at each annual session. The Secretary of the

Council should be a permanent official responsible to it for current business. The functions of the Council would be (1) the examination of proposals for labour legislation referred to it and also to initiate such proposals, (2) to promote a spirit of co-operation and understanding among those concerned with labour policy, and to provide an opportunity for an interchange of information regarding experiments in labour matters, (3) to advise the Central and Provincial Governments on the framing of rules and regulations, and (4) to advise regarding the collection of labour statistics and the co-ordination and development of economic research. If Labour Legislation is made a Central subject in the new constitution of India, the Royal Commission recommend that the authority finally responsible for such legislation must be the Central Legislature. If Labour legislation is to be decentralised, some co-ordinating body will be necessary. The decisions of the Council could not be given mandatory power, but in certain circumstances it might be made obligatory for Provincial Governments within a specified time to submit proposals for legislation to their respective legislatures for a decision as to their adoption or rejection.

The Commission recommended that Labour Commissioners should be appointed both for the Central and in all the Local Governments except Assam. Labour Commissioners should be selected officers who should hold the appointment for a comparatively long period. They should be responsible for the publication of labour statistics, should have the right to enter all industrial establishments and should be generally accessible both to employers and labour and should act as conciliation officers. Where there is danger of establishments being transferred to Indian States in order to escape regulation, an effort should be made to obtain the co-operation of the adjoining states. The Commission also recommended that the possibility of making labour legislation both a federal and a provincial subject should receive adequate consideration, and that if federal legislation is not practicable, efforts should be directed to securing that, as early as possible, the whole of India participates in making progress in labour matters. For States in which there is appreciable industrial development, the Industrial Council should offer a suitable channel for co-operation.

With regard to the question of representation of labour on the legislatures the Royal Commission recommended that if special constituencies are to remain a feature of the Indian constitution labour should be given adequate representation in the Central and Provincial legislatures. The method which is most likely to be effective in securing the best representatives of labour is that of election by registered trade unions. A special tribunal should be set up in each province to determine before election the weight which should be given to each registered trade union. The question was examined by the Indian Franchise Committee and so far as the Provincial Councils are concerned the communal ward of His Majesty's Government has given effect to the Labour Commission's recommendation. The Franchise Committee recommended a combination of trade union constituencies and special constituencies.

Domestic Servants.

The relationship of master to servant in India is a subject to which attention is frequently directed in the Press by complaints about the alleged deterioration of domestic servants and the hardships to which employers are subjected by the boycotting action of discharged servants. The remedy most commonly propounded for misbehaviour on the part of servants is registration with a view to checking the use of false testimonials, or "chits," and to enabling masters to obtain certain information as to the character of the persons they employ. This mode of procedure is of German origin, for the old Prussian Servants' Ordinances (*Gesindeordnung*) were supplemented in 1851 by a law, applying only to agricultural labourers and domestic servants, which punishes breach of contract, and since then various State laws dealing with domestic servants have been passed in Germany. The conditions are not, however, analogous for the servant keeping class in India is proportionately larger than in Europe, as also is the number of servants kept by each individual.

The first attempt in the East to deal with the problem by legislation was made in Ceylon. The act dealing with the registration of domestic servants in that Colony is comprised in Ordinance No 28 of 1871. It extends to all classes of domestic servants, hired by the month or receiving monthly wages, and the word "servant" means and includes head and under-servants, female servants, cooks, coachmen, horsekeepers and house and garden coolies. The Act came into operation in 1871 and empowered the Governor to appoint for the whole of the Island or for any town or district, to which the Ordinance is made applicable, a registrar of domestic servants, who is to be under the general supervision and control of the Inspector General of Police. A registry is kept by the registrar of all domestic servants employed within his town or district, and he has to enter therein the names of all the servants, the capacities in which they are employed at the time of such registration, the dates of their several engagements and such memorandum of their previous services or antecedents as they may desire to have recorded in the register. But the registrar must, previous to his entering all these details, satisfy himself as to the credibility of the statements made to him. Any person, who may not have been a domestic servant before, but who is desirous of entering domestic service, has to submit an application to the registrar, and if the registrar is satisfied that there are reasonable grounds to believe that the applicant is a fit and proper person to enter domestic service he shall enter his name in the register, recording what he has been able to learn respecting the person's antecedents together with the names of any persons who are willing to certify as to his respectability. If the applicant is unable to produce satisfactory or sufficient evidence as to his fitness for domestic service the registrar may grant him "provisional" registration, to be thereafter converted into "confirmed" registration according to the result of his subsequent service. If the registrar is satisfied that the applicant is not a fit and proper person he should withhold registration altogether, but in such a case he must report his refusal to register to the Inspector-General of Police.

Every person whose name has been registered in the general registry is given a pocket register containing the full particulars of the record made in the general registry. No person can engage a servant who fails to produce his pocket register or whose pocket register does not record the termination of his last previous service, if any. On engaging a servant the master has to enter forthwith in the pocket register the date and capacity in which such servant is engaged and cause the servant to attend personally at the registrar's office to have such entry inserted in the general registry. Similarly, in case the master discharges a servant he must insert in the pocket register the date and cause of his discharge and the character of the servant. Provided that if for any reason he be unwilling to give the servant a character or to state the cause of his discharge he may decline to do so. But in such a case he must furnish to the registrar in writing his reasons for so refusing. If the servant on dismissal fails to produce his pocket register the master must notify that fact to the registrar. Whenever any fresh entry is made in the pocket register the servant is bound to attend the registrar's office to have such an entry recorded in the general registry. Every servant whose name is registered shall if he subsequently enters service in any place not under the operation of the Ordinance, attend personally at the nearest police station on his entering or leaving such service and produce his pocket register to the principal officer of police at such station in order to enable the police officer to record the commencement or termination of the service. The police officer has then to communicate it to the registrar of the town or district in which such servant was originally registered.

Various penalties of fine as well as of imprisonment are imposed for violation of any of the acts required to be done or duties imposed by the Act on the various persons mentioned below. As respects masters if they fail to fulfil any of the duties imposed on them by the Act they expose themselves to a liability of their being fined to the extent of Rs 20. Similarly a servant, who fails to fulfil any of the duties imposed on him by the Act is liable to pay a fine not exceeding Rs 20. But in case he gives any false information to the registrar or to any other person on matters in which he is required by this Ordinance to give information, he is liable to a fine not exceeding Rs 50 or to imprisonment, with or without hard labour, not exceeding 3 months. A fee of 25 cents is charged to the master on engaging a new servant, a like fee of 25 cents is charged to the servant on his provisional registration, or on registration being confirmed or for registration of previous service or antecedents. But in case of loss or destruction of the pocket register the servant has to pay one rupee for the issue of a duplicate pocket register.

A similar Ordinance (No 17 of 1914) has been introduced in the Straits Settlements, where its operation has been limited to such local areas as may be declared by the Governor in Council, and its application within such areas has been restricted to the class of householders who are expected to desire the benefit of the provisions

Sea Routes between India and Europe.

The Indian port for the direct journey to and from Europe is Bombay. There are ordinarily five lines of steamers by which the journey to and from the West *via* Bombay can be performed, either by sea all the way, or—and in some cases only—by sea part of the way and by rail across Europe. They are the P & O, the Anchor Line, the City and Hall Line and the Lloyd Triestino. The Natal line steamers are available for Western passages only, the steamers sailing round the Cape on their Eastward voyages. There are ordinarily other services between Calcutta and the

West, by steamers sailing round Ceylon, and several lines connect Colombo with Europe. Of the latter the Orient, the Messageries Maritimes, the Bibby Lines, N Y K, Australian Commonwealth, and Royal Dutch Lines are the chief. Besides the P & O. The Bibby and Henderson services extend to Rangoon. The new railway between India and Ceylon greatly increases the importance of the Colombo route for Southern India. The shortest time between London and Bombay is 15 days *via* Marseilles. The following are the fares which are convertible at approximately current rates of exchange —

Peninsular and Oriental S N Co

CIVIL AVIATION.

The development of internal aviation services in India was first essayed by Lord (then Sir George) Lloyd, during his Governorship of Bombay (1918-23). Lord Lloyd succeeded in securing the inauguration of a postal mail service between Karachi and Bombay. This was carried in R A F machines. The use of these aeroplanes complicated the matter from the outset. The service was not warmly supported by the public. The effort failed.

The general attitude of the Government of India for some time after this was that as no air services in the world had yet been run without a Government subsidy and as India had no money available for such a purpose, a general development of air services in India must wait more prosperous times. The pressure of external conditions in favour of Indian aerial enterprise gradually increased. The inauguration of French and Dutch postal services across India, as well as the institution of a regular weekly between England and Karachi, and the general increase of civil aviation in all parts of the world and of visits of flyers of different nations to India, stimulated both Government and public opinion. India became a party to the International Air Convention and under this was obliged to provide ground facilities for aircraft from other countries.

The problem of internal air services was freshly taken up by the Government of India in the Department of Industries and Labour when Sir Bhupendranath Mitra was member of Government for that portfolio. Force of circumstances had already necessitated the appointment of a Director of Civil Aviation and the first holder of the post was Lt Col F C Sheldermine, O B E.

Non official members of the Assembly, under the leadership of Dr Moonje, then an elected member, for some time strongly pressed Government to institute a practical system for the training of young Indians in Civil Aviation. They foresaw that the development of civil

aviation in India was only a matter of time and their great desire was to prevent it following in the wake of the mercantile marine and the commissioned ranks of the army, in which Indians came to the fore under modern conditions only in time to be faced with competition by Britishers who were first in the field. The upshot of this agitation was an arrangement by which young Indians might be sent to England for training with a view to their future employment in the Civil Aviation Department as aerodrome officers, inspectors of aircraft and engines, etc. Eight lads were dispatched for the opening of this system. Others followed and results have been successful. These men are not trained primarily as commercial pilots, but a development of their training, if they show special aptitude and desire to adopt a pilot's career, is always in view. This is a wise precaution and some of them take pilot's certificates. All of them receive a certain amount of training as pilots and they also go through a post graduate course at the Imperial College of Science and Technology and a period of attachment to selected aircraft works and to the London Terminal Aerodrome at Croydon. The course lasts for two years and three months, during which time the men receive scholarships amounting to £240 per annum. A condition of eligibility for these scholarships is that applicants must possess a B Sc degree in engineering or physics.

Interior Postal Service—Sir Bhupendranath Mitra was in due course obliged to reconsider the question of assisted internal aerial services in India. An arrangement was made by which the Imperial Airways Service between Croydon and Karachi was, on 30th December 1929, extended to New Delhi, mails from and for Europe being carried to and from each week. This conveyance of mails between New Delhi and Karachi was performed under a special arrangement, the chief point of which was that the service was conducted by the Postal Department of the Government of India.

and that Imperial Airways chartered to them machines for the purpose. This meant, in effect, that the Western service of the Airways Company continued to Delhi, but that technically the service from Karachi eastwards, belonged not to them but to the Government of India. Passengers as well as mails were carried. On the expiration of the period for which the contract on these lines was arranged, the Government of India decided not to renew their charter with Imperial Airways and adopted the alternative course of contracting with the Delhi Flying Club to carry the weekly Karachi-Delhi air mails—here no passengers to and fro. This, like the earlier special arrangement with Imperial Airways, was obviously a transitional plan. It came into operation early in 1932. It filled the need of the moment, pending the development of a permanent scheme.

Before Sir Bhupendranath Mitra could critically develop the matter, he was succeeded in charge of the Departmental portfolio by Sir Joseph Blore and the latter entered with enthusiasm into the problem. Its solution was largely assisted by a great deal of spade work carried out by Col. Sheldermine before he resigned his appointment as D.C.A. in order to take up the corresponding one in England. A scheme was worked out under the direction of Sir Joseph Blore for the institution of a weekly air service between Karachi and Calcutta in connection with the weekly arrivals and departures of air mails conveyed by Imperial Airways, Ltd., from and to England. If the Government of India had at this time taken no steps towards the organisation of a service of the kind, they would have been unable to prevent Imperial Airways or some other non-Indian concern from establishing one and the authorities in India were determined that civil aviation within India should be Indian in character, either through the development of private enterprise or through the institution of Government-owned services.

The arrival of acute financial stringency following on the world depression, necessitated the abandonment of the Government Karachi-Calcutta service in 1931. Four Aero 10 aeroplanes had already been purchased for the service and they were sold, one of them being purchased for the use of Their Excellencies the Earl and Countess of Willingdon, who had newly arrived in India on the appointment of the Earl to be Viceroy. Efforts were then directed to alternative methods of attaining the desired result and in 1933 an arrangement for the purpose was carried through. In the new scheme there was organised in India a company known as Indian National Airways, Ltd. Its successful institution was largely the result of the efforts of Mr. R. E. Grant Govan, O.B.E., of New Delhi. This Company received the assistance of Imperial Airways, Ltd. into the programme thus devised there also entered the Government of India. The upshot of this was the institution of **Indian Transcontinental Airways, Ltd.**, a corporation of which 51 per cent of the capital is contributed by the Government of India and the remainder by Indian National Airways and Imperial Airways, Ltd. Its business is solely to conduct between Calcutta and Karachi a

fortnightly service to connect, at Karachi, with the Imperial Airways Western Air Service and at Calcutta with the service organised by Imperial Airways to cover the distance between Calcutta and Singapore, at which point another service is being organised under the auspices of the Australian Government to carry on to Australia.

In the alternative weeks between the fortnightly flights of the Indian Transcontinental Airways machines, the Trans India Service is carried by Imperial Airways. The new Karachi-Calcutta route was inaugurated during the summer of 1933 and the extension by Imperial Airways to Singapore was established in the following winter. The Australian extension is not yet in operation.

Indian National Airways, besides being concerned in this trunk service also undertake the development of branch or feeder internal services. They have hitherto established weekly services each way between Calcutta and Rangoon and Calcutta and Dacca, respectively. Meanwhile, private enterprise for the development of internal air services strongly developed in Bombay City and before the institution of Indian National Airways there was established by Tata, Sons & Co., a weekly service each way from Karachi via Bombay to Madras. Various important developments by both these organisations are contemplated.

Instruction in Aviation—Instruction in Aviation is given in India only through Clubs founded for the purpose. There are nine of these. Above them is the Aero Club of India and Burma, Secretary Wing Commander A. R. C. Cooper which exercises control and general co-ordination of activities under the Director of Civil Aviation with the Government of India. The nine instructional clubs are the Delhi, U.P., Bengal, Madras and Bombay Flying Clubs, Karachi Aero Club, Northern India Flying Club, Lahore, Jodhpur and Kathiawar Flying Club (A Punjab Flying Club at Lahore, lost its three aeroplanes in crashes and had to wind up. Its place has been taken by the Northern India Flying Club). The institution of two other clubs in the CP and Hyderabad Deccan respectively is in prospect.

The Club movement dates from March 1927, when, as a result of the interest taken in the subject by Sir Victor Sassoon, Bt., M.L.A., it was discussed by the Indian Legislative Assembly. An encouraging atmosphere was thus created and in the same month the Aero Club of India was formed, composed of about 40 members of the Assembly. Its first meeting was held in Simla in September of the same year and during the next three months 100 more members of the Assembly and 197 other members joined. Strong committees were then formed in Delhi, Calcutta, Bombay and Allahabad, with the object of developing interest in the movement and in order to utilise the Government grants which were at this time proposed and the formation of local clubs followed. The Aero Club entered into an agreement with the Royal Aero Club of Great Britain and thereby became its official representative in India and Burma.

The Government of India, in December, 1927, received from Sir Victor Sassoon a letter saying that subject to a grant of Rs 30,000 to the Aero Club for the year 1928-29 and a grant of Rs 20,000 to each club formed, he would bear any deficit between the Club's income and expenditure until the grants became available. This they agreed to and they further announced that they would provide for each club an initial equipment of two aeroplanes, a spare engine and a contribution towards the cost of a hanger where no hanger was already available. These grants commenced as from the 1st April 1928, and were to continue for two years. Agreements were entered into between the Secretary of State and the Aero Club and between him and the provincial clubs, laying down the conditions of financial assistance. Both aeroplanes manu-

factured by the De Havilland Aircraft Co were selected as the training machines. Eight of these arrived in December 1928, and training with them began in January 1929.

The first Indian air race was flown over a Delhi Agra Jhansi Lucknow Agra Delhi course in February 1932, and was very successful. There was a similar race over approximately the same course in February 1933, when the entries were good and included two competitors who specially came out from England for the contest and the event was again completely successful. The 1934 race was flown with Calcutta as its centre.

Director, Civil Aviation—Mr F Tymms, M C

Deputy Director, Civil Aviation—Mr A T E Eadon

THE SUEZ CANAL

The report of the Suez Canal Company for 1932 reflects an aggravation of the economic crisis throughout the world. Traffic receipts at £137,000,000 were less by 15 per cent against which a further reduction in working expenses was secured of £26,000,000, making a total reduction of £45,000,000 or 20 per cent on the working cost of 1930. In order to provide a gross dividend of 510f per share it was necessary to draw on the extraordinary reserve for £11,000,000. The volume of traffic at 28,340,000 tons was less by 5.6 per cent than the total for 1931 and of the last tonnage 15,721,294 or about 55.1 per cent was accounted for by British shipping. The weight of goods transported through the Canal was only 23,632,000 tons against 25,332,000 tons in 1931, and thus fell below the average of the three years immediately preceding the war. Many vessels which, when trade was on a larger scale, would have been sent laden through the Canal, had to be despatched from the United Kingdom to Australia in ballast, and were directed, in order to save expenses, to proceed by the long sea route.

Improvement Schemes—It was announced in 1914 that from and after January 1st, 1915, the maximum draught of water allowed to ships going through the Suez Canal would be increased by 1 ft, making it 30 ft English.

The maximum permissible draught of ships using the Canal was 24.4 feet in 1870, in 1890 ships drawing 25.4 feet could make the passage, and during the following 24 years the increase has been at the average rate of about 1 foot every six years, thus bringing the maximum draught authorized to 29 feet.

The scheme of improvement adopted by the Company on the recommendation of the International Consultative Committee of Works, the British representatives on which are Sir William Matthews and Mr Anthony Lister, is a comprehensive one, and the details suggest that it will meet the needs of the big ship.

A 40 Feet Channel—The declared policy of the Canal Company in regard to the deepening of the Canal is to offer a slightly greater depth of water than that available in ports east of

Suez. It is claimed that, with the exception of Sydney, there is no eastern port which at low tide has a greater depth of water than that now provided in the Canal throughout the full length of nearly 105 miles. In any case the work in hand should meet the needs of any ship likely to be built for the eastern trade during the next few years.

When the Canal was opened in 1869, the width was 72 feet and the depth about 26 feet 2 inches, in June, 1913, the width at a depth of 32 feet 8 inches had been increased to a minimum of 147 feet 6 inches over a length of about 85 miles and to a width of 328 feet over a distance of about 20 miles. The latest scheme makes provision for a depth of 40 feet throughout and for a widening up to 196 feet 8 inches in the south section, and the cutting of an appropriate number of sidings in the north and central sections, where a minimum width of 147 feet 6 inches is believed to be sufficient for the requirements of the immediate future.

The work of enlarging the capacity of the Canal presents no special difficulty on the engineering side. A good deal of sand is occasionally driven into the channel at Port Said during storms, but a remedy for this will be found in extension of the west breakwater by about 2,700 yards at a cost of over £6,000,000. The construction of this extension, which has been in hand for the past two years, is making satisfactory progress. The Suez Roads are being adequately dredged in accordance with an agreement between the Egyptian Government and the Company.

Almost up to the end of 1915 the works for extending the jetty to the west of Port Said, works of capital importance for the protection of the entry to the Canal were pushed on uninterruptedly. In November, however, for want of hydraulic lime, the manufacture of artificial rocks for this jetty was interrupted. The submarine foundations in stone and rubble of the new jetty were, as a matter of fact, completed to a length of 2,500 metres, the protective blocks were laid for 1,040 metres, and cemented for over 800 metres. The protection of the Channel is thus secured, and there is no need of any apprehension as to its future.

Travel in India.

Thirty years ago, a tour in India was possible only to the wealthy, the leisured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow, and the facilities for travel were so indifferent that he was a bold man who consigned himself to the mercies of the country without a sheet of letters of introduction. Now the mail which is posted in London on Thursday night, reaches Bombay in 14 days, and the passenger can travel by the same route and with the same speed as the mail. It is also possible to reach Bombay in 11 days from Genoa or Venice by means of the Lloyd-Triestino line. A dozen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular services while Imperial Airways have a weekly service from Croydon to Karachi and from there the Indian State Air Service takes you to Delhi and before long it is hoped to Calcutta. The Indian Railways provide facilities on the trunk lines equal to many of the best services in Europe and the Indian hotel has grown into a really comfortable caravanserai.

The traveller to India has a choice of many ports by which he may enter. To the majority of visitors from Europe and the West, Bombay provides their first glimpse of India, while others enter by Calcutta, Madras and Karachi and via Colombo.

Owing to its geographical position Bombay is known as the Gateway of India through which for more than a century, the import and export trade of India has largely passed. Ash-purple against the dawn, the spurs of the Western Ghats, thrones of mystery, stand sentinel about the inner sanctuary of Bombay Harbour. Among and above these mountain heights Wellington fought the battles which earned for him his early military greatness. Every schoolboy knows the story of the Marhatta campaigns, they are but one—the Marhattas—of the races within races that populate this vast country where two hundred and twenty-two different vernaculars are spoken. There is never an end to the land of India. You will find life in its most up to date form and next to it the customs and habits of a nation which have not changed for hundreds of years. Life will surge past you in a picturesque procession. You will hear a medley of strange sounds—the tinkle of the temple bells, the throb of the drum, the chant of the ‘muezzin’ announcing that God is Almighty and Mohammed is his Prophet, the song of the Shirmas, the cry of the wild beast in the jungle. The tropical sun blazing like a ball of molten gold in a turquoise sky, the silver moon sailing across the purple vault of heaven will awaken in you feelings which you have never known before. If the visitor seeks variety and picturesqueness, there is no region in all the world so full of vivid colour, of populous cities, of buildings designed by master architects of bygone days of diverse races, of absorbing subjects for study and

observation such as the customs, religions, philosophy and art of one of the oldest civilisations.

To the true lover of nature, the botanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain, and wild waste.

To the sportsman, it can furnish sport such as few countries can give, the tiger in the forest, the great mahseer in many rivers, the wily snipe on the pheels, the strong winged duck, the junking pig and many another kind.

To the mountaineer, the Himalayas offer the highest mountains in the world and some of the few famous peaks which are still unclimbed.

To the statesman, businessman or politician who seeks rest and change without idleness, India presents a sense of busy administration, a nation in the making and an experiment such as has never before been tried.

Bombay itself is cosmopolitan like many of the world's great ports and in it you will find jostling each other in the streets representatives of half the races of mankind. The Towers of Silence and the Caves of Elephanta are among the sights to be seen. Elephanta is one of those delightful islands which are freely scattered upon the waters over which Bombay reigns as Queen.

But Bombay is a gateway and through it many interesting trips await the visitor and northwards to Delhi he has the choice of two routes either by the G. I. P. Railway via the Ellora and Ajanta Caves, Sanchi, Gwalior, Agra and Muttra or by the B. B. & C. I. Railway via Biroda and through Rajputana with its famous cities of Mount Abu, Udaipur, Ajmer and Jaipur to Agra and Muttra. If you decide to go by the G. I. P. Railway route you will find at Ajanta frescoes which rival many of the old frescoes found in Europe while at Ellora are the most wonderful caves in the world, mountains cut into colossal sanctuaries. You will be able to compare the work of the Buddhists, the Jains and the Brahmans and learn more of Indian mythology than many hours of study will give you. At Sanchi are Buddhist buildings dating back to 150 B.C. The stone carvings are remarkable and are well worth a visit. As you proceed further north, Gwalior is reached. The great Fort of Gwalior has been described by Jergusson as ‘the most remarkable and interesting example of a Hindu palace of an early age in India’. Seventy miles further on lies Agra and of all the romantic cities of India, Agra must surely come first for it contains that crowning glory in marble, the Taj Mahal. Generations have come and gone since that far day when that most splendid of emperors Shahjehan bowed his head before his wife's coffin in the vault of the finished Taj. The building is better known than any other in the world. Visit it by moonlight and later by

daylight if you must. By moonlight its seduction is irresistible. Sit on the steps by the entrance gate and watch the moon drift above the trees and the ring of silver light stealing round the base of the dome and creeping gently upwards to the pinnacle. See it also in the fading evening light when amber and rose and gold, the sun sinks in the west behind the crenelated ramparts of Agra Fort. If you must visit it in the broad light of noonday then forget the first view from the gateway and wander awhile about the gardens where you will find exquisite glimpses of snowy structures so light and graceful that they seem to rest on air, of buoyant cupola and climbing campanile. Here is grandeur as well as beauty.

The Taj Mahal, however, is only one of the many interesting sights of Agra, and its Fort, Itmad ud Daulah's Tomb, Akbar's Tomb, 5 miles from Agra, and Fatehpur Sikri, the deserted city of Akbar about 23 miles distant are all well worth a visit. No other fortress in the world presents so great an appearance of knightly splendour, of proud and noble dignity or, with a more sovereign grace, crowns its red bastions with so wonderful a collection of palaces, mosques, halls of state, baths, kiosques, balconies and terraces as Agra Fort, a mile and a half in circumference with walls 70 feet high faced with red sandstone. The vigorous style of decorative architecture that Akbar introduced into his red sandstone palaces was embellished by his grandson Shah Jahan who was largely responsible for the delicate inlay work and the low reliefs in white marble. There are no buildings to equal these except those found in the Palace in Delhi Fort which Shah Jahan built when he transferred his headquarters to Delhi. Akbar's vigorous but supremely attractive style appears at its best in Fatehpur Sikri which he built in his joy at the realisation of his fondest hopes when his son Jahangir was born.

There in the year 1569 A.D. on a lonely eminence, Akbar founded his city and there began to rise as if by magic those great battlemented walls, the magnificent palaces and courtyards, the great mosque and the other superb specimens of the skill of the Moghul stone masons which stand to this day a source of endless wonder and admiration to visitors.

The traveller moves northward past Muttra and Brindaban, famous places of Hindu pilgrimage due to their association with the birth and early life of Lord Krishna, until Delhi is reached. Delhi, the capital of India, in days gone by and now the Imperial Capital of India, has no rival in greatness, as all men know that he who holds Delhi holds India. Here the visitor will find much that will interest and enthral him. Here he can trace the growth and fall of dynasties after dynasty, here he will find some of the best examples of the work of the Moghul Period at its zenith as he wanders with muffled feet in the great courtyard of the largest mosque in India, the Jama Masjid, or in Shahjahanabad, the Fort and Palace of Shahjahan whose halls rival those of the palace in Agra Fort with their delicate inlay work in marble and their gardens. Here are crumbling memorials of the Mutiny, Hindu Rao's house, the Kashmir Gate beneath which some still

salute dead Home and Salkhed as they pass, the tree encumbered sites of redoubt and battery, Nicholson's grave, Asoka's pillar, the site of the great Durbar.

Kutab, the first of the so called seven cities of Delhi with its Kutab Minar, 238 feet in height, erected in the 12th century A.D. of red and cream sandstone overlooks the plain where many of the pages of history were written. The Kutab Minar, tapering from the base to the summit, is divided by five corbelled balconies while on the fluting is carved an intricate design in which are introduced verses from the Koran. In the main courtyard stands the famous pillar of solid wrought iron devoid of rust and dating back to about 400 A.D. Visitors to Delhi should not miss seeing the Kutab for it is unique in India.

New Delhi, the eighth city of Delhi, is worthy to rank with its seven predecessors, Kutab, Siri, Tughlakabad, Jahanabad, Ferozabad, Paurana Qila and Shahjahanabad, the present day Delhi. Here you find an example of town planning carried out by some of the leading architects and engineers in the world on a site where they could start with a free hand.

If you decide to take the route northwards from Bombay via Rajputana, then you will see another but equally interesting side of India. Rajputana, the land of chivalry, attracts the visitor as few places do. Alone at Udaipur is there, in its perfection, the fairy palace of one's childhood, just such a long cataract of marble terraces and halls falling into the waters of a mountain encircled lake, as the illustrator of an Andrew Lang fairy book delights to draw.

Mount Abu, the Rajput Olympus, combines the delights of a hill station with one of the historic homes of the gods. The Dilwara Temples, the masterpiece of Jain architecture, contain some of the finest carvings in India. Forests of marble columns, carved and polished till they resemble Chinese ivories, are linked by flying arches that twist and twine from pillar to pillar like exquisite creepers, softening outlines and producing the effect of a symphony of graceful movement.

Northwards from Delhi is the Punjab and the North West Frontier Province whence most of the recruits for the Indian Army come. Here you will find Amritsar, the home of the Sikhs, Lahore, one of the most ancient and famous cities of India, the Khyber Pass, the historic gateway into India from the North, the flourishing cities of the Canal Colonies which have risen up since British Engineers have harnessed the waters of the Punjab 'the Land of the Five Rivers' which formerly ran to waste and many another city. Through the Punjab also you will travel to reach Kashmir, famous since the days of the Moghul Emperors.

The glory of Amritsar is the Darbar Sahib (the Golden Temple). The pavements of the sacred tank are all of marble from Jaipur and the tank itself contains a sheet of water 510 feet square. In the midst approached by a marble causeway, rises the Golden Temple, nearly cubical in form and decorated with wonderful richness.

Lahore grew in importance with the dawn of Moghul supremacy when Babar, the founder

until relieved by Sir Colin Campbell. The deeds of Lawrence who was in command until he was killed and of Havelock who made his historic but unsuccessful attempt to rescue the garrison and was himself besieged are well-known.

Cawnpore is one of the most important industrial cities of India and here you will find up to date factories, a symbol of the West with the teeming bazaars where business is still carried on as it has been done for generations.

Northern and Central India is, however not the only interesting part of India and the South can show you sights unlike those in any other part of the World. South India is a land of temples, full of the most wonderful carving while Mysore one of the most progressive Indian States, can show you fine buildings, falls higher than Niagara and wonderful scenery.

Madras is the capital of the Madras Presidency and the third largest town in India and the Presidency includes that part of India which was one of the first in which English and other foreign nations settled. The visitor will still find in the large houses belonging to the merchant Princes with their far spreading compounds in the conveniences still used by the local inhabitants and in the scenery, which is the India of the old picture books, traces of what India used to be when first the English settled there.

Mysore commemorates in its name the destruction of Mahishasura, a minotaur or buffalo headed monster by Chamundi, the form under which the consort of Siva is worshipped as the tutelary goddess of the ruling family. Mysore State is a picturesque land of mountain and forest presenting the most diversified and beautiful scenery. The Capital which bears the same name is the state is a city with many fine buildings and a visitor to India who wishes to see the working of an up to date Indian State situated among wonderful scenery cannot do better than visit Mysore. Elephants cannot throughout the southern forests and from time to time keddah operations are undertaken when wild elephants are captured in stockades. Tigers, leopards and bears are numerous and bison are found in certain forests. The famous Gersoppa Falls present one of the most beautiful sights of wild untamed nature to be found in India. Many of the temples contain examples of the finest carving and Srirangapatam famous as the capital of Tippu Sultan and about nine miles from Mysore is well worth a visit. For those who are travelling from Bombay to Colombo an interesting trip can be arranged via Mysore.

At Madura and Trichinopoly will be found examples of some of the best and most interesting work in South India.

Madura has been aptly described by European scholars as the Athens of South India and from time immemorial has been the abode of South Indian culture in all its aspects.

It contains one of the finest and largest temples in South India and unlike many other temples the tourist is allowed to wander without restrictions over most of it. Near Shiva's shrine and in

the hall of Vantipam of a Thousand Pillars can be seen some of the finest carving in stone in all the world. The workmanship is so fine, the chiselling so delicate that one is lost in silent admiration as one looks at the representations of the Hindu Pantheon and at the graceful figures of men, women and animals.

Trichinopoly is noted for its rock temple and about three miles away is Srirangam with its famous temple which is claimed as the earthly abode of Vishnu the Lord of Creation.

No one visiting India should miss the opportunity of seeing Burma for it is a country of extraordinary charm, a country of contrasts. Whatever be your hobby, whatever be your interest, be it sport, history, ethnology or botany, or should you be merely fond of beautiful scenery you will find a greater variety in Burma than in probably any other country. You can see huge snowy ranges and Alps spangled with rhododendrons and flowers unknown to science. You can find magnificent jungles almost impenetrable to man, bordering rushing torrents, or yet against you can see emerald green paddy fields and great winding rivers in the plains. Should you be adventurous and seek the wilder regions you will find great gaps in the frontier unvisited by civilised men and peopled by head hunters, Chins, Nagas and the fierce Black Lisu. Yet you will also find civilisation in the big cities like Rangoon and Myittha. Rangoon, the capital, is of special interest in that it possesses the famous Shwe Dagon Pagoda, the Sacred Golden Pagoda visited by more pilgrims than any other Buddhist Temple in Indo China.

This short account of India is not intended to be comprehensive and does not even mention many of the interesting places to be visited, but it is hoped that it will give some indication of the wonderful pageantry, the magnificent buildings of an older age, the sport, and the many things of interest which India and India alone can offer.

December, January and February are the most pleasant months for a visit to India. The days are pleasantly cool and except on the seaboard the nights are cold. India speaking broadly has no winter except in the far north. It is a land of sunshine and colour. But the traveller arriving before November or staying in the country beyond the month of March must expect to find the tropical sun asserting its sway unless he wends his way to far Kashmir or to one of the hill stations of India, Simla, the summer capital of India, Darjeeling the delightful or one of the many others situated among the hills of India.

Standard Tours

The planning of an itinerary for an Indian or Burman tour will depend upon the port of arrival, the port of departure, personal desires of the party and the time available. Any of the leading tourist agencies such as Thos Cook & Son, Ltd, the American Express Co, Cox & Kings (Agents) Ltd, Army & Navy Stores, Grindley & Co, etc, and the Publicity Officers of all the more important Railways as well as the Manager, Indian Railways Publicity Bureau, 57, Haymarket, London, and the Resident

Manager, Indian Railways Publicity Bureau, "Delhi House", 38 East 57th Street, New York, will work out tours to suit the convenience of individual parties. Many of the leading tourist companies will also arrange for inclusive and conducted tours. There are certain places, which are very well known such as Delhi, Agra, Benares, Darjeeling, Jaipur, the Khyber Pass, Kashmir and Mysore, but there are innumerable other places almost as well known containing sights which cannot be equalled in other parts

of the world. Puri, Lucknow, Amritsar, Udaipur, Mount Abu, Gwalior, Ellora and Ajanta Caves and Madurai are a few of them while in Burma, Mandalay and, the famous old cities of Ava and Amarpur nearby are well worth a visit.

A selection of itineraries for long and short tours in India and Burma is given below. These show what can be seen in certain periods of time, but they can be varied to suit individual parties or taken in the reverse direction.

Tour No 1 —4 weeks —Bombay, Udupur, Japur, Peshawar, Lahore, Amritsar, Delhi, Agra, Cawnpore, Lucknow, Benares, Darjeeling and Calcutta

Alternatives (a) Puri and Konarak in place of Darjeeling

(b) Gwalior, Sanchi, Lillora and Ajanta Caves in place of Japur and Udaipur

	1st	2nd	Servants 3rd
Total fare (approximate) on the basis of return tickets at 1½ single fares Calcutta—Darjeeling and Delhi—Peshawar	Rs 361-8 £ 27 \$ 120	186-4 14 62	65-12 5 20

Tour No 2 —2 weeks —Bombay, Udupur, Japur, Delhi, Agra, Gwalior, Sanchi and Bombay
Alternative Benares in place of Gwalior and Sanchi

	1st	2nd	Servants 3rd
Total fare (approximate)	Rs 192 £ 15 \$ 69	96 7-10 34	32 2-10 11

If the alternative is taken the fares are increased by about one quarter

Tour No 3 —1 week —Delhi, Lahore, Amritsar, Peshawar and Delhi

	1st	2nd	Servants 3rd
Total fare (approximate) on basis of return tickets at 1½ single fares	Rs 90 £ 7 \$ 25	45 3-10 13	16-2 1-5 4

Tour No 4 —10 days —Bombay, Poona, Mysore, Madras, Trichinopoly, Madurai and Colombo

	1st	2nd	Servants 3rd
Total fare (approximate)	Rs 212 £ 16 \$ 66	107 8 34	39 3 12

NOTE—If extra time can be allowed at Mysore, Somnathpur, Gersoppa Falls and Ootacamund can be visited

Tour No 5 —2 weeks —Colombo Madurai, Madras, Mysore, Ootacamund, and Colombo

	1st	2nd	Servants 3rd
Total fare by train (approximate)	Rs 222 £ 20 \$ 63	124 10 32	45 3-10* 11

NOTE—An interesting trip can be made after leaving Ootacamund via Cochin where the white Jews live, along the backwaters to Alleppey and Quilon by motor launch and motor car, down to Trivandrum, the capital of Travancore, by train, and by motor car to Cape Comorin, the southernmost point of India and, back via Trivandrum and Madurai to Colombo. This would take about seven days.

* Motor Mysore Ooty from Rs 75 additional per car

Tour No 6—1 week—Rangoon, Mandalay, Gokteik Viaduct, Mandalay—Rangoon

	1st	2nd	Servants 3rd	Revised fare by rail
Total fare (approximate)	Rs 70 £ 5 \$ 25	35 3 13	12 1 4	1st ret 102 3 0 2nd „ 51-2 0 3rd „ 17 2 0

NOTE—Many interesting trips off the beaten track can be made in Burma, but special arrangements are necessary

For any visitor landing in Calcutta, it is possible to visit Benares, Agra, Delhi, Jaipur, Bombay, Mysore, Madras, Trichinopoly and Madurai and still reach Colombo on the 14th day, but this entails sightseeing by day and travelling most nights and is not recommended for the ordinary visitor. A very attractive tour can, however, be worked out for a similar trip over a period of four weeks either allowing more time at the more important places or including other of the places mentioned in Tours 1 and 4 such as Darjeeling, Puri, the Khyber Pass, Lahore and Amritsar, Udaipur, etc.

Travelling in India is not expensive when

the long distances travelled are taken into consideration. The first, second and Indian servants fares are shown at the end of each tour. Hotel expenses average about Rs 15 (22/6 or 5½ dollars) per person a day except when special rates are charged during certain special periods, while a motor car for the day can be hired for Rs 25 to Rs 30 (38/6 to 45/ or 9 or 11 dollars) a day in most places, except when long distances have to be covered. Where the distances are short, tongas and two horsed landaus can be used and the daily charges vary from Rs 3 8 to Rs 9 (5/- to 13/6 or 1¼ to 3½ dollars). Guides with a good knowledge of English can be obtained from Rs 5 to Rs 10 (7/6 to 15/- or 2 to 4 dollars) a day.

HOTELS IN INDIA, BURMA, CEYLON AND MALAYA.

AGRA—Cecil, Laurie's Great Northern, Imperial

PENANG—Eastern and Oriental, Runnymede
SINGAPORE—Adelphi, Europe, Raffles, Sea-View, Riviera

Hill Stations

In India especially during the months of April and May, and at Christmas time, everybody tries as much as possible to take a holiday in the hills. Being anything from 2,000 to 8,000 feet above the level of the sea and difficult of access for motor traffic, the hill stations are delightfully cool and peaceful. Here one can usually ride, walk, play tennis and golf, or simply laze in beautiful surroundings and forget all about the trials of work and jangle of heat. These are the principal hill stations in alphabetical order—

Darjeeling (5,000 ft)—From Darjeeling the highest mountain peak in the world can be seen. The temperature averages 27° above that of London all the year round; that is, it neither exceeds 80° in summer nor falls below 30° in winter. Darjeeling is the summer seat of the Government of Bengal. To reach it, the traveller must start from Calcutta by taking train to Siliguri, a journey of 10 hours. From Siliguri the journey is completed either by motor or hill railway in about 6 hours. The principal hotels in Darjeeling are the Mount Everest, the Grand (Rockville), and the Park.

Kangra Valley—The Kangra Valley is situated about 100 miles east-north-east of Lahore at the foot of the Dhaulai Dhar Range of the Himalayas. There are magnificent landscapes and many historic temples and buildings. The visitor must take train from Lahore to Pathankot where he changes over the newly-opened narrow-gauge railway running between Pathankot and Jalandhar, or in Mandi State. Places to stay at are Dalhousie, Dharmshala and Kangra. The best hotels at Dalhousie are Stiffles Grand View and the Arramoor, and at Dharmshala the Swisses.

Kashmir—Perhaps the most famous beauty spot in the world can be reached by taking train (either G. I. P. or B. B. & C. I.) from Bombay to Rawalpindi (about 18 hours) whence the remainder of the journey is accomplished by motor. The average height of the valley is about 6,000 feet, and it is entirely surrounded by the lofty, snow-capped ranges of the Karakoram and Himalaya. Visitors usually stay either at Srinagar or Gulmarg. At Srinagar one can live at Nedou's Hotel or in boarding houses, or one can hire a houseboat and live on the River Jhelum. At Gulmarg Nedou's is the only hotel. As at Srinagar visitors usually take up their quarters in wooden huts rented through the Srinagar agencies or in tents.

Kodaikanal (7,000 ft)—Regarded by many as the most beautiful of South India's hill stations, is situated on the precipitous southern side of the Palni Hills overlooking the plains. Reached by metre gauge from Madras to Kodaikanal Road and thence by a 4 hours' motor run. The Carlton is the principal hotel. There are also boarding houses.

Matheran (2,500 ft)—The nearest hill station to Bombay, ideal for walkers and anybody wanting rest and quiet. Reached by taking train from Victoria Terminus, Bombay, to Neral (about 1½ hours) whence Matheran may be reached by hill railway (2 hours) or by pony, rickshaw, or on foot by a good walker. Stay at the Rugby Hotel.

Mahableshwar (4,500 ft)—Until recently when expenditure had to be cut down the summer seat of the Government of Bombay. Those who do not motor the whole way from Bombay a distance of about 180 miles, usually take train to Poona and then hire a car from Poona to Mahableshwar. Mahableshwar is noted for its delightful vegetation, orchids and lilies bloom in April and May. Hotels—Race View and Loderick.

Mount Abu (4,500 ft)—An ideal place for combining the pleasures of a mountaineering holiday with the interests of an archaeological excursion. Reached by B. P. & C. I. trains to Ahmedabad, thence by metre gauge to Abu Road, whence the journey is completed by car. The Rajputana Hotel is recommended. There is also a Dak Bungalow containing four furnished rooms, permission to use which must be obtained from the Assistant Engineer, P. W. D., Mount Abu.

Murree (7,000 ft)—The summer headquarters of the Northern Command. Magnificent views and walks. Visitors take train to Rawalpindi whence they complete the remaining 57 miles by car. The principal hotels are the Cecil and the Newforth.

Mussoorie (7,500 ft)—Much frequented on account of its exceptionally fine climate. Reached from Bombay by G. I. P. or B. B. & C. I. trains to Dehra Dun, a journey of 35 hours, where it is necessary to change over to motor which reaches Mussoorie about 6 hours later. The leading hotels are the Cecil, Charleville, Hackman's Grand, and the Saxo.

Naini Tal (6,500 ft)—Is the summer residence of the Governor of the United Provinces. From Bombay there are two ways of getting there. The first is to take either G. I. P. or B. B. & C. I. train to Muttra, thence by metre gauge to Kathgodam, and thence by motor (2 hours). The second route which takes about 5 hours longer is to take G. I. P. train to Lucknow and then change over to the metre gauge railway. The Grand, Metropole and Royal are the best hotels.

Ootacamund—Familiarly known as Ooty is situated on the famous Nilgiri Hills at an altitude of 7,500 feet. The mean average of temperature for the year from sunrise to sunset is 57.33 degrees. Ootacamund is the administrative centre of the District and the seat of the Madras Government for six months of the year.

from April to September Reached either by taking train to Mysore (40 hours from Bombay) and then changing to motor car for five hours, or by taking train to Mettupalayam via Madras and thence by hill railway to Ootacamund The principal hotels are the Snow and Cecil

Pachmar (3,500 ft)—Situated on a plateau in the Mahadeo Hills, is the summer quarters of the Government of the Central Provinces A delightful hot-weather health resort Reached by G I P railway to Pipariya via Jabulpore, and a two hours motor journey The best hotel on the Hill

Simla (7,000 ft)—The summer headquarters of the Government of India, is situated on several small spurs of the lower Himalayas Towards the end of September, and in October and November Simla enjoys the best climate in the world Reached from Bombay by taking G I P or B B & C I train to Kalka and thence either by hill railway or motor There are many good hotels and boarding houses The leading hotels are the Cecil, Clarke, Corstorphans, Grand, Gables (at Mashobra) and Wildflower Hall (Mhasu)

CLIMBING IN THE HIMALAYAS

Owing to their immensity and the time and cost involved in undertaking expeditions into the Himalayas a great deal of mountaineering and exploration remains to be done in the world's highest mountain range There are over fifty summits of 25,000 ft and of these only one, Kamet (25,447 ft) has been scaled, whilst there are innumerable lesser summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible The highest peak is Mount Everest, which by latest measurements is 29,141 ft Next come Kanchenjunga and K2, both about 28,150 ft, though which is the higher of the two is not certain

Pioneer Climbers—Mountaineering in the Himalayas began some eighty years ago when surveyors crossed high passes and scaled peaks in the course of their work Among these pioneers must be mentioned the Schlagintweit brothers, who in 1855 reached a height of 22,329 ft on the Eastern Ibi Gamin one of the subsidiary peaks of Kamet, whilst I S Pocock of the Survey of India set up a plane table at 22,040 ft in the same district Another notable early explorer was the famous botanist Sir Joseph Hooker who, in 1849, explored the Sikhim valleys of Kanchenjunga and made attempts to climb Kanchenjunga, 22,700 ft and Pauhunri, 23,180 ft Some remarkable explorations were also carried out by the Pandits of the Survey of India Among these men was Babu Sarat Chandra Das who traversed the Jonsong La, 20,200 ft

Later in the nineteenth century came Sir Martin (now Lord) Conway who, in 1892, made explorations in the Karakoram Himalayas, particularly in the region of the Baltoro Glacier the greatest of Himalayan glaciers, and climbed a peak of 23,000 ft Sir Francis Younghusband also made explorations in the Karakoram and accomplished the first crossing of the Karakoram

Pass The Duke of the Abruzzi also made a number of expeditions into this range and reached a height of 25,000 ft on the Bride Peak Mountaineering developed rapidly in the "nineties", and a bold attempt was made by A F Mummery, Professor N Collie and Brigadier General the Hon C G Bruce to climb Nanga Parbat In a final attempt on the mountain Mummery and his two Gurkhas were lost In 1899 D W Freshfield made the first circuit of Kanchenjunga and explored the Nepali side of the mountain

A New Phase—Meanwhile, thanks to Brigadier General Bruce, Gurkhas, and later Sherpas and Bhutias were trained for mountaineering and, with the advent of first class portage, Himalayan mountaineering entered on a new phase Dr and Mrs Bullock Workman made a number of expeditions into the Karakoram and W W Graham made a number of remarkable ascents, with Swiss guides, including an ascent of Kabru 24,000 ft, which has been the subject of much controversy Kabru was later attempted by two Norwegians, Messrs Rubenstein and Monrad Aas who got within a few feet of the top

The present century opened with a number of remarkable ascents by Dr A M Kellas, who died during the 1921 Everest expedition He climbed several great peaks including Kanchenjunga, Pauhunri and Chomomo and made expeditions to the Central Himalayas where, with Colonel H T Molshed he reached in 1920 an altitude of 23,500 ft on Kamet

In 1907 Brigadier General Bruce, Dr T G Longstaff and A L Mummery explored the Garhwal Himalayas and reconnoitred Kamet After this Longstaff, with the Swiss guides Alexis and Henri Brocherel, ascended Trisul, 23,406 ft which, until the Jonsong Peak, 24,344 ft, was climbed in 1930 remained the highest summit reached In 1911 and 1912 attempts were

made to climb **Kamet** by C F Meade and his Swiss guides and a height of 23,500 ft was gained. Captain Morris Shingsby also attempted **Kamet** at this time.

Attempts on Kanchenjunga—The first attempt on **Kanchenjunga** was made in 1905 but ended in disaster, Lieut Piche and three porters being killed by an avalanche. The second attempt in 1929 was made by a solitary American, E F Farmer, who lost his life. In the same year a determined attempt was made by a party of Bavarian Mountaineers led by Paul Bauer. A height of over 25,000 ft was reached on the north east spur before bad weather forced the party to retreat.

In 1930 a fourth attempt was made by an International expedition led by Professor G Dyhrenfurth. The party attempted the mountain from the Nepal side, but were repulsed by an ice avalanche which killed one of the porters. Subsequently, they ascended a number of peaks including the **Pamthang Peak**, 23,200 ft and the **Jonsong Peak** 24,344 ft.

The fifth attempt in 1931 was made by Bauer and his party, but failed at a slightly greater elevation than was attained in 1929. One of the party H Schaller and a porter were killed by a fall during the expedition.

In the summer of 1931 a party of young British climbers led by Mr F S Smythe succeeded in reaching the summit of **Mount Kamet** (25,447 ft) the highest mountain peak, though not the highest altitude ever reached by man.

Mount Everest—A description of the attempts to climb **Mount Everest**, the highest mountain in the world, may be divided under three headings: the reconnaissance expedition of 1921, the first attempt in 1922 and the second in 1924. A still further attempt is being made at the time of writing, in April, 1933.

The preliminary expedition for the reconnaissance of the approaches to **Mt Everest**, carried out its work in the most complete manner under the leadership of Lt-Col C K Howard Bury. The approaches to **Mt Everest** on all its northern faces were thoroughly examined, and relations were established with all the local authorities. On the information and experience of the reconnaissance expedition the second expedition to **Everest** was organised and set off the following year under the leadership of Brig-Gen the Hon C G Bruce. Capt G I Finch and Capt J G Bruce succeeded with the help of oxygen in reaching the height of 27,300 ft. During this expedition seven men were killed when an avalanche swept them over an ice cliff some 60 feet high.

The 1924 expedition was again commanded by Brig Gen Bruce. But owing to his ill health Lt-Colonel E F Norton took on the command. Lt Col E F Norton and Dr T H Somervell reached a height of 28,200 feet. Then a final attempt was made by G L Mallory and A C Irvine. They were assisted by a supporting party consisting of N E Odell and J de V Hazard. On June 6th they left the 25,000 feet camp with three porters who carried loads for them up to 28,800 ft. On June

8th they left camp for their attempt and were never seen again. On June 10th for the third time Odell climbed up to the 27,000 feet camp but could find no sign of Mallory and Irvine, and communicating with Norton evacuated the mountain.

The expedition of 1933 followed a successful effort by Lt Col J L R Wen, Political Officer in Sikkim, to obtain the permission of the Tibetan Government for a further attempt to climb the mountain. An **Everest Committee** was formed under the regis of the Royal Geographical Society and the Alpine Club and Mr Hugh Ruttledge, formerly of the ICS, accepted its invitation to take charge of an expedition. Included in its members were Mr F S Smythe, leader of the successful **Kamet Expedition** of 1931, and Capt E St J Burnie, E E Shipton and Dr C R Greene climbed **Kamet** with Mr Smythe in 1931. The Expedition reached Calcutta in February and forthwith proceeded to its main task.

The expedition established its base camp in the **Rongbuk Valley** on April 17th and on April 21st Camp I was established. Thenceforward the expedition was dogged by exceptionally bad pre monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col 23,000 ft prolonged and arduous work. Camp IV, 22,800 ft was not established until the middle of May after a 40 feet ice wall on the North Col slopes had been climbed. The expedition was equipped with wireless which enabled weather reports to be received from the meteorological authorities at **Alipore**. One installation was at **Darjeeling**, one at the base camp and a third at Camp III, 21,000 ft. Camp III was linked to the North Col by field telephone so that messages could be received up to 23,000 ft from the plains of **India** in a short space of time.

Owing to a series of blizzards and high winds Camp V was not established until May 22nd. But it was pitched at 25,500 ft several hundred feet higher than previously. The party was then cut off for three days by a furious blizzard and eventually had to retreat to Camp IV. The Camp was re-established on May 28th and on May 29th Wyn Harris, L Wager and J L Longland continued the ascent and finally pitched Camp VI at 27,400 ft, 600 ft higher than in 1924, after a magnificent effort on the part of the porters. Longland then brought the porters down but had a terrible time in a blizzard and only by exercising great mountaineering skill steered them down to Camp V. The following morning Wyn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north east ridge finally followed the same route as Norton in 1924. They were stopped by dangerous conditions at 28,100 ft and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V, after which they descended to Camp V. The following morning Shipton and Smythe were unable to leave Camp VI owing to a high wind but on June 1st they made their attempt on the summit.

An hour and a half after leaving the **Camp Shipton** had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wynn Harris

and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frostbites, strained hearts, and high altitude deterioration the party had to retreat to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

Aerial Expedition.—An interesting side to the exploration of Everest was an aerial expedition undertaken in 1933 for the purpose of photographing the mountain from the air. This venture was financed by Lady Houston. Major F. A. S. Blacker, formerly of the Gull, was its leader and in charge of its survey, while Lord Clyde, late chief pilot of the R. A. F., and Major P. J. Fotherton, of the London Marys, were two specially equipped aeroplanes. Adaptations of the well-known Wapiti were provided. A special point in their equipment was the provision of compressed oxygen for supply through gas masks to the aviator at high altitudes. The expedition was not permitted to fly across the Tibetan frontier so as to circle Mt. Everest but both machines successfully flew over the peak and several good photographs were taken of it. By permission of the Nepal Government a line of sight from Purnea, the base of the expedition across Nepal territory to Mt. Everest was taken and along this good survey photographs and the somewhat poor visibility at the time of the flight, in April, permitted.

An interesting mountaineering of which details were published in 1933 was one from Risalpur to Gilgit and back undertaken by the R. A. F. at Risalpur in the course of its routine duties in October, 1932. The expedition was commanded by Lt. Isaac and was made by five of the machines ordinarily in use by the Force. The distance from Risalpur by way of

the Indus Valley and past Naran Pargat to Gilgit is 256 miles. It was covered in 2 hrs. 20 min. on the outward flight and in 2 hrs. 5 min. on the return journey. From Gilgit the machines further proceeded upon flights over the Hunza, Nagar and Pablik areas. Prilliant photographs of Naran Pargat and Pablik were well as of other parts of the region of interest.

The year 1932 saw a successful expedition to Mount Naran Pargat. It was conducted by Dr. Merill of the Gull and included Lt. Isaac, former of the Gull, and Major P. J. Fotherton, of the London Marys. Several of the machines of the R. A. F. were used to transport the expedition to the summit of the mountain in August, 1932, before the arrival of the winter.

Mr. Hugh Pathe, who died during 1932, a valuable recognition of the S. F. Banks of the Great Eastern Insurance Co. Ltd.

It was also a success for the R. A. F. in 1932, when climbing on the highest peak in the Himalayas.

Several expeditions have lately been made into the Himalayas by members of the Himalayan Club, especially expeditions into Sikkim by members of the Indian Survey.

The Himalayan Club.—Was founded on 17th February, 1925, at New Delhi with the object of encouraging and assisting Himalayan travel and exploration and extending knowledge of the Himalayas through education, literature and sport. The initiation of the Club was due to the Hon. Sir George Curzon, Secretary, Commerce Department of the Government of India and to Major Kenneth Mason, M.C., I.C.S., Assistant Surveyor General. Its membership is over 150 including three lady members and its president is H. J. Sir Malcolm Hailey, who has, however, recently sent in his resignation on the ground that he now resided too far from the Club Headquarters. Major W. L. O. Swiss is Hon. Secretary.

The New Capital.

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential. Its disadvan-

tages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change. Various places had been discussed as possible capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour, and as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital was laid by the King Emperor on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhi of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manured. It is not encumbered with monuments and tombs needing reverent treatment and the site is near the present centre of the town of Delhi. A Committee consisting of Surge-General Sir C P Lukis, Mr H T Keeling, CSI, AMICL, and Major J C Robertson, I M S, was appointed to consider the comparative healthiness of the site and of an alternative one to the North of the existing city. Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

The Town Plan and Architecture—A report by a Town-Planning Committee, with a plan of the lay-out, was dated 20th March 1913. Work was begun in accordance with it and its main lines have been followed throughout. The central point of interest in the lay-out, which gives the motif of the whole, is Government House, and two large blocks of Secretariats. This Government centre has been given a position at Raisina Hill near the centre of the new city. Sir Edwin Lutyens is the architect for Government House and Sir Edward Baker for the Secretariats. The former building is estimated to cost approximately Rs 140 lakhs and the latter groups were originally estimated to some Rs 124 lakhs. The provision made in the design of the Secretariats for extensions in case if used has already partly been utilised. The Secretariat personnel has largely increased in the past few years and numerous additional rooms had to be provided to make room for Army Headquarters, which moved into the new capital at the end of the Simla season, 1929. To the east of the forum, and below it, is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indraprastha. Across this main axis runs an avenue to the shopping centre. Other roads run in different directions from the entrance to the forum. The axis running north-east towards the Jama Masjid forms the principal approach to the new Legislature Chambers. They are officially described as the Council House and the road is named Parliament-street. The railway station for the new city finds its place about half way between the old and new cities off the road through Palyangun, which lies to the west of Old Delhi in the direction of The Ridge. The main roads or avenues range from 76 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

For a temporary capital, for the use of the Government of India during the period of the

building of the new capital an area was selected along the Alipur Road, between the existing civil station of Delhi and the Ridge. The architecture and method of construction were similar to those adopted in the exhibition buildings at Allahabad in 1910 but the buildings have outlasted the transitional period for which they were intended. Army Headquarters were still housed in them in the winter until the season 1929-30. They are now occupied for various purposes including the temporary accommodation of Delhi University.

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 398,269 and of the new area 14,552, or a total of 412,821. The population of the Municipal town of Delhi was 2,29,144. The plans of the New Capital allow for a population within it of 70,000. Its present population is approximately 40,000. Sites have been allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the new city, and several of these habitations have been erected.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been the aim "to express within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features without abandoning the architect's aim to avoid doing violence to the principles of structural fitness and artistic unity.

Cost of the Scheme—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors have since then increased the amount, the chief of these being the immense rise in prices since the war, and the Legislative Assembly were informed by Government on 23rd March 1921, that the revised estimates then amounted to 1,307 lakhs of rupees. This amount includes allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates. The New Capital Enquiry Committee, in its report published in January 1923, estimated the total expenditure at Rs 1,292 lakhs including Rs 42 lakhs for loss by exchange. Actual expenditure upto approximately the end of 1929 was Rs 14 crores. This may be taken as the figure for the completion of the main project.

The Project Estimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest on the capital.

[illegible]

A non official Member in the Legislative Assembly on 25th September, 1921 at Simla moved a recommendation to Government "to appoint a Committee to inquire into the possibility of establishing a permanent capital of India in a place possessing salubrious and temperate climate throughout the year". This proposal was ridiculed by a majority of his non-official colleagues and was eventually rejected without a division.

At the Viceoy (Baron Irwin) proceeded in state to the new Legislative buildings henceforward to be known as the Council Buildings and formally declared them open on 18th February 1927. The Indian Legislature began its sessions in them next day.

During 1928, official and public attention became focussed on the need to effect drastic improvements in some of the crowded areas of the old city and to provide for its expansion and for suburban developments. This led to

Art Decorations—The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in by the beginning of March 1928 small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and, if finally approved by the Committee, fixed according to the margin

the examination of the possibilities of the arising between the old and new cities and of the desirability of driving connecting roads through the City walls in order to give access outwards in this direction. The old city is now rapidly expanding in a westerly direction, i.e., towards and up the Ridge, which runs behind both cities and the spaces between the two cities are being developed and utilised. So far the plan for a direct thoroughfare from the midst of the new city through the old city wall to the middle of the old city has not been proceeded with and consequently the magnificent thoroughfare, name Parliament Street, which was constructed for the purpose in New Delhi remains in a truncated condition. The Delhi Municipal Committee late in 1933 declined to co-operate in a completion scheme, on the ground that it would result in changes in property values in the old city to the disadvantage of many owners. The Medical Officer of Health of the old city in his latest reports gravely stresses the ill effect of its overcrowded state and in this he is borne out by the Municipality in its reports.

H E the Viceroy on 10th January 1930 laid the foundation stone of a large European and Indian General Hospital to be built in the course of the next few years at a cost of Rs 75 lakhs for the service of both old and new cities. This would provide 254 beds and the necessary laboratories and administrative and residential quarters. No progress has yet been made with the building work on which has for financial reasons been postponed.

All India War Memorial—H R H the Duke of Connaught on 10th February, 1921, laid the foundation stone of an All India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's sake proceeded with slowly. The memorial was formally inaugurated by Lord Irwin in February, 1931.

The Memorial takes the form of a triumphal arch spanning Kingsway, the avenue running down the centre of the Vista. It is generally similar to the Arc de Triomphe in Paris but is simpler. The monument reaches a height of 160 feet and the inner height of the arch is 87 feet 6 inches and its breadth 70 feet. Over the arch on both fronts appears in capital letters the single word INDIA and this is flanked on each side by the initials MCM (i.e., 1900) whilst immediately below them on the left hand are the initials XIV (i.e., 14) and on the opposite side the figures XIX (i.e., 19). Above the Arch is a circular stone bowl 11½ feet in diameter. A column of inoffensive chemical smoke ascends from this on ceremonial occasions and anniversaries and is illuminated by electric light reflections after dark. The memorial is solely Indian in purpose and bears the names of British and Indian officers and NCOs men of the Indian regiments who fought on the Indian Frontier in the Great War (those fought on other fronts being commemorated by memorials erected in those countries).

Public Institutions—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connexion a conference of Chiefs and Political Officers was held at Delhi at which the Viceroy presided. The proposal is still under consideration. To implement it would require an estimated capital outlay of Rs 12½ lakhs.

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential University of Delhi, the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university must be a matter of time and it was, therefore, decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. The initial work of organisation was quickly effected by the Executive Council. Unfortunately, the inability of the Government of India to allot considerable funds was a severe handicap. It was hoped that H E the Viceroy would be able to lay the foundation stone of the university buildings in November, 1922, but this proved impracticable. The general question of the finances of the University was in 1927 the subject of inquiry by a special Committee appointed by Government for the time being the University was housed in the temporary buildings in old Delhi occupied by the Civil Secretariat until 1929 and in 1931 Old Viceregal Lodge was allocated to it for its future home.

The new city was the scene of notable inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone, surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones erected in various parts of the land by Asoka and were presented by Canada, Australia, New Zealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the ceremony of unveiling. New Zealand nominated a Member of the Government of India to act in her behalf for the same purpose. The second great ceremony was the inauguration of the War Memorial. This was performed in State by His Excellency the Viceroy in the presence of representatives of every unit of the army in India of the Royal Air Force and of a large concourse of official and other spectators. There was a large popular fete on the ground lying below the old Fort and between it and the river Jumna. Their Excellencies the Viceroy and Lady Irwin arranged a programme of festivities at the Viceroy's House. A New Delhi Municipal Committee with its own permanent official Chairman and Secretariat was established in 1932.

Freemasonry in India.

In 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfrett, Esq., authorising him to "open a new Lodge in Bengal". Of this personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, a Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No 72 at Bengal in the East Indies". The next Provincial Grand Masters were James Dawson and Zeeh Gee, who held office in 1740 after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Clive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17th, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Mr. Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master". This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767, but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762 to John Blinnett, Commander of the "Admiral Watson," Indian Army for East India where no other Provincial Lodge is to be found. Middleton's election was confirmed October 31st, 1768 and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774 and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol of Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

Madras—The earliest Lodge in Southern India (No 222) was established in Madras in 1752. Three others were also established about 1766

In the same year Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1782 established a Provincial Grand Lodge and both these Provincial Grand Bodies continued working peaceably side by side until the Union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the Initiation in 1774 at Trichinopoly of the eldest son of the Nawab of Arcot, Umdat-ul Umra, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed". This document is now stored in the archives of the United Grand Lodge.

Bombay—Two Lodges were established in this Presidency during the 17th century, Nos 231 at Bombay in 1758 and 569 in Surat in 1768, both of which were carried on the lists until the Union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Moria was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Deccan". Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge 'Orion-in-the-West' was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which however left no trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members who obtained a warrant, on the recommendation of the parent Lodge, from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in the West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge Coast of Coromandel. It was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No 818 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded but in 1836 Dr James Burnes was appointed by the Grand Lodge of Scotland, F G M of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweeddale was absorbed within the jurisdiction of Dr Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub division of the Presidencies. Burnes may be best described as being in 1836, in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, *whom nature had endowed with all the qualities requisite for Masonic Administration*, soon got to work and presented such attractions to **Scottish Freemasonry** that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels, furniture and belongings, and the charge was accepted by Scotland. This Lodge still exists in Bombay and now bears No 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St George No 807 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burns established a Lodge "Rising Star" at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul-Umra has borne fruit, resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East, a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1861.

The Grand Lodge of England—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of

Ireland and the Grand Lodge of Scotland hold jurisdiction in India. By far the largest is the first the next largest is the third and the number of Lodges under Ireland is as yet small. The Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed.

Bengal

- 79 Lodges Rt Wor Bro Eric Studd, P G D, M L A, Dis G Master, D, D G M, Edward A H Blunt, C I E, O B E, I C S Assist D G M, F W Hockenhill, P G D

The Grand Lodge of Scotland exercises its rule through a Grand Master of all Scottish Freemasonry in India, who is elected by the Brethren subject to confirmation by the Grand Master Mason of Scotland. Dr Sir Temulji B Nariman, Kt, is the present incumbent of the office, and controls 78 Lodges. Under him the several districts are in charge of the following Grand Superintendents—

Lt-Col R W Castle, C M G, G Supdt, Northern India

G Lindsay, G Supdt, Central India

The Hon'ble Lt-Col Sir Terence H Keves, C S I, C M G, K C I E, G Supdt, Southern India

L H Emeny, G Supdt, Eastern India

F B Ady—Burma

The Grand Secretary is R W Bro Khan Bahadur J C Mistree, J P, 17, Murzban Road, Fort, Bombay

The Grand Lodge of Ireland granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Province, there being two already, viz English and Scottish, the Grand Lodge of Ireland declined to grant the warrant. In 1911, however, a warrant was sanctioned for the establishment of Lodge "St Patrick" and since that year three other Lodges have sprung into being, one of which is now defunct.

Scientific Surveys.

Zoological Survey of India—It was established in 1916, when the Zoological and Anthropological Section of the Indian Museum was converted into a Survey on a basis similar to that of the Geological and Botanical Surveys. The Indian Museum itself dates back to 1875, and at the outset the Zoological and Anthropological collections consisted almost entirely of material handed over by the Asiatic Society of Bengal, whose members had been accumulating systematic collections since 1814. Organised zoological investigation in India has thus been in continuous progress for nearly 120 years. From the foundation of the Museum in 1875 to the time when the Zoological and Anthropological Section was established as a separate Survey, the Curator (or as he was subsequently termed, the Superintendent) of the Indian Museum has been a zoologist and among the officers who have held the appointment have been such well-known members as Anderson, Wood-Mason, Alcock and Annandale.

With the exception of the Director (Lieut.-Colonel R. B. Seymour Sewell F.R.S.) all the officers are Indian. The main functions of the Survey are to investigate the fauna of India and to arrange and preserve the section in the Zoological and Anthropological galleries of the Indian Museum. In addition the Survey issues two series of publications upon Zoological research, namely *The Records* and *The Memoirs* of the Indian Museum.

Mammal Survey—The Survey was instituted in the year 1912 with the object of making as complete a study as possible of the occurrence and distribution of Mammals in India, Burma and Ceylon, and with the further object of supplementing the collection of Indian Mammals at the Bombay Natural History Society's Museum and at the British Museum as well as at the Natural History Museums in India. The primary object of the Survey being the furtherance of our knowledge of Indian Mammalian Fauna. Up to 1891 Naturalists in India had to rely for information on Dr. Jerdon's "Mammals of India" published in 1874. In 1884 R. A. Sterndale published his *Natural History of Indian Mammals* a purely popular work which did not add much to Jerdon's book. In 1881 a memorial prepared by Dr. Slater, Hon. Secretary to the Zoological Society, and signed by Darwin, Hooker, Huxley, and other well-known scientists, was presented to the Secretary of State for India. The memorial recommended that a series of Volumes dealing with the Fauna of India should be prepared and Dr. Blanford should be appointed its Editor. The memorial resulted in the publication in 1888-1890 of the Volume on Mammals in the "Fauna of British India" Series and since 1891 this volume has been the standard work on *Indian Mammals*. Blanford's book was however based on the information then available and the shortcomings of the book have been revealed in the light of more recent research. Further knowledge in regard to distribution and classification and the

discoveries of new species have rendered Blanford practically obsolete.

To remedy this defect, at the instigation of the authorities of the British Museum, the Bombay Natural History Society decided to institute what is now known as the Mammal Survey. Mr. W. S. Millard, then Hon. Secretary of that Society, issued in an appeal to its members to enable the Society to engage the services of trained European collectors so as to make a systematic collection of the mammals of India, Burma and Ceylon. The response to the appeal resulted in over a lakh of rupees being raised between 1911 and 1920, partly by subscriptions from the Society's members, contributions from Indian Princes, and grants from the Indian Government, the Government of Burma, Ceylon, Malay States, and the Provincial Governments. Subscriptions were also received from a few Learned Societies and Institutions in England and America. By the outbreak of the war the Survey had been carried on over large areas of the country, the districts covered being—In Western India a portion of Sind, the whole of Gujarat, Kutch and Kathiawar, the Southern Maharatta Country and Kanara in Southern India, in Coorg and Mysore, in the centre large tracts of the Central Provinces and some districts of Bengal and Behar, in Northern India the Society's collectors had worked over Kumaon, Darjeeling and Sikkim and the Bhutan Duars. In Burma, collections were made along the Chindwin river, in Central Burma and in the Shan States, Pegu and a portion of Tenasserim. The whole of Ceylon was also systematically surveyed.

The material, which up to the outbreak of War comprised some 17,000 specimens, was forwarded to the British Museum where the collections were scientifically worked out by the late Mr. R. C. Wroughton, formerly Inspector General of Forests, Mr. Oldfield Thomas F.R.S., Curator of Mammals at the British Museum, Mr. Martin C. Hinton and others. The results of their researches were published in a series of scientific papers in the journal of the Bombay Natural History Society. The enormous mass of material then collected resulted in the discovery of large numbers of new forms and species and by increasing our knowledge of the distribution of Indian Mammals has enabled the revision of Blanford's *Mammalia* to be undertaken and early in 1921 the Secretary of State for India commissioned Mr. R. C. Wroughton since deceased, and Mr. M. C. Hinton to undertake the work.

When demobilization rendered it possible the work of the Survey which had been in abeyance during the war was resumed and a collector Mr. C. Primrose, was sent to Assam and the Meghal Archipelago and Mr. Oldfield Thomas has written very appreciatively of his work among those islands. Mr. Primrose then began working inland but owing to the impracticability

lity of continuing his work in Burma during the monsoon, he was transferred to Gwalior where H. H. the Maharaja kindly acceded permission to work in his territories.

After working a portion of the Eastern Ghats the next move was to the Kangra District in the North West Himalayas and then on to the Punjab Salt Range. Two other collectors worked in Southern India. Permission was once more obtained from the Nepal Government for a collector to resume the Survey work in that country. The work in Nepal was brought to a successful close early in 1928 with a representative collection of interesting mammals and birds.

Botanical Survey—The Botanical Survey Department of the Government of India is under the control of a Director who is also Superintendent of the Royal Botanic Garden, Calcutta. There is a staff at headquarters of two officers for systematic work and at the Indian Museum a curator who is engaged in the development and maintenance of the Industrial Section. The Director holds administrative charge of the Government of India's cinchona operations in Burma, of quinine manufacture in Bengal and of the distribution of cinchona products to the Government of India's area of distribution in Upper India.

The existence of the Botanical Survey, like that of the Geological Survey, has both a cultural and an economic justification. On general grounds it is obvious that a progressive Government should acquit itself with the physical facts of the area it administers, and although apart from the cinchona operations, the activities of the Survey cannot be said to have much immediate economic applicability—consisting as they do of investigations and researches into the systematics, physiology, ecology, and histology of plant life—the work accomplished in pure botany at the Royal Botanic Garden during the last century and a half has exercised a profound and far-reaching influence upon the development of Agricultural Science and Forestry in India.

Survey of India—The first authoritative map of India was published by D. Anville in 1752, when the exploration of the then unknown India was still largely in French hands. It had been compiled from routes of solitary travellers and rough charts of the coast.

The Survey of India may be said to have been founded in 1767—ten years after the battle of Plassey—when Lord Clive formally appointed Major James Rennell the first Surveyor General of Bengal, at that time the most important of the East India Company's possessions, though there were earlier settlements in Madras and Bombay.

Rennell's maps were originally military reconnaissances and latterly chained surveys based on astronomically fixed points, and do not pretend to the accuracy of modern maps of India based on the rigid system of triangulation commenced at Madras in 1802 and since extended over and beyond India. Even now, however, the relative accuracy of these old maps makes them valuable in legal disputes, as for instance in proving that the holding of a Bengal landowner was a river area at the time of the Permanent Settlement of 1793, so that he is debarré from its benefits.

From these beginnings, this department has gradually become primarily responsible for all topographical surveys, explorations and the maintenance of geographical maps of the greater part of Southern Asia, and also for geodetic work.

Geodesy means the investigation of the size, shape and structure of the earth, and the geodetic work of the department consists of primary (or geodetic) triangulation, latitude, longitude and gravity determinations. From these the exact 'figure' of the earth is obtained, whereby points fixed by triangulation can be accurately located on its curved surface. This system of fixed points holds together all topographical and revenue surveys, and the existence of such a system from the early days of the department has obviated the embarrassments caused in other countries where isolated topographical surveys have been started without a rigid framework, with the inevitable result that they could not be fitted together.

A geodetic framework is, therefore, essential in any large survey, but there are a number of other activities, all of them ultimately utilitarian which can be suitably combined with its execution, and the following are some of these which are carried out in India:

Precise levelling for the determination of heights,

Tidal predictions and publication of Tide Tables for forty one ports between Suez and Singapore.

The Magnetic survey,

Observation of the direction and force of gravity,

Astronomical observations to determine latitude, longitude and time,

Seismographic and meteorological observations at Dehra Dun.

Indian geodesy has disclosed by far the largest known anomalies of gravitational attraction in the earth's crust, which have recently led to a reconsideration of the whole theory of isostasy.

Topographical Surveys—In the past this department used to carry out the large scale revenue surveys for most of India, and was still conducting this work for Central and Eastern India and Burma in 1905.

Though revenue survey is primarily a record of individual property boundaries and is concerned with the surface features, ground levels and exact geographical position essential to a topographical survey, it was on the whole found economical to carry out both surveys together.

By 1905 however, all the Provinces had taken over the revenue surveys, for which they had always paid, and the Survey of India was enabled to concentrate its energies on a complete new series of modern topographical maps in several colours on the 1-inch to 1 mile scale.

This new series had been rendered necessary by the natural demand for more detailed information to be shown on maps, especially as regards the portrayal of hill features by contours, proper classification of communications and—more recently—air traffic requirements.

It was intended that this 1905 survey should be completed in twenty five years, and then revised periodically every thirty years. Owing however to the war and more recent retrenchments only

two thirds of the programme had been completed by 1932, in spite of a reduction of scale for the less important areas

Although new surveys covering from thirty to sixty thousand square miles—an area comparable to that of England—are carried out every year, the maps of a large part of the country are still over 50 years old, printed mostly in black only, and have hill features shewn by roughly sketched form lines or hachures, such changes in town sites, canals and communications as have been embodied in them have not been surveyed on the ground but entered from outside information

Owing to the serious financial situation in 1931, the establishment of the department was severely cut down and its annual expenditure halved, in consequence of which the modern survey of India cannot now be completed before 1950

The obsolescence of the present series of modern maps of India is shewn in the second index map at the end of this report

Large Scale Surveys—Surveys and records of international, state and provincial boundaries have always formed an important item of topographical work, and in recent years numerous Guide Maps have been published of important cities and military stations where the 1 inch to 1 mile scale is inadequate

Miscellaneous—While expending on topographical and geodetic work all funds allotted by Imperial Revenues, the department is prepared to undertake or aid local surveys, on payment by those concerned, such as

Forest and cantonment surveys,
Riverin, irrigation, railway and city surveys,
Surveys of tea gardens and mining areas, with such control levelling as is necessary for these operations

Administrative assistance is also given, and executive officers, lent in aid of the revenue surveys of various Provinces and States

The Printing Offices at Calcutta and Dehra Dun also carry out work for other Government departments, such as special maps, illustrations for Reports and all diagrams for patents

The Mathematical Instrument Office of this department assists all Government departments, as well as non officials, by maintaining a high standard of instrumental and optical equipment and by manufacturing and repairing instruments which would otherwise have to be imported from abroad

Military Requirements and Air Survey—The department is also responsible for all survey operations required by the army, and is in a position to meet the rapidly increasing complexity of modern military requirements, especially in air survey

In view of its high military importance, air survey work for civil purposes is receiving all possible encouragement and assistance, and the latest methods of mapping from photographs taken from the ground are being studied experimentally

The flying and photography for air mapping done by this department are at present carried out by the Royal Air Force or the Indian Air Survey Company, a commercial firm with headquarters at Dum Dum

Administration is by the Surveyor General under the Education, Health and Lands Department of the Government of India

The Headquarters Office is at Calcutta under the Assistant Surveyor General and there are four Directors, one for the Map Publication and other technical offices at Calcutta, and three for three of the five Survey of India Circles into which the country is divided, the other two Circle areas (covering Burma and South India) are administered personally by the Surveyor General

Of the three Circle Directors, one also administers the Geodetic Branch at Dehra Dun in addition to his topographical survey Circle

Any enquiries regarding surveys, maps or publications may be addressed either to the Headquarters Office or to the Survey Director or Independent Party concerned, whose addresses are Director, Map Publication, Calcutta, Director, Geodetic Branch, Dehra Dun Director, Frontier Circle, Simla Director, Eastern Circle, Shillong, Officer in charge, No 6 (South India) Party, Bangalore and Officer in Charge, No 10 (Burma) Party, My mjo

Indian Science Congress—The Indian Science Congress was founded largely owing to the efforts of Prof P S Macmahon and Dr J L Simonsen. These two gentlemen worked jointly as Honorary General Secretaries of the Congress till 1921. The Asiatic Society of Bengal undertakes the management of the Congress finances and publishes annually the proceedings of the Congress. The objects are (1) to encourage research and to make the results generally known among science workers in India, (2) to give opportunities for personal intercourse and scientific companionship and thus to overcome to some extent one of the chief drawbacks in the life of workers in science in India, (3) to promote public interest in science, for this end the Congress is held at different centres annually, and evening lectures open to the public form an important part of the proceedings of each Congress

The Congress, which is progressive and vigorous, meets in January each year, the proceedings last for six days. The Herd of the Local Government is Patron of the Congress, the Congress session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different sections being represented in turn. The sections are (1) Agriculture, (2) Physics and Mathematics, (3) Chemistry and Applied Botany, (4) Zoology and Ethnography, (5) Botany, (6) Geology, (7) Medical Research, when the sections meet separately each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers, the afternoons to social functions and visits to places of interests, in the evenings public lectures are delivered

The Indian Research Fund Association—This Association, which is a much older body than the National Research Council in England, was constituted in 1911 with a sum of rupees five lakhs (£33,000) set aside as an endowment for the prosecution and assistance of research, the propagation of knowledge and experimental

Posts and Telegraphs.

POST OFFICE.

The control of the Posts and Telegraphs of India is vested in an officer designated Director General of Posts and Telegraphs whose office is attached to the Department of Industries and Labour of the Government of India. For the efficient working of the Department a representative of the Finance Deptt—the Financial Adviser, Posts and Telegraphs—has been attached to the office or the D G P & T. The Financial Adviser not only controls the finances of the Dept but also assists the D G generally in examining matters containing financial implications in which the former is assisted by the Deputy Director General, Finance. The superior staff of the Direction, in addition to the Director-General himself, consists on the postal side of one Senior Deputy Director-General, one Deputy Director-General (postal services), five (including one temporary) Asstt Deputy Director-General and one Personal Assistant to the Director General.

For postal purposes, the Indian Empire is divided into nine circles namely, Bengal and Assam, Bihar and Orissa, Bombay, Burma, Central, Madras, Punjab and North-West Frontier, United Provinces and Sind and Baluchistan. Each of the first eight is in charge of a Postmaster-General and the Sind and Baluchistan Circle is controlled by a Director of Posts & Telegraphs. The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies.

The Postmasters General are responsible to the Director General for the whole of the postal arrangements in their respective circles, including those connected with the conveyance of mails by railways and inland steamers. All the Postmasters-General are provided with Deputy and Assistant Postmasters-General. The nine Postal Circles are divided into Divisions each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors.

Generally there is a head post office at the head quarters of each revenue district and other post offices in the same district are usually subordinate to the head office for purposes or accounts. The Postmasters of the Calcutta,

Bombay, and Madras General Post Offices and of the larger of the other head post offices are directly under the Postmasters-General. The Presidency Postmasters, indeed, have one or more Superintendents subordinate to them. When the duties of the Postmaster or a head office become so onerous that he is unable to perform them fully himself a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed. The more important of the offices subordinate to the head office are designated sub offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub treasuries. The officer in charge of such an office works either single-handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents such as school-masters, shopkeepers, landholders or cultivators who perform their postal duties in return for a small remuneration.

The audit work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Finance Department of the Government of India and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountants-General, all of whom, with the necessary staff of clerks, perform at separate head-quarters the actual audit work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub-post offices and a few head offices perform telegraph work in addition to their postal work and are known by the name of combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph offices working under the control of the Post Office.

The Inland Tariff (which is applicable to Ceylon and Portuguese India except as indicated below) is as follows—

	When the postage is prepaid.	When the postage is wholly unpaid.	When the postage is insufficiently prepaid.
<i>Letters</i>	Annas Pies		
Not exceeding two and a half tolas	1 3	Double the prepaid rate (chargeable on delivery)	Double the deficiency (chargeable on delivery)
Every additional two and a half tolas or part of that weight	1 3		
<i>Book and pattern packets</i>			
Every 5 tolas or part of that weight	0 6		

Postcards

Single	9 pica
Reply	1 anna 6 pica
(The postage on cards of private manufacture must be prepaid in full)	

Parcels (prepayment compulsory)

Parcels not exceeding 800 tolas in weight —	Rs a
Not exceeding 20 tolas	0 2
Exceeding 20 tolas but not exceeding 40 tolas	0 4
For every additional 10 tolas or part of that weight	0 1

Registration is compulsory in the case of parcels weighing over 440 tolas

These rates are not applicable to parcels for Portuguese India

In the case of parcels for Ceylon a registration fee of 3 annas is chargeable on each parcel in addition to the rates shown above

Registration fee

For each letter, postcard, book or pattern packet, or parcel to be registered	0 3
---	-----

Ordinary Money Order fees

On any sum not exceeding Rs 10	0 2
On any sum exceeding Rs 10 but not exceeding Rs 25	0 4
On any sum exceeding Rs 25 upto Rs 600	0 4

for each complete sum of Rs 25, and 4 annas for the remainder, provided that, if the remainder does not exceed Rs 10, the charge for it shall be only 2 annas

Telegraphic money order fees—The same as the fees for ordinary money orders plus a telegraph charge calculated at the rates for inland telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message. In addition to the above a supplementary fee of two annas is levied on each inland telegraphic money order

In the case of Ceylon the telegraph charge is calculated at the rates shown below —

Express—Rs 2 for the first 12 words and 3 annas for each additional word

Ordinary—Re 1 for the first 12 words and 2 annas for each additional word. Telegraphic money orders cannot be sent to Portuguese India

Value payable fees—These are calculated on the amount specified for remittance to the sender and are the same as the fees for ordinary money orders

Insurance fees

	A	p
Where the value insured does not exceed Rs 100	0	3
Where the value insured exceeds Rs 100 but does not exceed Rs 150	0	4
Where the value insured exceeds Rs 150 but does not exceed Rs 200	0	5
For every additional Rs 100 or fraction thereof over Rs 200 and upto Rs 1,000	0	2
For every additional Rs 100 or fraction thereof over Rs 1,000	0	1

As regards Portuguese India see Foreign Tariff

Knowledge fee—For each registered article 1 anna

The Foreign Tariff (which is not applicable to Ceylon or to Portuguese India except in respect of insurance fees for parcels and parcel postage) is as follows —

Letters

To Great Britain and Northern Ireland (Egypt, including the Sudan) and all British Colonies, Dominions and possessions except Palestine and Transjordan	2½ annas for the first ounce and 2 annas for each additional ounce or part of that weight
To other countries, colonies or places	3½ annas for the first ounce and 2 annas for every additional ounce or part of that weight

Postcards, Single	2 annas
Reply	4 annas

Printed Papers—½ anna for every 2 ounces or part of that weight

Business Papers—For a packet not exceeding 10 ounces in weight 3½ annas. For every additional 2 ounces or part of that weight 3 annas

Samples—1½ annas for first 4 ounces and 2 annas per 2 ounces thereafter

Parcels

(i) Parcels not exceeding 20 lbs in weight and addressed to Great Britain and Northern Ireland are forwarded as mails to the British Post Office, the rates of postage applicable to such parcels being as follows —

Via Gibraltar Overland

For parcel—	Rs	a	p	Rs	a	p
Not over 3 lbs	1	8	0	1	13	6
Over 3 lbs, but not over 7 lbs	2	12	0	3	1	6
" 7 " " 11 "	3	15	0	4	2	6
" 11 " " 20 "	6	3	0	7	3	0

These parcels are delivered by the post office and the postage paid carries them to destination

(a) Parcels which exceed 11 lbs but which do not exceed 50 lbs (the maximum allowed) in weight are forwarded from India through the medium of the P & O S N Co and are delivered at destination under arrangements made by that Company. The postage charge applicable to such parcels is twelve annas for each pound, or fraction of a pound. The parcels are delivered free of charge within a radius of one mile from the Company's Head Office in London, if addressed to any place beyond that radius, carrier's charges are levied from the addressees on delivery. Parcels thus forwarded through the P & O S N Co cannot be insured during transit beyond India, but must, if they contain coin, etc., be insured during transit in India. No acknowledgment of delivery can be obtained in respect of these parcels nor can such parcels be transmitted to Great Britain and Northern Ireland under the value payable system.

Limits of Weight

Letters—4 lbs 6 oz

Printed Papers and Business Papers—To Great Britain and Northern Ireland, and the Irish Free State, British Australasian Colonies, Hong Kong, the Straits Settlements, Togo (British), the Union of South Africa, Rhodesia, and the Bechuanaland Protectorate—5 lbs

To Ceylon—No limit

To all other destinations—4 lbs 6 oz

Samples—To Great Britain and Northern Ireland, and the Irish Free State, Hong Kong, the Straits Settlements, Togo (British), the Union of South Africa, Rhodesia, and the Bechuanaland Protectorate—5 lbs

To Ceylon—200 tolas

To all other destinations—1 lb 2 oz

Parcels—11 lbs or 20 lbs

Limits of Size

Letters—1½ feet length by 1½ feet in width or depth. If in form of roll, 2½ feet in length and 4 inches in diameter

Printed Papers and Business Papers—To Ceylon—2 feet in length by 1 foot in width or depth

To all other destinations—1½ feet in length by 1½ feet in width or depth

If in form of roll, dimensions in all cases are 30 inches in length and 4 inches in diameter

Samples—To Great Britain and Northern Ireland, and the Irish Free State, Ceylon, Hong Kong, the Straits Settlements, the Union of South Africa, Rhodesia and the Bechuanaland Protectorate—2 feet in length by 1 foot in width or depth

To all other destination—1½ feet in length by 8 inches in width and 4 inches in depth

If in form of roll, dimensions in all cases are 1½ feet in length and 6 inches in diameter

Money Orders—To countries on which money

orders have to be drawn in rupee currency, the rates of commission are as follows—

	Rs	a
On any sum not exceeding Rs 10	0	3
On any sum exceeding Rs 10 but not exceeding Rs 25	0	6
On any sum exceeding Rs 25	0	6
for each complete sum of Rs 25 and 6 annas for the remainder, provided that, if the remainder does not exceed Rs 10, the charge for it shall be only 3 annas		

To countries on which money orders have to be drawn in sterling, the rates are as follows—

	Rs	a
On any sum not exceeding £1	0	4
" " exceeding £1 but not exceeding £2	0	7
" " " £2 " £3	0	10
" " " £3 " £4	0	13
" " " £4 " £5	1	0
" " " £5	1	0

for each complete sum of £5 and 1 rupee for the remainder, provided that if the remainder does not exceed £1, the charge for it shall be 4 annas, if it does not exceed £2, the charge shall be 7 annas, if it does not exceed £3, the charge shall be 10 annas, and if it does not exceed £4, the charge shall be 13 annas

Insurance fees (for registered letters and parcels only)

For insurance of letters and parcels to Mauritius, British Somaliland, the Seychelles, and of parcels to Iraq, Zanzibar and Portuguese India

Where the value insured does not exceed Rs 180

For every additional Rs 180 or fraction thereof

For insurance of letters and parcels to Great Britain and Northern Ireland and to British Possessions and Foreign countries (other than those mentioned above) to which insurance is available

Where the value insured does not exceed £12

For every additional £12 or fraction thereof

Acknowledgement fee—3 annas for each registered article

Magnitude of business in Post Office—At the close of 1932-'3 there were 106,480 postal officials, 23,800 post offices, and 167,170 miles of mail lines. During the year, 1,121 million articles, including 42½ million registered articles were posted, stamps worth Rs 62 4 millions were sold for postal purposes over 36 7 million money orders of the total value of Rs 762 millions were issued, a sum of Rs 192 millions was collected for tradesmen and others on V P articles, over 3 8 million insured articles valued at 1,095 7 millions of rupees were handled. Customs duty, aggregating over 8 3 million rupees was realised on parcels and letters from abroad pensions amounting to Rs 16 4 millions were paid to Indian Military pensioners and 15,000 lbs of quinine were sold to the public. On the 31st March 1933, there were 2,737,000 Savings Bank accounts with a total balance of Rs 434 5 millions and 84,700 Postal Life Insurance policies with an aggregate assurance of Rs 158 5 millions,

The fourth part of the Telegraph Department is the last of the four, and is entrusted to the American and French Engineers, who are assisted by a staff of British and American Engineers.

Inland Telegrams and Tariff - Telegrams sent or received from any place in India or Colonies are charged as inland telegrams. The tariff for such telegrams is as follows: -

Radio-Telegrams—1 or radio telegrams addressed to ships at sea from offices in India or Burma and transmitted to the coast stations at Bombay, Calcutta, Karachi, Madras, Port Blair or Rangoon the charge is thirteen annas per word in nearly all cases.

The following are the charges (excluding supplementary charges) for radio telegrams from Offices in India or Burma transmitted to ships at sea through the coast stations mentioned in the preceding paragraph—

Total charge
per word
Rs a

- (1) All Government or Private Radio telegrams excepting those mentioned in (2) to (4) below 0 13
- (2) Radio telegrams to His Britannic Majesty's Ships of War or Ships of the Royal Indian Marine 0 8
- (3) Radio telegrams to Spanish or Swedish ships 0 12

The sender of a radio telegram may prepay a reply. He must insert before the address, the instruction "R P" followed by mention in Rupees and annas of the amount prepaid, e.g., R P 7 8. This expression counts as one word.

DAILY LETTER-TELEGRAMS

Daily Letter Telegrams in plain language, which are dealt with telegraphically through out are accepted on any day of the week, and are ordinarily delivered to the addressee on the morning of the second day following the day of booking. They are subject to the conditions prescribed for Deferred Foreign telegrams with certain exceptions as stated below.

The charge for a Daily Letter Telegram is ordinarily one third of the charge for a full rate telegram of the same length and by the same route subject to a minimum charge equal to the charge for 25 words at such reduced rate including the indication D.L.

The late fee system does not apply to Daily Letter-Telegrams and such telegrams are not accepted during the closed hours of the office.

On Indian lines Daily Letter Telegrams are transmitted after Deferred Foreign telegrams.

The only special services admitted in daily letter telegrams are Reply paid, Poste Restante, Telegraph restant and telegraph re-direction under orders of the addressee.

Growth of Telegraphs—At the end of 1897-98 there were 30,300 miles of line and 155,088 miles of wire and cable, as compared with 107,160 miles of line including cable and 587,574 miles of wire including conductors respectively, on the 31st March 1933. The numbers of departmental telegraph offices were 257 and 115 (including 19 Radio offices), respectively, while the number of telegraph offices worked by the Post Office rose from 1,634 to 4,274.

The increase in the number of paid telegrams dealt with is shown by the following figures—

		1897-98	1932-33
Inland	{ Private	4,107,270	11,711,350
	{ State	800,382	8,52,069
	{ Press	37,910	679,701
Foreign	{ Private	735,679	2,219,685
	{ State	9,896	28,556
	{ Press	5,278	71,894
		<u>5,754,415</u>	<u>15,593,255</u>

The outturn of the workshops during 1930-31 represented a total value of Rs 10,53,500.

Wireless—The total number of departmental wireless stations open at the end of 1932-33 was thirty, viz., Akbar Allahabad, Basrah, Bombay, Calcutta, Chudubya, Chittagong, Delhi, Diamond Island, Fodhipur, Jutogh, Karachi, (two stations), Lahore, Madras (3 stations), Nagpur, Peshawar, Poona, Port Blair, Quetta, Rangoon (1 station), Sandheads (two pilot-vessels), Sandown and Victoria Point of which only Chudubya Port Blair and Victoria Point booked telegrams direct from the public.

Seven of these stations were designated coast stations for communication with ships at sea and ten worked as aeronautical stations in connection with regular air services.

The Duplex high speed service between Rangoon and Madras continued to work satisfactorily, the whetstone system being employed generally for this circuit.

Telephones—On the 31st March 1933 the number of telephone exchanges established by the Department was 317 with 19,025 straight line connections and 3,084 extension telephones. Of these exchanges, 169 were worked departmentally. The number of telephone exchanges established by Telephone Companies was 25 with 35,200 connections.

The total staff employed on telegraphs, telephones and wireless on the 31st March 1933 was 13,500.

Posts and Telegraphs—The capital outlay of the Indian Posts and Telegraphs Department during and to the end of the year 1932-33 was Rs 10,37,750 and Rs 15,82,84,000 respectively. The receipts for the year ended 31st March 1933 amounted to Rs 10,53,40,000 and charges (including interest on capital outlay) to Rs 10,97,30,000, the result being a net loss of Rs 43,89,000.

Sanitation.

The history of the sanitary departments in India goes back for about sixty years. During that period great improvements have been effected in the sanitary condition of the towns, though much remains to be done, but the progress of rural sanitation which involves the health of the great bulk of the population has been slow, and incommensurate with the thought and labour bestowed on the subject. "The reason lies in the apathy of the people and the tenacity with which they cling to domestic customs injurious to health. While the inhabitants of the plains of India are on the whole distinguished for personal cleanliness, the sense of public cleanliness has ever been wanting. Great improvements have been effected in many places, but the village house is still often ill-ventilated and over-populated, the village site dirty, crowded with cattle, choked with rank vegetation, and poisoned by stagnant pools, and the village tanks polluted, and used indiscriminately for bathing, cooking and drinking. That the way to improvement lies through the education of the people has always been recognised."

Of recent years the pace has been speeded up as education progressed, education developed, and funds were available. In a resolution issued in May 23rd, 1914, the Government of India summarised the position at that time, and laid down the general lines of advance. This resolution (*Gazette of India*, May 25th, 1914) should be studied by all who wish to understand the attitude of the Government of India towards sanitation prior to the passing of the Reform Act of 1919. It will be found summarised in the Indian Year Book of 1922 (page 475 *et seq.*) and earlier editions. One of the greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsible to local control through Ministers. It is yet too early to attempt to indicate the effects of this change.

The Public Health Commissioner with the Government of India in a general review of health organisation in British India which he laid in January, 1928, before the Interchange Study Tour organised for Medical Officers of Health from the Far Eastern Countries by the Health Organisation of the League of Nations, concluded "that the State effort in regard to Health Organisation in British India is one of no mean importance, that it has evolved over a couple of centuries during which many mistakes in policy must be admitted, that it has provided the Officers and the stimulus necessary for laying the foundations of medical education, that it has tried to uphold the ethical standards of western medicine and that in which ever way it is regarded it is an effort of which no Government need be ashamed." He quoted, the remark of the Government of India in their Resolution of 1914 that "in the land of the ox cart one must not expect the pace of the motor car."

The Public Health Commissioner in his annual report for the year 1925 noted the introduction of the political element into health matters as a result of the Reforms and said that the improvements being introduced before the Reforms were in some provinces now in a fairway, to maturing but that in other provinces "with less appreciation of the actual needs so far from adding to the organisation as they have found it have shown a desire to scrap even some of what they originally possessed." But, he says, "though the picture is neither bright nor the future rosy, it is becoming increasingly evident that a considerable section of the Indian community is thinking seriously on these public health problems amid much futile and destructive criticisms of State and municipal efforts here and there valuable and suggestive criticism can be met with which goes to prove my contention."

India's birth rate in 1925 was nearly twice that of England and Wales, her death rate was twice that of England and Wales and nearly three times that of New Zealand and her infantile mortality rate was nearly 2½ times that of England and Wales and nearly 4½ times that of New Zealand. "The information furnished for the great group of infectious diseases of world import, *i.e.*, plague, cholera, small-pox, yellow fever, typhus, malaria, and dysentery shows (says the Public Health Report already cited) that if we except typhus and yellow fever, India is one of the world's reservoirs of infection for the others and the main reservoir of infection for plague and cholera." The significance of these facts must, adds the Commissioner, be obvious to all who think. "Briefly their implication is that India's house, from the public health point of view, is sadly out of order and that this disorder requires to be attended to. It is not for India to say that so far as she is concerned prevention is impossible. If we think of the effect of sunlight on tubercle ridden children, of the effect of feeding on rickets, scurvy and beri-beri, of the way in which malaria, cholera, yellow fever, dengue, ankylostomiasis and filariasis can be and have been overcome we need have no fear in regard to India provided the necessary measures are put into operation."

The Public Health Commissioner in an address before the annual congress of the Far Eastern Association of Tropical Medicine, held in Calcutta in December, 1927, urged the importance of instituting a Central Ministry of Health which should be charged with the functions of co-ordinating the policies and activities of the departments concerned in the several provinces and with keeping them abreast of scientific progress. There is at present no public Health Act for the whole of India, nor under existing administrative arrangements is one immediately possible, but the desirability of the Central Ministry of Health and of such an Act is likely to be urged in the course of the revision of the Constitutional Reforms now in progress.

Chief Causes of Mortality—There are three main classes of fatal diseases specific fevers diseases affecting the abdominal organs, and lung diseases, Intestinal and skin parasites, ulcers and other indications of scurvy widely prevail. The table below shows the number of deaths from each of the principal diseases and from all other causes in British India and death rates per 1,000 during 1931.—

Mortality during 1931.

Statistical health reports for all India are always, inevitably submitted are belated owing to the number of provinces from which returns have to be collated

The Public Health Commissioner in his most recently published annual report which concerns the year 1931, brings to notice certain leading facts. He shows that the birth rate for the year was 44.3 per mille of the 1931 census population as compared with 33.1 p.m. of the estimated population for 1930 and 35.7 p.m. for the preceding quinquennium. He shows that the death rate was 24.8 p.m. of the 1931 census population as against 21.5 p.m. on the estimated population for 1930 and 26.0 p.m. for the preceding quinquennium. The infantile mortality rate, i.e., the death rate of infants below one year old per thousand live births, was 178.8 as against 180.8 in 1930 and 177.6 in the preceding quinquennium. The highest birth rate was recorded in the Central Provinces where the figure was 44.1 per mille (43.5 p.m. in 1930 and quinquennial average 46.0) and the lowest in Coorg, where it was 21.5 p.m. (25.7 p.m. in 1930 and quinquennial mean 21.1).

The Public Health Commissioner, dealing specially with the high rate of infantile mortality, mentions that statistics of the causes of these early deaths are not recorded but says that it is generally known that premature birth, convulsions, fever, malnutrition, respiratory diseases and bowel complaints are the main causative features. In a special chapter dealing with municipal vital statistics, he shows that to a considerable extent unskilled maternity service is responsible for high infant mortality rates in municipalities and that steps have been and are being taken in these areas to eliminate the risks.

Dr. Ruth Young, Director of the Maternity and Child Welfare Bureau of the Indian Red Cross Society, in some notes contributed to the Public Health Commissioner's report on this subject says that "One is forced to a monotonous repetition of the statement that progress (in maternity and child welfare work in India) is very slow, that local bodies and even provincial governments evince little interest in the work and have no convictions about it sufficient to prompt them to spend money on such a subject". On the basis of figures specially collected in the Madras Presidency, she says in regard to that field of international health province that "trained health workers are almost absent and the number of midwives available work out at about one for every 1,300 cases of child-birth per annum. One medical woman in about 7,000 cases is all that is available as a consultant in labour cases. Work is almost entirely unsupervised and without expert guidance". Dr. Young adds "The difficulties attending the provision of trained attendants for women during child-birth do not decrease as the years go by. The problem is such a gigantic one that it tends to induce a feeling of despair. One of the difficulties of training midwives is the comparative uselessness of employing medical men for the purpose, because such practitioners have not the opportunities to give practical instruction on actual deliveries

to the midwives and training which consists mainly of lectures is quite unsuited to such pupils. While "the number of medical women can spare time to carry on such work is very small and very few also have the inclination to do it". A satisfactory feature of the position is that women are increasingly taking advantage of hospitals and maternity homes for their confinements.

The Health Commissioner shows in regard to the general statistics that the registration of cases of death in India is still very defective and is likely to remain so. The Commissioner once more reiterates the demand that he has so often made for strengthening the central health organisation of India. He emphasises afresh the catastrophic nature of disease visitations in India, more especially those of cholera, smallpox and plague, and the paramount necessity for preserving not only the public health organisation which has hitherto existed, but also the principle of its skilled direction by competent and well experienced hygienists. He shows that as a result of the retraining campaign "the whole of the central health work of the Government of India has now to be dealt with by the Public Health Commissioner unaided. He adds "One must bow to the penalties of financial stringency more especially if this be on a world wide scale, but the voice of intelligent Indian opinion must sooner or later be heard on this both inside and outside the legislative chambers. Such opinion will surely demand an organisation which is capable of framing a public health policy for the country and of seeing that it is carried through. It will surely wish to see to it that the personnel for this is adequate and to this end its political representatives must be prepared to vote such grants as are necessary for the expenditure.

No big health policy for this country which is to be worthy of the name can be elaborated and worked to without the necessary expert administrative machinery which has its price like any other commodity."

Referring to the impression which persists in certain quarters that the transfer of executive control of public health to the provinces has removed the need for adequate central health organisation, he points out how absurdly inconsistent this is with the facts of the position, one which he uses for illustration being the obligations of the Government of India in the field of International health.

The Public Health Commissioner concludes "The great hope of the future must lie in the development of health education and, as a corollary, the gradual appreciation by the educated population of the value of health and so the creation of public health conscience. Until this has happened there will be little hope for the exercise of that intelligent pressure on provincial Governments for judicious expenditure on certain health measures which is not only justifiable but necessary.

THE HEALTH OF THE ARMY

General Health Statistics of the British Army in India

HEALTH OF THE INDIAN ARMY FOR THE YEAR 1932

	Average strength	Admissions		Deaths		Invalids sent to U K		Invalids discharged in India		Average constantly sick	
		No	Ratio per 1,000	No	Ratio per 1,000	No	Ratio per 1,000	No	Ratio per 1,000	No	Ratio per 1,000
Officers	2,175	700	321.8	1	6.90	26	11.95			24	36
Indian Rank	121,013	32,017	129.8	305	2.52			78	6.47	1,002	23
Followers	28,218	7,525	266.1	109	1.86					266	35
Others *	2,094			2				73			

* Includes Reservists, Indian Territorial Force, Royal Indian Marine, Indian State Forces R. A. F., Civilians and Prisoners.

The admission rate of officers sick in hospital for 1932 was 321.8 per thousand of strength as compared with 367.1 in 1931. Among soldiers 52,017 or 429.8 per thousand of strength were admitted to hospital, compared with 451.3 per thousand in 1931. There was thus a decrease of 21.5 per thousand on the 1931 figures. The death rate among Indian soldiers during 1932 was 2.52 per thousand as against 2.96 per thousand in 1931.

LEPROSY IN INDIA

It is exceedingly difficult to give anything approaching an accurate estimate of the total number of lepers in the Indian Empire to day. In 1921, when a Census was made, leprosy was regarded as an *infirmity* like blindness, insanity and deaf-mutism and the supposed number of lepers was tabulated along with these. The number counted was 102,513 as against 109,094 in 1911. But it was recognised doubtful if this figure represented anything more than the more advanced cases and that possibly a majority of this number were the begging and pauper lepers who are seen all over the country. Dr T. Muir, M.D., F.R.C.S., the Leprosy Research Worker at the Calcutta School of Tropical Medicine, said that "recent figures obtained from a carefully conducted but limited survey, tend to confirm the computation that there are roughly from a half to one million people in India suffering from leprosy."

Early in the year 1924, the British Empire Leprosy Relief Association was constituted in England with H. R. H. The Prince of Wales as Patron, the Viscount Chelmsford as Chairman of the General Committee and H. E. the Viceroy of India as one of the Vice-Presidents. Following its formation and in view of the good results being obtained from the newest treatment of leprosy, H. E. the Viceroy felt that the time was auspicious for the inauguration and carrying on of an earnest campaign with the object of ultimately stamping out leprosy from India.

His Excellency invited certain gentlemen representing various interests to form an Indian Council of the Association, which he formally inaugurated at a public meeting in Delhi on the 27th January 1925.

A general appeal for funds in aid of the Association was issued by His Excellency the Viceroy on the date of the inauguration of the Indian Council which was closed after a year with realizations amounting to over Rs. 20,00,000 which was invested in the end of 1928. The investments amounted to Rs. 20,63,065 yielding an annual revenue of over Rs. 1,22,000.

In the scheme of anti-leprosy campaign which the Association put into operation, the respective parts to be played by the Central and Provincial Committees in carrying forward the aims and objects of the Association are definitely apportioned. The Central Committee is vested with the task of promoting research, of preparing and publishing propaganda material, arranging for the training of doctors in the diagnosis and treatment of leprosy according to the latest methods and of conducting an expert survey of selected areas for the ascertainment of the facts regarding the incidence and endemicity of leprosy. Measures for the accommodation and treatment of leprosy patients and other schemes of purely local interest are to be the concern of provincial committees as agents of the Indian Council in the Provinces.

mology in India, and the Government eye hospitals are doing tremendous work, but these hospitals are situated in the large towns and cannot possibly by any stretch of imagination, give relief to the millions living in the rural areas

The All-India Blind Relief Association—(The Green Star Society) exists to co-ordinate and centralise the various Associations in the mofussil and to extend their work. It is under the patronage of the Governor of Bombay and has for its life President Mr C G Henderson (late I C S) who founded and managed for many years all the branch Associations working in Western India. It is affiliated to the International Association for the Prevention of Blindness, which has its headquarters in Paris and was formed on September 11th 1929, under the auspices of the League of Red Cross

Societies and the American Society for the Prevention of Blindness. The Organising Secretary is R Crawford Hutchinson, The Town Hall, Bombay.

A beginning has been made, but it is only a beginning, and it is but the fringe of this vast problem that has been touched. The schools of ophthalmology in India, are turning out ophthalmic surgeons who are crowding their profession in the cities and large towns. A scheme for taking these men and placing them in selected centres has been worked out, all that is required is monetary help. The cost is minimal and here is an opportunity for the generous and public spirited to emulate Sir Ernest Cassel and give to India an eye service of which India and the whole world could be proud and to the peoples of India that which to them is probably their most precious possession—their sight.

THE MATERNITY AND CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling maternal and infant mortality. The figures for maternal mortality are not accurately known, but they are certainly not less than 10 per thousand live births, often more. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy. A noteworthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford and also to the Indian Red Cross Society, which aims at gradually establishing a network of child welfare centres in most of the larger towns in India. The amalgamation of these two Bodies which has taken place, forming the Maternity and Child Welfare Bureau, will undoubtedly increase and develop the work. In all the great centres of population, work is now being done for the training of midwives, for the instruction of mothers and for the care of babies. Training centres for Indian and Anglo Indian women have been opened in order to spread the elements of infant hygiene to other parts of India. Most hopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers. But such is the magnitude of the field, that a consistent widespread effort on a scale hitherto impossible must be undertaken, if any appreciable reduction is to be made in the appalling mortality of young children.

Centres of Activity are organised on a provincial basis, though the various provinces differ considerably in the nature of the work undertaken and the amount of organisation displayed. It is noteworthy that the work is most co-ordinated and most energetically carried on where there are persons appointed under the Directors of Public Health whose special duty it is to foster Child Welfare activities.

The care needed by the wives and children of sepoys in the Indian Army is being

increasingly realised, and nowhere more than in the units themselves. The result has been, in the last few years the opening of much work in this direction. Much of it is purely medical work which in the absence of families hospitals for the Indian soldiers is a necessity. But genuine child welfare activities are also present in some centres many of them assisted by the M & C W Bureau Indian Red Cross Society, which has undertaken the organising work in place of the Lady Birdwood Army Child Welfare Committee. A remarkable feature of this movement is the keenness of the men themselves to aid it, realising as they do the benefit to their own women and children. There are now very few cantonments where some work of this kind is not going on.

So far all the schemes have devoted their attention to educating women in the elements of mothercraft and attempting to preserve infant lives and improve child health. In a land of so many languages and superstitions progress will necessarily be slow and India has yet to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perish at a later stage from the many ills that childhood is heir to in a land of great poverty, undernourishment, epidemics and famine. In Western lands the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in India also develop innumerable fresh roots, medical supervision, dental clinics, better housing, open air playgrounds, etc., etc. But these are not yet. Its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high damage rate of sickly, under developed, incompetent citizens.

INDIAN RED CROSS SOCIETY

When the war first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St John of Jerusalem and the British Red Cross Society. The final report of that Committee shows that up to June 1920 its total receipts amounted to Rs 1,77,85,716 of which some 17 lakhs had been contributed by the British Red Cross Society. It had spent about 67 lakhs in Mesopotamia, nine lakhs on the Afghan War and Waziristan Expedition, in Mesopotamia and India combined it had spent on Red Cross objects in all about 117 lakhs.

It closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world-wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the Joint War Committee to the new Society, and authorised it not only to direct the utilization for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. As contemplated in the Act of Constitution of the Society, its activities are completely decentralized, and are being carried on through twenty-two Provincial and State Branches under which there are numerous sub-branches.

The objects on which the funds of the Society may be spent are—

1 The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised

2 The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not

3 Child welfare

4 Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them

5 Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society

6 Home Service Ambulance Work

7 Provision of comforts and assistance to members of His Majesty's Forces, whether on the active list or demobilised.

The Society has five grades of subscribing Members, namely, Honorary Vice Presidents, Patrons, Vice Patrons, Members and Associate Members. Their respective subscriptions are Rs 10,000, Rs 5,000, Rs 1,000, Rs 12 annually or a consolidated payment of Rs 150, and anything between Re 1 and Rs 5 annually or consolidated payment of Rs 50. At the end of 1933 there were 12,500 adult members of these various grades.

To stimulate interest in the aims and objects of the Society amongst the future generations a Junior Red Cross movement has been instituted which embraces the student population. The Punjab Provincial branch has taken the lead in furthering this movement. Other provinces are now following suit and at the end of 1931 the number of members was 252,941.

Constitution—His Excellency the Viceroy is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society of whom 12 are the Vice-Presidents nominated by Provincial or State Branches, 8 elected by the Society at the Annual General Meeting from among the members of the Society and 5 nominated by the President.

The present Chairman of the Managing Body is Sir David Petrie, Kt., C.I.E., C.V.O., C.B., and the Organising Secretary, Miss Norah Hill, A.R.R.C.

Finances—The operations of the Joint War Committee were brought to a close in June 1920 with a capital investment of the face value of Rs 56,33,000 and Rs 8,01,500 8 6 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances at the end of December 1933, stood at a capital investment of the face value of approximately Rs 67½ lakhs. The income derived from the capital of the Society, (which is 3½ lakhs at present) after providing for certain liabilities of the Central Society, is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" Fund.

ST JOHN AMBULANCE ASSOCIATION

(Indian Council)

The St John Ambulance Association was founded in 1877, by the Order of the Hospital of St John of Jerusalem in England, and has for its objects —

(a) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured,

(b) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room,

(c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories, and other centres of industry and traffic,

(d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps,

(e) And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality, or denomination

An Indian Council of the Association was constituted on a regular basis in 1910. It has since issued over 200,000 certificates of proficiency in First Aid, Home Nursing, Home Hygiene and Sanitation and over 10,000 tokens such as Vouchers, Medallions, Labels and Pendants for special proficiency in those subjects. The object of the Association is not to rival, but to aid, the medical man, and the subject-matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits.

During the year 1933 22,853 persons attended 1,583 courses of instruction in First Aid, Nursing Home, Home Hygiene and Sanitation and of these 13,957 qualified for the Association's

certificates i.e., 12,869 in First Aid, 584 in Home Nursing, 451 in Hygiene and 53 in Sanitation. A new course, Domestic Hygiene and Mothercraft, introduced in 1932 has not made much headway. To popularise Home Nursing and Domestic Hygiene and Mothercraft courses among young girls and women special propaganda was started. Steps were taken during 1933 to arrange first aid courses for the personnel of flying clubs, but the response was poor.

The Association has five grades of members namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs 1,000, Rs 500, Rs 100, Rs 5, and Rs 2.

The income of the Indian Council at headquarters consists primarily of interest on securities, a fixed annual grant from Government, fees for certificates and membership subscriptions. The total income for 1933 was Rs 17,897, more or less normal figure. Management expenses amounted to Rs 22,413. After adjusting assets and liabilities outstanding the revenue account for 1933 showed a loss of Rs 6,305. The Council was able to carry on by taking a loan of Rs 7,000 from the Indian Red Cross Society and by buying much less stores than it sold, the balance of stores stock thus being reduced by Rs 11,000. The Council realise that the financial position and its maintenance by temporary expedients is unsatisfactory.

Their Excellencies the Viceroy and the Countess of Willingdon and His Excellency the Commander in Chief as President, Lady President and Chairman, respectively, with 17 members form the Indian Council. The general business of the Indian Council is conducted by an Executive Committee of which the Hon.ble Sir David Patric, Kt, CIL, CVO, CBE, is the Chairman, Miss Norah Hill, AFRS, the General Secretary, and Sir Ernest Burdon, Kt, CSI, CIE, ICS, the Honorary Treasurer.

INSANITY AND MENTAL HOSPITALS IN INDIA

The accommodation for the treatment in British India of persons who suffer from mental disorders is still very inadequate. In the Indian States, the condition of affairs is even worse, for, with the sole exception of Mysore State which has a small and highly archaic "mental hospital" at Bangalore, there are no mental hospitals in existence so that persons suffering from all forms of mental disease are confined in the jails where, of course, no provision exists for any kind of treatment. According to the last Census (1921) out of a total popula-

tion of 318,942,480 (India and Burma) there are 88,305 persons insane, making a proportion of insane to sane of 3 per every 10,000. In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while in New Zealand it is as much as 45 per 10,000. In reviewing these figures it must be borne in mind that those of the United Kingdom and New Zealand include the "feeble-minded" an item that is not included in the figures for British India.

INDIA.

Provinces, States and Agencies	General population			Insane population		
	Male	Female	Total	Male	Female	Total
Provinces under British Administration	1,021,112	1,170,710	2,191,822	44,677	28,574	73,251
States and Agencies	24,752,471	22,219,616	46,972,087	9,478	5,920	15,398
Total for all India	16,993,581	14,916,926	31,910,507	54,155	34,494	88,649

For the care of the 88,700 in cases of Indian and Burma there exists accommodation in mental hospitals for 6,750 hence only one person in ten out of the total insane population can obtain accommodation in institutions which exist.

For the care of the 88,700 in cases of Indian and Burma there exists accommodation in mental hospitals for 6,750 hence only one person in ten out of the total insane population can obtain accommodation in institutions which exist.

Province	No of Mental Hospitals	Admitted and re-admitted during the year	Total Population of Mental Hospitals			Discharged	Died	Dispensation		Cerebral Paralysis

Total	18	3,015			11,040		636	8,705 67	66 71	2,601

It will be observed that there is now no mental hospital in Bengal. Insanes from this province are treated in one or other of the two mental hospitals at Ranchi. All Mental hospitals are under the direct control of the Provincial administrative medical officers except the European Mental Hospital at Ranchi which is controlled by a Board of Trustees presided over by the Commissioner of Chota-Nagpur. The so-called 'Central' Mental Hospitals, that is to say, the Mental Hospital at Madras, North Yeravda (Bombay), Lahore (Punjab), Agra (United Provinces of Agra and Oudh) and Rangoon (Burma), as well as the two Mental Hospitals at Ranchi (one for Europeans and Americans and one for Asiatics and Africans) are administered by whole time medical officers who are usually trained alienists. The Administration of the remaining Mental Hospitals in British India and Burma lies with the Civil

Surgeon of the locality in which they happen to be situated. It is probably true to state that only one Mental Hospital in the whole of India can claim any pretension to be up to date as regards organisation, staffing and equipment and that is the Mental Hospital for Europeans at Ranchi. All the others are for the most part over crowded and under staffed, thus rendering anything approaching treatment on modern lines out of the question. The only province in India which has so far displayed some appreciation of the importance of bringing the prevention and treatment of mental disorders into line with conditions in civilised countries is Madras. The local Government of this province has achieved a notable advance in its attitude towards mental disorders by providing, in the construction of the new General Hospital at Madras, accommodation for the treatment of early cases of mental diseases.

As regards the incidence of insanity among the various races of India as well as the incidence of insanity in relation to occupation, no reliable information is available in view of the comparative paucity of cases in proportion to the general

population that come under observation. On the other hand the incidence by age is shown fairly well in the Census Report of 1921 which is as follows —

INDIA

AGE	Insane		Distribution of the insane by age per 10,000 of each sex	
	Male	Female	Male	Female
YEARS				
0-5	651	484	121	142
5-10	2,905	1,882	539	558
10-15	4,098	2,733	761	803
15-20	4,366	3,076	816	904
20-25	5,518	3,379	1,024	993
25-30	6,861	3,582	1,273	1,053
30-35	7,231	3,849	1,342	1,131
35-40	5,651	2,949	1,049	867
40-45	5,316	3,486	987	1,025
45-50	3,332	2,157	618	634
50-55	3,132	2,492	581	733
55-60	1,465	1,036	272	305
60-65	1,683	1,471		
65-70	602	430		
70 and over	1,070	1,006		
Unspecified	270	133		
Total for all India	54,151	34,154	623	857

A further result of the widespread ignorance and apathy both official and non official, towards psychiatry and its cognate interests, is the lack of any provision for the care and treatment of mentally defective children. In 1925, the Hon'ble Haroon Jaffer moved the Council of State to recommend to the Governor-General in Council that the Provincial Governments be asked to investigate the best means of dealing quickly and adequately with cases of mental defectives. A discussion followed which was remarkable only for the ignorance of the subject displayed by all who took part in it. The motion was eventually withdrawn.

Finally there is still a lamentable failure everywhere to appreciate the intimate associa-

tion of crime with mental disorder and the extreme paucity of medical men throughout the whole of India with any real knowledge of mental diseases leave the decision of questions involving what the law terms 'responsibility' in crime in the hands of medical men who are in no sort of sense "experts". In other words the current ideas both as regards the theory and practice of dealing with insanity and crime in India can only be described as archaic.

(See also "Insanity in India" by Colonel G. F. W. Ewens, I.M.S., and "Lunacy in India" by Colonel A. W. Overbeck-Wright, M.D., D.P.E., I.M.S. and Colonel H. P. Jago Shaw's book.)

National Association for Supplying Medical Aid by Women to the Women of India.

The National Association for Supplying Medical Aid by Women to the women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals, to train women doctors, nurses and midwives in India, and to bring these out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition Branches were formed in each Province, each Branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants in aid to several Provincial Branches, it gives scholarships to a number of women students at the Medical schools of Bombay, Calcutta, Madras and Delhi. It has in the past brought from England a certain number of European medical women.

It has assisted by grants in aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 13 Provincial Branches and a number of Local Committees.

The Government of India subsidize the Countess of Dufferin's Fund to the extent of Rs. 3,11,306 per annum to maintain a Women's Medical Service for India—this service consists of 11 officers, with a training reserve of 8 doctors and a Junior service of 6 assistant surgeons. Medical women either British or Indian holding registrable British qualifications are eligible for the senior service.

The President is H. I. The Countess of Willingdon, C.I., G.B.I. The Hon. Secretary is the Surgeon to H. I. The Viceroy, and the Secretary Dr. M. V. Webb, M.B., B.S., Red Cross Building, New Delhi and Viceregal Estates, Simla.

THE WOMEN'S MEDICAL SERVICE FOR INDIA

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as the Countess of Dufferin's Fund and is administered by the Executive Committee and Council of that Fund. The Government of India has so far allotted the sum of £25,000 per annum towards its maintenance. The present sanctioned cadre is forty-four first class medical women, with a training reserve of 8 women graduates in medicine of Indian Universities. Recruitment of the service is made (a) in India by a medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Secretary to the Council and the Chief Medical Officer, Women's Medical Service, (b) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportions of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who are in the service of, or who have rendered approved service to, the Countess of Dufferin's Fund, are to have the first claim to appointment, and thereafter special consideration is to be paid to the claims of candidates who have qualified in local institutions and of those who are natives of India.

Qualifications—The qualifications are that the candidate must be (a) a British subject resident in the United Kingdom or in a British Colony or in British India, or a person resident in any territory of any Native Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (b) Must be between the ages of

twenty-four and thirty at entry. (c) She must be a first class medical woman, i.e., she must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act, but this condition does not apply at the original constitution of the Service to medical women in charge of hospitals who, in the opinion of the Council, are of proved experience and ability. (d) The candidate must produce a certificate of health and character. But the Council reserves the power to promote to the service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After one year of probation has been satisfactorily passed their appointments are confirmed. The services of officers may be lent to Local or Municipal bodies, or to special institutions, which may be responsible for whole or part of the pay.

Pay—The rates of pay are as follows—

1st to 3rd year	Rs 450 per month.
4th to 6th	500
7th to 9th	550
10th to 12th	600
13th to 15th	650
16th to 18th	700
19th to 21st	750
22nd to 24th	800
24th and after	850

also an overseas allowance of Rs 100 per month to those below 12 years' service and Rs 150 per month to those of 12 years' service and over. Every officer of the Service shall pass an examination in such vernacular as the Executive Committee shall appoint within the first three years of her service, and shall receive no increment after that period until such examination has been passed. In addition

furnished quarters are provided free of rent or a house rent allowance to be determined by the Provincial Committee may be granted in lieu of it

Officers of the Service are permitted to engage in private practice provided it does not interfere with their official duties, and the Provincial Committee has the power to determine whether such duties are thus interfered with. Except in very special cases retirement is compulsory at the age of fifty-five. An officer recruited in England, whose appointment is not confirmed, or who is dismissed, is granted an allowance sufficient to pay her passage to England.

Leave Rules—(a) Casual Leave, which is occasional leave on full pay for a few days, and is not supposed to interrupt duty. (b) Leave on average pay is granted up to 2-11 of an officer's period on duty, according to Fundamental Rules. More than eight months' leave on average pay is not granted at one time. (c) Study leave may also be granted up to twelve months during the whole service. An allowance of 12 sh per day is granted in addition to $\frac{1}{2}$ average pay during study leave. (d) Extraordinary leave at any time at the discretion of the Executive Committee. (e) Leave not due may be granted subject to the following conditions—(i) on medical certificate, without limit of amount and (ii) otherwise than on medical certificate, for not more than three months at any one time and six months in all, reckoned in terms of leave on average pay. (f) The maximum period of continuous absence from duty on leave granted otherwise than on medical certificate is 18 months. (g) When an officer returns from leave which was not due and which was debited against her leave account, no leave will become due to her until the expiration of a fresh period spent on duty, sufficient to earn a credit of leave equal to the period of leave which she took before it was due. There are no allowances during extraordinary leave. A doctor appointed in England receives a sum of £100 to cover her passage and incidental expenses. There are also allowances to cover the cost of journeys by rail and road.

There is also a Provident Fund, each member contributing monthly thereto ten per cent of her salary, the Association contributing an equal amount, and each subscriber's account being granted interest on the amount standing to credit at the rate of 4 per cent per annum, or at such rate as the Council can invest without risk to the funds of the Association.

An officer loses the contributions made to her account by the Association with the interest thereon if she resigns (except on account of ill-health) before completing five years' service or in the event of dismissal. On retirement after approved service the sum which has accumulated to the credit of the subscriber is handed over to her.

Free Passages—Officers of the Women's Medical Service are granted free return passages corresponding to those granted under the Lee Concessions to officers of all-India services. The maximum number of return passages granted during an officer's entire term of service must not exceed four, the first falling due after 4 years' service.

The Training Reserve of the Women's Medical Service—This Service has a sanctioned cadre of eight and is open to women graduates in medicine of the Indian Universities. Salaries range from Rs 200 to Rs 300 per month, with furnished quarters or the equivalent in money, to those employed in India.

2 Two of the eight members of the reserve, but not more at any one time, may be deputed to Europe by the Executive Committee for post-graduate training, and shall receive a stipend at the rate of £ 200 a year each paid quarterly and return passage. Any member not so deputed shall be employed in India.

3 Ordinarily four years shall be spent in the reserve before a member is considered for appointment to the Women's Medical Service, but the Executive Committee shall have power to shorten this period in special cases. Service in the reserve shall be considered by the Executive Committee when appointments are being made to the Women's Medical Service, but shall not of itself constitute a claim to appointment.

VICTORIA MEMORIAL SCHOLARSHIPS.

The Victoria Memorial Scholarships Fund was organised by Lady Curzon in 1903, in order to secure a certain amount of improvement in the practising dais of India. A sum of about 6½ lakhs was obtained by public subscription, and centres were organised in each Province to carry out the objects of the Fund. Over 2,000 midwives have been trained in addition to large numbers who

have been partially trained. Of late years the Fund has done much to pave the way for the registration and supervision of indigenous dais. It has also done much propaganda work. The fund is now administered by the Maternity and Child Welfare Bureau of the Indian Red Cross Society.

LADY HARDINGE MEDICAL COLLEGE AND HOSPITAL

The Lady Hardinge Medical College was opened by Lord Hardinge on the 17th February 1916. It is a residential Medical College staffed entirely by women, and was founded to commemorate the visit to Delhi, in 1911, of the Queen Empress. Lady Hardinge took the initiative in raising funds by public subscription to meet the cost of buildings and equipment.

Thirty lakhs of rupees, in all, have been given for these purposes, mostly by the Ruling Princes and Chiefs of India. After Lady Hardinge's death in 1914, it was suggested by Her Imperial Majesty Queen Mary that the institution should serve as a memorial to its founder, and be called by her name.

The Governing Body includes the Director General, Indian Medical Service, the Chief Commissioner of Delhi, the Chief Engineer, Delhi Province, the Educational Commissioner with the Government of India, the Chief Medical Officer, Women's Medical Service, a representative elected by the All India Association of Medical Women, the Surgeon to H.E. the Viceroy, an Indian member of the Council of State, 2 Indian members of the Legislative Assembly, a private Indian citizen of Delhi, a private lady resident of Delhi, the Civil Surgeon of New Delhi and the Agent, Imperial Bank of India, Delhi. The Honorary Secretary, who is also a member of the Governing Body is the Deputy Director General Indian Medical Service. The Deputy Accountant General, Central Revenue, acts as Honorary Treasurer.

The College and Hospital, together with separate hostels for 100 Medical students and 70 nurses and residences for the medical and teaching staff, occupy a site of 5½ acres in New Delhi within easy reach of old Delhi city. The grounds are enclosed and adequate provision is made for the seclusion of both students and patients from outside observation. Strict observance of purdah cannot, however, be guaranteed in the case of students. As the hospital patients are all women or children, it is for example, necessary that students should, in their final year, attend a brief course of instruction on men patients at the Civil Hospital, Delhi. The College buildings contain a Library, Museum, Lecture Rooms, Laboratories and offices. Hostels are provided for Hindu, Moslem, Sikh and Christian students. The hospital is a fine modern building with accommodation for 200 in patients and a commodious outpatients' department. The College and Hospital are supported by a grant of Rs 3,11,000 from the Government of India, supplemented by grants from Provincial Governments and Indian States. Students are prepared for the Intermediate

Science Examination, and the M.B., B.S. degree of the Punjab University, with which the College is affiliated.

SENIOR STAFF

Principal and Professor of Midwifery and Gynaecology—Dr M. C. L. Houlton, M.D., &c., Women's Medical Service.
Vice Principal and Professor of Surgery—Miss Hamilton Browne, M.B. Ch.B. (Svd), D.T.M. (Calcutta), W.M.S.
Professor of Medicine—Miss N. I. Trouton, M.B. B.S. (Lond), M.P.C.S., L.R.C.P. D.T.M. (Calcutta).
Professor of Ophthalmology—Miss R. Roulston, M.B., Ch.B. (Glas), D.O. (Oxon), D.I.C.S. (Edin), W.M.S.
Professor of Pathology—Mrs I. S. Ghosh, M.B., Ch.B. (Aberdeen), D.I.B. (Cambridge), W.M.S.
Professor of Anatomy—Miss K. J. McDermott, M.B., B.S. (Punjab), W.M.S.
Professor of Physiology—Miss J. Surle, M.Sc.
Professor of Radiology—Dr Reklil, M.B.S. (Ph), D.M. & F. (Cantab).
Lecturer in Physics and Mathematics, and Superintendent of the Science Department—Miss J. H. Ross, M.A., B.Sc. (Glas).
Lecturer in Chemistry—Miss Soshella Ram, M.A. (Cantab).
Lecturer in Biology—Miss C. C. Burt, B.Sc. (Edin).
Lecturer in English—Miss Lbbutt, M.A. (Dublin), Modern Language Tripos (Cantab).
Bursar and Warden—Miss M. W. Jesson, M.A. (Cantab).

Attached to the Hospital there are (1) a Training School for Nurses, and (2) a Training School for Dispensers. All particulars as to admission and training may be obtained in the case of (1) from the Nursing Superintendents, Lady Hardinge Medical College Hospital, Delhi, and in the case of (2) from the Lecturer on Pharmacy, at the same address.

NURSING

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in England, there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras, and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These hospitals also act as training institutions, and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions and private agencies. In this way the supply of trained nurses, English, Anglo Indian and Indian, is being steadily increased. In Bombay the organisation has gone a step farther, through the establishment of the Bombay Presidency Nursing Association, c/o St George's Hospital, Bombay. This is composed of representatives of the various Nursing Associations in charge of individual hospitals, and works under the Government. The principle on which the relations of this Association with the Local Associations is governed is that there shall be central examination and control combined with

complete individual autonomy in administration.

State Registration of Nurses for all India is much required. A meeting was held in Bombay in 1923 when Nurses from the Presidency met to discuss the question. It is desired that India should have its own State Register as in the United Kingdom, South Africa, New Zealand, Australia, Canada and Burma, and that the curricula and examinations should be brought into line with these countries. Government has proposed to establish a Provincial Register preparatory to an All-India Register.

Nursing Bodies—The Secretary of the Calcutta Hospital Nurses' Institution is Mr A. R. Nicholson, Allahabad Bank Buildings, Calcutta. The names and addresses of the other Nursing bodies in Calcutta are Lady Minto's Indian Nursing Association (Bengal Branch), 4, Hungerford Street, Lady Rogers' Hostel for Indian Nurses, 144, Russa Road South, Nurses' Academy, 6, Suburban Hospital Road, and Nurses' Bureau, 37, McLeod Street. In Madras there is the General Hospital, with a staff of 62 nurses, the Government Maternity Hospital, the Caste and Gosha Hospital at Kilpauk, the Royapetta Hospital and the

Ophthalmic Hospital, also the Lady Amptull Nurses Institute and the South Indian Nursing Association (now amalgamated) President, Her Excellency Lady Goschen. The Association has under its management—*The Lady Amptull Nurses Institute*, Western Castle, Mount Road, Madras. Fully trained and experienced nurses for all cases of illness both among Europeans and Indians, always available. *The Lady Willingdon Nursing Home*, Western Castle, Mount Road, Madras, and *Nilgiri Nursing and Convalescent Home*, Ootacamund, for Medical, Surgical and Maternity cases. The Nilgiri Nursing Home affords admirable facilities for convalescents.

Bombay Presidency—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first steps were taken on the initiative of Mr L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately, the Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1860. By degrees substantial endowments have been built up, although the Associations are still largely dependent upon annual subscriptions towards the maintenance of their works. This Association was incorporated under the Societies' Registration Act of 1860, in the year 1911, with the primary object of establishing a nursing service from which the Nursing staff of Government aided hospitals under management of Nursing Association might be recruited. This function, however, was never carried out by the Bombay Presidency Nursing Association, and under the present circumstances it appeared to the Committee improbable that it could be carried out, but up to now the auxiliary function of the examining and granting certificates to nurses and midwives, and maintaining a register of qualified nurses and midwives and also maintaining a Provident fund for the employees of the affiliated associations have been successfully carried out from 1911 to 1933. Memorandum, Rules and By-laws of the Association were however revised brought into line with the actual working of the Association. Towards the end of 1927, the Committee decided that some steps must be taken to do so and accordingly appointed a sub-committee to consider the revision and amendment of the Memorandum, Rules and By-laws. The Sub Committee reported that it appeared to be impossible to amend and revise the present rules piecemeal and that the only way to put things in order would be to draft an entirely fresh constitution and rules.

After fully considering the Sub Committee's report the Committee agreed that the Association be incorporated by an Act on the line of the Registration Act in the United Kingdom. Pending

the passing of the Act the new Memorandum of Association having received the approval of Government was brought into operation from 1st April 1929.

The following are affiliated associations as well as Training Institutions —

St. George's Hospital Nursing Association, Bombay, (for nurses only), Hon. Secretary R. W. Douglass, Esq.

Jamshetty Jijibhoy Hospital Nursing Association, Bombay, (for nurses and midwives), Hon. Secretary Dr. M. V. Mehta, O.B.E., F.R.C.P.

Cama & Albless Hospitals Nursing Association, Bombay (for Nurses and Midwives) Nil. This is now purely Govt. institution.

Sassoon Hospital Nursing Association, Poona, (for Nurses and Midwives) Nil. This is now purely Govt. institution.

Karachi Civil Hospital Nursing Association (for Nurses only), Hon. Secretary F. T. M. Day.

Civil Hospital Nursing Association, Nasik (for Nurses and Midwives), Hon. Secretary Civil Surgeon, Nasik.

Civil Hospital Nursing Association, Ahmedabad (for Nurses and Midwives), Hon. Secretary Civil Surgeon, Ahmedabad.

Victory Nursing Association, Sholapur, (for Nurses and Midwives), Hon. Secretary Civil Surgeon, Sholapur.

Infant Welfare Society's (Bombay), Wadi Bunder Maternity Home, Wari Maternity Home and DeLisle Road Maternity Home (For Midwives only).

Hindu Nirashrit Fund Maternity Home, Surat (For Midwives only).

Brahman Sabha Mhaskar Maternity Hospital, Bombay (For Midwives only).

Sheth Vaidilal Sarabhai General Hospital and Chinai Maternity Home, Ahmedabad (For Nurses and Midwives).

Dhanrajgiri Hospital, Sholapur (For Nurses and Midwives).

Narwanagar State Hospitals Irwin Hospital, Victoria Hospital and Ba. Shri Sajuba Female Hospital (For Midwives and Nurses).

Bai Jerbai Wadiji Hospital, Parel, Bombay (For Junior Examination only).

The following are only affiliated Associations but not Training Institutions —

East Khandesh District Nursing Association, Hony. Secy Civil Surgeon, Jalgaon.

Goculdas Tejpal Hospital Nursing Association, Hony. Secy R. W. Bullock.

Bijapur Civil Hospital Nursing Association, Hon. Secretary Civil Surgeon, Bijapur.

Byramji Jijibhoy Nursing Association, Matheran.

Dharwar Civil Hospital Nursing Association, Hony. Secretary Civil Surgeon, Dharwar.

Kanara Nursing Association, Karwar, Hon. Secretary Civil Surgeon, Karwar.

Panch-Mahals Nursing Association, Godhra, Hony. Secretary Civil Surgeon, Godhra.

Prince of Wales Nursing Association, Aden, Hony. Secretary I. Taylor, Esq.

The following are recognised Training Institutions —

V. J. Hospital, Ahmedabad (for Midwives). State General Hospital, Baroda (for Nurses and Midwives).

- Civil Hospital, Belgium (for Nurses and Midwives)
- King Edward VII Memorial Hospital, Parel, Bombay (for Nurses only)
- Bai Yamunabai L. Nair Charitable Hospital, Lamington Road, Bombay (for Nurses only)
- Bomanji Dinshaw Petitji Parsi General Hospital, Cumballa Hill, Bombay (for Nurses only)
- Lady Dufferin and Louise Lawrence Institute, Karachi (for Nurses and Midwives)
- Morabhai Vrajabhukandas Hospital, Surat (for Midwives)
- American Presbyterian Mission Hospital, Miraj (for Nurses only)
- St Luke's Hospital, Vengula (for Nurses only)
- Parsi Lying in Hospital, Bombay (for Midwives only)
- St Margaret's Hospital, Poona (for Nurses and Midwives only)
- King Edward Memorial Hospital, Poona (for Midwives only)
- Nowroji Wadia Maternity Hospital, Parel, Bombay (for Midwives only)
- Achutlal Girdharil Maternity Home, Ahmedabad (for Midwives only)
- Zenana Mission Hospital, Broach (for Midwives only)
- Lady Dufferin Hospital, Sholapur (for Midwives only)
- Canada Hospital, Nisik (for Nurses and Midwives)
- Mission Hospital, Ahmednagar (for Nurses only)
- Municipal Maternity Homes, Bombay
 - Bellasis Road (Biculla)
 - Imamwada (Mazgaon)
 - Cadell Road (Worli)
 - Victoria Cross Road (Biculla)
 - Khetwadi (Gurgaon)

Provision for retiring allowances is made for all members on the basis of a Provident Fund, and a Nursing Reserve has been established for employment in emergencies such as war, pestilence or public danger or calamity

Address.—The Registrar, Bombay Nursing Council, Old Custom House, Fort, Bombay

Lady Minto's Indian Nursing Association—In 1906 this Association was inaugurated replacing the Punjab and Up country Nursing Association for Europeans in India, which society, established in 1892, had accomplished much useful work in this country. Owing, however, to lack of funds it was found impossible to continue its administration and to carry out the expansion of the work so urgently called for. The name of the helpers identified with the premier Association to whom the public must ever be indebted are the Hon Lady Littleton, Lady Helen Munro Ferguson and Mrs Cottrell, while Mrs Shepherd, by her indefatigable efforts, is truly entitled to be regarded as the pioneer of a trained nursing system throughout the greater part of India. The late Lady Curzon worked energetically to provide an enlarged Nursing organisation, but mainly owing to financial reasons, she was unable before she left India to bring the scheme to fruition. The Home Committee of the existing Association, recognising the need for expansion, consented to take over the

present Association and approached Lady Minto before she left England in 1905 for co-operation towards this project, and after much consideration and discussion with the Government of India, Lieut-Governors and Commissioners of Provinces, the present Association was established. An appeal by Lady Minto addressed to the public both in England and India, was responded to most generously, and sufficient funds were collected to form an endowment fund, which has in spite of fluctuations increased a little with time. The assistance of a Government grant is much valued, as it enables Homes for the Sisters to be kept up in six Provinces in India and in Burma. At the request of the Home Committee the enlarged Association was renamed the "Lady Minto's Indian Nursing Association."

The duties of the Home Committee are, as before, largely concerned in dispatching—as required—suitably trained and carefully selected Nurses for service on the staff of the Association in India. Thus, Europeans who are members of this Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient. The boon of obtaining good nursing at moderate terms is much appreciated, the rates of subscriptions being really an insurance against illness.

Her Majesty the Queen is a Patron of the Association. Her Excellency The Countess of Willingdon is President of the Central Committee in India.

Hon Secretary, Malov F M Collins, R A M C
Hon Treasurer, W R Linnant, Esq, I C S
Chief Lady Superintendent, Miss G Beckett
Address—Central Committee, L M I N A, Viceregal Lodge, Simla, and Red Cross Building, New Delhi

Hon Secretary, Home Committee—Vicant Secretary, Home Committee Miss M E Ray, R R C, 10, Witherly Mansions, Earls Court Sq

Nurses' Organizations—The Association of Nursing Superintendents of India is now amalgamated with the Trained Nurses' Association of India, and has the one set of officers. The Trained Nurses' Association of India and the Association of Nursing Superintendents of India are not Associations to employ or to supply nurses, but are organizations with a membership wholly of nurses with the avowed objects of improving and unifying nursing education, promoting *esprit de corps* among nurses, and upholding the dignity and honour of the nursing profession. The Associations have a membership of 172 including nurses trained in ten or more different countries, Europeans, Americans, New Zealanders, Australians and Indians. The Association of Superintendents was started in 1905 as the Association of Nursing Superintendents of the United Provinces and the Punjab, but by the next year its membership had spread over the country to such an extent that the name was changed to include the whole of India. The Trained Nurses' Association was started in 1908, and a monthly *Journal of Nursing* began to be published by the two Associations in February, 1910. The Associations are affiliated with the international Council of Nurses.

President Mrs G D Franklin, 33, Rajpur Road, Delhi

THE WOMAN SUFFRAGE MOVEMENT.

Hon Secretary and Treasurer Miss Gadsden,
General Hospital, Madras

Within the abnormally short period of eleven years the Woman Suffrage movement has risen in India, swept through the country sympathetically and achieved the political enfranchisement of women in all the nine British Provinces and in four Indian States

Three fundamental causes have led to this remarkable success first, the deep veneration that is given by the Hindu and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses, by the necessity for the presence of the wife at all ceremonies performed by a Brahman, by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly, the time was psychological, for a new era was beginning for the Indian people by the introduction of a Scheme of Reforms in Indian government which was planned to give a basis of representative government on a much extended scale. The door was being opened to complete Self-government but only men were being invited to enter through it, although women compose half the people of the country and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too just to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire

Though the Municipal franchise had been granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make a large impact on women's consciousness and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election, and similarly in other Municipalities in that Presidency women have exercised their vote responsibly and intelligently. Since 1922 over 100 women have become Municipal Councillors and members of Local Government Boards. Their appointment has chiefly been by nomination but there have been notable seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seat in Bombay Corporation, also the instance in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have been secured by this large band of women Councillors, and every year sees a greater

number of women serving on these Local Councils and Boards

It was owing to the rise of the political agitation for Home Rule between 1914 and 1917 that women began to wake up to their position of exclusion by British law from any share in representative government. The internment of one of their own sex, Dr Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for the ripe public expression of their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first hand in 1917.

During the Hon E S Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out.

The first claim for women suffrage for Indian women was made in the address presented to Mr Montagu at this historic **All-India Women's Deputation** which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation.

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that 'a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which since its inception women have voted and been delegates and speakers, and which this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens, and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India was published no mention of women was made

though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of the inclusion of women in the new franchise.

After the introduction of the **Government of India Bill** into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs Annie Besant, Mrs Sarojini Naidu and Mrs and Miss Harbani Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election as Legislative Councillors.

Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar. In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolution in the Madras Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise. During the month that must legally intervene between the tabling of a Woman Suffrage motion and its introduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council. The Debate took place on April 1st and after a short discussion, in which it was evident that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future. When the division was taken, it resulted in the resolution being carried by a majority of 34. Madras has thus the honour of being the first Province in British India to enfranchise its women, and it has done this ungrudgingly and unhesitatingly in the broad spirit of the equality of the sexes, as it grants the vote to women on the same terms as it has been granted to men. Dr (Mrs) Muthulakshmi Reddi, the first woman member of the British Indian Legislature, has been able to introduce legislation to do away with the Devadasi service in the Hindu temples and the immoral traffic in women and children. She has also devoted her attention to the development of the education of girls and to the promotion of the health of mothers and children.

Mr Trivedi brought forward a **Woman Suffrage Resolution** in the **Bombay Legislative Council** during the same session, but some irregularity in its wording caused it to be pronounced out of order. In June that subject was tabled again and championed by Rao Saheb Harilal Desai and Desai of Ahmedabad, Deputy President of the Council. As in Madras, the intervening month was filled with suffrage activity by the women of the Presidency and was remarkable for a large joint meeting of Bombay city women at which 19 Women's Societies took part, and for a suffrage meeting of Marathi and Gujarati women in Poona when over 800 women showed the greatest enthusiasm for the movement.

The **Bombay Council Debate** on Woman Suffrage took three days and the subject was very fully discussed by over 40 members. The result was satisfactory to the suffragists the voting being 52 in favour, 25 against and 12 neutral. Thus Madras and Bombay Presidencies gave the lead to the other Provinces. In September, 1922, Mr S. M. Bose, in the **Bengal Council**, moved a **Woman Suffrage Resolution**, which was debated for three days but finally defeated by 56 to 37 votes, a bloc of 40 Muhammadan members voting solidly against it. In September 1925 the Bengal Council passed the Suffrage Resolution by a vote of 54 to 38.

Mr Devaki Prasad Sinha's similar Resolution in the **Behar and Orissa Legislative Council** was defeated by only a 10 votes' majority.

These Debates proved so educational to their respective Provinces that the **Bengal** and **Behar** Provinces have since granted qualified women the **Municipal Vote**.

In February, 1923, a world suffrage record was made by the *unanimous* vote of the **United Provinces Legislative Council** in favour of Woman Suffrage.

In 1926 the **Punjab** granted woman suffrage without a division, and in 1926 the **Central Provinces**.

The new Reform Bill for **Burma** has included the grant of woman suffrage to the qualified Burmese women, and further made provision for their election as Councillors if the Council passes a Resolution desiring their admission and if that Resolution is approved of by the Governor.

In April, 1922, the **Mysore Legislative Council** unanimously passed the **Woman Suffrage Resolution**. The vote for the Representative Assembly of Mysore was granted to women in October, 1922. The vote for Mysore Legislative Franchise was granted to the Mysore women by H. H. The Maharaja and His Privy Council in June 1923. In October, 1924, **Assam Provincial Council** granted Woman Suffrage for its Province by 26 to 8. It also has been the first Province to pass a Resolution in favour of allowing women to enter the Council as members.

In 1929 soon after the All-India Women's Educational Reform was held in Patna, the Legislative Council of **Behar** and **Orissa** gave women the right of voting, election and nomination to the Council on the same terms as men. Thus the whole of British India has now

given to women equal political rights with men. The result has already demonstrated itself in the remarkable advancement of all the interests of women along the lines of education, health, housing, morality and social customs.

The Indian Native States of **Travancore, Cochin and Rajkot** are the only places in India where the sex disqualification has been completely removed from the statute book. These have allowed women the right to stand for election for the Legislative Council as well as the right to vote for it, and two women have been elected to the newly formed Representative Council of Rajkot. The year 1925 has been noteworthy for the appointment of the first woman Minister to Government. Mrs. Poonam Lukhose became a member of the Travancore Legislative Council on taking the position of State Darbar Physician. She acted as Minister for Health to the State for three years. Cochin State nominated Mrs. Madhavamma as a member of its first Legislative Council.

In British India by the terms of the Reform Bill the Councils had no power to alter the disqualification of sex which remains against the right to stand as candidates for election to the Councils. This could only be changed by the vote of the British Parliament, and the gaining of this right remained as a further objective of the women suffragists. Many large, influential meetings were held claiming the right of women to entry of the Legislatures. A deputation of women about this subject waited on the Madras Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State had been accorded the power to grant women the franchise for their assemblies also by resolution, but only for those provinces which had already granted women the Legislative franchise. The Legislative Assembly has passed by a large majority a Resolution granting the Assembly franchise to the women of such Provinces. Accordingly, on November 1923, women in India voted for the first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly. The number of women who voted in the large cities was surprisingly large in Bombay and Madras Presidencies and comprised women of all castes and communities.

In April, 1926 as a result of a favourable recommendation of the Muddiman Committee on Franchise Reforms, the Rule was changed in the Reform Bill which disqualified women from entering the Legislatures. Power was granted to the Councils and the Assembly to pass Resolutions allowing qualified women to be elected or nominated as members of these bodies. Agam Madras Council, on the 17th July, was the first to pass a Resolution admitting women to its membership. Bombay and the Punjab followed its lead in August and October respectively. This enabled women to become members of the Councils which have been functioning since then. But the permission

came too late for women to stand for election with any great chance of success, so the Women's Indian Association asked that women be nominated by Government for the new Councils in those Provinces which had voted to admit them, and that women also be nominated to the Assembly and the Council of State. Thus the year 1926 marked another milestone passed on the road to the complete political emancipation of Indian womanhood.

In 1926 the Central Provinces, the Punjab and Bengal, all granted the Franchise to women. The year 1927 was notable for the nomination of the first woman member to a Legislative Council in British India, the recipient of the honour being Dr. MUTHULAKSHMI AMMAL, and she was further honoured by being elected unanimously by her colleagues in the Madras Legislative Council, to the Office of DEPUTY-PRESIDENT OF THE COUNCIL. Since then Mrs. Kale has been nominated to the Legislative Council of the Central Provinces, and Mrs. Ahmed Shaw to that of the United Provinces. A Deputation from the All-India Women's Conference in Delhi in 1928 waited on the Viceroy requesting him to nominate two women to the Legislative Assembly. That has still remained ungranted.

The number of women enfranchised by the grant of the vote throughout India will not be more than a million under the present qualifications. Property and not literacy is the basis of the franchise, though the grant of the vote to every graduate of seven years' standing ensures that the best educated women of the country as well as those who have to shoulder the largest property responsibilities will be those who rightly will be the legislating influence on behalf of womanhood. As regards the custom of purdah prevailing in parts of India special provisions have been made in Municipal voting for purdah recording stations for purdah women in which a woman is returning officer and this has been found quite satisfactory and has been adopted also where desired in connection with Legislative Council elections.

Though the Women's Indian Association was the only Indian women's society which had woman suffrage as one of its specific objects, almost all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement: Lady D. Tata, Lady A. Bose, Lady T. Sadasivaiyer, the Begum of Cambay, Mrs. Ramabai Ranade, Mrs. Sarojini Naidu, Mrs. Tampi Jehangir Petit, Mrs. Tata, Mrs. Wadia, Mrs. Jinarajadasa, Dr. A. Besant, Mrs. M. E. Cousins, Mrs. Srirangamma, Mrs. Chandrasekhara Iyer, Miss S. Sorabji, Mrs. Khedkar, Dr. Mistry, Dr. Muthulakshmi Ammal, Mrs. Palmer, Mrs. Saraladevi Choudhuri, Mrs. Kumudini Basu, Mrs. K. N. Roy, Lady Shafi, Mrs. Hassan Imam, Miss S. B. Das, Mrs. P. K. Sen, Mrs. Rustomji Fardoonji, Mrs. B. Rama Rao, Mrs. Deep Narain Singh, Mrs. Raschid, Mrs. van Gildemeester, etc.

Warrant of Precedence.

The following new Warrant of Precedence for India was approved by His Majesty the King-Emperor of India, and received His Royal Sign Manual, on 9th April 1930 —

- 1 Governor General and Viceroy of India

Indian Orders.

The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861, and enlarged in 1866, 1875, 1876, 1897, 1902, 1911, 1915 and 1920 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire, the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign, a Grand Master (the Viceroy of India), the first class of forty-four Knights Grand Commanders (22 British and 22 Indian), the second class of one hundred Knights Commanders, and the third class of two hundred and twenty-five Companions, exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown, all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds. That of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size, (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander, but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery, or if the recipient was resident in India, to the Secretary of the Order at Calcutta.

Sovereign of the Order — His Most Gracious Majesty The King Emperor of India

Grand Master of the Order — His Excellency the Viceroy and Governor-General of India, the Right Honourable Viscount Willingdon, P C, G M S I, G M I E, G B E

Officers of the Order — *Registrar* Col the Hon Sir George Arthur Charles Crichton, K C V O, Secretary of the Central Chancery of the Orders of Knighthood, St James' Palace London, W 1

The Most Eminent Order of the Indian Empire

This Order, instituted by H M Queen Victoria, Empress of India, December 1877, and extended and enlarged in 1886, 1887, 1892, 1897, 1902, 1911, 1915 and 1920 is conferred for services rendered to the Indian Empire, and consists of the Sovereign, a Grand Master, forty Knights Grand Commanders (of whom the Grand Master is first and principal), one hundred and forty Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 20 nominations in any one year), also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statute Jan 1st, 1909, commemorative of the 50th Anniversary of the assumption of Crown Govt in India.

The Insignia are (1) The COLLAR of gold formed of elephants, lotus flowers, peacocks in their pride and Indian roses, in the centre the

Imperial Crown, the whole linked together with chains, (2) The STAR of the Knight Grand Commander, comprised of five rays of silver, having a small ray of gold between each of them the whole alternately plain and scaled, issuing from a gold centre, having thereon Her Majesty Queen Victoria's Royal Effigy within a purple circle, edged and lettered gold inscribed *Imperatrix Auspiciis*, and surmounted by an Imperial Crown gold (3) The BADGE consisting of a rose, enamelled gules barbed vert, and having in the centre Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Auspiciis* surmounted by an Imperial Crown, also gold, (4) The MANTLE is of Imperial purple satin, lined with and fastened by a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order

A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size (b) on his left breast a star, similar to that of the first class, but the rays of which are all of silver

The above mentioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order

A Companion wears around his neck a badge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches

Sovereign of the Order—His Most Gracious Majesty The King-Emperor of India

Grand Master of the Order—H E the Viceroy (Viscount Willingdon)

Officers of the Order—The same as for the Order of the Star of India

The Imperial Order of the Crown of India.

This Order was instituted Jan 1, 1878, and for a like purpose with the simultaneously created Order of the Indian Empire. It consists of the Queen and Queen Mother with some Royal Princesses, and the female relatives of Indian Princes or of persons who have held conspicuous offices in connection with India. Badge, the Royal Cypher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. Designation the letters C I

Sovereign of the Order

THE KING-EMPEROR OF INDIA

Ladies of the Order (C I)

Her Majesty The Queen
 H M the Queen of Norway
 H R H the Princess Victoria
 H M The Queen of Roumania

Baroness Amphilh

Countess of Minto

Marchioness of Crowa

France Charlotte, Lady Chelmsford

The Lady Willingdon

The Lady Irwin

Countess of Lytton

Viscountess Goschen

Lady Birdwood

Lady Ali Shah

Distinctive Badges—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', 'Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states—The Government of India have recently had under consideration the question of the position in which miniatures of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kaiser-i Hind Medal.

Indian Distinguished Service Medal—This medal was instituted on June 28th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII, and on the reverse a laurel wreath encircling the words For Distinguished Service. The medal, $1\frac{1}{2}$ inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon $1\frac{1}{2}$ in wide, with blue edges $\frac{1}{2}$ in wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit—This reward of valour was instituted by the H E I Co in 1837, to reward personal bravery without any reference to length of service or good conduct.

It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration. The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class consists of a star of eight points, $1\frac{1}{2}$ in in diameter, having in the centre a ground of dark-blue enamel bearing crossed swords in gold, within a gold circle, and the inscription Reward of Valour, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold, and the Third Class entirely of silver. The decoration is suspended from a simple loop and bar from a dark-blue ribbon $1\frac{1}{2}$ in in width with red edges, bearing a gold or silver buckle according to class.

Order of British India—This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army. Since 1878, however, any person European or native, holding a commission in a native regiment, became eligible for admission to the Order without reference to creed or colour. The First Class consists of a gold eight-pointed radiated star $1\frac{1}{2}$ in in diameter. The centre is occupied by a lion statant gardant upon a ground of light-blue enamel, within a dark-blue band inscribed Order of British India, and encircled by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band $1\frac{1}{2}$ in in diameter, through which the ribbon, once blue, now red, is passed for suspension from the neck. The Second Class is $1\frac{1}{4}$ in in diameter with dark blue enamelled centre. There is no crown on this class, and the suspender is formed of an ornamental gold loop. The reverse is plain in both classes. The First Class carries with it the title Sardar Bahadur, and an additional allowance of two rupees a day and the Second the title of Bahadur, and an extra allowance of one rupee per day.

Indian Meritorious Service Medal—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal" but on being promoted to a commission he may retain the M S medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left with a veil falling over the crown behind, encircled by the legend Victoria Kāsar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base, having a star beneath, between the two wreaths is the inscription for meritorious service. Within the palm wreath is the word India. The medal, $1\frac{1}{2}$ in in diameter, is suspended from a scroll by means of a red ribbon $1\frac{1}{2}$ in wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS.

THE KAISAR-I-HIND MEDAL.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901 and 1912—being as follows—"Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created, and by these presents for Us, Our Heirs, and Successors, do institute and create a new Decoration." The decoration is styled "The Kaisar-i-Hind Medal for Public Service in India" and consists of two classes. The Medal is an oval-shaped Badge or Decoration—in gold for the First Class and in silver for the Second Class—with the Royal Cypher on one side and on the reverse the words "Kaisar-i-Hind for Public Service in India", it is suspended on the left breast by a dark blue ribbon.

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar, in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following —

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 1-39th Garhwal Rifles—For great gallantry on the night of the 23rd-24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retreat was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 23rd Gurkha Rifles—For most conspicuous bravery during operations against the German trenches south of Maquisart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety, returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance Naick) Lala, 41st Dogras—Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naick Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once. When

this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan, 80th Punjabis—For most conspicuous bravery. He was in charge of a machine gun section in an exposed position in front of and covering a gap in our new line with in 150 yards of the enemy's entrenched position. He beat off three counter attacks, and worked his gun single handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance-Dafedar Govind Singh, 28th Cavalry—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 1½ miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana, 23rd Gurkha Rifles—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bomber

and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Lancers attached 29th Lancers—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh es Samarveh Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single handed, but all the machine guns and infantry had surrendered

to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Singh Negi, 2nd Battalion, 39th Garhwal Rifles—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy Ishaw Singh, 28th Punjab—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun, restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded him with his body, and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

PASSPORT REGULATIONS

[Note—These instructions are intended for Presidency proper only. Residents in Sind in Sind. Persons residing outside the Bombay respective Governments or Administrations.]

A—British Subjects

1. British Indian passports are issued only to—(1) British subjects by birth, (2) wives and widows of such persons, (3) British subjects by naturalization and (4) British-protected persons.

Before a subject of an Indian State is granted a passport he should show that he has severed all connections with his state of origin and is permanently residing in British India or produce a certificate to show that the state has no objection to the grant of a passport.

2. The Indian Passport Regulations do not require persons to be in possession of passports for leaving India, but as practically every other country requires travellers to be in possession of passports before they are allowed to land at the port of such country, travellers are advised to obtain passports before embarkation. Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service travelling on duty and members of the families of such persons when travelling to the United Kingdom on military entitled passages need not have passports.

3. Passports are not required for journeys by sea from Bombay to ports in India or to Burma, nor are passports required for permanent residents of Ceylon or India being British subjects to travel between India and Ceylon. Natives of India travelling to the Federated Malay States or the Straits Settlements do not require passports unless they propose to continue their journey onward. (The term "permanent resident" actually means persons born and domiciled in India.)

4. In order to obtain a passport, an application form (showing, among other things, the reasons for the proposed journey) should be

the information of residents in the Bombay should apply for passports to the Commissioner. Residents should apply for passports to their

filled in by the applicant and the applicant's declaration certified by a Political Officer, Magistrate, Justice of the Peace, Police Officer not below the rank of Superintendent, or Notary Public resident in India. Copies of the form can be obtained from any District Magistrate, from the Commissioner of Police, Bombay, by post from the Passport Officer to the Government of Bombay, by personal application at the Passport Office, or from any of the leading Banking and Shipping Agents in Bombay. Small duplicate unmounted copies of the photograph of the applicant and a fee of Rs. 6 in cash should be forwarded with the application form. Fees are not accepted in stamps or by cheque.

5. The application form when filled in should either be posted with the photographs and fee to the Passport Officer to the Government of Bombay, or should be presented at the Passport Office, Bombay. An applicant who forwards his application for a passport through the post may call at the Passport Office at Bombay to take personal delivery of it, but if it is desired that the passport should be sent to him through the post it will be sent to the local officer of the town in which the applicant resides who will hand over the passport to the applicant personally and take a receipt for it.

6. The Passport Office in Bombay is situated in the Civil Secretariat. The office is open from 10.30 a.m. to 6 p.m. daily, except on Saturdays when it closes at 2 p.m. and on Sundays and public holidays.

7. As a passport is valid for five years, there is no objection to anyone applying for a passport weeks or even months in advance of the date of sailing and much inconvenience will be avoided by early application. A notice of at least

8 In certain circumstances, such as for instance, cases of extreme urgency, the Passport Officer is authorised to issue a travel document called an "Emergency Certificate" on being satisfied as to the nationality and the *bona fides* of the applicant. An application for an Emergency Certificate will on no account be considered, unless it is accompanied by duplicate unmounted copies of the photograph of the applicant.

Iraq

9 Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service in uniform and *bona fide* Muhammadan pilgrims (Haj or Zair) holding individual pilgrim passes do not require passports for their journey to Iraq. All intending pilgrims holding pilgrim passes and proceeding to the Holy shrines in Iraq or Persia are warned that if they do not set out on their journey on or about the dates specified on their passes they may be refused permission to land in Iraq or Persia. All other travellers must be in possession of national passports and visas for Iraq. In the absence of Iraqi Consular Officers in India, visas for Iraq are granted by Passport Issuing Authorities in India on behalf of the Iraqi Government subject to the conditions stated below. The Iraq visas are of two kinds—Ordinary, valid for all entries into Iraq during a period of twelve months, and Transit, valid for a single journey only, allowing for stay of not more than fifteen days in Iraq. The fee for these visas is the same as for British visas—*vide* paragraph 18 below. Iraqi national passports are valid for return to that country without any further visa or endorsement.

Except in the case of *bona fide* tourists of ample and independent means, business representatives and employees of well established firms and persons with definite guarantee of employment in Iraq, visas for Iraq will not be granted without the previous permission of the Iraqi Government. The Passport Officer will, on request, ask for this permission by post or, if the applicant is prepared to defray the cost by cable. Applicants must state clearly the nature of their business and give one or more references in Iraq to enable the local authorities to make inquiries regarding the purpose of their journey.

With the exception of tourists who may remain for three months in Iraq without registration, all persons are required to obtain a "permis de sejour" from the police within fifteen days of their arrival in Iraq. Travellers are also warned that before departure from Iraq even on a transit visa they must obtain a passport endorsement of departure.

Passengers, both British and Foreign, proceeding by Eastbound aeroplane on the regular service to India do not require any endorsements or visas on their passports for any of the Arab Principalities. Similarly, passengers by West-bound do not require endorsements or visas, if they are booked to proceed the Arab Principalities places beyond. When, however, they propose to discontinue their journey at Kuwait, Bahrein, Sharjah or Gwadar or to break their journey at any of those places, they must comply with the ordinary passport requirements regarding endorsements and visas.

Egypt

10 In the absence of Egyptian Consular Officers in India visas for Egypt are granted by

Passport Issuing Authorities in India on behalf of the Egyptian Government. The fee for these visas is the same as for British visas—*vide* paragraph 18 below. All visas for Egypt placed on British passports are free of charge.

The Egyptian Government have prescribed rules which regulate the admission of foreigners into Egypt. Generally except in the case of British Government officials, *bona fide* tourists of ample and independent means and representatives of commercial houses of good standing, visas for Egypt cannot be granted whether for permanent residence or for a limited period without a reference to the Egyptian Government. In applying for visas for Egypt, a form of questionnaire laid down by the Egyptian Government which can be obtained from the Passport Office at Bombay, should be filled in. In addition, an applicant for a visa should supply in writing, full particulars as regard the nature of his business in Egypt, the reasons for the journey, the proposed duration of stay in Egypt and what means he possesses.

No transit visa for Egypt can be given unless Egypt is necessarily on the route which the traveller must follow to reach his country of destination, and provided there exists no direct route by which he can reach that country without the necessity of passing through Egyptian territory.

Holders of the new form Egyptian passport do not require visas to return to Egypt.

Other Countries

11 Restrictions exist on travel to various parts of the British Empire and to certain foreign countries. Among these may be mentioned Afghanistan, Australia, Canada, Fiji, Madagascar, Mexico, Mohammedan and Abadan, New Zealand, Palestine, Southern Rhodesia, Union of South Africa, South-West Africa and the United States of America. The restrictions apply particularly to Indians. Detailed particulars with respect to each country will be supplied on application.

Foreign Countries

12 Passports for journeys to or through foreign countries require, after issue, the visa of the Consul concerned. The addresses of the foreign consulates in Bombay will be found in the appendix below. Visas are however, not necessary for Austria, Belgium, Czechoslovakia, Denmark, France, Germany, Holland, Iceland, Italy, Liechtenstein, Luxembourg, Norway, Portugal, Sarro, Spain, Sweden and Switzerland provided the names of these countries are entered on the passport by a British Passport issuing authority. Pilgrims holding pilgrim passes for Iraq are warned that should they desire to proceed to Persia they should obtain a visa on their pass from a Persian Consular Officer in India.

Renewal

13 A passport is valid for five years from the date of issue and is renewable for a further period of from one to five years from the date of expiry of its validity, at the option of the holder, but in no case can a passport be extended beyond ten years from the original date of issue. On expiration of this period, or, if at any time the space provided for visas is covered and the holder wishes to travel to countries for which fresh visas are required a

new passport must be obtained. Application for renewal must be made in the prescribed form, copies of which may be had from any of the officers mentioned in paragraph 4 above. The fee for renewals is Re 1 for each year, or portion of a year, for which the passport is renewed.

Endorsements

14 A passport is valid only for the country or countries endorsed on it and fresh endorsements from a British Passport authority are not needed during the validity of the passport for subsequent journeys to these countries. Fresh endorsements may, however, be obtained on the passport for additional countries. Passports endorsed as valid for the British Empire are also available for travelling to territories under British protection or mandate, not however including Palestine, for which country the passport must be specifically endorsed. The fee for endorsing the names of foreign countries on British passports is Re 1, but no fee is charged for this purpose on British Indian passports. A fee of Rs 1 8 0 is payable for an endorsement for Palestine on both British and British Indian passports.

Marriage

15 A lady on marriage or re-marriage requires a fresh passport.

16 In the case of a joint passport issued in favour of a husband and wife, the latter cannot travel alone on it but should take out a fresh passport surrendering the joint passport for cancellation of her name from it. The particulars of a wife cannot be added to her husband's existing passport. The holder of the passport should either apply for a new joint passport or his wife should apply for a separate passport in her own name.

B—Foreigners

17 Foreigners proceeding direct to their own country, or to, or through, any other foreign

country or countries do not require a British visa on their passports. The nationals of the following countries do not require a British visa for travelling to the United Kingdom. The concession also applies to certain nationals proceeding to certain British Dominions and Colonies and information on this point can be obtained from the Passport Office. The concession does not apply to India—

Austria, Belgium, Czechoslovakia, Denmark, France, Germany, Holland, Iceland, Italy, Liechtenstein, Luxemburg, Norway, Portugal, Sarro, Spain, Sweden and Switzerland.

18 Foreigners who are subjects of the countries shown in the appendix below and who are travelling to British territories for which a British visa is necessary should first obtain passports endorsed for the British territory concerned from their consular representatives and should then present them to the Passport Officer for visa, together with a written statement of the reasons for the journey. British visas are of two kinds, viz, the Non transit and Transit. The fees for these are Rs 7 0 0 and Re 1 0 0, respectively, except in the case of nationals of States which levy higher fees, when the retentory scale of fees will be applied.

19 Other foreigners should apply for Emergency certificates through the Commissioner of Police, Bombay, or, where such foreigners reside in the mofussil, through the District Magistrate of the district in which they are residing. Small duplicate copies of the applicant's photograph must accompany the application. The fee for an Emergency Certificate is Rs 1-8 0.

20 The holder of a foreign passport who has obtained a visa granted by a British Passport Authority outside India for a destination which involves landing in or passing through, India does not need a further visa from the authorities in India.

The School of Oriental Studies.

This School was established by Royal Charter in June 1916. The purposes of the School (as set out in the Charter) are to be a School of Oriental Studies in the University of London to give instruction in the Languages of Eastern and African peoples, Ancient and Modern, and in the Literature, History, Religion, Law, Customs and Art of those peoples, especially with a view to the needs of persons about to proceed to the East or to Africa for the pursuit of study and research, commerce or a profession, and to do all or any of such other things as the Governing Body of the School consider conducive or incidental thereto, having regard to the provision for those purposes which already exists elsewhere and in particular to the coordination of the work of the School with that of similar institutions both in Great Britain and in its Eastern and African Dominions and with the work of the University of London and its other Schools.

The School possesses noble and interesting buildings, in Finsbury Circus provided by the British Government under the London Institution (Transfer) Act of 1912. The sum of £25,000 required for the alteration and extension of the buildings of the London Institution for the purposes of the School was voted by Parliament. The School buildings are quiet although they are in the heart of the City. The School

provides teaching in more than seventy subjects. In a considerable proportion of the spoken languages instruction is given by teachers belonging to the countries where the languages are spoken, as it is the aim of the School to provide as far as possible both European and Oriental Lecturers in the principal languages included in the curriculum.

Courses on the History, Religions, and Customs of Oriental and African countries form a special feature in the teaching of the School. There is a whole time Professor in Phonetics the classes for which are numerically larger than in any other subject. It is intended to record fully in phonetic symbols all the languages taught at the School.

Owing to the generosity of the Rockefeller Foundation a new sub department under Professor Lloyd James has been opened for the teaching of and research into African Linguistics.

Courses are also provided in Indian Law and the History of India, and arrangements are made from time to time for special courses of lectures to be given by distinguished orientologists not on the staff.

Patron, H. M. the King *Chairman of the Governing Body*, Sir Harcourt Butler, G.C.S.I. *Director*, Professor Sir E. Denison Ross, C.I.E., D. Litt., Ph.D. *Secretary*, G. W. Rossetti, M.A.

The Fisheries of India.

enquire into the working of the Department and make recommendations for its future development have just published their report in two volumes. The Evidence collected by the Committee is an octavo volume of 131 pages and the Report of the Committee is another similar volume of 261 pages. The Report is a remarkable production which summarises the aims and achievements of the Department during the last quarter of a century and contains detailed proposals for the expansion of the Department activities in different directions. The whole work of the Department has received a great impetus as a result of the report of this Committee. The Committee have emphasised the true purpose and aim of a technical Department of Fisheries to be essentially the material amelioration of the lot of the sea going fishermen. The activities of the past 25 years were largely concerned with curing and canning, manufacture of oil and guano and safe guarding of Government revenue. Remarkably successful as they were under the able guidance of Sir Frederick Nicholson, they seemed somewhat to obscure what should be the primary object and policy of the Department. Technological improvements in curing and canning and allied industries should follow ultimately in the wake of improved catches. Socio economic and humanitarian endeavours however necessary and important, in view of the caste system of India, could not directly add one fish to the actual catch of the fisherman. The Committee have therefore urged that efforts to improve the professional knowledge of the sea going fishermen and the catching powers of his craft and tackle which were inaugurated with the acquisition of the trawler in 1926 must necessarily occupy the first place of the departmental programme. The higher staff now consists of five Assistant Directors and an Assistant Biologist. These are respectively in charge of (1) the chank and beche de mer fisheries, (2) the Co operative and educational work and the West coast fish curing yards, (3) inland pisciculture, (4) deep sea fishing, (5) propaganda for rural pisciculture, and (6) biological investigations and fishery research. Certain other officers have charge respectively of sections dealing with technological research, trout fisheries and the fisheries of the Northern Circars. A special staff of officers trained in co operation have been appointed for intensive work among fishermen. The miscellaneous institutions controlled by the Department consist of a small demonstration cannery, a research station for curing, canning and allied industries, a Fisheries Training Institute at Calicut for imparting special training to teachers selected to teach in schools for fisher children of which there were 43 with a total of 3,637 pupils in 1930. All the public fish curing yards which were under the control of the Salt and Abkari Department till 1924 have passed into the charge of the Fisheries Department. It is now possible to introduce the better methods of cure and improved hygiene which the Department has been striving to popularise in all the yards. Due to the transfer of the yards, the Fisheries Department has a large ramified staff of yard officers (Salt Sub Inspectors, Petty Yard Officers and Peons) in almost every large fishing village on the coast. Besides

the direct work of issuing salt for curing, the Department sets itself to train these officers into expert advisers in curing methods and marketing fish, social workers for the incalculation of thrift, co operative and progressive ideas and new industries and lastly as trained observers for recording and reporting on various biological questions connected with fish and fisheries and collecting statistics regarding the value and quantity of sea fish caught and landed. Statistics have been published since 1925-26 regularly every year in the bulletins.

The activities of the Department are so varied and far-reaching that it is difficult even to enumerate them in the space available, much less to give details. So far its most notable industrial successes have been the reform of manufacturing processes in the fish oil trade, the creation of a fish guano industry and the opening of an oyster farm conducted under hygienic conditions. Twenty-four volumes have been issued to date and the twenty-fifth volume in Press. All this work has been carried on under serious handicap for want of adequate staff and equipment.

The educational work of the Department is becoming one of its most important branches whether it be specially training teachers for schools in fishing villages or training men in the technology of curing, canning and oil manufacture, in co operative propaganda and in the supply of zoological specimens for the use of college classes and museums. The last named has filled a long felt want and is contributing materially to the advancement of the study of Zoology throughout India. There is now no need to obtain specimens from Europe as they can be had from the Research Assistant, Fisheries Station, Lannur, Madras, at moderate prices.

Fish Curing—Fish curing is practised extensively everywhere on the Madras coasts. Its present success is due primarily to Dr Francis Day who after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty-free salt for curing purposes within fenced enclosures. He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts. His salt suggestions were accepted by the Madras Government, and from 1882 a gradually increasing number of yards or bonded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the salt to Government. At present about 115 of such yards are scattered along the coast and over 55,000 tons of wet fish are annually cured therein. The total receipts on the administration of these yards for the year 1930-31 was Rs 1,97,777-0-4 and expenditure Rs 2,85,913-12-4.

Pearl and Chank Fisheries—In the absence of the pearl fishery during the year, the chank fisheries prospered. An unprecedented number of 467,628 chanks were fished yielding a gross revenue of Rs 17,860-8-8.

The Inland Fisheries—The Inland Fisheries of Madras compare unfavourably with those of Bengal. Many of the rivers dry up in the hot season and few of the many thousands of irrigation tanks throughout the provinces

hold water for more than 6 to 9 months. As a consequence, inland fisheries are badly organised and few men devote themselves to fishing as their sole or even main occupation. The custom is to neglect or ignore the fishery value of these streams and tanks so long as they are full of water only when the streams shrink to pools and the tanks to puddles do the owners or lessees of the fishing rights turn out to catch fish. The result is a dearth of fish throughout the greater part of the year, a glut for a few days, and often much waste in consequence. The chief fresh water fishes of economic importance are the Murrel, notable for its virtue of living for a considerable period out of water, and various carps including Labeo, Catla and the well known favourite of sportsman in India the "Mahseer," Cat-fishes and Hilsa. In the Nilgiris, the Rainbow Trout has been acclimatised and thrives well. The Government working in conjunction with the Nilgiri Game Association maintain a hatchery at Avalanche, where quantities of fry are hatched and reared for the replenishment of the streams of the plateau. Fishing rights in the large irrigation tanks were transferred from Government to local authorities many years ago, these tanks are now being reacqured by Government in order that they may be stocked periodically by the Department, the results so far have shown a profit on the operations. To breed the necessary fry, 7 fish farms are in operation. In these the chief fish bred are the Gourami, obtained from Java, and *Etioplos suratensis* which has the excellent attribute of thriving and breeding as well in brackish as in fresh water, both protect their eggs while developing, a useful habit. Both the Gourami and *Etioplos* are largely vegetarian in diet. A further activity is represented by the breeding of small fishes especially addicted to feed upon the aquatic larvæ of mosquitoes. These are supplied in thousands to municipalities and other local authorities at a nominal price, for introduction into mosquito haunted sheets of water, these anti-malarial operations have proved successful in the places where the local authorities have given proper attention to the direction given.

Marine Aquarium—Perhaps a word is necessary about this institution at Madras. The building was constructed under the auspices of the Superintendent, Government Museum, Madras, and was thrown open to the public on 21st October 1909. The Superintendent, Government Museum, had charge of the Aquarium for ten years till 1919 when it was transferred to the Department of Fisheries. Ever since its opening, being the first institution of its kind in Asia, it has been immensely popular with the public.

A turtle tank of rough semi circular shape with 21 feet as diameter was added during the course of the year.

Deep Sea Fishing and Research—The fisherman has a fairly exhaustive knowledge of the fisheries along the coast up to 7 fathoms. If the catches of fish are to be improved it is necessary to ascertain—

- (1) what kinds and quantities of fish are available beyond 7 fathoms, and,
- (2) how to exploit these deep sea fisheries economically

The department's trawler "Lady Goshen" has been exploring the off shore belt of the sea up to 100 fathoms from Point Calimere to Madras on the East Coast and Calicut to Pigeon Islands on the West Coast, with a view to ascertain the kinds and quantities of fish available there. The Assistant Biologist and staff worked on board the trawler. One remarkable discovery made by this systematic survey is that fish of better quality and in larger quantity are available in deeper waters on the East coast from Point Calimere to Madras than on the West coast from Calicut to Pigeon Islands, during the months of the survey. Whether it is the case throughout the year is yet to be ascertained. However it has helped to revise the general belief that fish are much more abundant on the West coast than on the East coast, and opens up possibilities for large fishery developments on the East Coast which will ultimately increase the supply of fish food and fish manure.

Rural Pisciculture—As a result of the recommendation of the Royal Commission on Agriculture that all practical measures should be adopted to add fish to the diet of the cultivator thereby improving his nutrition, a scheme of rural propaganda was inaugurated in 1930. An Assistant Director with necessary staff was appointed to advise ryots in the stocking of village ponds which number over 106,050 in the Presidency. The work though begun in July 1930, has already completed a survey of ponds in 98 villages, 2,172 wells and 264 ponds in these villages were examined and out of this number 175 wells and 85 ponds were selected as suitable for piscicultural operations and 45 wells and 1 pond were stocked.

Welfare Work—A remarkable feature in the work of the Madras Fisheries Department is the energy which it devotes to the improvement of the condition of the fisherfolk. On Sir Frederick Nicholson's initiative, the Department has always recognised the duty of spreading among them education and the habits of thrift, temperance and co operation. The work has been specially successful on the West Coast. The number of fishermen's co operative societies in 1930-31 was 73.

The need for special efforts to promote co operation among fisherfolk and to renew and stimulate co operative societies to more efficient work has been recognised by Government for some years. The Committee on Fisheries recommended that all co operative work among fishermen both on the West and East Coasts in the Presidency should be done by the Fisheries Department and that, on the analogy of the system in vogue in the Labour Department, the staff of Inspectors of Co operative societies should work under the Fisheries Department, the Co operative supplying trained Inspectors and auditing the books of the societies. The Government partially accepted the recommendations and sanctioned the deputation of 3 Inspectors of Co operative Societies for exclusive work among fishermen under the department.

Two industrial societies were started one at Blinged and the other at Palapatty on the West Coast in 1927 with the object of weaning the fishermen gradually from the influence of

Bombay.

Whereas Bengal's fisheries are at present confined principally to inland waters, those of Bombay are concerned, save in Sind almost entirely with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding with excellent harbours for fishing, craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister Provinces. Bombay sea-fisheries are of very great importance financially as well as economically and, though there is less necessity for a special department to develop marine industries there is ample scope for most useful work in improving curing methods, in introducing canning, and in the development of minor marine industries particularly those connected with the utilization of by-products. With this end in view the Director of Industries administered the subject of "Fisheries" from 1918 and had for a time two officers in the Department engaged upon fishery investigation and development. A steam trawler was bought for work in Bombay waters in 1920 and began work in May 1921 off Bombay. The experiment continued until February 1922 and the trawler was subsequently sold to the Government of Burma. At the end of the results seemed promising, but the experiment as a whole showed that the cost of maintaining a trawler of the type used could not be met by sales of fish at current market rates. Cold storage has since been installed at the principal fish market in Bombay, but for a trawler special facilities are needed also for rapid coaling, supplying ice and stores and for unloading catches. More than this a change is needed in the medieval conditions under which the local fish market is conducted and there is much to be done in popularising little known species of edible fish such as karel, palu, tambura, and particularly the ray or skate which formed on the average 25 per cent of the total catch but which is so little esteemed locally that it sold on the average at the rate of 100 lbs for a rupee.

Owing to retrenchment the appointments of Fisheries officers have been abolished.

The more important sea fish are pomfrets, sole and sea-perches among which are included the valuable Jew fishes (*Scorpa* spp) often attaining a very large size and notable as the chief source of "fish maws" or "sounds" largely exported from Bombay for eventual manufacture into isinglass. The finest of Bombay fishing boats hail from the coast between Baselin and Surat. These boats are beautifully constructed, attain a considerable size, and are capable of keeping the sea for weeks together. In the season they fish principally off the Kutch and Kathiawar coasts and in the mouth of the Gulf of Cambay. Their main method of fishing is by means of huge anchored stow nets, which are left down for several hours and hauled at the turn of the tide. The chief catches are bombill (Bombay ducks), pomfrets and Jew fishes. The first named are dried in the sun after being strung through the mouth upon lines stretched between upright posts. South of Bombay the fishermen of Ratnagiri and Rajapur make use of another and lighter

class of fishing boat, specially designed for use in drift-net fishing. Fine hauls of bonito seer (a large form of mackerel) and allied fishes are often made during the season from September to January and later of shark and ray fish. For the latter specially large and powerful nets are employed. For part of the fair season, when fishing is not usually remunerative, many of the larger Bombay fishing boats are employed as small coasters, a fact which shows how large they run in size.

In Sind considerable sea-fishing is carried on in the neighbourhood of Karachi chiefly for large and coarse fish, such as soormal, shark, ray and Jew fishes. In order to prevent destructive exploitation of oyster beds the plucking of oyster is confined to licensed fishermen and is limited to a few months of the cold weather. The demand for oysters for edible purposes is considerable, but although many seed pearls are procurable it does not pay to work the beds for these purposes, and the export of such seed pearls to China for use in medicine ceased many years ago. Considerable fisheries exist in the River Indus, chiefly for the fish known as palla, which are annually leased out by Government for about Rs 20,000.

In the Gulf of Kutch two pearl fisheries exist: one for the true pearl oyster, the other for the window pane oyster. The former is carried on by His Highness the Maharaja of Junagar and the other partly by this Prince and partly by the administration of His Highness the Maharaja Gaekwar of Baroda. The latter industry owes its local existence to the enterprise of the Baroda Government which in 1905 obtained the services on deputation of Mr T Hornell, formerly Director of Fisheries in Madras for the purpose of examining the Marine potentialities of the Baroda territory in Kathiawar. One of the consequences was the discovery of large deposits of pearl bearing window pane oysters until then unknown, of late years these beds have produced annually from Rs 15,000 to Rs 25,000 in revenue perhaps the best example we have in India of the profitable nature of well directed scientific enquiry into fishery problems. The Baroda Government, continuing their enlightened interest in the fishery developments have had two officers trained in the Madras Fisheries Department and now employ them in development work on the Baroda coast.

Experiments in canning are now in progress at one of the chief fishing centres on the Southern Kathiawar coast and already promise considerable success particularly with regard to pomfrets.

In 1910 Mr W H Lucas, Collector of Salt Revenue, drew up a report on the improvement of the sea fisheries in the Bombay Presidency. The main conclusions at which he arrived were that the Indian consumer is so conservative that new methods of curing, canning, etc., have no chance of succeeding without the help of patient demonstration by Government as an initial step towards the investment of Indian capital in a new enterprise, and that therefore the establishment of a Government demonstration fishing station at some large fishing centre on the Ratnagiri or Kanara coast may be found advisable after the results of the Madras Government fishing station have been studied.

Recently Mr H T Sorley, ICS, carried out a survey of the fishing resources of the Bombay Presidency and Sind coast. The results of this investigation published by the Bombay Government contain valuable suggestions for the development of the Presidency's fishing industry.

The year 1933 is a memorable one so far as the fishing industry of the City of Bombay is concerned. The year saw the establishment of a Section of Fisheries under the aegis of the Department of Industries, Bombay. This

Section is still in its infancy and there is hardly any data whence it may be possible to draw any deductions about the future of the industry. An important feature of the work of the new Section was the launching of a fast motor boat by Sir Frederick Sikes, the then Governor of Bombay for the rapid transport of fish from the fishing grounds to the landing sites in Bombay. The venture is merely of an experimental nature. The primary object of this experiment is to demonstrate to local fishermen how the adoption of rapid and modern means of transport will directly benefit their trade.

Burma.

Fresh, dried and salted fish and fish paste are consumed by Burmese people. The value of fish imported from foreign countries (chiefly from Straits Settlements) was 8.85 lakhs in 1931-32. The exclusive right of fishing throughout the province of Burma belongs by custom of the country to Government, and the Burma Fisheries Act provides for the protection of this right and for conceding the enjoyment of it to the people subject to certain restrictions for the conservation of the fish.

Revenue.—The economic value of any industry or tract of country can, to some extent, be gauged by the revenue it yields. The fisheries yielded a substantial revenue (about 43.85 lakhs *per annum* during the last decennium) and therefore they are one of the most important sources of national wealth. The receipts declined to 2/3rds of this amount in the year 1932-33 owing to trade and economic depression. Some open lakes, pools of water and small rivers are classed as leaseable fisheries and are leased by Government to the highest and best bidders at public auction for periods varying from one to five years. The total number of leaseable fisheries in the province is 3,606 of which 1,697 lie in the Irrawaddy Division, and 699 in Mabin—one of the five districts in that division.

The Delta consists of a series of saucer shaped islands, many of which have embankments round the greater part of them along the north-east and west. In the hollows of these islands most of the fish come into spawn, and with the floods which overflow the embankment during October the young fry come down country from Upper Burma.

Licenses for fishing in all open fisheries are issued annually to persons who pay the prescribed fees for the specified classes of fishing implements. The greatest revenue from licenses comes from Mergui District where not only is the Pearlry industry carried on, but leases for collecting green snails and sea slugs are issued.

The principal kinds of fish caught in nets on the sea coast are (1) Kakkuan, (2) Katha-brung, (3) Kathahmyin and (4) Kabalu. These are generally made into salt fish which fetch Rs 2 to Rs 3 *per viss*. The creek and fresh water fish from fisheries are generally *ngalhu*, *ngayan* and *ngayun*. Most of them are sold fresh, but some are converted into salt fish. The fish caught in the rivers are generally *ngathalauk*, *Ngagyan* and *Ngaminmyin*. *Kakalaung* and *Ngapoma* which are found in small quantities elsewhere in India are sold in abundance in the Rangoon market.

The Punjab

The year 1932-33 was marked by an important change in the administration of the Fisheries Department. On the retirement of Mr C H Donald the post of Warden of Fisheries was abolished, and the department placed under the control of the Director of Agriculture, Punjab. The Fisheries Research Laboratory was transferred to the Agricultural College, Lyallpur, and now forms part of the Entomological Section at that Institute.

On account of financial stringency no important advance could be made either in conservation or in research. The number of fishing licenses rose from 6,392 in the previous year to 6,917 during 1932-33.

The catches of professional fishermen on the whole were satisfactory, except during the Spring of 1933, when weather conditions were unfavourable for both netting and angling. Hail storms did considerable damage to the fish

in the Sohan Stream in the Rawalpindi District. The trout fishing on the Beas and its tributaries in Kulu was good, except in the Tirthan Stream where the floods were very severe and played havoc with the fish. The number of trout Angling Licenses rose from 113 in the last year to 141. The Anglers got good sport and found the fish in excellent condition. Fishing in the two Trout Streams in Kangra proper was not good. Mahasir fishing in the waters in the sub montane Districts was satisfactory.

Trout cultural experiments were successful in the hills, but the breeding of carp at Chhenawan did not yield any important results. Owing to paucity of funds other fish breeding stations remained closed. 900 Larvicidal fish were sent from the Chhenawan Fish Tanks to three different places for the control of Malaria. These fish have been found by experiments to devour about 100 Mosquito larvae each in one hour.

Travancore.

This State has affiliated fisheries to the Department of Agriculture and with the help of two officers trained in Madras and another officer trained in Japan, the Department has already accomplished a notable amount of development work. Special attention has been given to the regulation of fisheries in backwaters, to the establishment of co operative societies

among the fishing community and to the introduction of improved methods of sardine oil and gurao production. Useful work has been done by one of the officers in elucidating the life-histories of the more valuable food fishes and prawns. Improved methods of curing fish are being introduced. Special Schools have been opened for the education of fisher lads.

The Forests.

Even in the earliest days of the British occupation the destruction of the forests in many parts of India indicated the necessity for a strong forest policy, but whether or not our earlier administrators realized the importance of the forests to the physical and economic welfare of the country, the fact remains that little or nothing was done. The year 1855 marked the commencement of a new era in the history of forests in India, for it was then that Lord Dalhousie laid down a definite and far-sighted forest policy. Further progress was delayed for a time by the Mutiny, but from 1860 onwards forest organization was rapidly extended to the other provinces. The earlier years of forest administration were beset with difficulties, which is not surprising considering that the Department was charged with the unpopular duty of protecting the heritage of Nature from the rapacity of mankind—a duty which naturally roused the antagonism of the agricultural population of India. Exploration, demarcation and settlement, followed by efforts to introduce protection and some form of regular management, were the first duties of the Forest Department. Work on these lines, which is not yet completed in the more backward parts of the country, has been pursued steadily from the commencement, and in consequence large tracts of forest have been saved from ruin and are gradually being brought under efficient management. Whatever may have been the opinions held in some quarters half a century ago as to the need for a policy, such as that expressed in Lord Dalhousie's memorable enunciation of 1855, there is no longer any doubt that results have amply justified the steps taken, and that in her forests India now possesses a property of constantly increasing value, the future importance of which it is hardly possible to overestimate.

Types of Forest—More than one-fifth of the total area of British India (including the Shan States) is under the control of the Forest Department. These areas are classified as reserved, protected or unclassed State forests. In the reserved forests rights of user in favour of individuals and the public are carefully recorded and limited at settlement while the boundaries are defined and demarcated, in the protected forests the record of rights is not so complete, the accrual of rights after settlement not being prohibited, and the boundaries are not always demarcated, while in the unclassed forests no systematic management is attempted, and as a rule the control amounts to nothing more than the collection of revenue until the areas are taken up for cultivation or are converted into reserved or protected forests. The total forest area of British India (including the Shan States) on 31st March 1930 was 240,710 square miles or 22.6 of the

total area. This was classed as follows: Reserved 107,753 Protected 6,263, Unclassed State 135,694

Throughout this vast forest area, scattered over the length and breadth of India from the Himalayan snows to Cape Comorin and from the arid juniper tracts of Baluchistan to the eastern limits of the Shan States, there is, as may be imagined, an infinite variety in the types of forest vegetation, depending on variations of climate and soil and on other local factors. Broadly speaking the following main types of forest may be distinguished—

(1) Arid country forests, extending over Sind, a considerable portion of Rajputana, part of Baluchistan and the south of the Punjab, in dry tracts where the rainfall is less than 20 inches. The number of species is few, the most important tree being the babul or khar (*Acacia arabica*), which however in the driest regions exists only by the aid of river inundations.

(2) Deciduous forests in which most of the trees are leafless for a portion of the year. These forests which extend over large areas in the sub-Himalayan tract, the Peninsula of India and Burma, are among the most important comprising as they do the greater part of the teak and sal forests.

(3) Evergreen forests—These occur in regions of very heavy rainfall, such as the west coast of the Peninsula, the eastern sub-Himalayan tract, and the moisture parts of Burma and are characterized by the great variety and luxuriance of their vegetation.

(4) Hill forests—In these the vegetation varies considerably according to elevation and rainfall. In the Eastern Himalaya, Assam and Burma, the hill forests are characterized by various oaks, magnolias and laurels, while in Assam and Burma the Khasia pine (*Pinus khasya*) grows gregariously at elevations of 3,000 to 7,000 feet. In the North-Western Himalaya the chief timber tree is the deodar (*Cedrus deodara*), which occurs most commonly at elevations of 6,000 to 8,000 feet, and in association with oaks or blue pine (*Pinus excelsa*), towards its upper limit the deodar merges into very large areas of spruce and silver fir, while below it are found extensive forests of the long-needled pine (*Pinus longifolia*) which is tapped for resin.

(5) Littoral forests—These occur on the sea coast and along tidal creeks. The most characteristic trees belong to the mangrove family (*Rhizophoraceae*). Behind the mangrove belt is an important type of forest occasionally inundated by high tides, in which the most valuable species is the "sundri" (*Heritiera fomes*).

Forest Policy—The general policy of the Government of India in relation to forests was definitely laid down in 1894 by the classification of the areas under the control of the Department into four broad classes, namely—

(a) Forests the preservation of which is essential on climatic or physical grounds. These are usually situated in hilly country where the retention of forest growth is of vital importance on account of its influence on the storage of the rainfall and on the prevention of erosion and sudden floods

(b) Forests which afford a supply of valuable timbers for commercial purposes, such, for example, as the teak forests of Burma, the sal forests of Northern, Central, and North Eastern India, and the deodar and pine forests of the North-Western Himalaya

(c) Minor forests, containing somewhat inferior kinds of timber, and managed for the production of wood, fodder, grazing and other produce for local consumption, these forests are of great importance in agricultural districts

(d) Pasture lands—These are not "forests" in the generally understood sense of the term but grazing grounds managed by the Forest Department merely as a matter of convenience

These four classes of forest are not always sharply divided from each other, and one and the same tract may to a certain extent be managed with more than one object

Administration—The forest business of the Government of India is carried out in the Department of Education, Health and Lands. The Inspector General of Forests is also President of the Forest Research Institute at Dehra Dun and is the technical adviser to the Government of India in forest matters. Under the Constitution of 1919 Forests were made a transferred subject in Bombay and Burma, where they had long been administered by the Provincial Governments and in 1924 the Reforms Inquiry Committee presided over by the late Sir Alexander Muddiman, Home Member of the Government of India, recommended that they be transferred in other provinces now unless, any local Government on examination of the position can make out a convincing case against the transfer in its own province

Territorial charges—The various provinces are divided into one or more Forest Circles, each in charge of a Conservator of Forests, provinces containing three or more circles also have a Chief Conservator who is the head of the Department for his province. Circles are divided into a number of Forest Divisions, in charge of members of the Imperial or Provincial Forest Service, these Divisions in most cases correspond to civil districts. Each Division contains a number of Ranges in charge of junior members of the Provincial Service or of Forest Rangers or Deputy Rangers, heavy Divisions are also sometimes divided into Subdivisions. The Ranges are further subdivided into a number of belts or protective charges held by Forest Guards or in some cases by Foresters

Non territorial changes—Apart from territorial changes there are various important posts of a non territorial nature connected with Forest Research and Education, the preparation of Forest Working Plans, and other special duties

The Forest Service—The Forest Service comprises three branches—

(1) The Indian (Imperial) Forest Service with a sanctioned total personnel of 379 officers consisting of the Inspector General of Forests, Chief Conservators, Conservators, Deputy and Assistant Conservators. Of these 281 have been recruited direct to the service. The officers of this service are recruited as probationers subject to the following methods prescribed in the Indian Forest Service (Recruitment) Rules, 1928—

(a) by nomination in England in accordance with such supplementary regulations as may be prescribed by the Secretary of State in Council

(b) by competitive examination in India in accordance with such supplementary regulations as may be prescribed by the Governor-General in Council

(c) by direct appointment of persons selected in India otherwise than by competitive examination,

(d) by the promotion on the recommendation of local Governments of members of the Provincial Forest Services,

(e) by the transfer of promotion of an officer belonging to a branch of Government Service in India other than a Provincial Forest Service

Further recruitment to the Indian Forest Service, whether by promotion or direct appointment, has been suspended until a decision is reached on the recommendation of the Services Sub Committee of the Indian Round Table Conference in regard to the provincialisation of the Indian Forest Service

In Bombay and Burma, where Forest is a transferred subject new services called the Bombay and Burma Forest Services Class I, have been created to take the place of the Indian Forest Service

(2) **The Indian Forest Engineering Service**—This service was created in 1919 but since 1922 no further recruitment has been made. Some of the Forest Engineers have been transferred to the Indian Forest Service or the Indian Service of Engineers and some have resigned or have retired. The future strength is not expected to remain at more than three or four (one each in Bombay, Madras and Punjab)

(3) **The Provincial Service**—Formerly it consisted of Extra Deputy and Extra Assistant Conservators of Forests. All Extra Deputy Conservators who were considered to be fully qualified to hold a major charge were transferred to the Indian Forest Service in 1920. The class of Extra Deputy Conservators has been abolished and the service now consists of Extra Assistant Conservators only. The fixation of the strength of the personnel of the service rests with the local Governments

Officers of this service are eligible for promotion up to 25 per cent of the posts in the Indian Forest Service in provinces other than Bombay and Burma, such promotion being made by the Secretary of State for India. These officers are recruited and trained in India, their

recruitment being a matter for the local Governments. A certain number of posts in the service are filled by the promotion of specially promising Rangers. Owing to the establishment of a course for the training of probationers for the Indian Forests Service at Dehra Dun since 1926, the Provincial Service course ceased to exist from 1928. The I F S College has also closed down at the end of Oct 1932 as a result of the stoppage of recruitment to the Indian Forest Service and as a measure of economy.

(4) The Subordinate Service consists of Forest Rangers (about 840), Deputy Rangers (about 900), Foresters (about 2,000) and Forest Guards (about 11,500). The Rangers are at present trained at three different centres—the Forest College at Dehra Dun (for provinces other than Burma, the Central Provinces, Bihar and Orissa, Bombay and Madras), the Burma Forest School at Pymmana (for Burma), and the Madras Forest College at Coimbatore (for Madras, Bihar and Orissa, Bombay and the Central Provinces). These three institutions were established in 1878, 1898 and 1912, respectively. The training of subordinates below the rank of Ranger is carried out in various local forest schools and training classes.

Research—For the first fifty years of the existence of the Forest Department in India no attempt was made to organize the conduct of forest research, and thus to co ordinate and elaborate the scientific knowledge so necessary to successful economic working. A commencement in organized forest research was at last made in 1906 by the establishment, at the instance of Sir Sainthill Eardley-Wilmot, then Inspector-General of Forests of a Forest Research Institute at Dehra Dun. The Forest Research Institute, is under the administrative control of the Inspector-General of Forests who is also the President. There are five main branches of research, namely Silviculture, Forest Botany, Forest Economic Products, Entomology and Chemistry, each branch being in charge of a research officer. The Timber Testing expert is engaged temporarily on short term contract. Indian Assistants have been appointed to receive the necessary technical training and experience with the object of eventually taking the place of experts if and when properly qualified. The Wood Technology, Paper Pulp Wood Preservation and Seasoning Sections are in charge of Indian experts who have received special training in their various subjects in Europe and America.

As a result of Mr R. S. Pearson's long and able administration of the Forest Economic Branch, the Government of India now have at Dehra Dun a series of forest workshops and experimental laboratories without parallel anywhere else in the world and official reports show that the value of the experimental work done in them is daily exemplified by the unending stream of inquiries received from persons doing business in timber and other forest products, not only in India but elsewhere in the world. The officers in charge of this branch received their training mostly in Europe and America and their efficiency is of a very high order.

Since 1906 research work has been prosecuted energetically so much so that in 1920 a new

scheme was sanctioned for the expansion of the staff and site of the Institute. Since then new land has been acquired, on which new buildings have been built for accommodating the various expanded branches and the new machinery obtained from the United Kingdom. As a result of this, steady progress has been made in the investigations which should ultimately lead to the fuller and better utilization of the raw products produced by Indian forests. Unfortunately the need for retrenchment in all Government activities has stopped or curtailed many promising lines of investigation.

Forest Products—Forest produce is divided into two main heads—(1) Major produce, that is timber and firewood, and (2) Minor produce, comprising all other products such as bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc. The average annual outturn of timber and fuel from all sources during the quinquennium ended 31st March 1931, the latest date for which statistics are available, was 353,863,000 cubic feet against an average of 361,172,000 cubic feet per annum attained in the preceding quinquennium. The annual outturn of timber and fuel from all sources during the quinquennium 1928-29 averaged 362,217,000 cubic feet against an average of 340,000,000 c ft during the preceding quinquennium. The trade in bamboos was almost stationary, with expectations of great development under commercial exploitation for paper pulp manufacture in the near future. The five years witnessed the initiation and development of certain large exploitation schemes, especially in Madras, which had indifferent success. It was hoped in Madras by utilising modern American methods to extract and utilise very large quantities of valuable timbers, but the final result proved that this extensive exploitation was justified neither by the stand of timber in the forests nor by the possibilities of satisfying markets. The Provincial Government after this experience adopted a more cautious policy.

An important measure for the development of forests in the Andamans was sanctioned by the Government of India. Hitherto, elephants had been employed for extraction of timber, with the result that only the fringe of the forests could be touched. The new plan is for the employment of American methods. American logging machinery was purchased and an American expert engaged to take charge of the work. Owing, however, to the wide spread depression in the timber trade the employment of mechanical methods for the extraction of timber have been suspended for the present. Elsewhere in India a great part of the trade in timber lies in the hands of contractors who are regarded as on the whole trustworthy if sufficient control over their operations is maintained.

Forest Industries—The important rôle which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognized. Fifteen years ago it was estimated that in Germany work in the forests provided employment for 1,000,000 persons while 3,000,000 persons, earning £30,000,000 a year, were employed in working up the raw

material yielded by the forests. It accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftsmen and others working in and near them, employment on an enormous scale is provided to persons engaged in working up the raw products. Among these latter may be mentioned carpenters, wheelwrights, coopers, boat builders, tanners, rope-makers, lac manufacturers, basket-makers, and many other classes of skilled labourers. The Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Indian

States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture. With the opening up of the forests, the extension of systematic working, the wider use of known products, and the possible discovery of new products, a steady and extensive development of industries dependent on the forests of India may be confidently anticipated in the future.

Financial Results.—The steady growth of forest revenue, expenditure and surplus during the past 65 years is shown in the following statement, which gives annual averages for quinquennial periods*—

Financial Results of Forest Administration in British India from 1864-65 to 1928-29 (in lakhs of rupees)

Quinquennial period	(Gross revenue average per annum)	(Expenditure average per annum)	Surplus (average per annum).	Percentage of surplus to gross revenue
	Lakhs	Lakhs.	Lakhs	Lakhs
1864-65 to 1868-69 . . .	27 4	23 8	13 6	30·4
1869-70 to 1873-74 .. .	50 3	39 3	17 0	30 2
1874-75 to 1878-79	66 6	45 8	20 8	31·2
1879-80 to 1883-84 .. .	88 2	56 1	32 1	36 4
1884-85 to 1888-89 ..	116·7	74·3	42 4	36·2
1889-90 to 1893-94 . .	159 5	86 0	73 5	46·1
1894-95 to 1898-99 . .	177 2	93 0	79 2	44 7
1899-1900 to 1903-04 .	196 6	112 7	83 9	42 7
1904-05 to 1908-09 .. .	257 0	141 0	116 0	45 1
1909-10 to 1913-14 . . .	296 0	163 7	132 3	44 7
1914-15 to 1918-19 . .	371 3	211 1	160 2	43 1
1919-20 to 1923-24 . .	551 7	367 1	184 6	33·5
1924-25 to 1928-29 . .	595 4	351 1	244 2	40 9

Most of the provinces show a steady increase of surplus. The slump in trade of the last few years was evident in the surplus for the year 1930-31 which fell to 121 lakhs from a previous "peak" figure of 273 lakhs in 1926-27. The figure, however, is still a most favourable one and indicates that the forests of India are being properly worked for the benefit of the country, with the passing of the current world-wide depression the temporary set back in financial results may be expected to disappear.

Agencies—An agency has been established in India by the Government of India for the sale of Government timber and it is at present held by Messrs Martin & Co, Calcutta. The agency held in England by Messrs W W Howard Brothers terminated in December 1926 and the work of

marketing Indian timbers in England (especially Andaman timbers) is now done under the direction of a Timber Adviser who is attached to the Office of the High Commissioner for India. This trade has not yet been raised to a satisfactory level, because, according to the official explanation, "the intense conservatism in English timber trade and the difficulty of obtaining a footing for little known timbers have combined to make satisfactory sales very difficult."

Bibliography—A large number of bulletins and other publications has been issued by the Forest Research Institute, and of these a list can be obtained from the President, Forest Research Institute and College, New Forest, Dehra Dun, U P.

Province	* Area of Province	Forest Area				Per cent of Forests to whole Area of Pro- vince	Outturn of Produce		Revenue Rs	Expendi- ture Rs	Surplus Rs

* Excludes Delhi Province and the British Parganas of Manpur (Central India)

† Unclassed state forests or public forest lands as they are often called, include in many provinces all unoccupied waste, often entirely devoid of trees

(a) Includes 60,615 square miles for Federated Shan States

(b) Including figures for Shan States and Karenmi

(c) Includes Rs 29,092 on account of receipts under the head Forest Research Institute and College

(d) Includes expenditure under heads Imperial (Rs 59,082), Forest Research Institute and College (Rs 7,33,171)

(e) After taking into account deficits under Imperial (Rs 59,082), Forest Research Institute and College (Rs 7,33,171)

WIRELESS TELEGRAPHY AND TELEPHONY

Beam Stations—The year 1927 saw the commencement of Beam wireless services on the Microm system between India and the United Kingdom. Powerful transmitting and receiving stations erected at Poona and Dhond respectively by the Indian Radio Telegraph Company are connected by land line with the Central Telegraph Office in Bombay, whilst stations at Skegness and Grimby are similarly connected with the General Post Office in London, and the circuits are so arranged that messages are exchanged between Bombay and London without intermediate handling at the Beam stations at either end. The huge aerial systems at Poona and Dhond each supported on five steel towers 237 feet in height or landmarks over a distance of many miles. The service was inaugurated by His Excellency the Viceroy on 23rd July 1927 at the Central Telegraph Office, Bombay, when His Excellency transmitted a message to the King and His Majesty's reply was received a few minutes later.

It is noteworthy that the opening of the Beam wireless service coincided with a reduction in rates by the cable companies. The Eastern Telegraph Co. which operates the cable from Europe to India has become merged in the New Imperial and International Communication Ltd.

For reasons of economy most of the inland wireless stations in India were practically closed down and placed in charge of Care and Maintenance parties which carry out tests twice a month the exceptions being Peshawar Radio, which always maintained official communication with Kabul in Afghanistan and Kashgar in China, and Jodogh Radio, which receives British Official Wireless sent out from Oxford and Rugby and passes the messages to Reuters Agency for distribution to subscribing newspapers. The stations at Delhi and Allahabad have now been equipped with apparatus to enable them to function as aeronautical wireless stations and they are used as such. New wireless stations for aeronautical purposes have been erected at Jodhpur in Bilmer and Gaya. The wireless installations at Karachi and Calcutta have been modified so as to meet all the Wireless requirements of aircraft passing over India. New stations equipped for aero nautical communication purposes are under construction at Clutterbong, Akrah, Sindoway and Bassem.

The coast stations, however, have been maintained in a state of high efficiency and many improvements effected. The application of the Baudot system to the high speed continuous wave wireless stations at Madras Fort and Mangaladon (Rangoon) has proved extremely satisfactory, and a large portion of the traffic between Southern India and Burma is regularly worked by this direct route instead of the circuitous route via Calcutta. The traffic is interrupted occasionally by atmospheric interference, particularly during the hot weather but the difficulties have been largely overcome by hand-speed working during the worst periods.

For many years the Bombay stations known as Bombay Radio was located on Butcher Island in the Harbour, but during 1927 a fine

new station equipped with modern apparatus was erected and taken into service at Santa Cruz, just outside the limit of Bombay Municipality.

Radio telegrams exchanged with ships at sea by coast stations in India and Burma continue to increase in number, and now total about 30,000 per annum. Official telegrams are exchanged with the British Naval station at Madras (Colony) via Bombay Radio. Regular service are also maintained between Burma and the Malay Peninsula via Pangoon and Penang and between Burma and Sumatra, whilst radio traffic is passed between Madras and Colombo when the normal route is interrupted.

Wireless telephonic communication between pilot vessels, lighthouses and shore stations are maintained by the Post Office at Bombay and Pangoon. In March 1931, telephonic communication between Bombay and London was established for the first time. The conversations were initiated from the *Belgenland* a tourist ship lying in Bombay Harbour and was made possible through the courtesy of Standard Telephone and Cable Limited in conjunction with the International Marine Radio Company.

Safety at Sea—A noticeable feature of wireless development during the past two years has been the provision of direction finding apparatus at Bombay and Karachi and facilities at other coast stations whereby ships at sea equipped with direction finding apparatus can obtain bearings on coast stations and thus determine their position with a remarkable degree of accuracy. The latest style of Microm beacon was erected on Kennedy Island during 1931 to guide shipping approaching Bombay harbour. All ships equipped with wireless direction finders will now be able to obtain exact knowledge of their whereabouts at a distance of 150 miles from the coast. The beacon is an experiment and is likely to be the first of many others along the coast of India. Improved arrangements for broadcasting time signals, weather reports and navigational warnings from coast stations have also proved of value to ships at sea.

By 1931 there were several years limited by the Government, which are maintained by the Government, Bombay, Madras, Karachi and Rangoon, and although the transmitting sets employed by them were of very low power, the broadcasts were tuned-in over practically the whole of India. The clubs were assisted financially by a Government contribution based upon the revenue from license fees, but this did not nearly suffice to cover the cost of the transmissions, and the greatest credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes. Credit is also due to the Indian States and Eastern Agency for the loan of transmitting apparatus, without which the broadcasts would have been impossible.

After negotiations extending over several years, an Indian Broadcasting Company was granted a license to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected in Bombay and Calcutta,

the services at the former being inaugurated by His Excellency the Viceroy in July 1927 and the latter by the Governor of Bengal a month later. These stations had each an aerial input of three kilowatts the same as that of the 210 stations in London of which they are practically duplicates. The programmes were so arranged that both Indian and European music are broadcast daily and the news bulletins and market and weather reports are read in two languages.

Bombay broadcasts normally on a wavelength of 3500 metres and Calcutta on 3701 and 1910 metres. Reception in either of these cities and for a distance of twenty or thirty miles around, is possible on crystal sets, of which a very large number have been sold. Valve sets are necessary for those living further afield, but although there has been a considerable demand for them the sales have not reached expectation. One of the greatest difficulties in India is the maintenance of batteries, which is no inconsiderable item when sets containing five or six valves are employed.

The Indian Broadcasting Company was wound up in 1930 and its operations have since been conducted by the Government of India, in the Industries and Labour Department. Government for this purpose formed an Indian State Broadcasting Service and instituted a Central Broadcasting Advisory Committee, representative of the non-official public in association with the Departmental officials, to keep them in touch with public opinion. The Committee has as its chairman the Member of the Viceroy's Executive Council in charge of the Subject (now the Hon. Sir Joseph Bhore) and upon it sit at the present time Messrs N. B. Macbeth and N. M. Dhanoo, M.L.A., Bombay, H. H. Reelands and K. C. Neogy, M.L.A., Calcutta, M. R. Colburn, Financial Adviser to Government in the Posts and Telegraphs Department and B. Rama Rao, Joint Secretary to Government in the Industries and Labour Dept. It is now proposed to establish a series of additional broadcasting stations in different parts of India so as to spread broadcasting receivable on low powered sets throughout the land. Important proposals with this purpose in view were discussed by the Advisory Committee in Calcutta in December, 1930. An event of considerable importance was Bombay's broadcast to the world on December 13, 1933. This broadcast, played from the Empire Station, gave listeners in Europe their first opportunity of hearing a typical Indian programme.

Licenses—Broadcast receiving licenses are issued at Head Post Offices at a fee of ten rupees per year, and cover the use of receiving sets throughout British India except Baluchistan and the North-West Frontier Province. Licenses for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applicants, more than 300 have been issued. The number of traders in wireless apparatus who are required to take out special Import Licenses has increased considerably during the past year. This improvement must be ascribed primarily to the commencement of broadcasting

Prospects—The Government of India have always encouraged the development of wireless

in India by private enterprise and to this source the India may look in the future for considerably increased internal radio communication. There are two most promising lines of development, viz.—

(a) Direction of small sets either for speech or Morse in districts where no land lines exist and to link such districts with the existing landlines. In this connection it may be remarked that modern small radio sets are capable of using either Morse or speech at will and if used for speech can be operated by the ordinary desk telephone instrument in daily use all over India.

(b) The use of radio as a substitute for land line to form the trunk telephone route between two cities which already have telephone facilities.

These would, it is thought, open up a new industry which if properly fostered would very soon extend its sales outside the limits of India. It is believed that the majority of parts for small radio sets could be more cheaply manufactured in this country than they can be imported and such an industry would find the right kind of skilled labour already in India.

Radio Telephone Service—An event of considerable importance was the inauguration of the radio telephone service between India and England on May 1, 1933, when His Excellency Sir Frederick Syles, Governor of Bombay, and Sir Samuel Hoare, Secretary of State for India, exchanged messages as a preliminary to the opening of the service to the public.

The service is based upon the beam wireless system which has been operated successfully for the past six years by the Indian Radio and Cable Communications Company between India and the United Kingdom and, since the beginning of this year, between India and Japan. Initially, the radio telephone service was limited to Bombay and Pooné at the Indian end and to the United Kingdom at the other, but facilities for conversation with other places were speedily arranged, and within a month it was possible for people in Bombay to speak to the United States, Canada, Australia, South Africa and many other parts of the world. Similarly, there is a gradual extension of the area covered in India, and when the improvement of the land lines has been completed, nearly every important city will be in direct telephonic communication with England and the rest of the world.

Many technical problems are involved in the perfection of the India-England wireless telephone, not the least of which is the ensuring of secrecy. When the service was first opened, reports from ordinary broadcast listeners in all parts of the country and as far afield as Ceylon indicated that conversations could be "tapped" with the greatest ease, but later "secrecy gear" was installed.

Any private telephone owner will be able to use the service for an overseas call. Before doing so, however, he will have to place a deposit of Rs 100 with the Divisional Engineer, Telegraphs, Bombay.

The charge for a 3 minutes' conversation to (a) places in England, Scotland and Wales is Rs 80, (b) Northern Ireland (Dublin) and the Isle of Man, Rs 84. Each additional minute's conversation to places under (a) will cost Rs 26 11 and to (b) Rs 28.

The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785, but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1780 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the land much later than was the case in Calcutta. In Calcutta the English were on suzerainty before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hick's Gazette or Journal*. Hick like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hick's, though they did not fortunately copy his bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harharu*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stoeckeler in 1836.

From its commencement the press was jealously watched by the authorities, who put serious restraints upon its independence and pursued a policy of discouragement and

rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Sir Buchanham, one of the ablest and best known of Anglo-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free though there existed certain regulations which were not enforced, though Lord Clive, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette*, founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Durpan* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During

the Mutiny. Its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in

influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussilte*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussilte*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

INDIAN PRESS LAW

Before 1835 all printing of books and paper was subject to licence by the Governor General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

The Act deals, not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to seduce soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants, or private individuals.

The different sections of the Act have in view (i) Control over presses and means of publication, (ii) control over publishers of newspapers, (iii) control over the importation into British India and the transmission by the post of objectionable matter, (iv) the suppression of seditious or objectionable newspapers, books, or other documents wherever found.

Repeal of Press Legislation—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Government, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1887, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending—

- (1) The Press Act should be repealed.
- (2) The Newspapers Incitements to Offences Act should be repealed.

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below. (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as regards criminal and civil responsibilities, (b) any person registering under the Press and Registration of Books Act should be a major as defined by the Indian Majority Act, (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I.P.O. subject to review on the part of the local Government and challenge by any persons interested in the courts, (e) any person challenging the orders of Government should do so in the local High Court, (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months, (g) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

Press Association of India—at the end of 1913 this Association was formed in Bombay. According to the constitution "its objects shall be to protect the press of the country by its efforts from arbitrary laws and their administration, from all attempts of the Legislature to encroach on its liberty or of the executive authority to interfere with the free exercise of the printing press by journals, letters and press proprietors, and for all other purposes of mutual help and protection which may be deemed advisable from time to time. Members pay a minimum subscription of Rs. 10 annually. The affairs of the Association are managed by a Council.

Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr James Wilson, when Finance Member, in 1859. Again, in 1867 Mr Dickson, the well known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

The Presidency Banks—The history of the Presidency Banks in their relationship with Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. But, very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited.

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

The Imperial Bank—Under the Imperial Bank of India Act (XLVII of 1920), the control of the Bank is entrusted to a Central Board of Governors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board, with the previous sanction of the Governor-General in Council may determine. The Central Board of Governors consists of—

- (a) Managing Governors not exceeding two in number, appointed by the Governor-General in Council on recommendation by the Central Board,
- (b) the Presidents, Vice-Presidents and Secretaries of the Local Boards,
- (c) the Controller of the Currency, or other officer nominated by the Governor-General in Council, and
- (d) not more than four non-officials, nominated by the Governor-General in Council.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Controller of the Currency and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not to vote under the agreement with Government. The Governor-General in Council is entitled to issue instructions to the Bank in respect of any matter which in his opinion vitally affects his financial policy or the safety of the Government balances, and if the Controller of the Currency or such other officer of Government as may be nominated by the Governor-General in Council to be a Governor of the Central Board shall give notice in writing to the Managing Governors that he considers that any action proposed to be taken by the Bank will be detrimental to the Government as affecting the matters aforesaid, such action shall not be taken without the approval in writing of the Governor-General in Council. Under the Imperial Bank of India Act provision was made for the increase of the capital of the Bank. The capital of the three Presidency Banks consisted of 3½ crores of rupees in shares of Rs 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs 500 each, of which Rs 125 has been called up, making the present capital of the Bank Rs 11½ crores, of which Rs 5,62,50,000 has been paid up. The Reserve Fund of the Bank is Rs 5,22,50,000 and the Balance Sheet of 31st December 1933 showed the Government balance at Rs 6,44,10,571, other deposits at Rs 74,12,77,440 and Cash Rs 18,50,75,840, with a percentage of Cash to liabilities of 22.83.

Class of Business—The Imperial Bank of India Act follows the Presidency Banks Act of 1876 in defining absolutely the class of business

in which the Bank may engage, though the older limitations are modified in some minor points. It permits for the first time the constitution of a London Office and the borrowing of money in England for the purpose of the Bank's business upon the security of assets of the Bank, but not the opening of cash credits, keeping cash accounts or receiving deposits in London except from former customers of the Presidency Banks. The Act provides for an agreement between the Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period of ten years determinable thereafter by either party with one year's notice, provides, *inter alia*, for the following important matters—

- (1) All the general banking business of the Government of India is to be carried out by the Imperial Bank.
- (2) The Bank will hold all the Treasury Balances at Headquarters and at

its branches. This involves the abolition of the Reserve Treasury system.

- (3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four. The branches and agencies of the three Presidency Banks prior to the date of amalgamation numbered 69, including the Colombo branch of the Bank of Madras. The Bank of Bengal had no branches prior to the proposal to transfer Government business to the Bank in 1861-62 but no less than 18 branches were established before 1868.
- (4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration.

In Schedule 1, Part 1, of the Act, the various descriptions of business which the Bank may transact are laid down, and in Part 2 it is expressly provided that the Bank shall not transact any kind of banking business other than that sanctioned in Part 1

Briefly stated, the main classes of business sanctioned are —

(1) Advancing money upon the security of —

- Stocks, &c, in which a trustee is authorised by Act to invest trust moneys
- Securities issued by State aided Rail ways, notified by the Governor-General-in Council
- Debentures, or other securities issued under Act, by, or on behalf of, a District Board
- Goods, or documents of title thereto, deposited with, or assigned to the Bank
- Accepted Bills of Exchange or Promissory Notes
- Fully paid shares and debentures of Companies with limited liability or immovable property or documents of title relating thereto, as collateral security where the original security is one of those specified in *a, b, c, d* and, if authorised by the Central Board, in *e*

(2) With the sanction of the Local Government, advancing money to Courts of Wards upon security of estates in their charge

(3) Drawing, accepting, discounting, buying and selling bills of exchange and other negotiable securities payable in India and Ceylon and, subject to the directions of the Governor-General-in Council, the discounting, buying and selling of bills of exchange payable outside India for and from or to such Banks as may be approved

(4) Investing the Banks' funds in the securities referred to in (1) *a, b, c*

(5) Making Bank Post Bills and Letters of credit payable in India and Ceylon

(6) Buying and selling gold and silver

(7) Receiving deposits

(8) Receiving securities for safe custody

(9) Selling such properties as may come into the Bank's possession in satisfaction of claims

(10) Transacting agency business on commission

(11) Acting as Administrator, for winding up estates

(12) Drawing bills of exchange and granting letters of credit payable out of India for the use of principles in connection with (11) and also for private constituents for *bona fide* personal needs

(13) Buying, for the purpose of meeting such bills, &c, bills of exchange payable out of India at any usance not exceeding six months

(14) Borrowing money in India

(15) Borrowing money in England upon security of assets of the Bank, but not otherwise

The principal restrictions placed on the business of the Bank in Part 2 are as follows —

(1) It shall not make any loan or advance —

- For a longer period than six months,
- upon the security of stock or shares of the Bank,
- save in the case of estates specified in Part 1 (Courts of Ward) upon mortgage or security of immovable property or documents of title thereof

(2) The amount which may be advanced to any individual or partnership is limited

(3) Discounts cannot be made or advances on personal security given, unless such discounts or advances carry with them the several responsibilities of at least two persons or firms unconnected with each other in general partnership

The Balance Sheet of the Bank as at 31st December 1931, was as follows —

LIABILITIES	R	s	p	ASSETS	R	s	p

Proposal to Establish the Reserve Bank of India—A Bill to establish a Reserve Bank in India is an essential preliminary to the introduction of the scheme of Reforms to give India a Federal Government has been passed by the Legislative Assembly and Council of State and received the assent of the Governor-General on March 6th, 1934. The proposals embodied in the Bill are given below—

The Bank shall be constituted for the purpose of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of the Act

The original share capital of the Bank shall be five crores of rupees divided into shares of Rs 100 each, which shall be fully paid up. The maximum number of votes any one shareholder shall have is 10, every five shares carrying the right of one vote. The number of share registers shall be fixed at five to be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon and the nominal value of the shares assigned to each centre has been fixed at Rs 140 lacs for Bombay, Rs 145 lacs for Calcutta, Rs 115 lacs for Delhi, Rs 70 lacs for Madras and Rs 30 lacs for Rangoon.

Management—The general superintendence and direction of the affairs and business of the Bank will be entrusted to a Central Board of Directors which shall exercise all powers and do all acts and things which may be exercised and done by the Bank. The Board shall be composed of—

(a) A Governor and two Deputy Governors to be appointed by the Governor-General in Council after consideration of the recommendations made by the Board

(b) Four Directors to be nominated by the Governor-General in Council

(c) Eight Directors to be elected on behalf of the shareholders on the various registers

(d) One Government official to be nominated by the Governor-General in Council

The Governor and Deputy Governors shall be the executive heads, and shall hold office for such term not exceeding five years as the Governor-General in Council may fix when appointing them, and shall be eligible for re-appointment. A Local Board shall be constituted for each of the five areas

Business which the Bank may transact—

The Bank shall be authorised to carry on and transact the following commercial business, viz.—The accepting of money on deposit without interest, the purchase, sale and rediscount of bills of exchange and promissory notes with certain restrictions, the making of loans and advances, repayable on demand but not exceeding 90 days, against the security of stocks, funds and securities (other than immovable property) against gold coin or bullion or documents of title to the same and such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank, the purchase from and sale to scheduled Banks of sterling in amounts of not less than the equivalent of Rs 1 lacs, the making of advances to the Governor-General in Council and to Local Governments repayable in each case not later than three months from the date of making the advance, the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of purchase, the purchase and sale of securities of the Government of India or of a Local Government of any maturity or of a local authority in British India or of certain States in India which may be specified

The Bank shall act as Agent for the Secretary of State in Council, the Governor-General in Council or any Local Government or State in India for the purchase and sale of gold and silver for the purchase, sale, transfer and custody of bills of exchange, securities or shares for the collection of the proceeds, whether principal interest or dividends, of any securities or shares for the remittance of such proceeds by bill of exchange payable either in India or elsewhere, and for the management of public debt

Right to issue Bank Notes—The Bank shall have the sole right to issue bank notes in British India and at the commencement shall issue currency notes of the Government of India supplied to it by the Governor-General in Council and on and from the date of such transfer the Governor-General in Council shall

not issue any currency notes. The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department

In addition to the note issue obligation the Bank shall undertake to accept monies for account of the Secretary of State in Council, the Governor-General in Council and of Local Governments and shall carry out their exchange, remittance and other banking operations including the management of the public debt on such conditions as may be agreed upon

Obligation to Sell or Buy Sterling—The Bank shall sell to or buy from any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for immediate delivery in London at a rate not lower than 1s 5 49/64d and not higher than 1s 6 3/16d respectively provided that no person shall be entitled to demand to buy or sell an amount of sterling less than ten thousand pounds. Every Scheduled bank shall maintain with the Reserve Bank a balance of not less than 5 per cent of their demand and 2 per cent of their time liabilities

Agreement with the Imperial Bank—The Bank shall enter into an agreement with the Imperial Bank of India which shall be subject to the approval of the Governor-General in Council and will remain in force for 15 years and thereafter until five years' notice on either side. Provisions to be contained in the agreement between the Reserve Bank of India and the Imperial Bank of India are—

The Imperial Bank of India shall be the sole agent of the Reserve Bank of India at all places in British India where there is a branch of the Imperial Bank of India which was in existence at the commencement of the Reserve Bank of India Act and where there is no branch of the Banking Department of the Reserve Bank of India

In consideration of the performance of the Agency duties, the Reserve Bank of India shall pay the Imperial Bank of India as remuneration a sum which shall be for the first ten years during which this agreement is in force a commission calculated at 1/16 per cent on the first 250 crores and 1/32 per cent on the remainder of the total of the receipts and disbursements dealt with annually on account of Government. As for the remaining five years the remuneration to be paid to the Imperial Bank shall be determined on the basis of the actual cost to the Imperial Bank of India as ascertained by expert accounting investigation

In consideration of the maintenance by the Imperial Bank of India of branches not less in number than those existing at the commencement of the Reserve Bank of India Act, the Reserve Bank of India shall until the expiry of 15 years, make to the Imperial Bank the following payments—

(a) during the first five years of this agreement Rs 9,00,000 per annum, (b) during the next five years of the agreement Rs 6,00,000 per annum and (c) during the next five years of the agreement Rs 4,00,000 per annum

Allocation of Surplus—The Governor-General in Council shall transfer to the Bank rupee securities of the value of Rs five crores to be allocated by the Bank to Reserve Fund

After making the necessary and usual provisions out of profits, a cumulative dividend at such rate not exceeding five per cent per annum on the share capital as the Governor-General in Council may fix at the time of the issue of the shares shall be paid and the surplus shall be allocated to the payment of an additional dividend to the shareholders calculated on the scales prescribed in the Act and the balance of the surplus shall be paid to the Governor-General in Council.

Provided that so long as the Reserve Fund is less than the share capital, not less than fifty lacs of rupees of the surplus or the whole

of the surplus if less than that amount shall be allocated to the Reserve Fund.

Publication of the Bank Rate—The Bank shall make public from time to time the standard rate at which it is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under the Act.

The Bank will publish the accounts of both the Issue and Banking Departments weekly in the *Gazette of India*.

The Bank shall create an Agricultural Credit Department.

The full text of the Reserve Bank Act is reproduced elsewhere in the year Book.

THE EXCHANGE BANKS

The Banks carrying on Exchange business in India are merely branch agencies of Banks having their head offices in London, on the continent, or in the Far East and the United States. Originally their business was confined almost exclusively to the financing of the external trade of India, but in recent years most of them, while continuing to finance this part of India's trade, have also taken an active part in the financing of the internal portion also at the places where their branches are situated.

At one time the Banks carried on their operations in India almost entirely with money borrowed elsewhere, principally in London—the home offices of the Banks attracting deposits for use in India by offering rates of interest much higher than the English Banks were able to quote. Within recent years however it has been discovered that it is possible to attract deposits in India on quite as favourable terms as can be done in London and a very large proportion of the financing done by the Exchange Banks is now carried through by means of money actually borrowed in India. No information is available as to how far each Bank has secured deposits in India, but the following statement published by the Director General of Statistics in India shows how rapidly such deposits have grown in the aggregate within recent years.

Exchange Banks' Investments

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India.

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned. The Exchange Banks have practically a monopoly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business. They are able however by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through. No definite information can be secured as to the extent to which rediscounting in London is carried on but the following figures appearing in the balance sheets dated 31st December 1932 of the undernoted Banks will give some idea of this.

LIABILITY ON BILLS OF EXCHANGE RE- DISCOUNTED AND STILL CURRENT

	£
Chartered Bank of India, Australia and China	2,110,000
Eastern Bank, Ltd	325,000
Hongkong and Shanghai Banking Corporation	2,105,000
Mercantile Bank of India, Ltd	1,081,000
National Bank of India, Ltd	3,213,000
P & O Banking Corporation, Ltd	1,301,000
	<hr/> 10,195,000

The above figures do not of course relate to re-discounts of Indian bills alone, as the Banks operate in other parts of the world also, but it may safely be inferred that bills drawn in India form a very large proportion of the whole.

The bills against exports are largely drawn at three months' sight and may either be 'clean' or be accompanied by the documents relating to the goods in respect of which they are drawn. Most of them are drawn on well-known firms at home or against credits opened by Banks or financial houses in England and bearing as they do an Exchange Bank endorsement they are readily taken up by the discount houses and Banks in London. Any bills purchased in India are sent home by the first possible Mail so that presuming they are rediscounted as soon as they reach London the Exchange Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills in anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until maturity.

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of which the following are the principal —

- (1) Proceeds of import bills as they mature
- (2) Sale of drafts and telegraphic transfers payable in London and elsewhere out of India
- (3) Purchase of Council Bills and Telegraphic Transfers payable in India from the Secretary of State
- (4) Imports of bar gold and silver bullion
- (5) Imports of sovereigns from London, Egypt or Australia

The remaining business transacted by the Banks in India is of the usual nature and need not be given in detail.

An interesting event in Indian Banking history is the recent entry in the Banking field here of one of the English 'Big Five'. This has been brought about by the acquisition of the business of Cox & Co. by Lloyds Bank.

The following is a statement of the position of the various Exchange Banks carrying on business in India as at 31st December 1931 —

In Thousands of £

JOINT STOCK BANKS

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations, and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events of ten years ago confidence has been largely restored. But in April 1923 the Alliance Bank of Sumra suspended payment and is now in voluntary liquidation. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial Bank undertook to pay the depositors of the Alliance Bank 50 per cent of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets —

In Lakhs of Rupees

BANKERS' CLEARING HOUSES

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members

and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below —

The Railways.

The history of Indian Railways very closely reflects the financial vicissitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Eastern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (120 miles), the East Indian Railway, Bombay to Kalyan (31 miles), Great Indian Peninsula Railway, and Madras to Arkonam (39 miles), Madras Railway Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private capital in India available for railway construction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose. By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian, (2) the Great Indian Peninsula, (3) the Madras, (4) the Bombay, Baroda and Central India, (5) the Eastern Bengal, (6) the Indian Branch, later the Oudh and Rohilkund State Railway and now part of the East Indian Railway, (7) the Sind, Punjab and Delhi, now merged in the North Western State Railway, (8) the Great Southern of India, now the South Indian Railway. The scheme laid the foundations of the Indian Railway system as it exists to day.

Early Disappointments

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was five per cent coupled with the free grant of all the land required, in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met. The interest charges were calculated at 22½ to the rupee, the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working. The early results were disappointing. Whilst the Railways greatly increased the efficiency of the administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions, the result was that by 1869 the deficit on the Railway budget was Rs 166 lakhs. Seeking for some more economical

method of construction, the Government secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness. Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula, the Bengal-Nagpur (1883-87), the Southern Mahratta (1882) and the Assam Bengal (1891) were constructed under guarantees, but on easier terms than the first companies. Their total length was over 4,000 miles.

Famine and Frontiers

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted—the Nilgiri, the Delhi-Umballa-Kalka, the Bengal Central, and the Bengal North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth. A step of even greater importance was taken when Native States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Native State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge, during the next ten years there were opened 4,239, making the total 8,494 (on the broad gauge 6,562, the metre 1,865, and narrow 67). Then ensued a period of financial ease. It was broken by the fall in exchange and the costly lines built on the frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly, it is said that they might have been ballasted with rupees, the long tunnel under the Khojak Pass added largely to this necessary, but unprofitable, outlay.

Rebate Terms Established

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line so that the dividend might rise to four per cent but the rebate was limited to 20 per cent of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantaj, the South Behar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to. The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed to illustrate the carrying power of this gauge. The rebate terms being found unattractive in view of the competition of 4 per cent trustee stocks, they were revised in 1896 to provide for an

absolute guarantee of 3 per cent with a share of surplus profits, or rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to $3\frac{1}{2}$ per cent on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 3 to $3\frac{1}{2}$ per cent and of rebate from $3\frac{1}{2}$ to 5 per cent with equal division of surplus profits over 5 per cent in both cases. At last, the requirements of the market were met, and there was for a time a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium. Conditions changed after the war and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction should be encouraged.

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India have to raise in the open market, they were increasing the amount. For the above reasons, the Government of India have abolished this system and are now prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They have also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas. This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which may be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, are likely to give such benefits to Local Governments and local bodies as will more than repay the amounts paid under the guarantee. Some such arrangements have already been made with Local Governments in Madras, Punjab, Burma and Bombay.

Railway Profits begin

Meantime a much more important change was in progress. The gradual economic development of the country vastly increased the traffic, both passenger and goods. The falling in of the original contracts allowed Gov-

ernment to renew them on more favourable terms. The development of irrigation in the Punjab and Sind transformed the North-Western State Railway. Owing to the burden of maintaining the unprofitable Frontier lines, this was the Cinderella Railway in India—the scapegoat of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1906 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £2 millions a year. In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year there was a reversion to a profit, and the net Railway gain has steadily increased. For the year ended March 1910 this gain amounted to £10,573,000. Although in a country like India, where the finances are mainly dependent upon the character of the monsoon, the railway revenue must fluctuate, there was no reason to anticipate a further deficit, but the net railway gain decreased to £3,767,000 in 1920-21 and there was an actual loss of £6,182,000 in 1921-22. As a result of the steps taken by the Railway Board, however, on the report of the Acworth Committee in 1921, this loss was changed into a gain of £813,000 in 1922-23.

The results in succeeding years will be seen from the following statements—

	Contribution to General Revenues	Railway Reserve Fund	Total Gain
	£	£	£
1923-24			4,437,712
1924-25	1,941,387	1,635,985	9,577,372
1925-26	4,135,611	2,854,936	6,990,580
1926-27	4,186,015	1,108,133	5,594,478
1927-28	4,707,239	3,460,000	8,167,239
1928-29	3,933,831	1,937,895	5,871,729
1929-30	4,588,050	1,561,650	3,027,300
1930-31	4,301,775	8,192,625	3,890,850
1931-32	4,020,150	—	6,900,000
1932-33	*		

* The contribution to General Revenues due for the year 1932-33 amounts to Rs 523 lakhs or 13 lakhs less than in 1931-32. The payment of the contribution has been held in abeyance until the return of prosperous years.

Rupees have been converted into £ at the average rate of exchange for the year.

In 1932-33 the gross receipts amounted to 84½ crores or 2 crores less than in the previous year. Working expenses, including the usual appropriation for depreciation amounted to 61½ crores—about 1½ crore less than in the

previous year. The net receipt of 23 crores, or 1 crore less than in 1931-32 were insufficient to meet the interest charges. The deficit of 10 crores was, as in the previous year, borrowed from accumulated balances of the Depreciation Fund.

Contracts Revised

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent dividend guaranteed at 22½ per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue carrying with them a sinking fund for the redemption of capital. The rail was thus became a State line, but it was released to the Company which actually works it. Under these new conditions the East Indian Company brought to the State in the ten years ended 1909 after meeting all charges including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. At the end of seventy four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

Improving Open Lines

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed, but the poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, has for some time kept this scheme in the background. The possibilities however of this construction being undertaken have improved considerably

recently and a detailed survey is being carried out. There does not exist any through rail connection between India and Burma, although several routes have been surveyed, the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Yampur route, and the Hukong valley route. The metre gauge systems of Northern and Southern India will also probably one day be connected and Karachi given direct broad gauge connection with Delhi a project that has been investigated more than once but cannot at present be financially justified. These works are, however, subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

During 1932-33 the principal open line improvements consisted in—

- Doubling of the Ruparani Bridge on the B N Railway.
- Erection of new spans on the Kotri Bridge over the Indus, N W Railway.
- Replacement of girders on the Jumna Bridge, Delhi.
- Rebuilding of the Mahanadi Bridge on the Ktni Branch, B N Railway.
- Building the new double track Bridge over the Nerbaddi near Broach, B B & C I Railway.
- Shoranur Cochin Railway conversion, S I Railway.

Government Control and Reorganisation of Railway Board

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901/02 Mr Thomas Robertson was deputed by the Secretary of State to examine the whole

question of the organization and working of the Indian Railways and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Certain minor changes have taken place from time to time since the constitution of the Railway Board. In 1909, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy, he usually sat in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies an informal mission was undertaken by Lord Incheape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921 and a revised organization which is described later was introduced from 1st April 1924.

Some of the difficulties involved in the constitution of a controlling authority for the railways of India may be realized from a study of the "Notes on the Relation of the Government to Railways in India" printed as an appendix to Volume I of the Annual Report by the Railway Board on Indian Railways. These notes bring out the great diversity of conditions prevailing which involve the Railway Department in the exercise of the functions of—

(a) the directly controlling authority of the State worked systems aggregating 18,499 miles in on the 31st March 1929,

(b) the representative of the predominant owning partner in systems aggregating 29,451 miles,

(c) the guarantor of many of the smaller companies, and

(d) the statutory authority over all railways in India.

Moreover in all questions relating to railways or extra municipal tramways in which Provincial

Governments are concerned, the Railway Department is called upon to watch the interests of the Central Government and is frequently asked to advise the Local Governments. Its duties do not end there. The future development of railways depends largely on the Government of India and the Railway Department is therefore called upon to plan out schemes of development, to investigate and survey new lines and to arrange for financing their construction. The evolution of a satisfactory authority for the administration of these varied functions has proved extremely difficult and the question was one of those referred to the Railway Committee (1920-21) presided over by Sir William Acworth who recommended the early appointment of a Chief Commissioner of Railways whose first duty should be to prepare a definite scheme for the reorganization of the Railway Department and Mr C D M Hindley, formerly Agent of the East Indian Railway and Chairman of the Calcutta Port Trust, was appointed Chief Commissioner on November 1st, 1922.

The principal constitutional change involved in this appointment is that the Chief Commissioner who takes the place of the President of the Railway Board is solely responsible—under the Government of India—for arriving at decisions on technical matters and for advising the Government of India on matters of railway policy and is not, as was the President, subject to be outvoted and overruled by his colleagues on the Board. The detailed reorganization of the Railway Board in accordance with the Chief Commissioner's proposals required careful consideration but one of the most important of his recommendations namely the appointment of a Financial Commissioner was considered of particular urgency and the Secretary of State's sanction was therefore obtained to the appointment with effect from 1st April 1923. While in the person of the Chief Engineer the Railway Board has always had available the technical advice of a senior Civil Engineer in Mechanical Engineering questions it has had to depend on outside assistance. The disadvantages of this arrangement have become increasingly evident and it was therefore decided with effect from November 1st, 1922, to create the new appointment of Chief Mechanical Engineer with the Railway Board.

The reorganization carried out in 1924 had for one of its principal objects the relief of the Chief Commissioner and the Members from all but important work so as to enable them to devote their attention to larger questions of railway policy and to enable them to keep in touch with Local Governments, railway administrations and public bodies by touring to a greater extent than they had been able to do in the past.

This object was effected by the following new posts which in some cases supplemented the existing ones and in other cases replaced them: Directors of Civil Engineering, Mechanical Engineering, Traffic, Establishment and Finance and seven Deputy Directors working under them.

The necessity of some central organisation to co-ordinate the publicity work carried out on railways and to undertake on its own the many forms of railways publicity which can be best

organised by one central body led to the inauguration of the Central Publicity Bureau under a Chief Publicity Officer in 1927. The success which has attended the work of this Bureau led to its being made permanent from January 1st, 1929. The work undertaken is described later.

The growing importance of labour questions necessitated the organisation of a new branch in the Railway Board's office and to the appointment in 1929 of a third member whose main duties are connected with the satisfactory solution of labour problems and the improvements of the conditions of service of the staff generally and of the lower paid employees in particular.

Under the Railway Board's policy of progressive standardisation, a Central Standardisation Office was established under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The Technical Officer under the Railway Board was transferred to this office as a Deputy Controller.

The present superior staff under the Railway Board, therefore consisted of 3 Directors, 5 Deputy Directors, 1 Secretary and an Assistant Secretary. In addition to the Controller of Railway Accounts and his officers to the Central Publicity Officer and the Officers in the Central Publicity Bureau and to the Chief Controller and the officers in the Central Standardisation Office.

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board was under consideration for some time and in accordance with a resolution adopted by the Legislative Assembly in September 1925, a start was made with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff was appointed reporting directly to the Auditor General. As it was found that the separation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State managed railways during 1929. The supervision of Accounts Officers was placed under a Controller of Railway Accounts reporting to the Financial Commissioner of Railways and that of Audit Officers under a Director of Railway Audit reporting to the Auditor General. These two duties were previously combined under the Accountant-General Railways, reporting to the Auditor General. The Chief Accounts Officers on railways are now under the Agent but have certain powers of direct reference to the Financial Commissioner of Railways.

Management

The Railways managed by Companies have Boards of Directors in London and are represented in India by an Agent. Some of the Company managed railways are still on a departmental basis with a Traffic Manager, Chief Engineer, Locomotive and Carriage and Wagon Superintendent, Controller of Stores and Chief Auditor, while others have separated the Transportation and Commercial duties of the Traffic Manager and combined the supervision of Locomotive running with Transportation

State managed lines have generally adopted the divisional organisation.

Clearing Accounts Office

A Clearing Accounts Office, with a Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of traffic interchanged between State managed Railways. The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Rail way following on the 1st April, the Eastern Bengal Railway on the 1st January 1928, and the Great Indian Peninsula Railway later.

At the request of the Bombay, Biroda and Central India Railway an exhaustive experiment was conducted to check the accuracy of the results obtained by the revised procedure and as the experiment was completely successful, the Board of Directors of the Bombay, Biroda & Central India Railway have also agreed to the transfer of the check and apportionment of their foreign traffic to the Clearing Accounts Office.

During 1927-28 demonstrations explaining the Clearing Accounts Office procedure were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure. An important demonstration was given to the representatives of the Southern Railways at Madras who were so impressed with the superiority of the new procedure that they unanimously recommended to their Home Boards the transfer of the work of check and apportionment of earnings from interchanged traffic to the Clearing Accounts Office and it was hoped to open a branch Clearing Accounts Office at Madras at an early date to deal with such traffic but owing to certain later developments in connection with experiments now in operation of through rate registers and of decentralisation of Traffic Accounts Work, no definite decision has yet been arrived at.

The Railway Conference

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from amongst the members, and has done much useful work.

The Indian Gauges

The standard gauge for India is five feet six inches. When construction was started the broad gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of cyclones. But in 1870, when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre-gauge of 3 feet 3½ inches was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metre-gauge lines provisional, they were to be converted into broad-gauge as soon as the traffic justified it, consequently

they were built very light. But the traffic expanded with surprising rapidity, and it was found cheaper to improve the carrying power of the metre gauge lines than to convert them to the broad-gauge. So, except in the Indus Valley, where the strategic situation demanded an unbroken gauge, the metre-gauge lines were improved and they became a permanent feature in the railway system. Now there is a great metre-gauge system north of the Ganges connected with the Rajputana lines and Kathiawar and another system in Southern India embracing the Southern Maratha and the South India Systems. These are not yet connected, but the necessary link from Khandwa by way of the Nizam's Hyderabad Godavari Railway, cannot be long delayed. All the Burma lines are on the metre gauge. Certain feeder and hill railways have been constructed on the 2'-0" and 2' 0" gauges and since the opening of the Barsi Light Railway which showed the possible capacity of the 2' 6" gauge, there has been a tendency to construct feeder lines on this rather than on the metre gauge.

State versus Company Management —

The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the Acworth Railway Committee. That Committee was unfortunately unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperative. When the question was debated in the Legislative Assembly in February 1923, the non-official Indian Members were almost unanimously in favour of State management and indeed were able to carry a resolution recommending the placing of the East Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contracts. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting the necessity for taking over the management of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company domiciled in India to take these railways over eventually on a basis of real Company

management. There have been certain definite advantages during a transition period in having a central authority with necessary powers to co-ordinate the work on railways and that the results have been satisfactory are borne out by the fact that Indian railways have contributed 4½ million pounds to General Revenues during 1927-28 and nearly 4 million pounds during 1928-29 in addition to paying in 3½ million and 1½ million pounds respectively during these two years to the Railway Reserve Fund. The Government, however, need careful consideration in other countries has

risc in a Government fully responsible to the Legislature or under any constitution which imposed on the Railway Department the necessary restrictions which must apply to ordinary departments of the State. The solution found in other countries such as Germany, Canada, Belgium, Austria and elsewhere, where State ownership has thrown on the State the obligation to manage its own railways, has been to create by a statute in authority charged with the management of the State Railway property with statutory prescription of the objects to be aimed at in such management and statutory division of railway profits between the State and the Railway Authority. This authority may take the form of a company as in Canada and in Germany or follow the simpler lines of a statutory commission. On 1st January 1925 the East Indian Railway was amalgamated with the Oudh and Rohilkhand Railway and brought under direct State Management while on 1st July 1925 the Great Indian Peninsula Railway followed suit. The Naini Jubbulpore Section of the East Indian Railway was transferred to the Great Indian Peninsula Railway on 1st October 1925.

On January 1st 1920 the contract with the Burma Railways Company was terminated and the management taken over by the State. The purchase of this railway has entailed the payment to the Burma Railways Company of the sum of three millions sterling being the share capital originally contributed by the Company. The financial effort of taking over the line is estimated to be an increase of about half a crore of rupees in the net annual revenue to Government.

The purchase of the Southern Punjab Railway of an aggregate length of about 927 miles worked by the North Western Railway was effected on the 1st January 1930. It is estimated that the financial result of the purchase which cost approximately Rs 70½ lakhs will be a gain to Government of about Rs 47 lakhs a year.

At the end of 1929-30 the Nizam's Guaranteed State Railways system which was the property of the company, was acquired and its management taken over by His Exalted Highness the Nizam's Government and is now known as His Exalted Highness the Nizam's State Railway.

Separation of the Railway from the General Finances — The question of the separation of the railway from the general finances was under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor General in Council — "that in order to relieve the general budget from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways —

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings"

(2) The contribution shall be a sum equal to five-sixths of 1 per cent on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic railways) at the end of the penultimate financial year plus one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent on the capital at charge, surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. 1 from the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines

(3) Any surplus profits that exist after payment of these charges shall be available for the Railway administration to be utilised in—

(a) forming reserves for,

(i) equalising dividends, that is to say, of securing the payment of the percentage contribution to the general revenues in lean years,

(ii) depreciation,

(iii) writing down and writing off capital,

(b) the improvement of services rendered to the public,

(c) the reduction of rates

(4) The railway administration shall be entitled, subject to such conditions as may be described by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts

and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, i.e., will not have the effect of increasing the fixed contribution for the year

(6) The Railway Department will place the estimate of railway expenditure before the Central Advisory Council on some date prior to the date for the discussion of the demand for grants for railways"

This resolution was examined by the Standing Finance Committee in September and was introduced with certain modifications. The final resolution agreed to by the Assembly on September 20th 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent instead of 5/6th per cent on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only 2rd of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining 1rd was to accrue to General Revenues. At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State. These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the L. I. Railway and the G. I. P. Railway and existing State Managed Railways remain under State management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangements in this resolution

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department

The period has now arrived for this separation to be reconsidered and revised but due to the economic depression the matter has been held in abeyance

Re organisation problems—The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations. The general direction in which this re organisation is being considered is that of consolidation into one department of the operating or transportation work of the railway, including the provision of power. This system which is commonly known as the divisional system, was first adopted on the Great Indian Peninsula Railway during 1922-23

The Pope Committee.

During 1932-33 a Committee under the Chairmanship of Mr. Pope, General Executive Assistant to the President of the L. M. S. Railway was formed to investigate and inaugurate a detailed analysis of every important activity of railway operation. In addition to the specific recommendation that 'job analysis' should be initiated on all railways, the following recommendations were made—

- (i) The better use of Locomotives
- (ii) The better use of Railway land
- (iii) Additional research and experiments
- (iv) Improved Work-shop practice
- (v) More careful listing of surplus track, equipment and accommodation
- (vi) Possibility of reducing hot axles

Rates Advisory Committee

The Rates Advisory Committee was constituted in 1926 to investigate and make recommendations to Government on the following subjects—

- (1) Complaints of undue preference
- (2) Complaints that rates are unreasonable in themselves,
- (3) Complaints or disputes in respect of terminals
- (4) The reasonableness or otherwise of any conditions as to the packing of articles specially liable to damage in transit or liable to cause damage to other merchandise,
- (5) Complaints in respect of conditions as to packing attached to a rate,
- (6) Complaints that Railways do not fulfil their obligations to provide reasonable facilities under Section 12 (3) of the Indian Railways Act

1932-33 five cases were referred for investigation and report

Inauguration of the Main Line Electric Service, G. I. P. Railway

The inauguration of the electrified main line section of the G. I. P. Railway from Kalyan to Poona took place on the 5th November 1929, and constituted the first entirely main line of track to be electrified in India. This scheme involved the elimination of the Bore Ghat Reversing Station. The problem of eliminating the Reversing Station had been seriously considered on several occasions in the past but it was not until 1923, when electrification had been definitely decided upon, that final survey operations became imperative.

Apart from the location of the realignment which called for the adoption of methods unusual in ordinary survey practice, the works involved in the construction of this double line broad-gauge section of railway were of considerable magnitude, chiefly in the form of heavy tunnel construction.

There are three tunnels in all aggregating 4,598 feet or 87 of a mile. The longest of these is 3,100 feet built throughout on a curve of the sharpest radius which occurs in these ghats. Allowing for curvature and the considerably increased spacing of tracks necessitated by the adoption of the latest standard dimensions, a tunnel section of 34 feet 6 inches wide and 24 feet 6 inches high was decided upon. This is considered to be the largest tunnel section in the world.

The steam trains to Poona took approximately 6 hours for the journey and it is anticipated that with electric traction this timing will be now reduced to approximately 3 hours.

With the opening of the electrified section between Kalyan and Ichapurli in October 1930, it is believed that the G. I. P. Railway has the greatest length of electrified main line in the British Empire and the entire scheme will be one of the most important main line electrifications in the world.

Publicity

The year 1929-30 marked a very considerable advance in the Publicity activities of the Indian railways. The Central Publicity Bureau of the Railway Board was inaugurated on 1st April 1927, a Chief Publicity Officer was appointed and provided with an Assistant and a small clerical staff. The office was located in Victoria Terminus, Bombay, it being felt that, to commence with, Bombay's position as the main port of arrival in India, closer touch could be kept with travellers and furthermore, Bombay presented certain distinct advantages from the point of view of printing facilities, etc.

In 1928 however the office was moved to Delhi as being more central and in closer touch with the Railway Board. Among some of the principal lines upon which it was decided to concentrate attention were—

- Cinema film production and display,
- Poster production and display
- Pamphlet production and display,
- Publication of an *Indian State Railways Magazine*
- Demonstration Trains,
- Upper and Lower class special excursion trains,
- Press propaganda in India,
- Press propaganda in Europe, America and other parts of the world,
- Reciprocal publicity with the leading railways of the world.

Shortly after the inauguration of the Central Publicity Bureau, the need was felt for a representative in England to give information and advice to potential travellers and to handle enquiries arising out of the advertising campaign which it was decided to carry out. A Publicity Officer was appointed and temporary offices secured in London in which an Indian State Railways Bureau was opened. It was soon found that separate permanent offices were required and these have now been obtained in 57, Haymarket, London, where sufficient accommodation is available to deal adequately with the many visitors who come there. With the opening of 'India House' a Branch Office has also been provided there, and this will deal more particularly with enquiries concerning Goods rates, but general enquiries can also be answered there. In order to obtain an adequate share of the American tourist traffic, an Office has also been opened in New York and a Resident Manager appointed there. This office was at first temporarily in accommodation kindly provided by the Canadian Pacific Railway in their General Offices at 342, Madison Avenue, New York, but now has its own commodious office in an excellent site at Delhi House, 38, East 57th Street, New York.

Owing to the financial stringency it was decided in 1931 to cut down the Bureau and

Open Mileage—The total route mileage on March 31st, 1933 was made up of—

Broad gauge	21,131 06 miles
Metre-gauge	17,652 97 "
Narrow gauge	4,176 85 "

Class I Railways	Number of seats in passenger carriages			
	1st	2nd	Inter	Thrd
5'-6"	25,211	45,200	67,576	676,133
3'-3½"	10,993	14,762	12,653	379,338

Under the classification adopted for statistical purposes, this mileage is divided between the three classes of railways as follows —

Class I	34,893 56 miles
Class II	3,248 82 "
Class III	1,145 60 "

During the year 1932-33, 305 92 miles of new lines were opened for public traffic. Of this mileage, 264 11 miles belong to Class I

Financial Results of Working—The total gross earnings of all railways in India during the year 1932-33 amounted to Rs 86 65 crores as compared with 87 83 crores in 1931-32. These figures, however, include railways owned by Indian States and companies for which the Government of India has no direct financial responsibility. The figures of receipts and expenditure for railways with which the Government are directly concerned are as follows —

(Based on actuals of penultimate year 1930-31)

		(Figures in thousands)	
		Rs	Rs
1	1 per cent on capital of Rs 7,35,91,90 at charge—commercial lines—to end of 1930-31		7,35,95
2	(i) Receipts (1930-31)—		
	Gross traffic receipts—commercial lines	93,62,17	
	Subsidized companies—share of surplus profits	20,36	
	Interest on depreciation and reserve fund balances and dividends on investments in branch lines and miscellaneous receipts	1,47,78	
	Total Receipts		95,30,31
(ii)	Charges (1930-31)—		
	Working expenses—commercial lines	65,26,89	
	Indian States and railway companies' share of surplus profits	1,16,30	
	Land and subsidy	5,90	
	Interest—		
	On capital at charge—commercial lines	29,87,05	
	On capital contributed by Indian States and companies	1,37,59	
	Miscellaneous railway expenditure	61,99	
	Contribution at 1 per cent on capital at charge—commercial lines	7,35,95	
	Total Charges		1,05,71,67
(iii)	Deficit		10,41,36
(iv)	Contribution of 1/5th of surplus		
3	Total contribution from railway revenues 1 plus 2 (iv)		7,35,95
	Deduct—Loss on strategic lines—		
	(i) Interest on capital	1,46,91	
	(ii) Miscellaneous railway expenditure	69	
	(iii) Loss in working	65,77	
4	Net payment due from railway to general revenues in 1932-33		2,13,37
			5,22 58

After meeting all interest and annuity charges Government therefore received a net profit of 4.04 crores on the capital at charge of the State minus the net receipts, that is the gross receipts minus the working expenses, have in recent years given the following returns —

	Percent
1913-14	5.61
1923-24	5.24
1924-25	5.85
1925-26	5.31
1926-27	3.95
1927-28	5.50
1928-29	5.22
1929-30	4.65
1930-31	Nil
1931-32	Nil

Up-to-date figures of the result of working of other countries are not available, but the following table compares the latest available figures of average receipts per ton-mile of these countries which have published statistics of working later than 1919 —

	Receipts per ton-mile
United States of America 1929	7.70
United Kingdom 1929	15.15

	Receipts per ton-mile
Japan 1927-28	7.26
Switzerland 1928	20.25
South America 1928-29	17.25
Canadian Railways 1929	5.75
India 1929-30	6.11

In the case of receipts per passenger-mile the figures for United States of America and India are as follows —

United States of America 1929	11.78 paise
India 1929-30	7.25 "

while in England the present standard fare charged per mile third class is 18 paise.

From the above it will be seen that railway transportation of freight in India is one of the cheapest in the world and still more so for passenger traffic.

An examination of the latest available figures of operating ratios of for Indian railways brings out results not unfavourable to Indian railways.

	Year	Operating Ratio
United States of America	1930	74 percent
France	1927	84.15
English Railways	1928	79.40
South African Railways	1928-29	77.80
Argentine Railways	1927	71.05
Canadian Railways	1929	81.21
India	1913-14	61.79
	1923-26	62.69
	1926-27	62.04
	1927-28	61.79
	1928-29	62.77
	1929-30	61.02
	1931-32	71.08
	1932-33	71.61

Output of Railway owned Collieries—The output of railway owned collieries during 1929-30 was 3,184,206 tons out of a total of 6,773,750 tons consumed on class I Railways.

For 1930-31 the output was

2,926,812 tons for a total of 6,629,014 tons

For 1931-32 the figures are

2,481,891 tons for a total of 6,759,398 tons

Number of Staff—The total number of employees on Indian Railways at the end of the year 1932-33 was 710,271, was compared with 731,979 at the end of 1931-32. The increase in route mileage during the same period was 812 miles. The following table shows the number of employees by communities on 31st March 1930, 1931 and 1932 —

	Europeans	Statutory Indians					Other Classes *
		Hindus	Muhammadians	Anglo Indians	Sikhs	Indian Christians	
31st March 1930	4,981	570,040	182,349	14,617			30,710
31st March 1931	4,709	553,851	172,321	14,350			35,809
31st March 1932	4,532	520,575	157,876	13,570	8,767	14,398	12,261
31st March 1933	4,297	504,082	152,875	13,048	8,591	15,574	11,801

* These include Sikhs and Indian Christians not shown separately

THE CHIEF RAILWAYS IN INDIA

The Assam-Bengal Railway, which is constructed on the metre-gauge, starts from Chittagong and runs through Surma Valley across the North Cachar Hills into Assam. It is worked under a limited guarantee by a company.

Bengal and North-Western

The Bengal and North-Western Railway was constructed on the metre-gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre gauge system at Cawnpore and with the Eastern Bengal State Railway at Khatihar and the East Indian Railway at Benares and Mokameh Ghat.

Mileage open	1269 67
--------------	---------

Bengal-Nagpur

The Bengal-Nagpur Railway was commenced as a metre-gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broad gauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatnam was transferred to it and in the same year sanction was given for an extension to the coal fields and for a connection with the Branch of the East Indian Railway at Hariharpur.

Bombay Baroda

The Bombay, Baroda and Central India Railway is one of the original guaranteed railways. It was commenced from Surat via Baroda to Ahmedabad, but was subsequently extended to Bombay. The original contract was terminable in 1880, but the period was extended to 1905, and then renewed under revised conditions. In 1885 the Rajputana-Malwa metre-gauge system of State railways was leased to the Company and has since been incorporated in it. On the opening of the Nagda-Muttra, giving broad-gauge connection through Eastern Rajputana with Delhi the working was entrusted to this Company. On the acquisition of the Company in April 1907 the purchase price was fixed at £11,685,581.

Burma Railways

The Burma Railway is an isolated line, and although various routes have been surveyed there is little prospect of its being connected

with the Railway system of India in the near future. In reply to a question in the Imperial Legislative Council in 1919, Sir Arthur Anderson said — "During 1914-15 extensive survey operations were carried out to ascertain the best alignment for a railway connection along the coast route between Chittagong and certain stations on the Burma Railways south of Mandalay. A rival route via the Hukong Valley between the northern section of the Assam-Bengal Railway and the section of the Burma Railways north of Mandalay was to have been surveyed during the following year but was postponed because of the war. It is now proposed to commence this survey during the coming cold weather, and on its completion, Government will have sufficient information to enable them to decide which route shall be adopted. Thus no arrangements for the construction of a line have yet been made nor has any concession been granted, but it is probable that the line selected will be built at the cost of Government and worked by one or other of the main lines which it will connect. It was commenced as a State Railway and transferred in 1896 to a Company under a guarantee. From January 1st, 1929, its working has been taken over by the State.

Eastern Bengal

The Eastern Bengal State Railway was promoted under the original form of guarantee and was constructed on the broad-gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre-gauge of the Northern Bengal State Railway, which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

East Indian

The East Indian Railway is one of the three railways sanctioned for construction as experimental lines under the old form of guarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutiny ran as far as Raniganj. It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1880 the Government purchased the line, paying the share-holder by annuities, but leased it again to the company to work under a contract which was terminable in 1919.

The contract was not terminated until January 1st, 1925, when the State took over the management. From July 1st, 1925 the Oudh & Rohilkhand railway was amalgamated with it.

Mileage open	4219 83

Earnings per cent	4 09

Great Indian Peninsula

The Great Indian Peninsula Railway is the earliest line undertaken in India. It was promoted by a Company under a guarantee of 5 per cent and the first section from Bombay to Thana was open for traffic in 1853. Sanction was given for the extension of this line via Poona to Rutchur, where it connects with the Madras Railway, and to Jabbulpur where it meets the East Indian Railway. The feature of the line is the passage of the Western Ghats, these sections being 152 miles on the Bhore Ghat and 92 miles on the Thul Ghat which rise 1,131 and 972 feet. In 1900, the contract with the Government terminated and under an arrangement with the Indian Midland Railway that line was amalgamated and handed to a Company to work.

The contract was terminated on June 30th, 1925, when the State took over the management.

Madras and Southern Mahratta Railway

The Madras Railway was the third of the original railways constructed as experimental lines under the old form of guarantee. It was projected to run in a north westerly direction in connection with the Great Indian Peninsula Railway and in a south westerly direction to Cileut. On the expiry of the contract in 1907 the line was amalgamated with the Southern Mahratta Railway Company, a system on the metre gauge built to meet the famine conditions in the Southern Mahratta Country and released to a large Company called the Madras and Southern Mahratta Railway Company.

Earnings per cent	5.56

The North-Western

The North Western State Railway began its existence at the Sind-Punjab Delhi Railway, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karachi to Kotri. The interval between Kotri and Multan was unbridged and the railway traffic was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railway from Lahore towards Peshawar was begun. In 1886 the Sind-Punjab Delhi Railway was acquired by the State and amalgamated with these two railways under the name of the North-Western State Railway. It is the longest railway in India under one administration.

Earnings per cent	2.66

Oudh and Rohilkhand

Oudh and Rohilkhand Railway was another of the lines constructed under the original form of guarantee. It began from the north bank of the Ganges running through Rohilkhand as far as Saharanpur where it joins the North-Western State Railway. It was not until 1847 that the bridge over the Ganges was completed and connected with the East Indian Railway. To effect a connection between the metre gauge systems to the North and those to the South of the Ganges a third railway was laid between Bhujwal and Cawnpore. The Company's contract expired in 1889 when the Railway was purchased by the State and has since been worked as a State Railway.

The working of this railway was amalgamated with that of the East Indian Railway from 1st July 1925.

The South Indian

The South Indian Railway was one of the original guaranteed railways. It was begun by the Great Southern India Railway Company as a broad gauge line, but was converted after the severities to the metre gauge. This line has been extended and now serves the whole of the Southern India, south of the south west line of the Madras Railway. Between Tuticorin and Ceylon a ferry service was formerly maintained, but a new and more direct route to Ceylon via Rameshwaram was opened at the beginning of 1914. As the original contract ended in 1907, a new contract was entered upon with the Company on the 1st of January 1903.

The Indian States

The principal Indian State Railways are the Nizams, constructed by a company under a guarantee from the Hyderabad State, the Kathiawar system of railways, constructed by subscriptions, among the several Chiefs in Kathiawar, the Jodhpur and Bikaner Railways, constructed by the Jodhpur and Bikaner Chiefs, the system of railways in the Punjab, constructed by the Patiala, Jind, Maler Kotla, and Kashmir Chiefs, and the railways in Mysore, constructed by the Mysore State.

At the end of the financial year 1929-30 a total of 1257.57 miles of new lines was under construction, distributed as follows—

	Miles
5' 6" gauge	730.77
3' 3 1/2" gauge	457.51
2' 6" gauge	69.29

During 1929-30 sanction was accorded to the construction of new lines totalling 227.77 miles.

	Miles
5' 6" gauge	93.00
3' 3 1/2" gauge	115.17
2' 6" gauge	19.00

INDIA AND CEYLON.

The possibility of connecting India and Ceylon by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, and since 1895 various schemes having been suggested

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the possibility of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points, is one of the schemes that has been investigated

In 1913, a detailed survey was made by the South Indian Railway Company, and the project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talaimannar Point on the Ceylon side, a length of 20.05 miles of which 7.19 will be upon the dry land of the various lands, and 12.86 will be in water. The sections on dry land will consist of low banks of sand pitched with coral and present no difficulty. The section through the sea will be carried on a causeway which it is proposed to construct in the following way. A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand. These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete ties, struts and chains. Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram Island and Mannar Island.

Indo-Burma Connection

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma. Government accepted the position and appointed Mr. Richards, M. Inst. C.E., to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The

coast route appears to be the best one but at present would not be remunerative. This would start from Chittagong, which is the terminus and headquarters of the Assam-Bengal Railway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile rice fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 94 miles from the town of Chittagong. For about 160 miles further it chiefly runs through the fertile rice lands of Arrakan and crosses all the big tidal rivers of the Akyab delta. These include the Kaladan river which drains 4,700 miles of country and even at a distance of about 30 miles from its mouth is more than half a mile wide. About 260 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kawkphu stretching out into the mangrove swamps like ribs from the backbone. Innumerable spurs of the Arrakan Yoma have to be crossed. Yoma is a mountain ridge which extends from Cape Negrais northwards until it loses itself in a mass of tangled hills east of Akyab and Chittagong. At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher. It is a formidable obstacle to railway communication between India and Burma. This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to.

The other routes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr. R. A. Wavell many years ago. The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet long. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong Valley route is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route. One hundred and fifty miles of this route lie in open country capable of cultivation though at present it is only very thinly populated. Only one range of hills has to be crossed and this can be negotiated with a summit tunnel 5,000 feet long at a height of 2,500 feet. There are less than fifty miles of very heavy work and only about 4,500 ft. aggregate of rise and fall. The Hukong Valley route although cheaper than the Manipur route is not a practical financial proposition and both may be ruled out of consideration.

(a) Excludes antimonial lead

(b) Export of b values

(c) Export values,

(d) Estimated,

The feature which stands out most prominently in a survey of the mineral industries of India is the fact that until recent years little has been done to develop those minerals which are essential to modern metallurgical and chemical industries, while most striking progress has been made in opening out deposits from which products are obtained suitable for export, or for consumption in the country by what may conveniently be called direct processes. In this respect India of to-day stands in contrast to the India of a century ago. The European chemist armed with cheap supplies of sulphuric acid and alkali, and aided by low sea freights and increased facilities for internal distribution by the spreading network of railways has been enabled to stamp out, in all but remote localities, the once flourishing native manufactures of alum, the various alkaline compounds, blue vitriol, copperas, copper, lead, steel and iron, and seriously to curtail the export trade in nitre and borax. The reaction against that invasion is of recent date. The

high quality of the native-made iron, the early anticipation of the processes now employed in Europe for the manufacture of high-class steels, and the artistic products in copper and brass gave the country a prominent position in the ancient metallurgical world, while as a chief source of nitre India held a position of peculiar political importance until, less than forty years ago, the chemical manufacturer of Europe found among his by-products, cheaper and more effective compounds for the manufacture of explosives.

With the spread of railways, the development of manufactures connected with jute, cotton and paper, and the gradually extended use of electricity the demand for metallurgical and chemical products in India has steadily grown. Before long the stage must be reached at which the variety and quantity of products required, but now imported, will satisfy the conditions necessary for the local production of those which can be economically manufactured only for the supply of groups of industries.

COAL

Most of the coal raised in India comes from the Bengal and Bihar and Orissa—Gondwana coal-fields. Outside Bengal and Bihar and Orissa the most important mines are those at Singareni in Hyderabad, and in Central Provinces but there are a number of smaller mines which have been worked at one time or another.

Provincial production of Coal during the years 1931 and 1932

(a) Estimated

In reversal of 1930 and 1931, the export statistics for coal during 1932 show an increase, amounting to about 78,500 tons. Exports to Hongkong increased greatly from 89,127 tons in 1931 to 218,638 tons in 1932. As the exports to Ceylon fell from 281,684 tons in 1931 to 190,237 tons in 1932. Hongkong, for the first time, became the leading importer of Indian coal. Exports to the Straits Settlements (including Labuan) decreased by some 16,000 tons, whilst those to the Philippine Islands and Gurn showed an increase of about 7,000 tons. The United Kingdom took 32,699 tons against 10,785 tons in the previous year and other countries absorbed about 28,000 tons more. The export of coke decreased by 332 tons. Imports of coal and coke showed during 1932 another substantial fall, namely from 88,035 tons in 1931 to 47,544 tons in 1932, 13,912 tons of the latter consisted of coke. This fall is due mainly to a decrease of some 30,000 tons from South Africa, and of 9,000 tons from the United Kingdom. The average surplus of exports over imports during the years 1926 to 1932 was, in fact, greater than the surplus during the pre-war quinquennium.

The average number of persons employed in the coal fields during the year showed a smaller decrease (4.4 per cent) than the decrease in production

(7.2 per cent). The average output per person employed, therefore, showed a decrease to 121.7 tons in contrast with the advances up to 1930, which have been 110.5 tons for 1925 rising to 113.1 tons for 1926, 122.3 tons for 1927, 125.5 tons for 1928, 130.4 tons for 1929, and 129.1 tons for 1930, with a decrease to 125.4 tons in 1931. Except for the last five years, however, the figure for the year under review is still higher than those previously recorded, these higher figures are due, partly to an increased use of mechanical coal cutters, and partly to concentration of work. During the past few years a large number of collieries have been shut down and the labour absorbed in the remainder, this concentration permits of a proportional reduction of the supervising staff, resulting in a larger tonnage per head. There was a decrease in the number of deaths by accident from 196 in 1931 to 164, the latter figure is much better than the annual average for the quinquennium 1919-1923, which was 274, and also below the annual average for the quinquennium 1924-1928, which was 218. The death rate was 1.0 per thousand persons employed in 1932, a little less than the figure for the previous year (1.1), the average figure for the period 1919-1923 was 1.36, and for the period 1924-1928 was 1.16.

IRON ORE

Bengal and Bihar and Orissa are the only provinces in India in which iron ore is mined for smelting by European methods. Iron smelting, however, was at one time a widespread industry in India and there is hardly a district away from the great alluvial tracts of the Indus, Ganges and Brahmaputra in which slag heaps are not found. The primitive iron smelter finds on difficulty in obtaining sufficient supplies of ore from deposit that no European Ironmaster would regard as worth his serious consideration.

Early attempts to introduce European processes for the manufacture of pig-iron and steel were recorded in 1830 in the South Arcot District. Since that date various other attempts have been made but none proved a success before that now in operation near Barakar in Bengal. The site of the Barakar Iron-Works was originally chosen on account of the proximity of both coal and ore supplies. The outcrop of iron stone shales between the coal-bearing Barakar and Raniganj stages stretches east and west

from the works, and for many years the clay ironstone nodules obtainable from this formation formed the only supply of ore used in the blast furnaces. Recently magnetite and hematite have been obtained from the Munbhum and Singhbhum districts, and the production from the last named district has largely replaced the supplies of ore hitherto obtained near the iron works.

The Bengal Iron and Steel Company, Limited, have now given up the use of ores obtained from the neighbourhood of Barakar and Raniganj and are now obtaining most of their ores from the Kolhan Estate, Singhbhum. Some years ago the Bengal Iron Steel Co., Ltd. secured two deposits of iron ore in Saranda (Singhbhum) forming parts of two large hill masses known as Notu Buru and Buda Buru respectively. Recent prospecting in this part of Singhbhum has led to the discovery of numerous additional deposits of iron ore, the extension of which has been traced into Keonjhar and Bonal States in Orissa, a total distance of some 40 miles in a S S W direction. At Pansira Buru, a portion of Notu Buru, the deposit has been opened up, and now feeds the Barakar Ironwork. Pansira Buru rises to over 2,500 feet above sea level, the low ground on the west side being at about 1,100 feet above sea-level. The uppermost 400 to 450 feet of this hill has now been opened up, and the workings indicate the existence of a deposit about a quarter of a mile long, perhaps 400 feet thick and proved on the dip for about 500 feet. The ore body appears to be interbedded with the Dharwar slates, from which it is separated by banded hematite jaspers. The ore itself is high grade micaceous hematite often lateritised at the outcrop. Cross cuts into the interior of the deposit show that the hematite becomes very friable not far below the outcrop. In fact the characteristics of this ore, including the surface lateritisation, are almost exactly reproduced in the iron-ore deposits of Goa and Ratnagiri. The Tata Iron and Steel Company at Sakchi possesses slightly

richer and purer ore bodies in the Itanpur district, supplies of ore are at present drawn from the deposits in Mayurbhanj. The ore deposits have all been found to take the form of roughly lenticular bands or bodies of hematite, with small proportions of magnetite in close association with granite on the one hand and granitic rocks on the other.

The production of iron ore in India is still steadily on the increase, India is now, in fact, the second largest producer in the British Empire, and yields place only to the United Kingdom. Her output is of course still completely dwarfed by the production in the United States (over 59 million tons in 1930 and 31 million tons in 1931) and France 48 and 38 million tons in 1930 and 1931 respectively), but her reserves of ore are not much less than three quarters of the estimated total in the United States, and there is every hope that India will eventually take a much more important place among the world's producers of iron ore. In 1930 however, the prevailing depression was reflected in a decrease in the Indian output over the previous year of 23.8 per cent amounting to 578,930 tons, followed by a further fall of 221,742 tons (12.1 per cent) in 1931. In 1932 however, in spite of the continuance of the depression there was a partial recovery in the production of iron ore in India of 135,618 tons (8.3 per cent). The figures shown against the Keonjhar and Mayurbhanj States in the following table represent the production by the United Steel Corporation of Asia, Ltd. and the Tata Iron and Steel Co. Ltd. respectively. Of the total production of 666,874 tons shown against Singhbhum, 528,370 tons were produced by the Tata Iron and Steel Co., Ltd. from their Nominudi mine, and 138,504 tons by the Indian Iron and Steel Co., Ltd. from their mines at Gua. The output of iron ore in Burma is by the Burma Corporation, Limited, and is used as a flux in lead smelting.

Quantity and value of Iron ore produced in India during the years, 1931 and 1932

Total	1,624,883	41,58,737	308,055	1,760,501	39,19,769	294,720

In contrast with the preceding year there was a fall in the total output of iron and steel by the Tata Iron and Steel Co. at Jamshedpur. The production of pig iron fell from 799,545 tons in 1931 to 699,931 tons in 1932, with decreases in the production of steel (including steel rails) from 439,134 tons in 1931 to 430,333 tons in 1932, and of ferro manganese from 14,366 tons in 1931 to 366 tons in 1932. As in 1931, there was no production of pig iron by the Bengal Iron Co., their output of products made from pig iron in 1932 amounted to 3,371 tons of sleepers and chairs, and 17,266 tons of pipes and other castings, against 28,211 tons and 32,760 tons, respectively in 1931. The Indian Iron and Steel Co. decreased their production of pig iron from 243,214 tons in 1931 to 198,700 tons in 1932. The output of pig iron by the

Mysore Iron Works fell from 15,577 tons in 1931 to 14,683 tons in 1932. The total production of pig-iron in India fell from 1,058,336 tons in 1931 to 913,314 tons in 1932.

Exports of Pig-iron—The decrease in the production of pig iron in India recorded above was accompanied by a fall in the quantity exported from 318,994 tons in 1931 to 250,137 tons in 1932. Japan is still the principal consumer of Indian pig-iron, but the proportion fell from 49 per cent in 1931 to 41.5 per cent in 1932, whilst the actual amount fell by 34 per cent. Exports to all other countries fell substantially except to United Kingdom to which a rise of about 65 per cent (33,732 tons) took place. The export value per ton of pig-iron varied slightly from Rs. 35.1 (£2.6) in 1931 to Rs. 34.8 (£2.62) in 1932.

MANGANESE ORE.

This industry was started some thirty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. The most important deposits occur in the Central Provinces, Madras, Central India, and Mysore—the largest supply coming from the Central Provinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields. The ore is now used in the manufacture of ferro-manganese for use in steel manufacture. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing

since when the smallest production was 450,416 tons in 1915 valued at £929,546 whilst the smallest value was in 1909 when a production of 644,660 tons was valued at £603,908. The fall in magnitude of this catastrophe to the Indian manganese industry is perhaps best realised from the fact that whilst the quantity of the production in 1932 was a little over one fifth of that of the peak year of 1927, the value was less than one nineteenth of the value of the 1927 production. In fact in none of the major Indian mineral industries have the effects of slump been so seriously felt as in the manganese industry.

The decrease of 1932, totalling 325,575 tons, was distributed over all producing districts except Keonjhar State which showed an increase of some 5,000 tons, Vizagapatam district with an increase of some 2,700 tons, and North Kanara with a trivial output against none in the previous year. Production ceased from the Panch Mahals, Belgaum, and Bellary. In the Central Provinces the production fell from 302,344 tons in 1931 to 77,186 tons in 1932, which is the smallest output since 1901, in the infancy of the industry in the Central Provinces, when the output was 44,428 tons. During the year the majority of mines in the Central Provinces were closed including several in mines that had never been closed since the commencement of work in 1900 and 1901.

The present chief sources of production of manganese ore are now India, Russia, the Gold Coast, South Africa, and Brazil, whilst substantial supplies of ore are forthcoming from Egypt and Czechoslovakia.

There is a steady consumption of manganese ore at the works of the three principal Indian iron and steel companies, not only for use in the steel furnaces of the Tata Iron and Steel Company, and for the manufacture of ferro-manganese, but also for addition to the blast furnace charge in the manufacture of pig iron. The consumption of manganese ore by the Indian iron and steel industry in the year under review amounted to 19,647 tons, against 53,037 tons in 1931.

Record Output in 1927—Before the year 1926, the record production of Manganese-ore in India took place in 1907 when 902,291 tons were raised. In 1926, the output rose to 1,014,928 tons, valued at £2,463,491 f.o.b. Indian ports, the rise in output was however, accompanied by a decrease in value. In 1927 the production rose to the highest figure yet recorded, 1,129,353 tons, accompanied by a rise in value to the peak figure of £2,703,068 f.o.b. Indian ports. During the year 1928, the upward tendency was not maintained, the output falling to 978,449 tons valued at £2,198,895 f.o.b. Indian ports. In 1929, the output rose again slightly to 994,279 tons but the value fell heavily to £1,571,030. In 1930 the output fell substantially to 829,946 tons with a heavy fall in value to £1,200,236. In 1931 a still more serious fall took place to 537,844 tons with a value of £726,954. This has been followed by a disastrous fall in 1932 to 212,604 with a value of £140,022. This is the smallest quantity and value reported since 1904, when the output was 150,190 tons valued at £137,933. In 1905 the output was 247,427 tons valued at £223,432.

GOLD

The greater part of the total output of gold in India is derived from the Kolar gold field in Mysore. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,085 ounces in 1907. The figures for the latter years reveal a small improvement. The Nizam's mine at Hufli in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. This mine was opened in 1903. The only other mines from which gold was raised were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave an output of 2,993 ounces in 1911 but work there ceased in 1912. The Anantapur mines gave their first output of gold during the year 1910, the amount being 2,532 ounces, valued at Rs 1,51,800. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Maitkyina, and 216 ounces of gold were obtained in 1904, the amount steadily increased from year to year and reached 8,415 ounces in 1909, but

fell in subsequent years until in 1922 it was no more than 24 oz. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. There was a trivial fall in the total Indian gold production from 330,488 8 ozs valued at Rs 2,08,01,943 (£1,510,885) in 1931 to 329,681 7 ozs valued at Rs 2,53,51,438 (£1,906,123) in 1932. There was again a small production from the same districts in the previous year. The figures for the Punjab and the Central Provinces are, of course, with the output of Kolar which makes up 99.97 per cent of the Indian total. The considerable increase in the value of production is due to 1932 being the first full year since Britain and India abandoned the gold standard in September, 1931, with consequent appreciation in the price of gold, against sterling or Rupees. As a result of this appreciation in the price of gold 9,666,122 ozs of gold reckoned in terms of fine gold were exported during 1932. The value was Rs 75,87,52,203 (£57,049,038).

The average number of persons employed on the Kolar Gold Field during 1932 was 18,816.

PETROLEUM

Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil-fields are found in the Irrawaddy Valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over 100 years, and to 1886, prior to annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. Singu, now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was 43 million gallons, and after a fall to 31½ million gallons in 1910 it rose to 56½ million gallons in 1912. Several of the islands off the Arakan coasts are known to contain oil deposits but their value is uncertain. About 20,000 gallons were obtained from the eastern Barongo Island near Akra, and about 37,000 gallons from Ramri Island in the Kyaikpyu district during 1911. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons

which increased to nearly 4 million gallons in 1912. The existence of oil in Assam has been known for many years and an oil spring was struck near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ and 4 million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. In Baluchistan geological conditions are adverse, and though some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The world's production of petroleum in 1926 amounted to nearly 150 million tons, of which India contributed 0.72 per cent. In 1927, this figure jumped to some 172 million tons, of which the Indian proportion on a practically stationary production, fell to 0.64 per cent. In 1928, there was another substantial rise in the world's production, which reached the figure of over 181 million tons. In 1929 there was another jump to over 202 million tons, but in 1930 the world's production fell to about 193½ million tons. In 1931 to about 188 million tons, and in 1932 to about 180 million tons. The United States alone showed a fall greater than the total fall. Increases were shown by Roumania, Persia, Netherlands, East Indies, Argentina, Trinidad, India, Germany, Czechoslovakia, Italy and Bolivia. Roumania showed the largest increase

All other producers showed a decrease in production. The United States contributed 59.9 per cent of the world's supply in 1932. Russia 11.9 per cent and Venezuela 8.9 per cent. In 1928 India contributed 0.64 per cent which fell 0.60 per cent in 1929 and rose to 0.62 in 1930, 0.63 per cent in 1931 and 0.64 per cent in 1932, her position on the list of petroleum producing countries fell from 11th in 1929 to 12th in 1930, 1931 and 1932, her place being taken by Trinidad.

The production of petroleum in India (including Burma) rose from 305,018,751 gallons in 1931 to 308,606,031 gallons in 1932, the highest production yet recorded, with the exception of the output of 311,030,108 gallons in 1930. The increase in 1932 represents the balance of a considerable increase in the output of Burma and slight increase of that of the Punjab, and of a trivial proportionate decrease in the production of Assam. This increase in output in 1932 was accompanied, however, by a decrease in value

amounting to Rs. 83,11,212 (£561,514) 12.8 per cent, the fall in price being a reflection of the world depression.

Production from Yenangyaung, the most highly developed field in the Indian Empire, showed a decrease of 1,073,700 gallons, or a little over 3 per cent of the 1931 total.

An interesting feature of the year was the discovery of oil at the horizon of the 3,000 and 3,100 feet sands in East Twingon. For many years these horizons have been recognised as gas sands, but it now appears that the gas in them is a crestal accumulation on the higher portions of the structure. This discovery proved a narrow strip of oil within the Twingon Reserve and led to competitive deepening towards the close of the year. Development of this part of the field, both by extension tests and by a deep test well, was proceeding at the end of the year. At Minlindung one of the two deep test wells was abandoned, while the other remained shut down.

Amber, Graphite and Mica—Amber is found in very small quantities in Burma. Graphite is found in small quantities in various places but little progress has been made in mining except in Travancore. The total output in 1929 was 39 tons. India has for many years been the leading producer of mica, turning out more than half of the world's supply. In 1914, owing to the war, the output was only 38,189 cwts compared with 43,650 cwts in 1913. Owing to necessary restrictions with regard to the export of mica, the output fell off considerably in the year 1915, but subsequent demand in the United Kingdom for the best grade of ruby mica led to a considerable increase in production during the following years.

There was a small fall in the declared production of mica from 38,963 cwts valued at Rs 20,37,634 (£150,935) in 1931, to 32,713 cwts valued at Rs 14,35,401 (£107,925) in 1932. In the years 1926 and 1927 the export figure was approximately double the reported production figure, whilst in the years 1928 and 1929 the quantity exported was more than double the reported production. In 1930 the recorded exports were, however, only some 57 per cent in excess of the reported production, in 1931 only 36 per cent, and in 1932 only 43 per cent in excess.

The United States of America and the United Kingdom, which are the principal importers of Indian mica, absorbed respectively 23.4 per cent and 43.2 per cent during 1931, and 24.0 per cent and 47.6 per cent during 1932. Germany took 7.2 per cent and 10.6 per cent respectively, of the total quantities exported during the years 1931 and 1932. The average value of the exported mica decreased from Rs 78.3 (£5.8) per cwt in 1931 to Rs 71.2 (£5.4) per cwt in 1932. The exports fell from 52,966 cwts value at Rs 41,48,768 (£307,316) in 1931, to 47,021 cwts valued at Rs 33,48,943 (£251,800) in 1932. This is the lowest total value recorded since 1915-16, when the value of the mica exports was £208,496.

The difference between exports and production is generally attributed to theft from the mines. If this be the only explanation we must assume that during the three years prior to 1930 there has been as much mica stolen as won by honest means. Early in 1928 a bill was introduced into the Legislative Council of Bihar and Orissa, the purpose of which was an attempt to reduce the losses on this account by licensing miners and dealers, the bill was, however, rejected. In March, 1930, however, a similar bill to regulate the possession and transport of, and trading in, mica was passed, and from the figures presented since 1930, as analysed above, it appears that this bill may already have produced a good effect.

Tin, Copper, Silver and Lead—Following a series of years of practically continuous increase, a slight decrease in the production of tin ore in Burma is reported for the year 1931, during which the output amounted to 4,255.2 tons valued at Rs 33,07,380. In 1932, however, there was again an increase in production to 4,525 tons valued at Rs 45,09,995. This is the highest quantity (but not the highest total value, for which the smaller outputs of 1926, 1927, 1929, 1930 and 1931 showed higher figures) recorded in any one year. The considerable increase in the total value is, of course, mainly due to the rise in the price of the metal during

the year resulting from the tin restriction scheme in operation in the five leading tin producing countries, Malaya, Netherlands East Indies, Bolivia, Nigeria and Siam, a scheme to which India is not an adherent. This increase in output of some 270 tons is the balance of and increase from Tavoy and Mergui and a decrease from Mawchi in the Southern Shan States. Milling operations were suspended at Mawchi in August 1927 pending the installation of additional plant and further development. Milling was resumed in February 1930 and this explains the large increases of 1930 and 1931. The figure for 1932 includes 1,573.3 tons from Mawchi, calculated to be the proportion of tin ore in 2,732 tons of concentrates derived from mixed wolfram scheelite cassiterite ore, these concentrates are assumed to contain 43 per cent of wolfram and 57 per cent of cassiterite. There was no reported output of black tin.

Imports of unwrought tin increased from 41,969 cwts valued at Rs 36,28,556 in 1931 to 49,279 cwts valued at Rs 47,50,341 in 1932, over 98 per cent of these imports came from the Straits Settlements.

In contrast with the increase in the production of silver from the Bawdwin mines of Upper Burma, amounting to 1,400,291 ozs recorded during the four years, 1925 to 1928, the following years 1929, 1930 and 1931 were marked by decreases amounting to 124,211 ozs, 226,311 ozs, and 1,153,806 ozs respectively. In 1932, however, there was a small increase again, amounting to 98,556 ozs. These variations in quantity were accompanied by a small fall of value in 1929, marked falls in 1930 and 1931, and a marked rise in 1932. The output of silver obtained as a by-product from the Kolar gold mines of Mysore showed an increase of some 5,000 ozs. The amount of silver bullion and coin exported during the year was 34,664,148 ozs valued at Rs 4,15,61,144.

The production of lead-ore at the Burma Corporation's Bawdwin mines in Burma decreased further from 397,679 tons in 1931 to 372,586 tons in 1932, and the total amount of metal extracted decreased from 74,785 tons of lead (including 1,505 tons antimonial lead) valued at Rs 1,28,88,270 in 1931, to 71,202 tons of lead (including 642 tons of antimonial lead) valued at Rs 1,09,95,587 in 1932. The quantity of silver extracted from the Bawdwin ores rose slightly from 5,900,400 ozs valued at Rs 51,97,367 in 1931 to 5,998,956 ozs valued at Rs 62,32,915 in 1932. The value of the lead per ton fell from Rs 172.3 to Rs 154.5, whilst the value of the silver rose from Re 0.14-1 to Re 1.0-7 in the year 1932. The ore reserves in the Bawdwin mine, as calculated at the end of June, 1932, totalled 4,126,179 tons, against 4,233,120 tons at the end of June, 1931, with an average composition of 25.4 per cent of lead, 15.6 per cent of zinc, 0.68 per cent of copper and 19.7 ozs of silver per ton of lead. Included in this reserve are 37,000 tons of copper-ore. During the year development work in the Mengtha section, discovered in 1930, continued in yield satisfactory results.

Zinc—A monograph on zinc ores issued by the Imperial Institute in 1917 says that during the past fifty years zinc ores have received but little attention in India and no production was recorded until 1913. The

production of zinc concentrates by the Burma Corporation, Limited, in the Northern Shin States, fell from 51,455 tons valued at Rs 17,23,528 in 1931 to 44,484 tons valued at Rs 15,09,298 in 1932. The slight rise in the value per ton is parallel with a similar rise in the price of spelter. The exports during 1932 amounted to 49,950 tons valued at Rs 24,97,500 against 54,818 tons valued at Rs 28,41,250 in the preceding year.

Copper—In 1931 the mine output was 153,636 long tons of copper ore valued at Rs 22,71,940. 161,563 short tons of ore were treated for a production of 4,069 long tons of refined copper. 1,668 tons of this were sold in the Indian market at an average price of Rs 673 per ton. In addition there was a production of 3,637 tons of yellow metal, the average selling price in India being Rs 719 per ton.

Operations continued uninterrupted during the year 1932 at the Mosaboni Mine and at the works site at Maubhandar. The mine output increased to 175,010 long tons of copper-ore valued at Rs 25,09,080. 185,894 short tons of ore were treated in the mill and the production of refined copper amounted to 4,443 long tons. 3,441 tons were consumed in the rolling mill and 1,312 tons were sold in the Indian market at an average price of Rs 689 per ton. Operations in the rolling mill resulted in the production of 5,440 long tons of yellow metal, of which 4,830 were sold in India at an average price of Rs 657 per ton. The total ore reserves at the close of the year 1932 amounted to 700,466 short tons with an average assay value of 3.053 per cent of copper.

There was a considerable decrease in the production of coppermatte at the Namtu smelting plant of the Burma Corporation Limited, from 13,437 tons valued at Rs 32,25,003 in 1931, to 9,729 tons valued at Rs 19,81,499 and averaging 44.32 per cent of copper, 26.36 per cent of lead, and 83.72 ozs of silver to the ton. In addition 365 tons of copper ore valued at Rs 6,900 were produced in the Nel're district, Madras.

Gem Stones—The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphire, spinel, tourmaline, garnet, rock crystal, agate, cornelian, jadeite and amber. The production of diamonds in Central India rose from 639 carats valued at Rs 34,683 in 1931 to 1,254.1 carats valued at Rs 72,189 in 1932. Of this latter production

1,152.1 carats were produced in Panna State and the remainder in Charkhari, Ajigarh and Buxar.

A severe decline in the output from the Mogok ruby mines of Upper Burma in 1924, followed in 1925 by a marked drop in value, bore witness to a serious decline in the industry. The Burma Ruby Mines, Limited, ultimately decided to go into liquidation, and the mines were offered for sale in September, 1926. The skeleton organisation left in charge of the mines, however, made good use of its opportunities with the result that the value of the output in 1926 exceeded that of the previous year by over a lakh of rupees. This encouraging result was effected by a rigorous economy and an extension of a system of co-operation with local miners, and was assisted by some good finds of sapphires in the Kyaungdwin mine—the only one still worked by European methods.

During 1927, however, production fell in value by over 1½ lakhs of rupees, due mainly to a decrease in the value of the sapphires and spinels produced, there having been a slight increase in the value of the rubies. During 1928, there was another very large decline in value, amounting to over a lakh of rupees, due to a severe drop in the value of the sapphires produced as before. There was a slight increase in the value of the rubies. The value of the 1929 production was slightly above that of 1928, due to a considerable increase in the value of the rubies found, largely balanced by another large fall in the value of sapphires produced. In 1930 there was a further substantial fall in production and in total value, though the value per carat of the sapphires produced is the highest recorded for many years. Judging from reports in the *Rangoon Times* this is due to the opening up by the Burma Ruby Mines, Ltd., of the new Pagoda mine at Kathi leading to the find of a fine sapphire of 630 carats and a star sapphire of 293 carats. The find of a ruby of 100 carats was also reported. The great drop in production recorded in 1931 was due to the cessation of operations of the Burma Ruby Mines, Limited. Though the industry is in a very depressed state, work is still continued by local miners, but of this no reliable statistics are available. For 1932 no returns are available, except that a fine ruby of 17 carats was found at Chaunggyin near Mogok, and a fine sapphire of about 90 carats and a good star sapphire of 453 carats were mined at Kathi.

SALT

There was a large decrease in the total output of salt amounting to some 228,000 tons, shared by Madras (108,893 tons), Bombay and Sind (83,638 tons) and Northern India (43,317 tons), partially balanced by small increases in Aden (5,204 tons) and Burma (2,110 tons). Imports of salt into India increased slightly by 24,147 tons, all the countries of origin showing increases excepting Italian East Africa, Spain, and 'other countries'.

Bibliography—Report of the Chief Inspector of Mines in India, under the Indian Mines Act (VIII of 1901) for 1930, by the Chief Inspector of Mines Report on the Mineral Production of India during 1929 by L Leigh Fermor, Officiating Director, Geological Survey of India Note on the Mineral

Production of Burma in 1922 Monographs on Mineral Resources published by the Imperial Institute Quinquennial Review of the Mineral Production of India for the years 1924-1928 (Records of the Geological Survey of India, Vol LXIV)

e

Stock Exchanges.

There are about 475 Share and Stock Brokers in Bombay. They carry on business on the Brokers' Hall, bought in 1887 from the funds of the Share and Stock Brokers Association formed to facilitate the negotiations and the sale and purchase of Joint Stock securities promoted throughout the Presidency of Bombay. Their powers are defined by rules and regulations framed by the Board of Directors and approved by the general body of Brokers. The Board has the power to stop business in times of emergencies. The official address

of the Secretary is, Dalal Street, Fort, Bombay.

At first the admittance fee for a broker was Rs 5 which was gradually raised to Rs 7,000. The fee for the Brokers' card has increased. In 1921 a number of cards were sold at Rs 40,000 each and a few were employed to purchase in or the extension of the bus value of the card is about Rs 11,000.

In November 1917 a second Stock Exchange was opened in Bombay, with its headquarters in Apollo Street known as the **Bombay Stock**

Exchange, Ltd This separate Exchange no longer functions it was revived in 1922 It has ceased to function again

Committee of Enquiry—In 1923 the Government of Bombay appointed a Committee to enquire into the constitution, customs, practices, rules, regulations and methods of business of the Native Share and Stock Brokers' Association of Bombay and to investigate any such complaints of the public and to make any such enquiries with reference to any of the aforesaid matters or any other matter appertaining to the aforesaid Association as the Committee may deem proper and thereafter with a view to protect the investing public against the interested or irregular control of business to formulate such definite proposals for the future constitution, control, direction and regulation of the aforesaid Association as the Committee may deem proper

The Committee issued a report early in 1924 signed by all the members save one who appended a minority report The majority report made several important recommendations for reform notably one aimed at the prevention of corners and another for facilitating the handling of legitimate complaints against the brokers on the part of the public The Association, however, adopted the minority report which leaves the constitution and practice of the Exchange very little modified

In the middle of the year 1925 there was heavy speculation in certain mill scrips The market was tremendously oversold, the usual crisis ensued, leading to the temporary closing of the Exchange and the suspension of all dealings and a public agitation for thorough reform arose The brokers were at first unwilling to yield to this demand. But a threat of Government intervention and control altered their attitude In the end, they submitted new draft rules under which wild speculation will be discouraged and the recurrence of such crisis as that indicated above will be unlikely

For many years the Calcutta Share Market met in the open air in business quarters and was under no control except that of market custom In 1908 the Calcutta Stock Exchange Association was formed, and the existing customs were focussed into rules drawn up for the conduct of business Public confidence grew rapidly and the rules regarding membership and business underwent drastic changes to suit advancing conditions The Great War, having given an impetus to Indian industries, was responsible for an astoundingly large volume of business in the market which culminated in a boom

In June 1923, the Association was incorporated into a Limited Company under the Indian Companies Acts 1913 1920 with an authorised capital of Rs 3 lakhs divided into 300 fully paid up shares of 1,000 each Accounts are made up annually up to 30th September At the present moment, the number of shares subscribed is 223, each firm owning, and being entitled to own, only one share

The total number of members, including partners and assistants of member firms, is a little above 560 The Committee has restric-

ted the further sale of new shares until it deems it necessary to revise its decision, exception being made in the case of a partner dissociating from an existing firm Anyone intending to become a member is required to purchase a share from a member and the admission fee charged by the Association is Rs 5,000 The conduct of members and of business is controlled by bye laws, customs and usages being fully honoured The market customs differ from those of most other Stock Exchanges, since there are no settlement days, delivery is due the second day after the contract is passed, and sales of securities are effected for most part under blank transfers It has not got jobbers like the London Stock Exchange, but the brokers mostly combine the function of dealers The principle business transacted is connected with the shares in Jute Mills, Coal Companies, Tea Companies registered in India, miscellaneous industrial concerns (such as paper, flour etc) Railway Companies and Debentures, the latter representing those of industrial concerns and Trustees Investment Securities, namely, Municipal, Port Trust and Improvement Trust Debentures

A general meeting of the shareholders annually elects a Committee which elects several Sub-Committees and Hon Office Bearers—the President, two Joint Hon Treasurers and the Hon Secretary The Committee is empowered to do all work on behalf of the Association, which in its turn delegates powers to the Sub-Committees and the Hon Office Bearers The Committee also adjudicates in disputes between members thus enabling the members to avoid law Courts in most cases

Committee for 1934—Kedarnath Khandelwal, B A, LL B, President J S Haywood, G C Montgomery, O A Cohen, J S Kori, Gobind Tall Binger Mahulram Sonthalia, Rai Rameswar Nathany, Bihardur Jagannath Thunjunwalla, Sirbotosh Sen, Shambhu Nath Dutt, Itendra Mohan Dutt, M Sc, Gorilall Seal and Barendra Tall Chitradevi

Joint Honorary Treasurers—Rai Rameswar Nathany Bihardur and Gorilall Seal

Hon Secretary—Satya Ranjan Mitra, B A, B L

The Stock Exchange has its own building at 7, Lyons Range This building—one of the finest specimen of its kind—was opened on 6th July, 1928, by Sir Stanley Jackson, the Governor of Bengal The ground floor is utilised for the Association Hall where members meet between 12 noon and 5 p m This floor also contains the offices of the Association, a well equipped Library and several retiring places for the benefit of the members The upper three floors are tenanted by members' offices

The Madras Stock Exchange situated at No 9 Broadway consists of about 100 Members of which 25 are working Members It was opened on 6th April 1920 and deals principally in Mill shares Business is regulated by rules drawn up by the Directors There is a Board of arbitration There is an admittance membership card of Rs 1,000 and an annual subscription of Rs 100 The original 100 members were elected by the first Directors and each of the working members have deposited a security of Rs 3,000

Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very active in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian but alongside these have sprung up in recent years certain Associations such as the Bombay Indian Merchants' Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another and constantly work in association.

The London Chamber of Commerce in 1921 realizing the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organization. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters.

A new movement was started in 1913 by the Hon. Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aims at effecting great improvement in strengthening Indian commercial organization. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season, in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. Mr. (now the Hon. Sir) D. L. Wacha, President of the Bombay Indian Merchants' Chamber, presided as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Congress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to

take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The following are the principal paragraphs of a Memorandum of Association and Statement of Objects of the new Associated Chamber as approved by the Congress—

I The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE."

II The Registered Office of the Chamber will be in Bombay.

III The objects for which the Chamber is established are—

- (1) To discuss and consider questions concerning and affecting trade, commerce, manufactures and the shipping interests, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and shipping interests of the country.
- (2) To attain those advantages by united action which each Chamber or Association or body may not be able to accomplish in its separate capacity.
- (3) To organize Chambers of Commerce, Commercial Associations or Bodies in different trade centres of the Country.
- (4) To convene when necessary the Indian Commercial Congress at such places and at such times as may be determined by a Resolution of the Chamber.

The Articles of Association provided "There shall be an annual meeting of the Associated Indian Chamber held at Bombay on a date to be fixed by the Executive Council in the month of February," or at some other time, and "semi-annual or special meetings may be convened by the Executive Council or on the requisition of one third of the total number of members addressed to the Secretary."

The organization languished for lack of support for some years until a number of merchants specially interested in Currency and Exchange questions revived it in 1926 at Delhi and 1927 at Calcutta, the initiative in the new activities hailing, like the first movement, from Bombay. The Commercial Congress held in Calcutta on 31st December 1926 and 1st and 2nd January 1927, decided upon the formation of a "Federation of Indian Chambers of Commerce and agreed to the registered office of this body being "at the place where the President for the year has his headquarters or where he directs it to be located." Among the objects for which the Federation is established are the following—

- (a) To promote Indian businesses in matters of inland and foreign trade, transport, industry and manufactures, finance and all other economic subjects.

- (b) To encourage friendly feeling and unanimity among business community and associations on all subjects connected with the common good of Indian business
- (c) To enter into any arrangement with any Government or authority supreme, municipal, local or otherwise that may seem conducive to the Federation's objects or any of them, and to obtain from any such Government or authority all rights, concessions, and privileges which the Federation may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions
- (d) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this Federation
- (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of this Federation
- (f) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise
- (g) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities

The Rules provide for two classes of members, viz, numbers consisting of Chambers of Com-

merce (Subscription Rs 300) and others consisting of Commercial Associations (Subscription Rs 150)

The following are the Committee of the Federation for 1934 —

President — Mr Kāstubbhāi Lalbhāi

Vice President — Lālā Padampat Singhania

Members of the Committee — Mr Nalini Ranjan Sarker (Bengal National Chamber of Commerce, Calcutta), Lālā Shri Ram (Delhi Factory-owners Federation, Delhi), Mr G D Birla (Indian Chamber of Commerce, Calcutta), Sri Purshotamdas Thakurdas, Kt, CIE, MBE, (Indian Merchants' Chamber, Bombay), Mr Walchand Hirachand (Maharashtra Chamber of Commerce, Bombay), Raj Ratna Seth Chinnimal Girdharilal (Baroda Millowners Association, Baroda), Seth Mathuradas Vissani (Indian Merchants' Chamber, Bombay), Rao Bahadur Shivratna G Mohatta (Karachi Indian Merchants' Association, Karachi), Mr A D Shroff (Indian Merchants' Chamber, Bombay), Mr P S Sodhbans (Indian Chamber of Commerce, Lahore), Mr Vidya Sagar Prandya, M.L.A., (Southern Indian Chamber of Commerce, Madras)

Secretary — Mr D G Mullickar

Office address — Parkore's Nālā, Ahmedabad

Telegraphic address — Unicomind, Ahmedabad

BENGAL

The Bengal Chamber of Commerce was founded in 1834. Its headquarters are in Calcutta. Other societies connected with the trade and commerce of the city are the Royal Exchange, the Bengal Bonded Warehouse Association, the Calcutta Trades Association, the Bengal National Chamber of Commerce and the Marwari Chamber of Commerce. The Bengal Chamber is registered with a declaration of membership of 300. Its objects are the usual purposes connected with the protection of trade "in particular in Calcutta". There are two classes of members: Permanent (Chamber and Associated) and Honorary.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining or manufacture, and joint stock companies or other corporations, formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or

connected with art, science or literature, may be elected as permanent members of the Chamber.

The following are the office bearers of the Chamber for the year 1933-34 —

President — Mr J S Henderson, (Messrs Mackinnon, Mackenzie & Co)

Vice President — Mr J Reid Kay, (Messrs James Finlay & Co, Ltd)

Members — Mr Alec Aikman, (Messrs Andrew Yule & Co), Mr H F Bateman, (Messrs Shaw, Wallace & Co), The Hon'ble Sir D C Benthall, (Messrs Bird & Co), Mr R D Cromartie, (The Mercantile Bank of India, Ltd), Mr H A M Hannay, (Agent, Eastern Bengal Railway), Mr L V Heathcote, (The Burma Shell Oil Storage & Distributing Co of India, Ltd), Mr R A Towler, (Messrs McLeod & Co)

The Secretary of the Chamber is Mr A C Daniel. Assistant Secretary, Mr D C Fairbairn.

The following are the public bodies (among others) to which the Chamber has the right of

returning representatives, and the representatives returned, for the current year

The Council of State—The Honble Mr J S Henderson

The Bengal Legislative Council—Mr G R Dain CII, (Calcutta Highways Co Ltd), Mr H H Burn, (McLeod & Co), Mr C R Sunover, (Kilburn & Co), Mr C J Miller, (Horse Miller & Co Ltd), Mr W H Thompson, (Bengal Telephone), Mr Henry Birkmyre, (Birkmyre Brothers)

The Calcutta Port Trust—Mr M A Hughes, (Turner Morrison & Co Ltd), Mr S D Gladstone, (Gillanders Arbuthnot & Co), Mr G R Campbell, Mackinnon, (Mackenzie & Co Ltd), Mr A L B Tucker, (Kilburn & Co), Mr K J Nicholson, (Gladstone, Wallie & Co), Mr J Reid Kiv, (James Finlay & Co, Ltd)

The Calcutta Municipal Corporation—Mr I Rooney, (Bengal Telephone Co Ltd), Mr G U Pottinger, (Burmah Shell), Mr N G Herbert, (Imperial Chemical Industries Co Ltd), Mr A M Playfair, (Macneil & Co), Mr C H Holmes, (Holmes Wilson & Co Ltd), Mr K G Sillar, (Calcutta Electric Supply Corporation Ltd)

The Board of Trustees for the Improvement of Calcutta—Mr W H Thompson, MLC (Bengal Telephone Co, Ltd)

The Bengal Boiler Commission—Mr W Gow, (Burn & Co Ltd), Mr H H Reynolds, MLC (Ind), MLC, Mr J Williamson, MLC (Ind), MLC

The Bengal Smoke Nuisances Commission—Mr E J R Girdiner, Mr G A Robertson

The Chamber elects representatives to various other bodies of less importance, such as the committee of the Calcutta Sailors' Home, and to numerous subsidiary associations. The following are the recognised associations of the Bengal Chamber of Commerce—

Calcutta Gram Oilseed and Rice Association, Indian Jute Mills Association, Indian Tea Association, Calcutta Tea Traders' Association, Calcutta Fire Insurance Association, Calcutta Import Trade Association, Calcutta Marine Insurance Association, The Wine, Spirit and Beer Association of India, Indian Mining Association, Calcutta Baled Jute Association, Indian Paper Makers' Asso-

ciation, Indian Engineering Association, Calcutta Jute Fabrics Shippers' Association, Calcutta Hydraulic Press Association, Jute Jute Brokers Association, Calcutta Piled Jute Shippers Association, Calcutta Jute Dealers Association, Calcutta Hide and Skin Shippers Association, Calcutta Sugar Importers Association, Calcutta Accident Insurance Association, Calcutta Flour Mills Association, Calcutta River Transport Association, and the Master-Stewards Association

The Chamber maintains a Tribunal of Arbitration for the determination, settlement and adjustment of disputes and differences relating to trade, business, manufacture, and to customs of trade, between parties all or any of whom reside or carry on business personally or by agent or otherwise in Calcutta, or elsewhere in India or Burmah, by whom order of such parties the said disputes and differences be submitted. The Secretary of the Chamber acts as the Registrar of the Tribunal, which consists of such members or assistants to members as may, from time to time annually or otherwise be selected by the Registrar and willing to serve on the Tribunal. The Registrar from time to time makes a list of such members and assistants.

The Chamber also maintains a Licensed Measurers Department controlled by a special committee. It includes a Superintendent (Mr R Ellis), Head Office Manager (Mr C G Smith) and Assistant Superintendents (Messrs J G Smyth, G C G Smyth, J B I Henfrey and B Perry), and the staff at the time of the last official returns consisted of 100 officers. The usual system of work for the benefit of the trade of the port is followed. The Department has its own provident fund and compassionate funds and Measurers' Club. The Chamber does not assist in the preparation of official statistical returns. It publishes weekly the *Calcutta Prices Current*, and also publishes a large number of statistical circulars of various descriptions in addition to a monthly abstract of proceedings and many other circulars on matters under discussion.

INDIAN CHAMBER OF COMMERCE, CALCUTTA.

The Indian Chamber of Commerce was established in November 1925 to promote and protect the trade, commerce and industries of India and in particular the trade, commerce and industries in or with which Indians are engaged or concerned, to aid and stimulate the development of trade, commerce and industries in India with capital principally provided by or under the management of Indians, to watch over and protect the general commercial interests of India or any part thereof, and the interests of persons, in particular the Indians, engaged in trade, commerce or industries in India, to adjust controversies between members of this Chamber, to arbitrate in the settlement of disputes arising out of commercial transactions between parties willing or agreeing to

abide by the judgment and decision of the Tribunal of the Chamber, to promote and advance commercial and technical education and such study of different branches of Art and Science as may tend to develop trade, commerce and industries in India, to provide, regulate and maintain a suitable building or room or suitable buildings or rooms for a Commercial Exchange in Calcutta, and to do all such other things as may be conducive to the development of trade, commerce and industries, or incidental to attainment of the above objects or any of them.

There are two classes of Members, local and mofussil. The local Members pay an annual subscription of Rs 100 and the Mofussil

members Rs 50 Merchants, Bankers, Ship-owners, representatives of commercial, transport or insurance companies, brokers and persons engaged in commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature who are Indians shall be eligible for election as members of the Chamber

The Office of the Association is located at 2nd Floor, Patel House, Churchgate Street, Fort, Bombay, and the telephone number is 25350

Millowners' Mutual Insurance Association, Ltd

The Millowners' Mutual Insurance Association, Ltd, was registered on 30th June 1924, as a Company limited by guarantee. The registered office of the Association is located in Patel House, Churchgate Street, Fort, Bombay.

The objects of the Association are —

(a) The mutual insurance of members of the Company against liability to pay compensation or damages to workmen employed by them or their dependants for injuries or accidents fatal or otherwise, arising out of and in the course of their employment, (b) the insurance of members of the Company against loss or damage by or incidental to fire, lightning, etc., and (c) to reinsure or in any way provide for or against the liability of the Company upon any assurances granted or entered into by the Company and generally to effect and obtain re-insurances, counterinsurances and counter guarantees, etc., etc.

The Association consisted of 56 members on 1st October, 1933

All members of the Millowners' Association are eligible for admission to the Mutual Company. Non-members are also eligible for membership of the Mutual, provided their application is approved of by the Committee of the Millowners' Association.

The affairs of the Mutual Insurance Association are under the control of a Board of Directors.

The present Directors are —

Mr A Geddiss (Chairman)

The Hon'ble Sir Munmohandas Ramji, Kt, Sir Ness Wadia KBE CIE, Sir Joseph Kay, Kt, Sir Chunilal V Mehta, KCSI, Ratansi D Morari, Esq, S D Saklatvala, Esq, F Stones, Esq, OBE, and A C M Cursetjee, Esq, MA, LLB, Secretary of the Association

Indian Merchants' Chamber

The Indian Merchants Chamber was established in the year 1907. Its objects are —

- (a) To encourage friendly feeling and unanimity among business community on all subjects connected with the common good of Indian merchants
- (b) To secure organised action on all subjects relating to the interests of the Indian business community directly and indirectly
- (c) To promote the objects of the Indian business community in matters of inland and foreign trade, shipping and transport, industry and manufacture, banking and insurance
- (d) To collect and disseminate statistical and other information securing the promotion of the objects of the Chamber, and to make efforts for the spread of commercial and economic knowledge
- (e) To take all steps which may be necessary for promoting, supporting or opposing legislation or other action affecting the aforesaid interests by the Government or any Department thereof or by any local body or bodies and in general to take the initiative to secure the welfare of the business community in all respects
- (f) To make representations to Local, Central or Imperial authorities, Executive or Legislative, on any matter affecting trade, commerce, manufacture or shipping, banking or insurance
- (g) To undertake by arbitration the settlement of commercial disputes between merchants and businessmen and also to provide for arbitration in respect of disputes arising in the course of trade, industry or transport, and to secure the services of expert technical and other men to that end if necessary or desirable
- (h) To advance and promote commercial and technical education and to found and support establishments and institutions for such purposes
- (i) To undertake special enquiries and action for securing redress for legitimate grievances of any branch of trade or industry as also all such other action as may be conducive to the extension of trade, commerce or manufacture or incidental to the attainment of the above objects
- (j) To secure the interests and well-being of the Indian business communities abroad
- (k) To secure, wherever possible, organised and/or concerted action on all subjects involving the interests of members including 'regulating conditions of employment of industrial labour' in various industries represented by the members of the Organisation

- (ii) To nominate delegates and advisers, etc., to represent the employers of India at the Annual International Labour Conference of the League of Nations
- (iii) To take up, consider and formulate ideas on the subjects which are on the Agenda of each International Labour Conference
- (iv) To take all steps which may be necessary for promoting, supporting or opposing recommendations or conventions of the International Labour Conference
- (v) And generally to do all that may be necessary in the interests of the realisation of the above objects of the Chamber directly or indirectly

There are three classes of members —

- (1) Ordinary, (2) Patrons and (3) Honorary.
- (1) There are three classes of ordinary members —

(a)—Residents of Bombay and its suburbs who will have to pay Rs 75 as annual subscription, but joint stock Companies will have to pay Rs 100 per year.

(b)—Mofussil members who will have to pay Rs. 25 as annual subscription

(c)—Associations which will have to pay Rs 125 as annual subscription

Admission Fee—All the ordinary members and patrons pay Rs 100 as admission fee which is credited to a capital fund of the Chamber and not expended on revenue account except with the consent of the general body

- (2) Patrons—Indian firms or individual Indian merchants can join as Patrons. Firms will have to pay Rs 5,000 and individuals Rs 2,500 as donation, the proceeds of which will be credited to a capital fund which shall not be expended on revenue account but the interest whereof shall be taken to revenue account

- (3) Honorary members—Gentlemen distinguished for public services or eminent in commerce and manufactures or otherwise interested in the aims and objects of the Chamber may be elected as Honorary members by a General Meeting of the Chamber on the recommendation of the Committee and as such shall be exempted from paying subscriptions. They shall not be entitled to vote at any meeting of the Chamber nor shall they be eligible to serve on the Committee.

Any Indian gentleman, firm or association engaged in mercantile pursuits or interested in trade and commerce desirous of joining the Chamber shall be eligible for membership

The address of the Association is 262, Masjid Bunder Road, Munday Post, Bombay

MAHARASHTRA CHAMBER OF COMMERCE

The Maharashtra Chamber of Commerce was started in September 1927 with the object of establishing friendly relations among merchants and factory owners of Maharashtra, safeguarding their interests against measures likely to affect them adversely, collecting financial, industrial and trade statistics, and disseminating information thereabout amongst members of the Chamber

Membership of the Chamber is confined to merchants and factory-owners belonging to the City of Bombay, Bombay Suburban District, Poona, Sholapur, Satara, Ratnagiri, Kolaba,

Nasik, Ahmednagar, Thana and Last and West Khandesh and Belgaum and Indian States adjoining these districts

President—Mr Walchand Hirachand

Vice-Presidents—R. B. Hanumantram Rannath, R. B. Iyaman Vishwanath Pophale, Mr M. L. Dahanukar

Secretary—Mr D. V. Kelkar, M. A.

The offices of the Chamber are in the Phoenix Building, Graham Road, Ballard Estate, Bombay

KARACHI

The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred by the Committee upon "any gentlemen interested in the affairs and objects of the Chamber." All new members joining the Chamber pay Rs 750 entrance fee and the monthly subscription is Rs 18. The subscription to the Chamber's periodical returns is at present fixed at Rs 10 per month for the Daily Trade Return & Rs 10 per annum for the Weekly Price Current and Market Report. The affairs of the Chamber are managed by a committee of ten members, consisting of a Chairman, Vice-Chairman and eight members elected at the annual general meeting of the Chamber as early in the year as possible. The Chamber elects a representative on the Bombay Legislative Council, four representatives on the Karachi Port Trust, two on the Karachi Municipality and two on the North Western Railway Advisory Committee, Karachi. There were 63 members of the Chamber in January 1934. The following were the officers in 1933 —

Chairman —Mr R H Martin, (Forbes, Forbes, Campbell & Co, Ltd)

Vice-Chairman —Mr J W Anderson, (Grahams Trading Co (India), Ltd)

Members of Committee —Mr L C Buss, (Burmah Shell Oil Storage and Distributing Co of India, Ltd), Mr A D Finney, (Mackinnon, Mackenzie & Co), Mr T C Hiles (North-Western Railway), Mr F H Johnston, (National Bank of India, Ltd), Mr G N R Moir, (Bombay Co, Ltd), Mr W Reid, (David Sassoon & Co, Ltd), Mr T M Zoures, (Ralli Brothers, Ltd), Mr C Voegel, (Volkart Brothers)

Representative on the Bombay Legislative Council. Mr J Humphrey, OBE

Representatives on the Karachi Port Trust Messrs H S Bigg-Wither, OBE, G H Raschen, J W Anderson and W D Young

Representatives on the Karachi Municipality Mr A A L Hynn & Mr G A Johnstone

Representatives on the North Western Railway Local Advisory Committee, Karachi Messrs R H Martin and L Reid

Ag Secretary —Mr H M Gomes

Ag Public Measurer —Mr J G Smith

The following are the principal ways in which the Chamber gives special assistance to members —The Committee take into consideration and give an opinion upon questions submitted by members regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate arbitrators and surveyors for the settlements of disputes. When two members of the Chamber or when one member and a party who is not a member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber, under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are members of the Chamber. A public measurer is appointed under the authority of the Chamber to measure pressed bales of cotton, wool, hides and other merchandise arriving at or leaving the port.

MADRAS

The Madras Chamber of Commerce was founded in 1836. All merchants and other persons engaged or interested in the general trade, commerce and manufactures of Madras are eligible for membership. Any assistant signing a firm or signing *per-pro* for a firm is eligible. Members who are absent from Madras but pay their subscriptions may be represented in the Chamber by their powers-of-attorney, as honorary members, subject to ballot. Honorary members thus elected are entitled to the full privilege of ordinary members. Election for membership is by ballot at a general meeting, a majority of two thirds of the recorded votes being necessary to secure election. Every member pays an entrance fee of Rs 100, provided that banks, corporate bodies and mercantile firms may be represented on the Chamber by one or more members and are liable for an entrance fee of Rs 100 once in ten years each. The subscriptions shall not exceed Rs 300 per annum, payable quarterly in advance, subject to reduction from time to time in accordance with the state of the Chambers' finances. Absentees in Europe pay no subscription and members temporarily absent from Madras pay one rupee per month. Honorary members are admissible to the Chamber on the usual conditions. Members becoming insolvent cease to be members but are eligible for re-election without repayment of the entrance donation.

The Chamber undertakes arbitrations and surveys, the granting of certificates of origin and the registration of trade marks. One of the rules for the last named is "that no trade mark or ticket shall be registered on behalf of an Indian firm trading under a European name."

The following publications are issued by the Chamber —Madras Price Current and Market Report, Tonnage Schedule and Madras Landing Charges and Harbour Dues Schedule.

There are 58 members and 6 Honorary Members of the Chamber in the current year and the Officers and Committee for the year are as follows —

Chairman Mr W M Browning

Vice Chairman Mr F Birley, MLC

Committee —Messrs G A Bambridge, H N Cohn, R A Gray, G H Hodgson and A S Todd

The following are bodies to which the Chamber is entitled to elect representatives and the representatives elected for the year —

Madras Legislative Council Mr F Birley, MLC

Madras Port Trust Messrs W M Browning, R D Denniston, and A S Todd *Vacant*

Corporation of Madras Messrs F E James, A J Powell and A G Vere

Federation of Chamber of Commerce of the British Empire Sir Gordon Fraser
Secretary G Gompertz

SOUTHERN INDIA.

The Southern India Chamber of Commerce established in 1909 has its Registered Office in Madras. The objects of the Chamber are those usual for such bodies, concerning the promotion of trade, especially in the Madras Presidency, and the interests of members. Special objects are stated to be—

“To maintain a Library of books and publications of commercial interest, so as to diffuse commercial information and knowledge amongst its members

“To establish Museums of commercial products or organise exhibitions either on behalf of the Chamber or in co operation with others”

There are two classes of members, permanent and honorary. The usual conditions as to eligibility for election prevail.

The Chamber is a member of the Federation of Indian Chambers of Commerce, the Indian Chamber of Commerce in Great Britain, and the Indian National Committee of the International Chamber of Commerce Paris.

The Chamber registers trade marks, holds survey and arbitrations, and issues certificates of origin.

The right of electing two representatives to the Madras Port Trust was accorded to the Chamber by the Madras Port Trust Amendment Act, 1915. Members of the Chamber hold seats in the Madras Legislative Council and the Chamber has also been accorded the right of electing a representative to that body.

Under the Madras City Municipal Act, 1919, the Chamber has the right of electing two Councillors to the Madras Corporation. Under the State Aid to Industries Act, 1923, the Chamber has the right to elect one member to the Board of Industries.

The Chamber also sends its representatives to the Road Board, the Town Planning Trust, the Provincial Cotton Committee, Vizagapatam Harbour Works Committee, the Advisory Committees of the South Indian and Madras and Southern Mahratta Railways, the Madras University, the Government Institute of Commerce, Advisory Council, Madras, the Social Hygiene Council (Madras Branch), the Anna Malai University, State Technical Scholarship Board, Advisory Committee of the Government Rayaparam and Ophthalmic Hospital and Madras Electric Supply and Tramways Advisory Committee, Income tax Board of Reference and Indian Institute of Accountants.

The Chamber has 115 members on the roll and has its own building. Several Associations in the City of Madras and Chambers of Commerce Upcountry have been affiliated to this Chamber.

UPPER INDIA

The Upper India Chamber of Commerce is concerned with trade, commerce and manufactures in the United Provinces and has its registered office at Cawnpore. Members are elected by the Committee, subject to confirmation by the next general meeting of the Chamber. Gentlemen distinguished for public service, or eminent in commerce or manufactures, may be elected honorary members of the Chamber by the members in a General Meeting and such shall be exempted from paying any subscription to the Chamber. There is no entrance fee for membership, but subscriptions are payable as follows—A firm, company or association having its place of business in Cawnpore, Rs 300 a year, an individual member resident or carrying on business in Cawnpore, Rs 300, firms or individuals having their places of business or residence outside Cawnpore pay half the above rates, but the maintenance of a branch office in Cawnpore necessitates payment of full rates.

The affairs and funds of the Chamber are managed by a Committee of ten members, which has power to constitute Local Committees of from four to seven members each at trade centres where membership is sufficiently numerous to justify the step. Such Local Committees have power to communicate only with the Central Committee.

The Chamber appoints arbitration Tribunals for the settlement and adjustment of disputes when invited, to do so, members of the Tribunals being selected from a regular printed list of arbitrators.

The Chamber has in the present year 61 members, two honorary members and seven affiliated members.

The following are the officers—

Upper India Chamber of Commerce Committee—*President*—Mr J M Lowme, (Messrs Begg, Sutherland & Co, Ltd) *Vice President*—Mr R Menzies, O B R, (The British India Corporation, Ltd) *Members*—Mr K J D Price, (The Muir Mills Co, Ltd), Mr T Gavin Jones, (The Cawnpore Chemical Works, Ltd), Mr Ram Narain, Cawnpore, Mr G V Lewis, (The British India Corporation, Ltd), Mr E J W Plummer, (The Swadeshi Cotton Mills Co, Ltd), Mr A P Curtis, (Messrs Begg, Sutherland & Co, Ltd), Mr Jang Bahadur Mirhouri, (Messrs Moonna Lal & Sons), and Mr A Barr Pollock, (The Chartered Bank of India, Australia & China) *Representatives on the United Provinces Legislative Council*—Mr E M Souter, M L C, (Messrs Ford & Macdonald, Ltd), The Hon ble Mr J P Srivastava, M L C, M S C, Cawnpore.

Secretary—Mr J G Ryan, M B E, V D

Head Clerk—Babu B N Ghosal

PUNJAB

The Punjab Chamber of Commerce has its headquarters at Delhi and exists for the cure of mercantile interests on the usual lines in the Punjab, the North West Frontier Province and Kashmir. The Chamber has Branches at Amritsar and Lahore. Membership is by ballot and is restricted to Banks, Merchants (wholesale), Railways and proprietors of large industrial interests. The entrance fee is Rs 100 and the rate of subscription Rs 180 per year. The Chamber returns one member to a seat on the Reformed Punjab Legislative Council jointly with the Punjab Trades Association, and shares representation in the Indian Legislative Assembly with other Chambers which are members of the Associated Chambers of Commerce of India, in the seat allotted to the Associated Chambers. The Chamber is a member of the Federation of Chambers of Commerce, London. The Chamber is represented on the Municipal Corporation of Delhi as well as on the N W Railway Advisory Committee, Lahore.

The Managing Committee meets at Delhi and Lahore and the following are office bearers—

nual Force Act, 1920—*J R Shirley, Esq

COCANADA

The Cocanada Chamber of Commerce was
established on 29th October 1868

The following are the members of the
Chamber which has its headquarters at
Cocanada, the chief port on the Coromandel
Coast north of Madras —

*Members—*The Coromandel Co., Ltd., Ripley
& Co., Innes & Co., Wilson & Co., Gordon Wood-
roff & Co., (Madras), Ltd., Northern Circars
Development Co., and Burmah Shell Oil
Storage and Distributing Co. of India, Ltd.

MEMBERS OF THE COMMITTEE

Mr S A Cheesman, (Chairman)

„ C D T Shores

„ H P Ferguson

„ G M Lake, (Secretary)

The rules of the Chamber provide that by
the term 'member' be understood a mercan-
tile firm or establishment, or the permanent
Agency of a mercantile firm or establishment,
or a society of merchants carrying on business
in Cocanada or other place in the Districts
of Kistna, Godavari, Vizagapatnam, and
Ganjam, and duly elected according to
the Rules of the Chamber, and that all such
be eligible but only members resident in Coca-

nada can hold office. Members are elected by
ballot. The Committee, when called upon by
disputing members or non-members of the
Chamber, give their decision upon all questions
of mercantile usage and arbitrate upon any
commercial matter referred to them for final
judgment. In either case a minimum fee of
Rs 16 must accompany the reference with
Rs 5 from a non member and Rs 1 from a
member as payment for the Chamber's Sealed
Certificate.

The Committee consisting of 3 members
including the Chairman, is elected by
ballot at the general meeting in January
in each year for a term of 12 months.
The entrance fee for each member, whose
place of business is in Cocanada, is Rs 100 and
for each member whose place of business is
elsewhere is Rs 50. The subscription for each
member whose place of business is in Cocanada
is Rs 120 per annum, payable quarterly, and for
each member whose place of business is else-
where is Rs 60 per annum, payable in advance.
The Committee usually meets once a month on
the penultimate Thursday and the general body
meets on the last Thursday.

A Fortnightly Circular of current rates of
produce, freights, and exchange is drawn up by
the Committee.

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS

The Department of Statistics was reabsorbed
into the Department of Commercial Intelligence
with effect from the 1st December 1922. The
joint department has its office at No 1, Coun-
cil House Street, Calcutta, the headquarters
of the Director-General. It embraces two dis-
tinct classes of work (a) the collection and
dissemination of information connected with
overseas trade which may be of use to Indian
firms and (b) the compilation and publication
of All India statistics.

For some time past the Government of India
have felt the necessity for the creation of a
Central Statistical Research Bureau for the con-
tinuous analysis and interpretation of economic
and statistical facts and phenomena and they
have recently established the nucleus of a Sta-
tistical Research Bureau under the Director-
General of Commercial Intelligence and Statistics
at their headquarters. The Director General is

now stationed at the headquarters of the Go-
vernment of India with a Deputy Director of
Commercial Intelligence and a Deputy Director
of Statistics at Calcutta and a new Deputy
Director of Statistical Research at the head-
quarters.

Among the important publications for which
the Director General is responsible are the
following annual volumes: Review of the Trade
of India, Statement of the Foreign Sea-borne
Trade and Navigation of British India,
Statistical Abstract for British India, Agri-
cultural Statistics, Estimates of Area and Yield
of Principal Crops and Indian Customs Tariff.
The department also publishes a weekly
journal—The Indian Trade Journal—
the principal features of which are (a)
information as to tariff change in foreign
countries which affect Indian interests (b)
notices of tenders called for and contracts

placed by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communiques and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, prices and trade movements of the staple exports and imports, (g) trade enquiries for securing trade introductions, (h) summaries of the leading features of consular and other trade reports, and (i) abstracts of the proceedings of the various Chambers of Commerce in India.

The Department also administers the **COMMERCIAL LIBRARY AND READING ROOM** located at No 1, Council House Street Calcutta. This was at first a small departmental library used for the purpose of answering enquiries but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence, Statistics, and Patents and Designs, and the resultant Commercial Library

and Reading Room was placed under the administrative control of the Director-General. It has now been expanded into a first-class technical library containing over 13,863 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and over 330 technical and commercial journals and market reports. Ordinarily books are consulted in the Library, but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with Directors of Industries and other Government Departments in India, with the Indian Trade Commissioners in London and Hamburg with His Majesty's Trade Commissioners in India and the Dominions, and with Consular Officers in various parts of the world. And the yearly increase in its correspondence shows that it is steadily being used more and more both by firms in India and by overseas firms interested in Indian exports.

THE BRITISH TRADE COMMISSIONER SERVICE IN INDIA.

The British Trade Commissioners in India are part of the world-wide Commercial Intelligence Organisation of the Imperial Government. The Department of Overseas Trade, London, which is the headquarters of this organisation, is a joint department of the Board of Trade and the Foreign Office and was created in 1917 with the specific object of stimulating the overseas trade of the United Kingdom by securing commercial information from all parts of the world, by disseminating it to British manufacturers and exporters, by undertaking such special constructive activities as may be found possible, and by assisting traders in the removal of their difficulties. The Department has nothing to do with the regulation of trade. It passes no measures and makes no restrictive or regulative orders. Briefly, the policy on which it is based is the policy of assistance without interference.

The Department of Overseas Trade maintains a network of trained and experienced Commercial Intelligence Officers throughout the world, who forward a constant supply of commercial information to London and provide local assistance in the promotion of British economic interests. Those overseas officers who are stationed in the British Empire are members of the Trade Commissioner Service while Foreign countries are served by the Commercial Diplomatic Service forming part of the British Diplomatic Missions and by the Consular Service.

Sir (then Mr) Thomas M Ainscough, OBE, was appointed His Majesty's Senior Trade Commissioner in India in January 1918 and opened an office in Calcutta in March of that year. For five years, owing to the pressing need for economy in the Public Service, he was singlehanded in covering this vast territory. In 1923, however, H M's Government sanctioned the opening of an office in Bombay and the creation of an additional Trade Commissioner's post in Calcutta. Mr W D M Clarke holds the appointment of H M's Trade Commissioner at Bombay and in 1930

Mr R B Willmot was appointed as H M's Trade Commissioner at Calcutta. The territory is now divided between the Calcutta and Bombay posts and this development allows the Senior Officer to travel almost continuously to any part of India which may call for his attention and to devote his time to some of the broader politico-economic problems which are becoming so important in view of the changing political conditions in India.

Function of Commissioner.—The primary duty of the British Trade Commissioner comprises the collection of information in regard to opportunities that may arise within his territory for securing and developing trade by British manufacturers and merchants, both in the United Kingdom and other parts of the British Empire. He is, therefore, enjoined carefully to watch and report from time to time to the Board of Trade and the Governments of the Dominions concerned on all matters affecting the trade, industry and commerce of his area. His general functions are to maintain cordial relations with the governing authorities of his area, to enter into personal relations with the Chambers of Commerce, Trade Associations, and similar bodies, and with the principal representative importers and local manufacturers, to visit the principal commercial centres, to report upon foreign competition, on financial and trade conditions, and new legislation affecting trade, to make an annual general report on the conditions and prospects of trade in his area, and to furnish special reports and monographs on particular questions which are likely to be of interest to British manufacturers and exporters. He is also expected to supply a regular flow of commercial information of all kinds to his department, to maintain an active correspondence with firms in the United Kingdom or the Dominions who wish to extend their trade with his area, and to give all possible assistance to the representatives of British firms who may visit his territory.

Every effort is made by His Majesty's Trade Commissioners to keep in touch with British representatives and agents in India. The offices are equipped with a complete range of directories and reference books of all kinds and information is available with regard to such matters as tariff conditions, port dues and charges throughout the world, etc. A library consisting of over 1,000 catalogues of the leading British manufacturers is maintained in Calcutta and Bombay, and firms desiring information with regard to specific manufacturers of particular machinery or processes are invited either to call personally or to communicate their requirements in writing. It is hoped that local importers and buyers will co-operate by making a more extended use of the information available in the offices and by bringing to the attention of the British Trade Commissioners any cases where the interests of exporters from the United Kingdom or the Dominions may be adversely affected by foreign competition or otherwise.

For many years British traders have deplored the fact that there have not been available officials with commercial experience who could help them in voicing their difficulties and in meeting foreign competition. As a rule these complaints eulogized the Consuls of other countries and invited the attention of Government to their many virtues. In response to this agitation the greatest care has been taken by the British Government to select, as their trade officers Overseers, men of sound commercial training and experience who have acquired some reputation in their respective spheres, and a comprehensive and businesslike organization has been built up at the Department of Overseers

Trade, London, to deal with the information sent home. It now rests with the British mercantile community, both at home and also Overseas, to co-operate freely and frankly with the Trade Commissioners and to recognize the work they are doing in the Imperial interest by assisting them with such information and particulars with regard to foreign competing goods, conditions of trade, etc., as they are able to afford.

Colombo.

THE INDIAN CENTRAL COTTON COMMITTEE

The Indian Cotton Committee of 1917-18, a full summary of whose report appears on pages 291-294 of the Indian Year Book of 1922, reviewed the position of cotton growing in India very thoroughly and made a series of recommendations for the improvement of cotton growing and marketing which have proved to be of the greatest value. One of their recommendations was that a permanent Indian Central Cotton Committee should be established to promote the welfare of the cotton growing industry generally, to advise the Government of India and Local Governments in regard to matters of cotton policy, especially with reference to legislation for the prevention of malpractices and similar matters.

The Indian Central Cotton Committee was appointed by resolution of the Government of India in April 1921, and worked as an advisory body until 1923. Another recommendation of the original Committee was that a cotton cess should be levied to provide funds for the work of the Central Cotton Committee and for agricultural and technological research on cotton. The Cotton Cess Act was passed in 1923 and at

the same time the Central Cotton Committee was incorporated and its membership enlarged in order to make it fully representative of all sections of the industry. Its constitution and present membership is as follows—

President, ex officio—Dewan Bahadur Sir T. Vajazraghacharya, KBE, Vice Chairman, Imperial Council of Agricultural Research, Simla or Delhi

Representing the East India Cotton Association, Ltd., (Vice-President)—Sir Purshotamdas Thakurdas, KT, CIE, MBE, C/o Messrs. Naranadas Rajaram & Co, Narasri Chambers, Outram Road, Fort, Bombay

Ex Officio—B. C. Burt, Esq, CIE, MBE, IAS Agricultural Expert, Imperial Council of Agricultural Research, Simla or Delhi

Representing the Agricultural Department, Madras—S. V. Ramamurthy, Esq, ICS, Director of Agriculture, Madras

Representing the Agricultural Department, Bombay Presidency—The Director of Agriculture, Bombay Presidency, Poona

Representing Cotton Growers, Madras—M R
R K Suresh Babu, M C, Cumbum,
Kurnool District, Madras Presidency

Khan Bahadur Nawab Fazl-ul-Ali Khan,
Chairman District Board, and President, Central
Co operative Bank, Ltd, Gujrat (Punjab)

Khan Sahib Farrukhbeg Sadikahbeg Muzi, Bar-at-Law, President, District Local Board, Nawabshah, Sind

Representing the Cotton Millowners of Delhi — Lal Shri Ram, Delhi Cloth and General Mills Delhi

Secretary — Mr P H Rama Reddi, M A, B Sc, I A S

Director, Technological Laboratory — Dr Nazir Ahmad, M Sc, Ph D

Publicity Officer — Mr R D Mhtra, M A, Agri (Oxon), Post Grad Dip Agri (Oxon), Post Grad Res B Latt (Oxon)

Office — Vulcan House, Nicol Road, Ballard Estate, Bombay

From the commencement the Central Cotton Committee took steps to deal with the various malpractices reported by the original Committee which by spoiling the reputation of the Indian cottons and rendering them less valuable for spinning purposes, were reducing the returns of the grower and causing great economic loss to the country at large

The Cotton Transport Act passed in 1923 enables any Local Government with the consent of its Legislative Council to notify definite areas of cotton for protection and to prevent the importation of cotton from outside the area except under license. Prior to the passing of the Act inferior cottons were imported in large quantities into the staple cotton tracts for purposes of adulteration, and the reputation of several valuable cottons had been ruined by this abuse. The Act has now been applied to the most important staple cotton areas of the Bombay and Madras Presidencies and the Central Provinces and of the Baroda, Rappi, Chhota Udepur, Hyderabad, Indore, and Sangli States and with excellent results.

The Cotton Ginning and Pressing Factories Act (XII of 1925) subsequently passed provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enables them to be traced to their origin. This Act, with the minimum of official interference, places the cotton trade in a position itself to deal with abuses, and should lead to a very marked improvement in the quality of Indian cottons.

The Central Cotton Committee has also devoted considerable attention to constructive action for the improvement of the marketing of cottons and to bringing to the notice of the trade, both in India and abroad, those improved varieties which have now reached a commercial scale and has carried out some important enquiries into the financing of the cotton crop up-country and primary cotton marketing, and the effect of "pools" of cotton ginning and pressing factories on the price paid to the growers for their produce. As an instance of the progress in cotton growing which has been made since 1917 it may be stated that since that date approximately half a million bales of cotton of medium staple have been added to the Indian crop by the work of the Agricultural Departments. In general it may be said that the Committee affords a common meeting ground for

representatives of all sections of the Cotton trade and of the cottongrowing industry, thus enabling a number of problems to be tackled from every point of view and definite progress made towards their solution.

Research Studentships — The Committee has also instituted a scheme of research studentships to enable distinguished graduates of Indian Universities to undertake research on cotton problems under the direction of experienced research workers in India. Scholarships for training abroad are also sometimes granted.

STATISTICS — By the efforts of the Committee great improvement has been effected in cotton statistics. The compilation of statistics relating to (1) Indian raw cotton consumed in spinning mills in India, (2) exports by sea and receipts at mills of Indian cotton classified by varieties, (3) stocks of cotton held on the last day of the season by the trade at important cotton centres in India, and by the mills, and (4) loose cotton received in the spinning mills of the major cotton growing provinces, the establishment of weekly statistical returns relating to the number of bales of raw cotton pressed in India, and the revival of rail-borne trade statistics for cotton are some of the results already achieved by the Committee in this direction.

Research — By means of the Cotton Cess the Committee is provided with funds for the promotion of research. It maintains in Bombay a fully equipped Technological Laboratory which includes a complete experimental, spinning plant and a scientific laboratory for research on the cotton fibre. This laboratory provides Agricultural Departments with complete and authoritative reports on the spinning value of new cottons, thus providing a much needed facility. In addition it is now possible to undertake research work on a number of questions connected with the spinning qualities of cotton which have not been touched in the past. The Laboratory is unique in that it is probably the only institution of its kind which approaches the subject primarily from the standpoint of the grower.

The Committee contributes the greater part of the funds for the Indore Institute of Plant Industry which is a Central Agricultural Research Institute for cotton where many problems of fundamental importance are being studied.

In addition by means of grants in-aid to Agricultural Departments it has provided for special investigations on problems of general applicability which would otherwise have been left untouched through lack of staff and funds. Such schemes are in operation in all major cotton-growing provinces and now number twenty-seven.

The Committee also assists by means of grants to Agricultural Reports in Provinces and States and to Co-operative Cotton Sale Societies in the wider distribution of seed of improved varieties of cotton. There are 16 such schemes in operation at present.

His Excellency the Viceroy (Lord Reading) when he visited Bombay in December 1924 and formally opened the Committee's Spinning Laboratory laid great stress on the importance and value of the Committee's work.

THE EAST INDIA COTTON ASSOCIATION, LIMITED

Bombay—The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917 the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Muccehdums' Association Ltd., and The Japanese Cotton Shippers' Association. None of these bodies were representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in futures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June 1918 as a temporary measure under the Chairmanship of Mr G Wiles, ICS. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May 1922 when the Act, under which the Board worked, was repealed, and its functions were carried on by the First India Cotton Association under Bombay Act No XIV of 1922.

The Association continued to function under the above Act until 31st October 1932. With effect from 1st November 1932 the Association has been regulating transactions in cotton under Bombay Act No IV of 1932 under which it has been declared to be a recognised Cotton Association.

The present constitution of the Board is as follows—

Haridas Madhavadas, Esq., (President), Sellers' Panel, Bhudas Nanalal, Esq., (Vice President), Sellers' Panel, H F Milne, Esq., Buyers' Panel, L F H Goodwin, Esq., Buyers' Panel, R L Ferad, Esq., Buyers' Panel, J G Anderson, Esq., Buyers' Panel, Surajmal Khalliram, Esq., Sellers' Panel, Chimanlal B Parikh, Esq., Sellers' Panel, Beggur Gupta, Esq., Brokers' Panel, Chundal B Mehta, Esq., Brokers' Panel, Jagjivandas Dossabhai, Esq., Brokers' Panel, P N Phulon, Esq., Brokers' Panel, Jannadas Adukra, Esq., Brokers' Panel, Ramdeo Anandlal Podar, Esq., Brokers' Panel, N M Deshmukh, Esq., M A (Cantab), Bar at-Law, Mian Nurullah, Esq., MLC. Nominated on the Board of Directors as Representatives of Growers' of Cotton by the Indian Central Cotton Committee.

Officers

D Mehta, Esq., P A, Secretary, C M Parikh Esq., B Com, Assistant Secretary, A R., Menezes, Esq., Manager, Clearing House.

Some of the objects for which the Association is established are—To provide and maintain suitable building or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to and prohibition of the user thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Exchange to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts to adjust by arbitration or otherwise controversies between persons engaged in the Cotton Trade to establish just and equitable principle in the said Trade to maintain uniformity of control of the said trade, to fix or adopt standards of classification of cotton, to acquire, preserve and disseminate useful information connected with the Cotton interest throughout all markets to decrease or insure the local risk attendant upon business, and generally to control, promote and regulate the Cotton Trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted. To establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such use whether in the case of the general body or particular classes or any individual or firm or company using the Clearing House. To regulate the handling and exportation of Cotton from India and the importation of Cotton into India in so far as it may be imported. To bring, prosecute, or defend or aid in bringing, prosecuting, or defending any suits, actions, proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association and to prescribe the principle of framing of contracts with a view to eliminate the temptation and possibility of speculative manipulation.

The Association has a fine Exchange Building at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, and a large Trading Hall on the lines of Liverpool and New York Exchanges.

The inaugural ceremony of the opening of the Exchange Building was performed by His Excellency Sir Leslie Wilson, Governor of Bombay, on the 1st December 1925 in the presence of a large gathering which included most of the prominent business men of the City and many leading citizens.

There is a membership of 395 members.

The Bombay Cotton Annual containing matters relating to every branch of the Trade is published annually in December and statistics are issued twice weekly.

The Textile Industry.

India has been the home of the cotton trade from the earliest times. Its cotton, known as white wool, was well known to the ancients and its cloth was familiar to the West in the days of the overland route. The name Calico comes from the fine woven goods of Calicut, and the products of the Dacca handlooms are still remarkable as the finest muslins human skill can produce.

Indian Cotton

The exports of Indian cotton began to assume importance with the opening of the sea route. They received an immense stimulus during the American Civil War, when the close blockade of the Confederate ports produced a cotton famine in Lancashire, and threw the English spinners back on India for their supply of raw material. When the war broke out the shipments of Indian cotton were 528,000 bales, but during the last year of the war they averaged 972,000 bales. Most of this cotton was sold at an enormously inflated price, and

induced a flow of wealth into Bombay, the great centre of the trade, for which there was no outlet. The consequence was an unprecedented outburst of speculation known as the "Share Mania," and when the surrender of Lee re-opened the Southern Ports widespread ruin followed. It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £92 millions. Since then the cultivation of Indian cotton, although interrupted by famine, has steadily increased. For the last season for which returns are available, 1932-33 the total area in all territories reported on was computed at 22,588,000 acres and the total estimated outturn was 4,516,000 bales of 100 lbs. as compared with 21,522,000 acres and 4,061,000 bales in 1931-32.

Bombay, the Central Provinces and Hyderabad are the chief producing centres. The following table gives the rough distribution of the outturn. The figures are the estimated figures for the past season, and are not exact, but they indicate the distribution of the crop —

Provinces and States	1932-33 (Provisional Estimates)	
	Acres in Thousands	Bales of 100 lbs. (In thousands)
Bombay (a)	6,587	1,457
Central Provinces and Berar	4,216	710
Punjab (a)	2,268	652
Madras (a)	1,976	112
United Provinces (a)	527	170
Burma	320	62
Bengal (a)	76	24
Bihar and Orissa (b)	65	13
Assam	37	15
Ajmer-Merwara	33	11
North-West Frontier Province	16	3
Delhi	2	1
Hyderabad	3,602	534
Central India	1,007	135
Baroda	722	144
Gwalior	597	76
Rajputana	419	57
Mysore	88	10
Total	22,588	4,516

(a) Including Indian States

Note — A bale contains 400 lbs. of cleaned cotton

(b) Excluding certain feudatory states which report an area of 28,000 acres with a yield of 8,000 bales, as against 29,000 acres and 7,000 bales last year

The spinning of yarn is in a large degree centred in Bombay the mills of that province producing nearly 55 per cent of the quantity produced in British India. The United Provinces of Agra and Oudh and Madras produced about 19·4 per cent while Bengal and the Central Provinces produced 4·0 and 4·4 per cent. Elsewhere the production is as yet very limited.

BOMBAY ISLAND.

Here is a detailed statement of the quantity (in pounds) and the counts, or numbers, of yarn spun in Bombay island —

—	1928-29	1929-30	1930-31	1931-32	1932-33

* Year ending 31st August

† Does not include 31 Mills in course of erection

The Jute Industry.

Considering its present dimensions, the jute industry of Bengal is of very recent origin. The first jute mill in Bengal was started at Rishra in 1855, and the first power loom was introduced in 1859. The original outturn was 8 tons per day. In 1900 it had grown to 2,500 tons per day, it is now 4,000 tons per day, and it shows every indication of growing and expanding year by year. Another interesting thing about the jute industry of Bengal is that, although it is practically a monopoly of Scotsmen from Dundee, the industry itself owes its inception to an Englishman. The founder of the industry was George Acland, an Englishman, who began life as a midshipman in the navy, and was for some years in the East India Marine Service. He quitted this service while still a young man, and engaged in commercial pursuits in Ceylon, where he was successful. Later on he turned his attention to Bengal, and arriving in Calcutta about 1853 he got into touch with the management of the paper works, then at Serampore, where experiments were being tried with country grasses and fibre plants to improve the quality or cheapen the manufacture of paper. This seems to have suggested to Acland the manufacture of ree, and in 1854 he proceeded to England, with a view to obtaining machinery and capital in order to manufacture goods from that material. During this trip he visited Dundee, and while there Mr John Kerr, of Douglas Foundry, suggested to him the importing of machinery into Bengal "where the jute comes from and spin it there." This suggestion bore fruit, for shortly afterwards Acland placed orders with Kerr for a few systems of preparing and spinning machinery, and returned to India the same year accompanied by his two sons and a few Dundee mechanics who were to assist him in erecting and operating the first jute mill in Bengal. This, as has been stated, was at Rishra, the site of the present Wellington mills, near Serampore, and here, in 1855, the first machine spun jute yarns were made. As not infrequently happens the pioneer got very little out of his venture. After several ups and downs the Acland interest in the Rishra mill ceased in 1867, and the company which Acland had formed in 1854 was wound up in 1868.

Power-loom.—The pioneer's example was followed by Mr George Henderson of that silk firm, and in 1859 the Borneo Jute Co was launched under his auspices. To this company is due the credit of introducing the power-loom for jute cloth. Unhampered by the financial difficulties which had burdened the Aclands, the Borneo Jute Co made rapid progress, doubling their works in 1864, and clearing their capital twice over. In 1872 the mills were turned into a limited liability company, the present "Barnagore Jute Factory Co., Ltd." Four other mills followed in succession—Gouripore, Serajunge, and India Jute Mills.

"From 1868 to 1873," writes Mr David Wallace in "The Romance of Jute" "the five mills excepting the Rishra mill simply coined money and brought the total of their looms up to 1,250." To illustrate the prosperity of the industry at this period we may take the dividends paid by the Barnagore

Company. On the working of their first half year, a 15 per cent interim dividend was declared, which seemed to justify the enormous capital at which the company was taken over from the Borneo Company, and shares touched 68 per cent premium. The dividend for the first year, ending August 1873, was 25 per cent, for 1874, 20 per cent, and for 1875, 10 per cent. Then came a change. The investing public had forgotten the effect of the Port Canning bubble, and the condition of the jute industry in 1872-73 seeming to offer a better return than coal or tea, both of which had just enjoyed a boom, it was only necessary to issue a prospectus of a jute mill to have all the shares snapped up in the course of an afternoon.

In 1872-73 three new companies were floated locally—the Fort Gloster, Budge and Sibpore, and two Home companies, the Champdany and Samnugger, all of which commenced operations in 1874. In 1874-5 eight other mills were launched—the Howrah, Oriental (now Union), Asiatic (now Soorah), Clive, Bengal Pressing and Manufacturing Co (now the Bellinghatta-Barnagore branch mill), Rustomjee (now the Central) Ganget (registered in England), and Hastings, owned by Messrs Birmyre Bros., of Greenock fame—in all thirteen new companies, coming on all of a heap and swelling the total looms from 1,250 up to 3,500. This was too much of a strain for the new industry, and for the next ten years all the mills had a severe struggle. The older ones all survived the ordeal, but four of the new concerns—the Oriental, the Asiatic, the Bengal Pressing and Manufacturing Co and the Rustomjee—became moribund, to appear again later on under new names and management. Fort Gloster also suffered badly.

Between 1875 and 1882 only one new mill was put up. This was Kamarhatti, promoted by Messrs Jardine, Skinner & Co. which came into being in 1877, as the result of Dr Barry's visit to Calcutta in 1876, when he transferred the agency of the Gouripore Co from Messrs Jardine, Skinner & Co to his own firm. This mill, together with additions made by some of the other mills, brought the total looms up to 5,150 in 1882. By the end of 1885 the total was further augmented by the Hooghly, Titaghur, Victoria and Kanknarrah mills, bringing the number of looms at work up to 6,700. From this period on to 1894 no new mills came into existence except the Calcutta Twist Mill, with 2,460 spindles, since merged into the Wellington branch of the Champdany Co. Between 1896 and 1900 the following new mills were started—The Gordon Twist Mill with 1,800 spindles (now acquired by Anglo-India), Khardah, Gondolpara (French owned), Alliance, Aratboon, Anglo-India, Standard, National, Delta (which absorbed the Serajunge), and the Kinnison. A full of four years witnessed large extensions to the existing mills after which came the following series of new mills, besides further heavy extensions—Dalhousie, Alexandra, Naihati, Lawrence, Reliance, Belvedere, Auckland, Kelvin and Northbrook. The last decade has seen the construction of Hukumchand, Birla, Shree Hanuman, Gagalbhui, Premchand and Agapara Mills, which—with the exception of the last named—are under Indian ownership.

Progress of the Industry.

THE record of the jute industry may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for each year from 1917-18 up to 1926-27 and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100 —

	Number of mills at work	Authorised Capital (in lakhs of Rs)	Number (in thousands) of		
			Persons employed daily (average)	Looms	Spindles
Average—					
1879-80 to 1883-84	21 (100)	270.7 (100)	38.8 (100)	5.5 (100)	88 (100)
1884-85 to 1888-89	24 (114)	341.6 (126)	52.7 (136)	7 (127)	138.4 (157)
1889-90 to 1893-91	26 (121)	402.6 (149)	64.3 (166)	8.3 (151)	172.6 (196)
1894-95 to 1898-99	31 (148)	522.1 (193)	86.7 (223)	11.7 (213)	244.8 (278)
1899-1900 to 1903-04	36 (171)	680 (251)	114.2 (294)	16.2 (295)	334.6 (380)
1904-05 to 1908-09	46 (219)	960 (355)	165 (425)	24.8 (451)	510.5 (580)
1909-10 to 1913-14	60 (286)	1,209 (443)	208.4 (537)	33.5 (609)	691.8 (786)
1914-15 to 1918-19	73 (348)	1,403.6 (519)	259.3 (668)	39.7 (722)	821.2 (933)
1917-18	76 (362)	1,428.5 (528)	266 (686)	40.6 (738)	834 (948)
1918-19	76 (362)	1,477.2 (546)	275.5 (710)	40 (727)	839.9 (954)
1919-20	76 (362)	1,563.5 (579)	280.4 (723)	41.0 (745)	856.3 (973)
1920-21	77 (367)	1,923.5 (712)	288.4 (758)	41.6 (745)	860.9 (968)
1921-22	81 (386)	2,122.4 (784)	288.4 (743)	43.0 (782)	908.3 (1,032)
1922-23	86 (409)	2,324.7 (859)	321.2 (828)	47.5 (863)	1,003.1 (1,140)
1923-24	89 (424)	*2,385.8 (881)	330.4 (851)	49.0 (891)	1,043.4 (1,185)
1924-25	90 (424)	2,213.3 (818)	341.7 (881)	50.3 (914)	1,067.6 (1,213)
1925-26	90 (429)	2,134.7 (788)	331.3 (854)	50.5 (918)	1,063.7 (1,209)
1926-27	93 (443)	2,119.8 (783)	333.6 (860)	51.0 (927)	1,083.8 (1,231)
1927-28	93 (443)	*2,119.7 (783)	335.8 (865)	52.2 (949)	1,105.6 (1,256)
1928-29	95 (452)	*2,126.6 (785)	313.8 (886)	52.4 (953)	1,108.1 (1,259)
1929-30	98 (466)	2,186.6 (807)	343.2 (886)	53.9 (980)	1,140.4 (1,296)
1930-31	100 (476)	2,360.6 (872)	307.6 (793)	61.8 (1,123)	1,221.9 (1,392)

* Revised

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The value of jute manufactures exported by sea in 1924-25 was over thirty-three times as great as the average value of the export in the period 1879-80 to 1883-84 —

	Jute manufactures		Value in lakhs of Rs
	Gunny bags in millions of number	Gunny cloths in millions of yards	
1879-80 to 1883-84	54.0 (100)	4.4 (100)	124.9 (100)
1884-85 to 1888-89	77 (140)	15.4 (350)	162.9 (130)
1889-90 to 1893-91	111.5 (203)	41 (932)	239.3 (232)
1894-95 to 1898-99	171.2 (312)	192 (4,136)	518 (415)
1899-1900 to 1903-04	206.5 (376)	427.2 (9,709)	826.5 (662)
1904-05 to 1908-09	257.8 (469)	698 (15,864)	1,449.7 (1,154)
1909-10 to 1913-14	339.1 (618)	970 (22,045)	2,024.8 (1,621)
1914-15 to 1918-19	667.6 (1,216)	1,156 (26,273)	4,019.3 (3,218)
1919-20	342.7 (624)	1,275.1 (28,980)	5,001.5 (4,004)
1920-21	533.9 (987)	1,352.7 (33,800)	5,299.4 (4,273)
1921-22	386.7 (715)	1,120.5 (28,000)	2,999.5 (2,419)
1922-23	344.2 (637)	1,254.3 (31,350)	4,049.4 (3,265)
1923-24	413.7 (752)	1,348.7 (30,652)	4,228.3 (3,352)
1924-25	425.1 (774)	1,456.2 (33,095)	5,148.8 (4,122)
1925-26	425.0 (774)	1,461.3 (33,211)	5,752.1 (4,605)
1926-27	449.0 (818)	1,503.1 (34,161)	5,281.3 (4,222)
1927-28	463.1 (843)	1,552.7 (35,289)	5,321.8 (4,260)
1928-29	497.6 (906)	1,568.2 (35,640)	5,656.4 (4,528)
1929-30	522.3 (951)	1,650.5 (37,511)	5,158.7 (4,130)
1930-31	434.0 (790)	1,270.9 (28,884)	3,148.8 (2,521)
1931-32	388.5 (707)	1,021.0 (23,204)	2,138.6 (1,712)

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year although the increase was very much less than that in the case of manufactures. During the war years exports declined very considerably. The cessation of the war stimulated the export trade and in 1919-20 the export showed an increase, as compared with the average of the war quinquennium (1914-15 to 18-19). In the following two years, the export recorded a decrease and in 1922-23 they again made a recovery and amounted to 573,000 tons.

	Jute, raw, ton	
Average 1879-80 to 1883 84	375,000	(100)
„ 1884-85 to 1888-89	445,000	(119)

„ 1931-32	557,000	(157)

The total quantity of jute manufacture exported by sea from Calcutta during the year 1922-23 was 668,000 tons as against 639,000 tons in the preceding year and 603,500 tons in the pre-war year 1913-14. The value of these exports amounted to Rs 40,28 lakhs or an increase of Rs 10,36 lakhs over the preceding year and Rs 12,08 lakhs over the pre-war year. The shipments of gunny bags were valued at Rs 15,82 lakhs and of gunny cloth Rs 24,24 lakhs as against Rs 13,86 and Rs 15,92 lakhs respectively in the preceding year and Rs 12,48 and Rs 15,58 lakhs in the pre-war year.

The price of raw jute reached a very high point in 1906-07, the rate being Rs 65 per bale. In 1907-08 it dropped to Rs 42 per bale, and the fall was accentuated in 1908-09 and 1909-10, the price having declined to Rs 36 4 and Rs 31. In 1917-18 it dropped to Rs 38 8-0 but rose again in 1919-20 up to Rs 77-8-0. In 1920-21 it dropped to Rs 65 but rose again to Rs 86. It again declined to Rs 66 in 1921-22 the price rose to Rs 73 at the end of September, but

fell back again to Rs 70 at the end of November and recovered at Rs 64 at the close of the year.

Bihar and Orissa	148,800	170,000
Assam	99,300	127,400
Total	1,861,800	2,143,100

† Including Nepal

The Indian Jute Mills Association now one of the most important, if not the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started under the following circumstances —In 1886 the existing mills, finding that in spite of the constant opening up of new marks working results were not favourable, came to an agreement, with the late S E J. Clarke, Secretary to the Chamber of Commerce, as trustee, to work short time. The only mills which stood out of this arrangement were the Hooghly and Serajgunge. The first agreement, for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years between 4 days a week, 9 days a fortnight and 5 days a week. Besides short time, 10 per cent of the sacking looms were shut down for a short period in 1890. An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning power during the currency of the agreement, only a few exceptions being made in the case of a few incomplete new mills.

The present officials of the Association are —
Chairman —Mr H H Burn, M L C,
Members of Committee —

Mr Sheokissen Bhatler, Mr P S Macdonald, Mr S K Acott, Mr W A M Walker, M L C, Mr A Wilson, Mr D Wilson

Working days —With the introduction of the electric light into the mills in 1896, the

working day was increased to 15 hours, Saturdays included, which involved an additional amount of cleaning and repairing work on Sundays. In order to minimise this Sunday work and give them a free Sunday, an agitation was got up in 1897 by the Mill European assistants to have the engines stopped at 2 or 3 p.m. on Saturdays. The local Government took the matter up, but their action went no further than applying moral suasion, backed by a somewhat half-hearted threat. The Mill Association held meetings to consider the question and the members were practically agreed as to the utility of early closing on Saturdays, but, *more suo*, could not trust themselves to carry it out without legislation. Unfortunately the Government of India refused to sanction the passing of a Resolution by the provincial Government under the Factory Act and the matter was dropped. Only a year or two ago the Jute Mills Association in despair brought out an American business expert, Mr J H Parks, to advise them on the possibility of forming a jute trust with a view to exercising some control over the production and price of jute. Mr Parks came, and wrote a report which the Association promptly pigeon holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of jute.

The working agreements referred to above have been followed by others, differing in points of detail, but with the same object in view namely the restriction of production. During the past 10 years a policy of curtailment of output has been continuously in force. The mills in the membership of the Association,

comprising some 95 per cent of the trade, are at present working 10 hours per week, with 15 per cent of the total complement of looms closed, and the current agreement incorporates a clause which provides that the mills will not instal any extra productive machinery or relative buildings during the currency of the agreement, which will remain in force until three months notice of intention to alter the present working arrangements, or to terminate the agreement, has expired. In addition to this working arrangement, which as has been stated above applies only to the mills in the membership of the Association, there came into force with effect from 1st August 1912 an agreement with the five principal mills outside the Association, namely, Adamjee, Azarpara, Gagalbhai Jindlow and Shree Humnum, whereby these mills have undertaken to restrict their working hours to 54 per week up to 30th June 1913. With certain modifications this agreement has since been extended and is now a continuing agreement, subject to six months notice of termination being given by either party, but this notice cannot be given before the 1st July 1913. Five of the Association mills—Promchand, Crake, Waverley, Megna and Nudda—have also been granted the privilege of working 54 hours per week with a full complement of machinery.

An Association, styled the Calcutta Jute Dealers Association, has been formed in Calcutta to promote and to guard the common interests of its members as dealers in jute for local consumption. The members are bankers and brokers of jute for sale to the jute mills in and around Calcutta. The present Committee—Mr H A Tule, *Chairman*. Members—Mr D King, Mr H L Vinton, Mr G C Moon, Mr A C Robertson, Mr J W R Steven.

Effects of the War—The official review of the Trade of India in 1916-17 says—The value of the exports of raw jute increased in 1916-17 by nearly Rs 65 lakhs to Rs 1,020 lakhs. The quantity exported, however, was less than in the preceding year. The estimated yield of the crop was 12 per cent above that of the previous year, viz., 1,490,000 tons or 8,340,000 bales. Owing to the lack of tonnage and other abnormal circumstances brought about by the war, the quantity exported was 10 per cent below that of the previous year. Of the consumers the United Kingdom and Italy took less, while the United States, France (mainly via Dunkirk), Russia (via Vladivostok) and Brazil took greater quantities. There were, of course, no exports to enemy countries which took more than 27 per cent in the five years ending 1913-14, the pre-war year. The increase in the value accompanied by a decrease in the volume of exports was due to the very high range of prices during the months of September, October, November and December. Towards the close of the year under review prices steadily declined, and have since gone still lower.

Jute Manufactures—The value of the exports now approximates to Rs 42 crores. In spite of the war with its attendant difficulties of freight and finance, the exports of gunny cloth showed an increase of Rs 241 lakhs of which Rs 163 lakhs were due to higher prices and Rs 78 lakhs to an increase in the volume of exports. There were also an increase of Rs 118 lakhs in the value of gunny bags

exported. The number of bags shipped increased while the weight decreased, and bags for war purposes being lighter than the ordinary bags for transporting grain. Exports to Australia in 1916-17 were a record. The United Kingdom with Australia took more than half of the number of bags exported while the United States took more than half of the quantity of cloth exported.

There were 74 mills at work throughout the year with 41,292 looms and 86,739 spindles. The number of persons employed was 2,28,841. There were no difficulties as regards the supply of labour.

The number of gunny bags shipped from Calcutta during 1922-23 declined from 750 million bags to 732 million bags, but the value increased from Rs 17,87 lakhs to Rs 15,82 lakhs. Shipments of gunny cloth rose from 1,120 million yards to 1,251 million yards, valued at Rs 17,02 lakhs and Rs 21,21 lakhs respectively.

Hemp and Jute Substitutes

Experiments have been made during the last few years by the Agricultural Department of the Government of India with the Decan hemp plant (*Hibiscus cannabinus*), which yields a fibre very similar to jute. As a result, a new variety of the plant, known as Type 3, has been obtained, which it is now proposed to introduce into several parts of India, and, as a beginning, the variety is to be grown on a number of estates in Bihar. A sample of the fibre prepared from this variety by the usual methods of retting was 10 ft to 12 ft long, of an exceptionally light colour, well cleaned, and of good strength. It was valued at £15 per ton with Himliparum jute at £12 10s and Bengal first mark jute at £17 per ton. Decan hemp has been grown fairly extensively in Bombay, the Central Provinces, and Madras where it is used for ropes and cordage and also for the manufacture of a coarse sack cloth. A valuable feature of the plant is its suitability for cultivation in such parts of India as are not suitable for jute.

Prior to the war, the United Kingdom's requirements of hemp were mainly supplied by the following countries in order of importance—the Philippine Islands, New Zealand, India, Russia, Italy and Germany. The opinion appears to be held that the effect of the war will be to cause very considerable changes in the character of the fibre market. There will probably be labour difficulties, it is thought, in the preparation of the hemp crops of Russia and Hungary and it is not unlikely that the world will look to countries such as India for the supply of fibres which may be used as substitutes for the European varieties of hemp. There can be no doubt that one of the early effects of the war was to firm up hemp prices. As far as India in hemp is concerned, values were persistently depreciated during the first six months of 1914 owing to large stocks held, but the closure of the Russian hemp market on the outbreak of war resulted in a marked improvement in values, and there was a keen demand and a considerable rise in price. Exports from Calcutta during 1922-23 made a great recovery from the previous year. The quantity advanced by 37 per cent from 197,412 cwt to 269,487 cwt and the value from Rs 26.93 lakhs to Rs 36.68 lakhs.

THE WOOL INDUSTRY

Wool exported from India consists not only of wool grown in India itself, but of imports from foreign sources, these latter coming into India both by land and by sea. Imports by sea come chiefly from Persia, but a certain quantity from Persia also comes by land, while the main imports are from Afghanistan, Central Asia, Tibet and Nepal. Quetta, Shikarpur, Amritsar and Multan are the main collecting centres for wool received by land from Afghanistan and Persia, whence it is almost invariably railled to Karachi for subsequent export overseas.

Imports and Exports—A considerable amount of wool is imported annually from Tibet, and in normal years, from Afghanistan. Imports of raw wool in 1932-33 amounted to 7.2 million lbs valued at Rs 12 lakhs, showing a marked increase compared with the previous year. Australia was the largest supplier with 3 millions lbs and the United Kingdom sent 2.1 million lbs, thus ousting Persia from the second place.

Production in India—The production of wool in India is estimated at 60 million lbs, the estimate being arrived at from the available figures of the number of sheep in the country and their estimated yield per fleece, the average quantity of wool yielded per sheep per annum being taken at only 2 lbs.

All Indian wools are classed in the grade of carpet wools, and it is correct to say of perhaps fully half the breeds of sheep found on the plains of India that they yield a kind of hair rather than of wool. They are reared chiefly on account of the mutton, and the fleece has been generally regarded as of subsidiary interest. In many respects, in actual fact, the Indian plains sheep approximate more nearly to the accepted type of the goat rather than of the sheep. Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhound with tucked up belly, having some coarseness of form, the feet light, the limbs bony, sides flat and the tail short".

Mill manufacture—The number of mills in British India in 1930, the latest year for which details are available, was 12 of which five were

in the United Provinces. The paid up capital of these mills was Rs 68,28,576 and the number of looms and spindles was 1,447 and 69,293 respectively. The average number of persons employed daily in these mills was 4,240. There are no complete figures of production, the last year for which they are available being 1921 when the quantity of woollen goods produced was 3,820,879 lbs valued at Rs 1,17,90,396. As regards Indian States there are four woollen mills in Mysore which produced woollen goods of 2,700,201 lbs, in weight in 1930, the value being Rs 17,83,256. The bulk of the wool used by the Indian mills is Indian wool, although it is supplemented to some extent by the importation of merinos and cross breeds from Australia for the manufacture of the finer classes of goods. Their market for manufactured goods is almost entirely in India itself. Imports of woollen piecegoods in 1932-33 increased by over 8 million yards as compared with the preceding year, and even exceeded the imports of 1929-30 by about a million yards. Imports came chiefly from France, Italy, Japan and the United Kingdom. There was a considerable increase in the number of woollen shawls imported in 1932-33, Germany being the largest single source of supply. Imports of carpets and floor rugs declined to 188,000 lbs in 1932-33 from 267,000 lbs in 1931-32. The share of Persia in this trade receded considerably, but imports from the United Kingdom rose.

Blanket weaving and carpet manufacture are carried on in various parts of the country, notably in the Punjab and the United Provinces. Woollen pile carpets are made in many of the jails. Amritsar had a considerable trade at one time in weaving shawls from *pashm*, the fine under fleece of the Tibetan goat, but its place has been taken to some degree by the manufacture of shawls from imported worsted yarns, but more generally by the manufacture of carpets of a fine quality which find a ready sale in the world market. This work is done entirely on hand looms and the carpets fetch a high price.

Bibliography—Notes on wool in India. By A. H. Silver and J. K. Mehta, Govt Press, Calcutta, (1919).

Silk.

In the early days of the East India Company the Indian Silk trade prospered greatly, and various sub tropical races of the Silkworm were introduced. But the trade gradually declined for the following reasons —

In the seventeenth and eighteenth centuries India's chief competitor in the silk trade was the Levant Company. Successful efforts, however, were made to acclimatise in Europe one or two races of a temperate worm, procured from China and Japan. When sericulture became part of the agriculture of France and Italy, a quality of silk was produced entirely different from that of India and Turkey, and its appearance created a new demand and organized new markets.

All subsequent experience seems to have established the belief that the plains of India, or at all events of Bengal, are never likely to produce silk that could compete with this new industry. On the lower hills of Northern India, on the other hand, a fair amount of success has been attained with this (to India) new worm, as, for example, in Dehra Dun and Kashmir. In Manipur, it would appear probable that *Bombyx mori*, possibly obtained from China, has been reared for centuries. The caprice of fashion has, from time to time, powerfully modified the Indian silk trade. The special properties of the *Morah* silk were formerly much appreciated but the demand for them has now declined. This circumstance, together with defective systems of rearing and of hand-reeling and weaving, accounts largely for the present depression in the mulberry silk trade of India.

Mulberry-feeding worms—Sir George Watt states that in no other country does the necessity exist so pressingly as in India to treat the subject of silk and the silk industries under two sections, viz., Bombycidae, the domesticated or mulberry feeding silkworms, and Saturniidae, the wild or non-mulberry feeding worms. In India the mulberry worm (*Bombyx Mori*) has been systematically reared for many centuries, there being six chief forms of it. In the temperate tracts of India various forms of *Morus alba*, (the mulberry of the European silk-producing countries), are grown specially as food for the silkworm. This is the case in many parts of the plains of Northern India, Baluchistan, Afghanistan, Kashmir, and along the Himalaya at altitudes up to 11,000 feet. The other species even more largely grown for the Indian silkworm is *M. Indica* of which there are many distinctive varieties or races. This is the most common mulberry of Bengal and Assam as also of the Nilgiri hills.

India has three well known purely indigenous silkworms, the *tasar*, the *muga* and the *eri*. The first is widely distributed on the lower hills, more especially these of the great central tableland, and feeds on several jungle trees. The second is confined to Assam and Eastern Bengal, and feeds on a laurel. The third exists in a state of semi domestication, being reared on the castor-oil plant. From an art point of view the *muga* silk is the most interesting and attractive, and the cocoon can be reeled readily. The

eri Silk, on the other hand, is so extremely difficult to reel that it is nearly always carded and spun—an art which was practised in the Khasi Hills of Assam long before it was thought of in Europe.

Experiments and results—Numerous experiments have been made with a view to improving sericulture in India. French and other experts are agreed that one of the causes of the decline of the silk industry in India has been the prevalence of diseases and parasites among the worms, the most prevalent disease being pebrine. M. Lafont, who has conducted experiments in cross breeding, believes that improvement in the crops will be obtained as soon as the fight against pebrine and other diseases of the worms is taken up vigorously by the producers of seed and the rearers of worms, while improvement in the quality of the cocoons will be obtained by rearing various races, pure and cross breeds.

In Kashmir and Mysore satisfactory results have been obtained. In the former State sericulture has been fostered on approved European principles with Italian reeling machinery, seed being imported annually on a large scale. In 1897 in Mysore Mr. Tata, after selecting a plantation and site for rearing houses, sent to Japan for a Superintendent and trained operatives. The Mysore authorities have made a grant of Rs. 3,000 a year to the Tata farm in return for instruction given to the people of Mysore in Japanese methods of growing the mulberry and rearing the insects. The products of the Mysore State are exported to foreign countries from Madras. The work of the Salvation Army is also noteworthy in various parts of India. They have furnished experts, encouraged the planting of mulberry trees, and subsidised several silk schools. The draft prospectus has been issued of a silk farm and institute to be started at Simla under the auspices of the Salvation Army. The Lieutenant-Governor of the Punjab has permitted the school to be called after his name, and the Punjab Government made a grant of Rs. 2,000 towards the expenses. Sir Dorabji Tata has also made a donation of Rs. 1,000. The Bengal Silk Committee under the guidance of some French experts have conducted cross breeding experiments with a view to establish a multi voltine hybrid of European quality. There is a Government sericultural farm at Berhampore, where, it is said, a pure white multi-voltine of silk worm is reared. The results of the Bengal Committee's labours may be summed up as follows: the only really effective method of dealing with the problem is to work up gradually to a point at which the whole of the seed cocoon necessary for the province will be supplied to rearers under Government supervision, and to establish gradually a sufficient number of large nurseries throughout the silk districts of the province.

In 1915 there was issued by the Agricultural Research Institute, Pusa, a *Bulletin* (No. 48 of 1915) entitled "First Report on the Experiments carried out at Pusa to improve the Mulberry

Silk Industry—In a short Prefatory note Mr Bambridge Fletcher (Imperial Entomologist) explains that the object of the Bulletin is to place on record some of the more important experiments which were commenced at Pusa, in the year 1910 and have since been carried on in the endeavour to fix a superior multivoltine race of the Mulberry Silkworm which would not degenerate and which would yield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at present.

Central Nurseries—The report of the Agricultural Department, Bengal, for the year ending June 30, 1913, gives an account of a scheme which has been devised with the object of reclaiming the silk industry. The aim of the scheme is gradually to establish throughout the silk districts a sufficient number of central nurseries with rearing houses and thus enable the whole of the seed cocoons required in the province to be supplied under Government supervision. It is believed that this is the only really effective method of dealing with the problem. A number of the existing smaller nurseries were closed during 1913 and others are being converted into enlarged and improved central nurseries with rearing houses complete. The ultimate success of the scheme depends

largely on the willingness of the rearers to pay an adequate price for pure seed.

A pamphlet was published in 1915, by Mr M N De, Sericultural Assistant at Pusa, which contains practical hints on improved methods which are recommended to be used for reeling mulberry silk in Bengal and other silk producing districts. It has been found that, by the provision of two small pulleys to the ordinary Bengal type of reeling machine, superior thread can be obtained, the cost of the extra apparatus is merely nominal (five or six annas per machine) whilst the suitability of the machine for cottage workers is maintained. By attention to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pans, great improvements can be effected in most silk centres in Bengal and other districts.

Exports of Silk—As a result of the war the trade has shown in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by Rs 12 lakhs to Rs 27½ lakhs, of which raw silk accounted for Rs 24 lakhs. In 1916-17 the total exports rose to Rs 54½ lakhs. In 1932-33 exports of raw silk and silk manufactures amounted to Rs 318 lakhs in value, compared with Rs 334 lakhs in the previous year.

Indigo.

Indigo dyes are obtained from the Indigofera, a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, India having about 40. Western India may be described as the headquarters of the species, so far as India is concerned, 25 being peculiar to that Presidency. On the eastern side of India, in Bihar, Bengal, Assam and Burma, there is a marked decrease in the number of species but a visible increase in the prevalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the dyers of Holland, and it was the desire to obtain a more ample supply of dyestuff that led to the formation of the Dutch East India Company and so to the overthrow of the Portuguese supremacy in the East. Opposition to indigo in 17th century Europe was keen owing to its interference with the wool industry, but it was competition to obtain indigo from other sources than India that led to the first decline of the Indian indigo industry. In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had

been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India, and, as one of the many surprises of the industry, the province of Bengal was selected for this revival. It had no sooner been organised, however, than troubles next arose in Bengal itself through misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous *Memorandum* of 1837. This led to another migration of the industry from Lower and Eastern Bengal to Tirhut and the United Provinces. Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable dye. They first killed the madder dye of Europe, then the safflower, the lac and the *al* dyes of India, and are now advancing rapidly with synthetic indigo, intent on the complete annihilation of the natural dye. Opinions differ on many aspects of the present vicissitude, meantime the exports from India have seriously declined, and salvation admittedly lies in the path of cheaper production both in cultivation and manufacture. These issues are being vigorously faced and some progress has been accomplished, but the future of the industry

can scarcely help being described as of great uncertainty. The issue is not the advantage of new regulations of land tenure, but one exclusively of natural *versus* synthetic indigo. (See Watt's "Commercial Products of India") In this connection it may be noted that increases in the price of coal in England, due to labour difficulties, have greatly strengthened the position of natural indigo. In February 1915 a conference was held at Delhi when the possibility of assisting the natural indigo industry was considered from three points of view—agricultural, research and commercial. The agricultural or botanical side of the question is fully discussed by Mr and Mrs Howard of Pusa in Bulletins Nos 51 and 54 of the Agricultural Research Institute. Other aspects of the question have been fully examined in the Agricultural Journal of India by Mr W. A. Davis Indigo Research Chemist

to the Government of India. An Indigo Cess Bill was passed in the Imperial Legislative Council in 1918. It provides for a cess on indigo exported from India for the scientific investigation of the methods of cultivation and manufacture of indigo, the proceeds of the cess being received and expended by Government.

Decline of the Industry—Since synthetic indigo was put upon the market, in 1897, the natural indigo industry of India has declined very rapidly, apart from slight recoveries in 1906-07 and 1911-12, the decline continued without a break until the revival due to the impossibility of obtaining artificial dyes in sufficient quantities during the war.

Exports from India fell to 300 cwts in 1932-33 from 800 cwts in the previous year.

OILS AND OIL CAKES

Oilseeds ranked seventh among India's exports in 1932-33 and represented 8.54 per cent of the total value of exports. The total exports of oilseeds fell from 958,000 tons valued at Rs 14.59 lakhs in 1931-32 to 733,000 tons valued at Rs 11.31 lakhs. Details of oilseeds exported during 1932-33 appear in the section of the Year Book dealing with exports.

A pamphlet on the subject which was published by the Commercial Intelligence Department points out that it is both economically and industrially unsound for India to export her oil seeds instead of manufacturing the oils and oil cakes in India. It allows other countries to reap the manufacturers' profits and at the same time deprives Indian agriculture of the great potential wealth, as cattle-food and manure, contained in the oil cakes. An immense quantity of oil is, as a matter of fact, already manufactured in this country by more or less crude processes. Village oil mills worked by bullocks and presses worked by hand exist in all parts of the country and supply most of the local demand for oil. There has also been a great increase in recent years in the number of oil mills worked by steam or other mechanical power. These crush all the commoner oil seeds and development has been especially marked in the case of mustard oil, castor oil and groundnut oil. In spite of all this there has been a perceptible diminution in the export of oil from India, particularly of coconut oil and linseed oil, and an increase in the export of oil seeds, which is particularly marked in the case of copra and groundnuts. The situation created by the War has naturally led to too much discussion of the possibility of developing on a large scale the existing oil-milling industry in India.

There are three difficulties with which any proposal to develop in India an oil-milling industry on a great scale is faced. In the first place, there exist high protective tariffs in European countries which encourage the export from India of the raw material rather than the manufactured product. Secondly, there is a better market for the oil cake in Europe than in India and the freight on oil seeds is less than the freight on cake. Thirdly, it is much easier and less expensive to transport oil seeds by sea than it is to transport oil. While this has been the position in the European markets, Indian-made oils, other than coconut oil, have made enough headway in Eastern markets to suggest the possibility of a development of those markets.

The problem of finding a market for oil cakes is equally important. The value of oil cakes is much better appreciated in Europe than in India. The Indian cultivator is prejudiced against the use of machine-made cake as a cattle food or as manure because he considers that it contains less oil and therefore less nourishment than the village-made cake. He is therefore unwilling to buy it except at a reduced price. His prejudices on this point have no justification in fact since experts are agreed that mill cake is a better food for cattle than village-made cake. Even when the mill cake contains less oil than the village cake, there is still more oil in the cake than cattle can digest. The excess of oil in the village cake where it exists, is a drawback and not an advantage to the use of the cake as food. A considerable amount of demonstration work has been done by the Agricultural Departments of Government in order to remove the cultivator's prejudices and there is said now to be an increasing demand for most classes of mill cake.

Tea.

Among plantation crops in India tea is the most important. The indigenous tea plant growing in a wild condition was first discovered in Assam about 1820. It soon drew the attention of the East India Company, which after some enquiries started an experimental garden in 1835. After working for five years it was handed over to the Assam Company. It may be said, however, that the foundations of the present tea industry were laid between 1856 and 1859. Since the latter date the growth of the industry has been phenomenal and in less than a hundred years the British Empire has become the tea garden and tea shop of the world.

The following table shows the growth of the industry since 1875 —

Progress of the Industry

Year	Area under tea in 000 acres	Production in 000,000 lbs.	Year	Area under tea in 000 acres	Production in 000,000 lbs.
1875-79 (average)	173	34	1925	672	135
1880-84 "	241	57	1926	679	364
1885-89 "	307	90	1927	690	361
1900-1904 "	500	195	1928	702	372
1910	533	249	1929	712	401
1915	594	352	1930	802	391
1920	654	322	1931	807	394
			1932	807	411

It will be seen from the above table that during the last fifty years, while the area under tea has risen by over 300 per cent, the production has increased more than ten times.

Assam and Bengal are the two most important centres of the tea industry in India. Assam alone accounting for more than half the total production.

The following table shows the various centres of the industry in the country and their relative importance —

Provinces	Area under crop 000 acres	Production '000 lbs	Average daily working strength (permanent and temporary)
<i>Assam —</i>			
Surma Valley	115	73,784	156,489
Assam Valley	285	185,157	400,995
Total	430	258,941	557,484
<i>Bengal —</i>			
Darjeeling	61	23,000	65,522
Jalpaiguri	128	85,127	125,632
Cuttack	6	1,517	5,715
Total	195	109,633	196,869
<i>Madras —</i>			
Nilgiris	32	11,403	30,750
Malabar	13	6,493	12,832
Coimbatore	22	9,700	27,217
Others	*	34	41
Total	67	27,630	70,852
<i>Coorg</i>	*	160	620
<i>Punjab</i>	10	1,930	10,995
<i>United Provinces</i>	6	1,189	3,871
<i>Bihar and Orissa</i>	4	853	2,002
Total British India	712	400,965	843,623
Indian States	77	32,033	56,810
Total India	789	432,998	930,472

* Less than 500 acres

Although India produces such large quantities of tea its consumption of tea is comparatively very little, about 57 million lbs as compared with 421 million lbs in the United Kingdom and the consumption per head is only 18 lb as compared with 9.20 lbs in the United Kingdom. The low domestic consumption, however, enables India to export large quantities to other countries the principal among which is the United Kingdom. It is estimated that India supplies about 40 per cent of the world demand of this commodity. In 1932-33, 87 per cent of the total quantity of tea produced in India was exported abroad.

The year 1932-33 was one of the worst for the tea industry. In addition to the world-wide

depression, there was considerable over production with the result that producers of tea all over the world were faced with declining prices and accumulation of stocks. The preference granted to Empire teas did not prove sufficiently effective to check the consumption of cheap Java teas. Besides this there was only a small difference in the price of medium and common teas and there was thus no inducement to grow the former.

To check over production a scheme was therefore introduced to restrict production and to limit exports. A Bill giving legislative effect to the scheme was passed at the autumn session of the Legislative Assembly. The beneficial effects of this measure are already being seen.

The following table explains briefly the position as regards the *export of tea from India* —

Year	Amount exported (million of lbs)	Value in lakhs of rupees	Col 3 as percentage of value of total exports
1	2	3	4
1926-27	349	29.04	9
1927-28	362	32.48	10
1928-29	360	26.60	8
1929-30	377	26.01	8
1930-31	356	23.56	
1931-32	341	19.44	
1932-33	379	17.15	

The following figures show the proportion of exports of tea from India by sea sent to different parts of the world to the total exports —

	1928-29 per cent	1929-30 per cent
To United Kingdom	83.0	84.2
To Rest of Europe	2.0	2.2
To Asia	5.8	3.8
To America	5.7	5.8
To Australia	1.6	1.3
To Africa	1.9	2.7
	100	100

The following table gives the average wholesale prices of tea in Mincing Lane from 1922-30, in pence per lb —

Year	North India	South India
1922	15.46	14.00
1923	18.76	18.14
1924	19.92	19.02
1925	17.68	17.62
1926	19.36	19.00
1927	19.01	18.88
1928	16.49	15.40
1929	15.72	15.35
1930	14.69	14.52

A considerable quantity of Indian tea imported into the United Kingdom is normally re-exported to other foreign countries.

From 1923 to 1927 the prices obtained for tea were good, but in 1928 a decline set in, and in 1929 and 1930 prices fell further still. The price of Indian common tea particularly fell more than that of others. While as compared to 1923, all tea fluctuated in the London market within a range of 25 per cent, Indian common tea fell by about 50 per cent.

In 1932-33 the fall in tea prices was almost catastrophic. The average price of tea per lb realised at the Calcutta auction sales during 1922-3 was 5 as 2 p as against 6 as 5 p in 1931-32 and 9 as 4 p in 1930-31.

The following table shows the variations in the average prices of Indian tea sold at auction sales in Calcutta and the index numbers of these prices with base 1901-02 to 1910-11 = 100 —

	Average price at auction sales	
	Price per lb As p	Index Number
1901-02 to 1910-11	6.0	100
1927-28	14.10	247
1928-29	11.4	189
1929-30	9.11	165
1932-33	5.2	

The fall in tea prices greatly affected the profits of tea companies. The following table which shows the profit per acre of 65 tea companies gives an idea of the effect on profits of the fall, in prices —

Profit per Acre of 65 Indian Tea Companies

	1913	1924	1928	1929
Average profit per mature acre	£ 6-10-7	£ 15-2-0	£ 10-0-0	£ 6-9-0
Average profit in pence per lb	2 6	6 4	3 84	2 26
Average crop per mature acre	599 lbs	560 lbs	625 lbs	684 lbs

It is quite clear from the above table that although the yield per acre has considerably increased, the profits per acre are actually lower than in 1913.

The main reasons of the slump in the tea industry are over-production and intense competition, particularly from Java and Sumatra. In order to counteract the adverse influence of the former, an agreement to restrict output, was reached early in 1930 by associations of tea-growers. For India and Ceylon the degree of restriction to be undertaken varied according to the quality of the tea produced, being greater for the lower qualities than for the finer.

According to the latest agreement between the Indian, Ceylon and Netherlands East Indies produces, for five years from 1933 awards exports are to be restricted and extension of cultivation not to be permitted beyond 2 per cent of the present planted area.

During the year 1931-32 there was a considerable fall in the wages of workers on tea plantations. The average wages of men, women and children in the Assam Valley were Rs 12 8-5, 9 8-7 and 6 15 8, respectively, as compared with Rs 14 0 11, 10 12-7 and 7-4-7, respectively, in 1930-31. In the Surma Valley the average earnings fell from Rs 9 7-2 to Rs 7 14-11 in the case of men, Rs 7-10 5 to Rs 6 1-1 in the case of women and Rs 5 3 6 to Rs 4-9-1 in the case of children.

Under the Ottawa agreement Indian Tea has been granted preference by Great Britain.

The following are the important recommendations made by the Royal Commission on Indian Labour in regard to the Tea Industry. The recommendations contained therein are very vital to the future welfare of the industry and the principal amongst them have therefore been reproduced below —

(1) No further legislation making a breach of contract of service a criminal offence should be countenanced.

(2) The power conferred by section 3 of the Assam Labour and Emigration Act to prohibit recruitment in Assam in particular localities

should be withdrawn immediately and no barrier should be set up to prevent free movement of labour from one part of India to another.

(3) The Assam Labour and Emigration Act should be repealed and a new measure set up in its place.

(4) The Assam Labour Board should be abolished.

(5) The Government of India should appoint a Protector of Immigrants in Assam to look after the interests of emigrants from other Provinces who have not yet settled in Assam.

(6) Every future assisted emigrant to an Assam tea garden should have right after the first three years to be repatriated at the employers' expense.

(7) A worker dismissed before the expiry of the three years should be entitled to repatriation at the expense of the employer dismissing him, unless it is established that the dismissal was due to wilful misconduct.

(8) The establishment of statutory wage-fixing machinery, if practicable, is desirable, and there are reasons for believing that, if proper methods are adopted, a practicable scheme can be devised.

(9) Before legislation is undertaken, one enquiry should be undertaken as to the most suitable form of machinery, the actual rates paid and the variation in these rates between district and district and garden and garden.

(10) Maternity benefits should be provided for by legislation.

(11) The employment, either directly or with their parents, of children before the age of 10 years should be prohibited by law.

(12) Boards of Health and Welfare should be established under statute for convenient planting areas.

Some of the above recommendations have already been taken up by the Government of India for legislative or administrative action.

Coffee.

Such historical evidence as is available on the subject shows that coffee was first introduced into India from Mecca as early as the 16th Century. The first coffee garden was planted by a European about 1840 but the industry thus started did not flourish till 1860.

The production of coffee in India is mostly confined to the South. The area under coffee in 1930 (including plantations of less than 10 acres) was 1,63,000 acres, an increase of 14 per cent over the figures for 1925.

The total exports of coffee decreased from 2,05,000 cwts in 1925-26 to 1,50,000 cwts in

1926-27, but in 1927-28 there was a sharp rise to 2,77,000 cwts. In 1928-29 and 1929-30 the shipments again declined and amounted to 1,98,000 cwts and 1,84,000 cwts respectively. In 1932-33 the quantity exported was 17,000 cwts. The principal countries to which Indian coffee was exported were, as usual, the United Kingdom and France.

Not only does India export coffee in large quantities but it also imports it chiefly from Java, Ceylon and the Straits Settlements which it re-exports to Mesopotamian Territory, Iraq and the Bahrain Islands.

The following table gives the figures of the production and exports of Indian coffee —

Production and Export of Indian Coffee in thousands cwts

12 Months ending June 30th	Production	Export	Surplus available for Home consumption
1925	272 1	251 9	20 2
1928	317 5	260 9	56 5
1929	247 8	142 6	105 2
1930	352 0	243 0	109 0

Making allowance for the re-exports from India of imported coffee, the consumption of Coffee in India in 1930 was approaching four times the amount consumed in 1925.

The total production of cured coffee in India during the season 1931-32 was nearly 34 million lbs as compared with 33 million lbs during the previous season. Exports declined from 293,000 cwts in 1930-31 to 156,000 cwts in 1931-32. The pre-war, war and post-war averages were 255,000 cwts, 216,000 cwts, 226,000 cwts respectively. Local consumption of Indian coffee which has been expanding expanded still further owing to the restrictions on imported coffee. As regards exports, the United Kingdom and France which constitute the principal markets, both increased their respective off-takes very considerably and required 52,000 cwts and 54,000 cwts as against 44,000 cwts and 43,000 cwts respectively in 1931-32. The total value of the exports of coffee was 1,10 lakhs in 1932-33 as against Rs 94 lakhs in 1931-32.

The daily average number of persons employed in the coffee plantations in 1929-30 was returned

at 92,504 of whom 55,972 were permanently employed and 36,532 temporarily employed as compared with 94,865 persons (44,744 garden and 19,094 outside labour permanently employed and 31,027 temporary outside labour) in 1928-29.

The general trade depression did not fail to affect the coffee industry but in addition to the general slump in trade there was an additional factor which depressed coffee prices and this was the exceptionally heavy crops of Brazilian coffee. Since the year 1925 there has been a general downward trend in coffee prices but until the end of 1929 the fall was comparatively slow, but since then it has been very rapid. This will be clearly seen from the fact that while the average wholesale price of Indian coffee in London was 140s in 1923 and 127s in 1929 it fell to 86s in 1930.

The declared value per cwt of coffee was Rs 60 11-9 in 1931-32 as against Rs 65 8 1 in 1930-31. It rose to Rs 63 6-7 in 1932-33. The wholesale price in India per cwt in April 1933 was Rs 72 0 0.

INDIAN TOBACCO

The tobacco plant was introduced into India by the Portuguese about the year 1605. As in other parts of the world, it passed through a period of persecution, but its ultimate distribution over India is one of the numerous examples of the avidity with which advantageous new crops or appliances are adopted by the Indian agriculturist. Five or six species of *Nicotiana* are cultivated, but only two are found in India, namely, *N. Tabacum* and *N. rustica*. The former is a native of South or Central America, and is the common tobacco of India. About the year 1829 experiments were conducted by the East India Company towards improving the quality of leaf and perfecting the native methods of curing and manufacturing tobacco. These were often repeated, and gradually the industry became identified with three great centres—namely, (1) Eastern and Northern Bengal (more especially the District of Rangpur), (2) Madras, Trichinopoly, Dindigul, Coconada and Calicut in Southern India, and (3) Rangoon and Moulmein in Burma. Bengal is the chief tobacco growing Province, but little or no tobacco is manufactured there. The chief factories are near Dindigul in the Madras Presidency, though, owing to the imposition of heavy import duties on the foreign leaf used as a cigar wrapper, some cigar factories have been moved to the French territory of Pondicherry.

The question of improving the quality of Indian tobaccos has received the attention of the Botanical section of the Agricultural Research Institute, Pusa, and three Memoirs have been published recording the results of investigations in that direction. The immediate problem at Pusa is the production of a good cigarette tobacco. Many attempts have been made in the past to introduce into India the best varieties of cigarette tobacco from America, but the results have been disappointing. It is now hoped to build up by hybridization new kinds of tobacco suited to Indian conditions of growth, which possess in addition the qualities necessary to obtain a better price.

Area under Cultivation—The cultivation of tobacco is very widespread in Burma. The two main varieties are called "Burmese tobacco" and "Havana tobacco." Of the Burmese tobacco there are two main varieties "Seywet-gyi," the large-leaved variety and "Seywet-gyun," a smaller-leaved variety with

pointed leaves. The former yields a heavier crop, but the latter gives better quality. There is always a great demand on the market for both the Havana and the Burma tobacco. The smooth leaves of the Havana plant are used for the wrappers and the coarser Burmese leaf for the filling.

The most important tobacco tracts in British India are—(i) the Coimbatore and Dindigul tract of Madras, where the *Usi-Kappal* and *Wara Kappal* varieties are largely grown, the former supplying the Trichinopoly cigar, (ii) the Godavari Delta of Madras, (iii) the Rangpur tract of Bengal, (iv) the Districts of Bihar and Orissa, (v) Guzerat in Bombay and (vi) the delta tract of Burma.

The season for harvesting varies in different localities ranging from December to June, but the bulk of the crop is harvested during the months of February, March and April. The leaves when quite dry, are assorted and placed in heaps in stacks to ferment. They are then tied into bundles of 25 or 30, a useless leaf being employed for tying each bundle. The leaves are laid perfectly flat, the bundles being fan-shaped. In this condition they are baled, the broom-like ends projecting outwards. By varying the degree of fermentation of the leaves, different qualities of tobacco are obtained. A black variety is used in India for cake tobacco, and this is the most common product, but a certain amount of yellow leaf is grown for cigar making.

Exports—Exports of unmanufactured tobacco declined by 9 per cent in quantity from 28 million lbs. 1930-31 to 25.4 million lbs. in 1931-32 and by 17 per cent in value from Rs. 97 lakhs to Rs. 81 lakhs. In the United Kingdom, notwithstanding a reduced consumptive demand Indian tobacco gained public favour with the increasing popularity of Empire grown tobacco and the shipments advanced from 10 million lbs. to 11 million lbs. There were, however, decreases in the exports to Aden, the Straits Settlements and the Netherlands which fell by 1 million lbs. each to 4, 1¹ and 1 million lbs. respectively. An interesting development of the trade is the rapid increase in purchases by China which absorbed 3 million lbs. in 1931-32 as compared with 1 million lbs. in the preceding year, while Japanese requirements slightly declined to 3.7 million lbs.

The Cocaine Traffic.

The form of cocaine chiefly used in India is Cocaine Hydrochloride. This salt forms light shining crystals, with a bitterish taste, and is soluble in half its weight of water. The alkaloid cocaine—of which this is a salt—is obtained from the dried leaves of the Erythroxylon Cocaine which grows in Bolivia, Peru, Java, Brazil and other parts of South America. The leaves are most active when freshly dried and are much used by the Natives as a stimulant. Tea made from them has a taste similar to green tea and is said to be very effectual in keeping people awake. In India the Coca plant seems never to have been cultivated on a commercial scale. It has been grown experimentally in the tea districts of Ceylon, Bengal and Southern India and has been found to produce a good quality and quantity of cocaine. As the plant has not been seriously cultivated and as there is no possibility for the present of the drug being manufactured in India, no restrictions have as yet been placed on its cultivation.

Spread of the habit—The cocaine traffic in India which seems to be reaching in alarming proportion in spite of legislation and strict preventive measures is of comparatively recent growth, though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the illegal sale of cocaine in India has largely increased and the various provincial Excise Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of society and in Burma even school children are reported to be its victims, but in India as in Paris the drug is mostly used by prostitutes or by men as an aphrodisiac. The habit has spread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian intoxicating drugs.

Smuggling—So far as the cases already detected show, the persons who smuggle the drug by sea from Europe and places outside India, into India, are chiefly sailors, stewards, firemen and sometimes engineers and officers of foreign ships. The ports through which cocaine enters India are Bombay, Karachi, Calcutta, Madras, Marmagao and Pondicherry. The main inland distributing centres are Delhi, Lucknow, Meerut, Lahore, Mooltan, Surat and Ahmedabad. Delhi especially is notorious for the cocaine trade. Great ingenuity is employed in smuggling cocaine through the Custom houses. It is packed in parcels of

newspapers, books, toys and piece goods and in trunks which have secret compartments. The retail trade in the towns is very cunningly organized and controlled. In addition to the actual retailers, there is a whole army of watchmen and patrols whose duty is to shadow the Excise and Police officials and give the alarm when a raid is contemplated. During the War several cases of importation of Japanese cocaine were detected, the importers being Japanese and Chinese sailors. The original marks on the packets and phials are usually destroyed so that the name of the manufacturing firm may not be found out.

The Review of the Customs Administration in India for 1930-31 states that during the year a total of 17,345 grains of cocaine were seized by the Customs authorities, of which 1,792 ounces were valued at approximately Rs 1,80,000.

The amount seized is either given to Hospitals in India or destroyed. It is no longer possible to buy cocaine from any betelnut seller as it was ten years ago, but scores of cases in the Police Courts show that the retail trade thrives, though to a diminished extent, in Bombay. High profits ensure the continuance of the trade.

The Law in regard to Cocaine—This varies in different provinces. A summary of the law in Bombay is as follows. No cocaine can be imported except by a licensed dealer and importation by means of the post is entirely prohibited. The sale, possession, transport and export of cocaine are prohibited except under a license or permit from the Collector of the District. A duly qualified and licensed Medical practitioner is allowed to transport or remove 20 grains in the exercise of his profession, and as far as 6 grains may be possessed by any person if covered by a *bona fide* prescription from a duly qualified Medical practitioner. The maximum punishment for illegal sale, possession, transport, etc., under Act V of 1878 as amended by Act XII of 1912 is as follows. Imprisonment for a term which may extend to one year or fine which may extend to Rs 2,000 or both and on any subsequent conviction imprisonment for a term which may extend to 2 years or fine which may extend to Rs 4,000 or both. The law in Bombay has been further amended so as to enable security to be taken from persons who have been convicted of cocaine offences. The new Act also contains a section for the punishment of house owners who let their houses to habitual cocaine sellers.

The Opium Trade.

Mention opium and half the Western world directs its thought to India, as though India were a most unscrupulous producer of the most noxious drug on earth. Refer to the League of Nations' proceedings in regard to opium and again, mainly under the leadership of American representatives, one finds India and the Government of India held up to humanity as traffickers in opium and as thereby obstacles to making the world a better place to live in. In fact, neither India nor the Government of India has anything to be ashamed of in its opium history. Whatever may be the case in other countries, centuries of inherited experience have taught the people of India discretion in the use of the drug and its misuse is a negligible feature in Indian life. Abuse of its properties is rarer in India than the abuse of alcohol in Western countries. So much for the internal position.

The record as regards exports is equally clean. India has never driven hard bargains to secure the sale of the product overseas. Where it has been bought the reason is its superiority over other supplies, because of the stringent regulations by which its manufacture has always, under the British authorities, been regulated in India, in order to secure the purity and cleanliness of the finished product. Directly any importing country has expressed a desire to have the trade reduced, the Government of India have responded by stiffening their restrictions on export. There have, in recent years, mainly at the instance of America, been numerous International conferences with a view to making opium and drugs derived from it more difficult to obtain and in every case it has been found that India had already given the lead in the special regulations which it was proposed to lay down.

The China Trade—The classic case of Indian restriction of her export opium trade is provided by China. There is a long history of Indo-Chinese negotiations on the subject, but it is unnecessary to go further back into these than 1911. On 8th May of that year, there was drawn up between India and China an agreement under which the Government of India assented to (1) the payment of an import duty three times the existing amount in return for the promised abolition of provincial taxes, (2) the partial closure of China to Indian opium by provinces, including not only stoppage of transit passes, but also treaty port closure, Shanghai and Canton excepted, (3) the total extinction of trade before 1917 on proof of total cessation of opium production in China, and (4) revision of the agreement on due notice by either party. This agreement, as its terms indicate, was on the side of China the outcome of a professed desire to stamp out the opium trade and opium consumption in her midst. And on her side China, in the agreement, undertook, among other things, to reduce production in China *par passu* with the reduction of exports from India.

In addition to the limit to the China trade imposed by the agreement, the Government of India undertook in order to lessen the danger of smuggling into China, and as an earnest of their desire to assist that country, strictly to confine the remainder of Indian opium export

to the legitimate demands of the non-China markets. A figure was elaborately calculated for these markets and India drastically cut her non-China exports down to it in 1911. In subsequent years, she progressively reduced the permissible export limit and in 1913 she stopped exports to China altogether.

The financial sacrifice thereby undertaken by India in order to help the Chinese in their professed desire for reform amounted to many millions sterling a year. China never carried out her side of the bargain. She is still demonstrably the greatest opium producing country in the world and the only effect of the reduction, and eventual abolition, of imports from India is better trade for Chinese opium producers and merchants and largely increased imports of opium into China from Persia and Turkey.

Agreements observed by India—The Government of India have carried out to the letter their side of the 1911 agreement. They have gone further. Not only were exports to China stopped and exports to non-China countries in the East limited in accordance with the agreement with China, but exports to non-China countries have, on the voluntary initiative of India, been subjected to successive restraining agreements with the countries concerned. The Government of India introduced, with effect from 1st January 1923, a certificate system recommended by the League of Nations, whereby all exports of opium must be covered by certificates from the Government of the importing country that its consignment is approved and is required for legitimate purposes. The pressure exerted by the League of Nations in this regard was not pressure upon the Government of India but upon the Governments of the importing countries and, so far as India was concerned, the new system was welcomed because it removed from the shoulders of the Government of India all responsibility in regard to opium consumption in the importing countries and laid it upon their own respective Governments. In 1926, in order to fulfil the spirit of her international agreements, India decided, though she was in no way bound by their letter to do so, to reduce her exports to Far Eastern countries for other than medical and scientific purposes by 10 per cent yearly, so as to extinguish them altogether by December 1935, and effect has been given to that policy at considerable financial sacrifice. India is the only country that has made any considerable sacrifices of the kind.

International Aspect of the Problem—It was only during the processes and negotiations by which the Indian opium export trade to China was being suppressed that the Opium question began to assume a widely international aspect. This happened on the initiative of the U.S.A., at whose instance an International Opium Commission met at Shanghai in 1909 and formulated a series of recommendations for the suppression of opium smoking and the regulation of the use of opium and morphia. The United States thereafter advanced a further proposal for an International Conference at the Hague. This met on 1st December 1911, and finally drew up a convention on the subject, the terms of this document presented no new

iders to the Government of India. Their provisions India had long observed. As regards morphia and cocaine, with which the Hague Conference concerned itself, the uses of these drugs in India had long been subject to exceedingly strict regulations. But these two drugs, the use of which for other than medical purposes invariably takes the form of dangerous vice, were becoming a menace to the world. They were not included within the scope of the proposals submitted by the U.S.A. for the consideration of the Conference. It was mainly owing to pressure by the Government of India that they were included within the terms finally signed and the rigid and universal application of the articles of the Convention which apply to them would rid the world of the drug evil.

As regards prepared opium, that is to say smoking opium, India does not and never has exported it and the sale of it in India is prohibited. No opium is exported from India to the United States of America. None has been exported to Great Britain by private merchants since 1916. Exports to Great Britain are strictly limited to medicinal requirements and go officially from the Government of India to the British Government. Nor is Indian opium exported to any other country in Europe.

Indian Uses of Opium—There is a fundamental difference between the problem in India and that in foreign countries, particularly in America and Europe. America and Europe are principally concerned with the problem of the vicious consumption of cocaine and morphia and it is on the experience of the abuse of these drugs in those countries that much of the condemnation of Indian policy is based. It is accepted that the consumption of opium in America and Europe is in effect hardly less disastrous than that of morphia and cocaine. And the reason is that to Americans and Europeans opium is an unaccustomed drug. The habit of its use being both new and strange to them, it is never used to moderation but always abused, and the results have no relation to the result of moderate opium eating in India. The fact appears to be that peoples require a tolerance to drugs to the use of which they are long habituated. Opium has been used in India since the 16th century at least. The method of use is eating and in India, generally speaking, eating seems to do little, if any, harm. Smoking, which is the habit of the Far Eastern races, rather than of the Indian races, seems to do much more harm in India than eating, while on the other hand where smoking is in ordinary use competent authorities (e.g., the Royal Commission on opium in Malaya) think eating to be more harmful than smoking.

The Government of India have fully participated in the different International Conferences on the drug question and responded to the obligations which her assent to their conclusions has placed upon her in regard to home consumption. But the principal effect upon India of these International discussions has been to draw the fresh attention of her Government and people to the opium situation in her midst, to cause consultations on the subject between the Government of India and the Indian Legislature and to produce what may be described as considerable intelligent progress in the development of those regulations upon the use of opium which are time honoured

The Commission of 1895—Despite all this, the principles of Indian internal opium policy essentially remain, subject to certain changes of scientific opinion in regard to medicinal uses, those laid down by a Royal Commission which was appointed by His Majesty's Government, mainly as a result of the activities of the Society for the Suppression of the Opium Trade, in 1893, to inquire into all the circumstances connected with the production and sale of Indian opium. The Society which was largely instrumental in bringing about the institution of the inquiry, recorded its opinion that the appointment of the Commission constituted "the greatest and most solid forward step that the movement for the suppression of the opium trade has yet made" and considered that the Royal Commission was "as fair-minded and impartial a tribunal as the Society could have desired to hear its case." The results of the enquiry were published in 1895 in seven volumes.

The Royal Commissioners examined with the greatest care the problem of opium consumption in India and in brief they found that it was not only subject to careful regulation but was governed by longstanding and admirable disciplinary habits among the people. Excessive use, they found, was exceptional, and condemned by public opinion. As regards the legal restriction of its use to medical needs, they advised that Government could do no more than limit the extent of cultivation and hold a monopoly of manufacture and wholesale supply and that to draw a line in popular opinion between medical uses and those not strictly so describable would be impracticable. They agreed that the mass of Indian opinion was opposed to prohibition as an unnecessary restriction on individual liberty and interference with established customs and habits. Apart from the religious question they found Indians generally to consider the use of alcohol to be more objectionable, more injurious and more disgraceful.

"The Government of Lord Hardinge, in a Despatch to His Majesty's Government in 1911, and that of Lord Reading, in a despatch dated 24th March, 1921, both in the same words took their stand on the conclusion of the Royal Commission "that the opium habit as a vice scarcely exists in India; that opium is extensively used for non-medical and quasi-medical purposes, in some cases with benefit and for the most part without injurious consequences, that the non-medical uses are so interwoven with the medical uses that it would not be practicable to draw a distinction between them in the distribution and sale of the drug and that it is not necessary that the growth of the poppy and the manufacture and sale of opium in British India should be prohibited except for medical purposes." The despatch of Lord Hardinge's Government was approvingly quoted by Lord Reading's Government a few years ago. It has long been recognised that any attempt to eradicate by law the use of opium would be open to all the objections involved in bureaucratic interference with popular custom. Eating it is largely quasi-medical, it is used for the prevention, cure and alleviation of disease, as a prophylactic as an anodyne and as the commonest and most treasured household medicine of the people, to whom qualified medical assistance is inaccessible. It is also taken as a solace, as a tonic and as a

re torative to lessen or avert fatigue and in other ways in which, when moderately used, it is relatively innocuous

Present Policy—The current attitude and policy of the Government of India were lately explained in their behalf to the League of Nations at Geneva. Their representative declared that any genuine measure of reform initiated by a Provincial Minister in connection with it would receive encouragement and support from the Central Government and showed that the policy of that Government is, and has been, one of non-interference with the moderate use of raw opium, whether the object of the consumer be some real or supposed physical benefit or merely the indulgence of the almost universal desire of human beings, particularly those whose occupations involve exposure or severe bodily exertion, for a stimulant or narcotic. Excessive indulgence it is and always has been the desire of Government to express.

Opium is under the current Indian constitution a Provincial Transferred Subject. Nevertheless, owing to the jealous watching and criticism by observers in every continent, the Government of India called an official All-India Conference, which was opened at Simla by Lord Irwin, on 5th May 1930, to consider the question of certain areas where opium consumption was alleged to be unduly high. This followed on the prosecution of special provincial inquiries by committees set up by the Local Governments at the special instance of His Majesty's Government. The Conference, after an exhaustive discussion of the phenomena presented by the various areas selected for investigation, and in the light of the personal knowledge of the representatives of the different Provinces and of the reports of the local committees, concluded that it appeared that certain parts of Assam and Calcutta might correctly be regarded as having excessive consumption and that Orissa and the Ferozepore District of the Punjab might be held to provide cases for further inquiry. In other cases the Conference considered that there was no evidence of prevalent excess. But they gave a series of examples to show that there were simple explanations showing harmless causes for what appeared to be excessive consumption in many places.

While speaking at the Second Geneva Opium Conference on 19th January 1925, Lord Cecil stated that he had seen figures, apparently taken from a report made by the United States Treasury, to the effect that consumption was greater in America than in India. The estimate framed by the Advisory Committee of the League of the annual requirements of opium for strictly medicinal and scientific purposes is 600 milligrammes or 9.25 grains per capital which is roughly equivalent to 6 Indian seers per 10,000. The Health Committee of the League opined that this could be reduced to 450 milligrammes, or 6.94 grains in countries possessing a well developed medical service. The consumption per capita in British India during 1924-25 worked out at 17.2 grains per head. The rate of consumption has certainly fallen since the compilation of this published figure. The amount includes veterinary uses and these are extensive, though to secure statistics of the quantity of opium given to animals is impossible. Allowance also has to be made for the poor morphine con-

tent of Indian opium, which is about 9 per cent at 90 deg consistence, and the limited number of medical practitioners trained on Western lines to administer strictly measured doses. Lord Cecil's statement at the League of Nations was received with extreme criticism by Mr Porter of the American delegation. Mr Porter said the American statistics cited had been disavowed and that Lord Cecil's observations were a "vile slander upon the people of the United States." Lord Cecil apologised and withdrew his statement. But Mr Frederick Wallis, Commissioner of Correction, New York, writing in the Current History Magazine for February, 1925, showed the annual per capita consumption in Italy to be one grain, in Germany 2 grains, in England 3 grains, in France 4 grains and in the United States 36 grains. In "Current History" for March, 1925, Mr Wallis defended this last figure and said that in view of the smuggling into the United States "it would appear to me that the consumption would be much larger than the Government officially gave as 36 grains." It appears now to be recognised by all sane opinion throughout the world that India has the cleanest sheet if any in regard to opium control and export. Even the former ill informed sentimental attacks upon the Government in these respects have almost stopped.

Opium policy has on several occasions during the past few years come under discussion in the Central Indian Legislature and in regard to it the Government of India and the non-official members of the Legislature have been in accord. Cultivation of the poppy in British India is confined, except for a few wild and inaccessible regions, to the area that supplies the Government of India Factory at Ghazipur in the United Provinces where it can only be cultivated under license. Importation into British from the Indian States is controlled by prohibition of imports except on Government account and by agreement with the States concerned that they will not allow exports to British India except by arrangement. Cultivation in British India is progressively and rapidly being reduced. The sown area in British India which produced the crop of 1931-32 was 37,012 acres, i.e., 26.3 per cent of the area in 1922-23, and 20 per cent of that in 1912-13. The process of reduction was stayed in 1931-1932 because it was found that the rate before 1931 had been too rapid so that stocks were brought to a dangerously low level. Progressive and rapid reduction was resumed in 1933. The consumption of opium in the different provinces in India in 1932 is shown in the following table—

	lbs
Madras	62,568
Bombay (including Sind)	51,090
Bengal	64,135
United Provinces	39,880
Punjab	62,210
Burma	41,330
Bihar & Orissa	37,724
Central Provinces and Berar	26,446
Assam	30,512
Administered Areas (a)	14,445
Total for British India	4,28,340
Aden	90

(a) North West Frontier Province, Baluchistan, Ajmer-Merwara and Delhi

The population of British India according to the 1931 Census is 271,526,992, and the consumption per head in British India, excluding Aden, inclusive of the opium used for veterinary purposes but excluding that consumed for medicinal purposes was 11.04 grs. per head of the population. The population of Aden in 1931 was 50,809 and the opium consumption per head was 12.3 grs.

Close supervision is maintained over the licensed vendors in all parts of British India, the conditions of their licences require that the

shops shall always be open to inspection, that no opium shall be sold to children or bad characters, that sales shall only be made on the licensed premises and during the prescribed hours, that only unadulterated Government opium shall be sold, that credit shall not be allowed, that no consumption shall be permitted on the premises, that full accounts shall be maintained and that the names and addresses of purchasers of more than one or two tolas shall be recorded. These conditions are effectively enforced by the excise departments of the various provinces.

GLASS AND GLASSWARE

The total value of the imports of glass and glassware amounted to Rs. 1,121 lakhs as compared with Rs. 1,221 lakhs in 1931-32. Almost all the important descriptions under this head recorded improvements. Of the principal countries participating in this trade Japan retained the foremost position and the value of her supplies advanced to Rs. 65 lakhs in 1932-33 from Rs. 42 lakhs in 1931-32 and Rs. 55 lakhs in 1930-31.

Manufacture of Glass in India—Glass was manufactured in India in centuries before Christ and Pliny makes mention of "Indian Glass" as being of superior quality. As a result of recent archaeological explorations, a number of small crude glass vessels have been discovered indicative of the very primitive stage of the industry. But no further traces of ancient Indian Glass Industry as such survive, yet, it is certain that by the sixteenth century it was an established industry producing mainly bangles and small bottles. The quality of the material was inferior and the articles turned out were rough. Beyond this stage the industry had not progressed until the nineties of the last century. Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this line. Since then a number of concerns have been started, a number of them have failed. They mainly devote themselves to the manufacture of bangles and lampware side by side with bottle making on a small scale. This, therefore, is the criterion which determines the two well-defined classes of the industry in its present stage, (i) indigenous Cottage Industry and (ii) the modern Factory Industry.

(i) The indigenous Cottage Industry which is represented in all parts of the country, but has its chief centres in Ferozabad District of U. P., and Belgaum District, in the South, is mainly concerned with the manufacture of cheap bangles made from "glass cakes or blocks" made in larger factories. The industry is at present in a flourishing state and supplies nearly one third of the Indian demand for bangles. The quality has been improved by the discovery of new glazing processes and for the present the turnover in this line has gone up to 20 lakhs of rupees a year. But these bangles have now to face a very hard competition from Japan whose "silky" bangles are ousting the old type Indian ones.

(ii) The modern Factory type of organization of this industry is just in its infancy at

present. The existing factories mostly stop at producing glass cakes for bangles as in Ferozabad or simple kind of lampwares and bottles. There is one factory in the United Provinces which since 1929 has been manufacturing sheet glass. Artistic glassware is out of the question and the private capitalists who have to run their concerns mostly with commercial ends do not think it worth their while to spend money and labour on it. War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, etc., and in order to meet the Indian demand for them, new factories were started and old revived, which produced only cheap and simple kind of lampware and bottles on small scale. The total production of these Indian Glass Works has not been exactly estimated, but it is generally supposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware. There are a number of factories engaged in the production of lampware, of which two or three only produce bottle and carboys also. The chief centres for the former kind are Bombay, Jubbulpore, Allahabad, and Bijnor and Ambala, while bottles are only manufactured at Naini and Lahore, and recently at Calcutta.

During the later years of the war period, a number of Glass Works were opened in the Bombay Presidency and adjoining districts, local manufacture having been stimulated by the cessation of imports of German, Austrian and Belgian glass.

Causes of failure—Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventable causes, prominent among which were (1) Lack of enlightened management (2) Lack of proper commercial basis, as in some cases the proprietors had a number of other more larger concerns to look to (3) Bad selection of site. An ideal site for a Glass Factory would be determined by the (a) nearness of quartz and fire-clay, (b) nearness of fuel, and (c) by the nearness of market. At least two must be present. In some concerns, two were absent. (4) Specialisation was lacking, some factories in their initial stages trying to manufacture three or four different kinds of glassware simultaneously like lampware, bottles, and bangles, etc. (5) Paucity of sufficient fluid capital for initial expenses for machinery or other improvements or even in some cases for running the concern in the beginning.

But beyond these there are certain real and special causes that contributed to the failure of some of these and hinder the progress of the rest. Chief among them are (1) The Industry is in its infant stage and hence such failures are but incidental. (2) No expert guidance in this line, there is a lack of men and good literature. (3) Paucity of skilled labour of higher type.

The present Indian workmen in this line and blowers are few in number and illiterate. They, therefore, master the situation and are unamenable to management. (4) Heavy cost of good fuel, the works usually being situated where good sand and quartz can be obtained, and consequently, in most cases, at a great distance from the coal-fields. (5) To a certain extent, competition from Japan and European countries.

The Indian Industrial Commission say in their Report (Appendix E), viz "The Glass Industry, even in its simplest form is highly technical and can be efficiently carried on only by scientifically trained managers and expert workmen. The present stage has been reached by importing men, only partially equipped with the necessary qualifications, from Europe and Japan, and by sending Indian students abroad to pick up what knowledge they can. The glass industry is a closed trade and its secrets are carefully guarded, so that the latter method has not proved conspicuously successful."

HIDES, SKINS AND LEATHER

India's local manufactures of skins and leather have steadily increased in recent years. Previous to the outbreak of war, the trade in raw hides in this country was good, there was a large demand for hides, and prices ruled high. On the declaration of war, the trade which had up till then been brisk was seriously dislocated. Exports to enemy countries especially to the great emporium of Indian hides, Hamburg, were stopped, and exporters had to find new markets for the raw material. The raw hide business of India had up to that time been largely, if not quite entirely, in the hands of German firms or firms of German origin and Germany had the largest share of India's raw hides. In the four months before the outbreak of war she took 39 per cent of the total exports. In 1912-13 she took 32 per cent and in 1913-14, 35 per cent. Germany still takes the major share of India's raw hides while America takes the bulk of goat skin exports. Shipments of tanned hides go mostly to Great Britain.

The total value of the export trade was Rs 743 lakhs in 1932-33 compared with Rs 892 lakhs a year earlier.

Conditions of the Trade—The trade in hides and skins and the craft in leather manufacture are in the hands either of Mahomedans or of low caste Hindus, and are on that account participated in by a comparatively small community. The traffic is subject to considerable fluctuations concomitant with the vicissitudes of the seasons. In famine years for instance the exports of untanned hides rise to an abnormal figure. The traffic is also peculiarly affected by the difficulty of obtaining capital and by the religious objection which assigns it to a position of degradation and neglect. It has thus become a monopoly within a restricted community and suffers from the loss of competition and popular interest and favour.

Uses of Indian Hides—The fifteenth report of the Imperial Economic Committee states that Indian hides both raw and partially tanned, are largely used for the upper leather of boots, partially tanned skins are used for fancy leather articles, bookbinding and for covering the small rollers used in cotton mills for drawing the thread. Raw sheepskins are used for similar

articles and also for gloves. They are exported mostly to Germany, France and Italy. Raw goatskins are used almost entirely in the manufacture of glace kid, of which commodity the United States is the chief producer.

The chief markets for Indian raw hides are in Central and Southern Europe, Hamburg being an important distributing centre. Directly after the war an effort was made to direct more of this trade to the United Kingdom, but it has drifted back to Germany. The assortment and grading of raw hides exported from Calcutta before the war, largely the result of the work of German firms established there had reached a high standard. After the war the trade became somewhat disorganised from a variety of causes, among which may be cited fiscal changes, the entry into the trade of new and at first inexperienced firms, the increased cost of arranging for supervision at up country points. It has, however, been recovering its reputation.

Protecting the Industry—The report of the Industrial Commission pointed out that the principal difficulty at present in the hides and leather industry was the lack of organisation and expert skill. Government action to foster the industry was first taken in September 1919, when a Bill was introduced in the Imperial Legislative Council further to amend the Indian Tariff Act, 1894. The effect of this Bill was officially described as follows: "It is to impose an export duty of 15 per cent on hides and skins with a rebate of 10 per cent on hides and skins exported to other parts of the Empire, and there tanned. Its object is to ensure that our hides and skins shall be converted into fully tanned leather or articles of leather so far as possible in India and failing this in other parts of the Empire, instead of being exported in a raw state for manufacture in foreign countries." Sir George Barnes who was in charge of the Bill and described the tanning industry as one of the most promising Indian industries explained that "the present position is that we have in India at the present time some hundreds of tanneries for the tanning of hides, a large number of which have come into existence in order to satisfy military requirements during the war. We have in fact the foundations of a flourishing tanning industry, but there is reason to fear that it may tend to dwindle and disappear

with the diminution of military requirements, if some other support is not given. We want to keep this industry alive, and we believe that in this case protection in the shape of a 15 per cent export duty is justifiable and ought to be effective. It is clearly just also that the same measure of protection should be extended to the tanners of skins whose business, as I have already stated, was injured by the necessities of the war. Though Indian tanneries have enormously increased in number during the past three years, they can only deal with a comparatively small proportion of the raw hides and skins which India produces, and it is to the advantage of India and the security of the Empire generally that this large surplus should, so far as possible, be tanned within the Empire, and with this end in view the Bill

proposes a 10 per cent rebate in respect of hides and skins exported to any place within the Empire. I should add that it is proposed to limit by notification the benefit of this rebate to hides and skins actually tanned within the Empire and Indian hides and skins re-exported from an Empire port for the purpose of being tanned abroad will not be entitled to any rebate."

Indigenous methods—India possesses a large selection of excellent tanning materials such as *Acacia* pods and bark, Indian sumach, the Tanner's cassia, Mangroves, and Myrabolams. By these and such like materials and by various methods and contrivances, hides and skins are extensively cured and tanned and the leather worked up in response to an immense, though purely local, demand.

INDIAN INVENTIONS AND DESIGNS.

A handbook to the Patent Office in India which is published by the Government Press, Calcutta, gives the various Acts, rules, and instructions bearing on the subject together with hints for the preparation of specifications and drawings, hints for searchers and other valuable information that has not hitherto been readily accessible to the general public in so convenient a form. In the preface the Controller of Patents and Designs explains the scope of the Patent laws in India and indicates wherein they differ from English law and procedure.

The foundation of patent legislation throughout the world lies in the English "Statute of Monopolies" which was enacted in 1623, the 21st year of King James the First. In part this Act has been repealed, but the extant portion of the more important section 6 is as follows— "Provided also that any declaration before mentioned shall not extend to any letters patent and grants of privilege for the term of fourteen years or under, hereafter to be made of the sole working or making of any manner of new manufactures within this realm to the true and first inventor and inventors of such manufactures, which others at the time of making of such letters patent and grants shall not use, so as also they be not contrary to the law nor mischievous to the State by raising prices of commodities at home, or hurt of trade, or generally inconvenient, the said fourteen years to be accomplished from the date of the first letters patent or grants of such privilege hereafter to be made, but that the same shall be of such force as they should be if this Act had never been made, and of none other."

The existing Indian Patent Law is contained in the Indian Patents and Designs Act, 1911 as amended in 1930 and the Rules of 1933. The Patent Office does not deal with trade marks or with copyright generally in books, pictures, music and other matters which fall under the Indian Copyright Act III of 1914. There is, in fact, no provision of law in British India for the registration of Trade Marks which are protected under the Merchandise Marks Act, (IV of 1889) which forms Chapter XVIII of the Indian Penal Code.

On the whole, Indian law and procedure closely follow that in the United Kingdom for the protection of inventions and the registration of designs, as they always have done in matters of major interest. One main difference exists, however, as owing to the absence of provision of law for the registration of Trade Marks, India cannot become a party to the International Convention under which certain rights of priority are obtainable in other countries.

The first Indian Act for granting exclusive privileges to inventors was passed in 1856, after an agitation that had been carried on fitfully for some twenty years. Difficulties arising from an uncertainty as to the effect of the Royal Prerogative prevented earlier action, and, owing to some informalities the Act itself was repealed in the following year. In 1859 it was re-enacted with modifications, and in 1872 the Patterns and Designs Protection Act was passed. The protection of Inventions Act of 1883, dealing with exhibitions, followed, and then the Inventions and Designs Act of 1888. All these are now replaced by the present Act of 1911.

The existing Acts extend to the whole of British India, including British Baluchistan and the Santhal Parganas. This of course includes Burma, but it does not embrace the Native States. Of the latter Hyderabad (Deccan), Mysore, Gwalior, Baroda, Travancore, Marwar, Cochin, Kashmir and Jamu have ordinances of their own for which particulars must be obtained from the Government of the States in question as they are not administered by the Indian Patent Office in Calcutta. A patent granted in British India does not extend to the United Kingdom or to any other British Possession, but under the reciprocal arrangement an applicant for an Indian patent has 12 months priority in the United Kingdom, Australia, Canada, New Zealand, the Irish Free State, the Union of South Africa and Ceylon and *vice versa*. The object of the Act of 1911 was to provide a simpler more direct, and more effective procedure in regard both to the grant of patent rights and to their subsequent existence and operation. The changes made in the law need not here be referred to in detail. They

gave further protection both to the inventor by providing that his application should be kept secret until acceptance, and to the public, by increasing the facilities for opposition at an effective period. At the same time a Controller of Patents and Designs was established, with power to dispose of many matters previously referred to the Governor-General in Council and provision was made for the grant of a sealed "patent" instead of for the mere recognition of an "exclusive privilege". The provisions of the Act follow with the necessary modifications those of the British Inventions and Designs Act of 1907.

New Legislation—Part I (Patents) of the Act of 1911 has been further amended by Act VII of 1930 and includes the following—

If an Application comprises more than one invention the additional inventions may be made the subject matter of additional applications bearing the same date as the original application.

The term of the Patent will be 16 years instead of 14 years.

Patent of Addition will be granted on the original patent without the payment of additional renewal fees but the additional patent will expire with the date of the original patent.

Fresh provisions are made for the use of an invention by Government.

Government will grant licences to the public on application if the Patentee refuses to do so on reasonable terms.

Several other facilities are given under the Indian Amended Act of 1930 on the lines of the present British Patent Act.

The period of opposition to the grant of a patent has been extended to 4 months from the date of the notification of the "Acceptance" of the application, instead of 3 months. The provisions contained in the Indian Patents and Designs Rules, as regarded divisional applications in respect of inventions covered by the original application and divided therefrom, have been amplified and embodied in the Act itself. Section 10 has been amended to empower the Controller to decide disputes about proceeding with the applications for patents, that may occur between the applicants and third parties, or between joint applicants among themselves.

The time for appeal to the Governor General in Council has been extended to 3 months, instead of 2 months from the date of the decision appealed against. A new Section 21A has been provided relating to secret patents. A new Section 35A has been provided for giving relief in suits for infringement of patents in respect of valid claim, despite the existence of invalid claims in the specification.

The definition has been altered as to the person entered on the Register as the grantee or proprietor of the patent. Section 78A (4) has been amended to enable British India to enter into reciprocal arrangement with the Indian States.

The definition of the term "Design" has been altered and the time for applying to secure for the registration in India, the priority date of the application in the United Kingdom or other parts of the British Empire, has been extended to 6 months.

Printed Specification of applications for patents, which have been accepted (One Rupee per copy), may be seen free of charge, together with other publications of the Patent Office at the following places—

Note—The quinquennial average figures are inserted only for comparative purposes. The progressive total of additions to stock (Item 9) and net progressive absorption (Item 10) are calculated on the annual figures and are not based on these averages. Item 9 is the sum of the yearly figures in Item 5 and Item 10 the sum of the yearly figures in Item 8.

(a) Excludes gold imported and exported on behalf of the Bank of England

(b) Figures are for calendar year ending 31st December

* Net exports

According to the report by Mr N Mukarji Actuary to the Government of India, contained in the Indian Insurance Year Book, 1932, the number of companies subject to the provisions of the Indian Life Assurance Companies Act of 1912 and the Indian Insurance Companies Act of 1928 is 282 of which 136 companies are constituted in India and 146 companies are constituted outside India. Of the 136 Indian companies, 60 are established in the Bombay Presidency, 25 in Bengal, 21 in the Madras Presidency, 14 in the Punjab, 8 in Delhi, 2 each in the Central Provinces, Ajmer and Burma and 1 each in Burma and the U P. Of the 146 non-Indian companies 71 are constituted in the United Kingdom, 31 in the British Dominions and Colonies, 18 in the Continent of Europe, 12 in the United States of America, 9 in Japan and 5 in Java.

Most of the Indian companies carry on life assurance business only. They are 103 in number and of the remaining 33 Indian companies, 20 carry on life business along with other insurance business and 13 carry on insurance business other than life.

Besides the Indian life offices, there are some pension funds, mostly connected with Government offices, which are exempt from the operation of the Act and the Indian Post Office Insurance Fund is also exempt. As regards non-Indian companies, most of them carry on insurance business other than life. Out of the total number of 146 non-Indian companies, 122 carry on insurance business other than life, 10 carry on life business only and 14 carry on life business along with other insurance business. Of the latter 24 companies, 16 are constituted in the United Kingdom, 6 in the British Dominions and Colonies and 1 each in Germany and Switzerland.

The total new life assurance business effected in India during 1931 amounted to 125,099 policies assuring a sum of nearly 267 crores and yielding a premium income of 13 crores, of which the new business done by Indian companies amounted to 97,099 policies assuring a sum of 17 crores and having a premium income of 7 crores. The share of the British companies in respect of new sums assured is 3½ crores of the Dominion and Colonial companies about 6 crores and of the single German company ½ crore.

The average sum assured under the new policies issued by Indian companies is Rs. 1,764 and under those issued by non-Indian companies Rs. 3,499.

The total life assurance business effected in India and remaining in force at the end of 1931 amounted to 714,600 policies assuring a total

sum of 168 crores including reversionary bonus additions and having a premium income of very nearly 81 crores. Of this the share of Indian companies is represented by 502,000 policies assuring a sum of 91 crores and having a premium income of 11 crores.

Most of the Indian companies now transact life assurance business on the scientific principle but there are still some which carry on business on the **dividing plan** under which the sum assured is not fixed but depends on the division of a portion of each year's premium income amongst the claims arising in that year. The Government of India Actuary says in his latest annual report that the main defect of dividing insurance business is that policy holders in each class are charged the same rate of premium of subscription irrespective of their age on admission ranging even in some cases from 18 to 60 years. "Business of this nature is not only unsound but is apt to lend itself to the practice of fraud on the part of policy-holders and agents and later on by the company. It has been declared to be the cause of insurance enterprise in India." Before the Act of 1912 was passed there were numerous companies which transacted life assurance business on the dividing plan and most of them came to grief. Of such companies which were in existence at the time of the passing of the Act the majority have disappeared and some have stopped issuing policies on the dividing plan. A few new companies have taken up this dividing insurance business and it will not be long before they realise their mistake.

Some Indian life offices have extended their operations outside India, mostly in British East Africa and in the Near East. The total new sums assured by these offices outside India in 1931 amounted to 66 lakhs yielding a premium income of 4 lakhs and the total sum assured including reversionary bonus additions in force at the end of 1931 amounted to 4 crores, having a premium income of 2½ lakhs.

The total new annuity business effected during 1931 was for the amount of about 2 lakhs per annum, which was equally shared by Indian and non-Indian companies. The total annuity business remaining in force at the end of the year was for the amount of 3½ lakhs per annum of which the amount payable by Indian companies was a little over 1½ lakhs per annum.

The life assurance business of Indian companies which steadily increased during 11 years up to 1929 received a setback in 1930 owing to the general financial depression. The following table shows the new business effected since 1921 in each year and the total business remaining in force at the end of the year.

Year	No. business written during the year	Total business remaining in force at the end of the year
1921	5,47 lakhs	31 lakhs
1922	5,64 "	37 "
1923	5,85 "	40 "
1924	6,89 "	45 "
1925	8,15 "	50 "
1926	10,35 "	55 "
1927	12,77 "	60 "
1928	15,41 "	65 "
1929	17,29 "	70 "
1930	16,50 "	75 "
1931	17,76 "	80 "

A large portion of the new business transacted by the younger and less firmly established companies lapsed within a short time and the growth of total business in their case is not commensurate with the volume of new business transacted in each year. The total business which lapsed during 1931 was 7½ crores and was over 10 per cent of the total new business.

The net income of the Indian companies under their life insurance business from premiums and interest amounted to 5½ crores in 1931 and was in excess of 2 crores over the corresponding income of the previous year. Claims amounted to 1½ crores and exceeded the previous year figure by 12 lakhs. Claims by death showed an increase of 5 lakhs and

claims by curcivancy an increase of 7 lakhs, respectively.

The life insurance funds increased by nearly 2 crores during 1931 and amounted to 22½ crores at the end of that year. The average rate of interest earned on the life funds during the year was a little less than 5½ per cent.

The Post Office Insurance Fund was instituted by the Government of India in 1882 for the benefit of the postal employees, but gradually addition to it has been thrown open to almost all classes of Government servants who are employed on civil duties. The following are some of the important particulars relating to the business of the Fund during the four years 1929 to 1932—

Year ending 31st March	New business effected during the year		Total business remaining in force at the end of the year		Total income	Life Assurance fund at the end of the year
	Number of policies	Total sums assured	Number of policies	Total sums assured and bonuses		
1929	7,582	1,43,41,000	61,471	13,02,47,000	63,17,000	3,61,11,000
1930	8,891	1,49,56,000	71,470	14,17,81,000	69,36,000	1,02,80,000
1931	9,710	1,50,38,000	79,058	15,37,85,000	76,05,000	4,16,16,000
1932	6,481	98,15,000	83,165	15,88,89,000	81,09,000	4,91,47,000

Fire, Marine and Miscellaneous Insurance Business.—The net Indian premium income of all companies under insurance business other than life insurance during 1931 was 2½ crores of which the Indian companies share was 2½ crores and that of the non Indian companies 1½ crores. The total amount is composed of—

1,28 lakhs from fire

43 lakhs from marine, and

77 lakhs from miscellaneous insurance business

The Indian companies received—

28 lakhs from fire,

7 lakhs from marine and

21 lakhs from miscellaneous insurance business.

The total assets of Indian companies amount to 29 crores of which stock exchange securities form the bulk. These securities are shown in the account at a net value of 20½ crores. Mortgage loans on policies and on stocks and shares are shown at 4 crores. Land and house property are valued at 1½ crores, deposits, cash and stamps, are shown at 2½ crores, accrued interest at 1½ crores, agents' balances and other outstanding items at 1½ crores, and loans on personal security and other miscellaneous assets at 1½ crores. Investments of Indian companies outside India consist mainly of stock exchange securities and amount to 2½ crores.

Customs Tariff.

General import duties are levied for fiscal purposes and not for the protection of Indian industries. Any duties imposed for protective purposes are on the recommendations of the Tariff Board, as accepted or amended by Government. Under the terms of the Ottawa Agreement a large range of British and Colonial goods received a preferential rate of duty from January 1, 1933. But this tariff has been modified with a view to admitting free or at favourable rates articles, the cheap import of which was considered necessary in the interests of the country. Thus certain raw materials, minerals, agricultural implements and dairy appliances are admitted free. Machinery, printing materials, etc., are assessed at 10 per cent and iron and steel railway material and ships at 15 per cent.

Re Imports—Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re import exempted from duty on the following conditions—

The Collector of Customs must be satisfied—

- (1) of the identity of the articles,
- (2) that no drawback of duty was paid on their export,
- (3) that the ownership has not changed between the time of re export and subsequent re import,
- (4) that they are private personal property re-imported for personal use, not mere merchandise for sale,
- (5) that not more than three years have passed since they were re exported.

Duty is, however, charged on the cost of alterations, additions, renovations and repairs, involving the substitution of new parts, done to the articles while abroad, which should be declared by the person re importing the articles in a form which will be supplied to him at the time of re importation.

To facilitate identification on re importation an export certificate giving the necessary particulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examination.

This concession of free entry on re importation is not extended for the benefit of Companies or Corporate Bodies.

Drawbacks—When any goods, capable of being easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eighths of such duties shall, except as otherwise hereinafter provided, be repaid as drawback.

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended

term as the Chief Customs Authority, or Chief Customs Officer on sufficient cause being shown in any case determines, provided further that the Chief Customs Officer shall not extend the term to a period exceeding 3 years.

When any goods, having been charged with Import duty at one Customs port and thence exported to another, are re exported by sea as aforesaid, drawback shall be allowed on such goods as if they had been so re exported from the former port.

Provided that, in every such case, the goods be identified to the satisfaction of the Officer in Charge of the Custom House at the port of final exportation, and that such final exportation be made within three years from the date on which they were first imported into British India.

No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re export.

No such payment of drawback shall be made until the vessel carrying the goods has put out to sea, or unless payment be demanded within six months from the date of entry for shipment.

Every person, or his duly authorised agent, claiming drawback on any goods duly exported, shall make and subscribe a declaration that such goods have been actually exported, and have not been re landed and are not intended to be re landed at any Customs port, and that such person was at the time of entry outwards and shipment, and continues to be, entitled to drawback thereon.

Merchandise Marks—Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relating to merchandise marks. In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1880, and connected Acts and the notifications issued thereunder. The following summary of the regulations in force does not claim to be exhaustive. For those seeking more complete information a reference is suggested to the Merchandise Marks Manual which is published under the authority of the Government of India and obtainable of all agents for the sale of Indian Government publications.

Infringements or offences may be classified conveniently under four heads—

- 1 Counterfeit trade marks,
- 2 Trade descriptions that are false in respect of the country of origin,
- 3 Trade descriptions that are false in other respects, and
- 4 Lengths not properly stamped on piece-goods.

NOTE 1.—In the expression "*ad valorem*" used in these Schedules the reference is to "real value" as defined in Section 30 of the Sea Customs Act, 1878 (VIII of 1878), unless an article has a tariff value assigned to it.

NOTE 2.—Tariff-valued heads are based on the ordinary trade description of each article and cover all reduced grades and mixtures unless they are separately provided for.

NOTE 3.—In this publication, the expression "standard rate of duty" means, in the case of articles included in Parts VIII and IX of the Statutory Tariff, the standard rate of duty as opposed to the preferential rate, and, in the case of other articles, the ordinary rate of duty including surcharges, if any.

(The following details of the Indian Customs Tariff are published by courtesy of the Government of India.)

(ii) apparatus for wireless reception incorporated in a single unit with transmitting apparatus

(iii) wireless transmission apparatus and component parts thereof

Provided that nothing shall be deemed to be a component part of apparatus for wireless telegraphy or telephony for the purpose of this exemption unless it is essential for the working of such apparatus and has been given for that purpose some special shape or quality that would not be essential for its use for any other purpose

+ Under Government of India, Finance Department (Central Revenue), Notification No 14, dated the 9th April 1932, telegraphic instruments and apparatus and parts thereof imported for supply from bond for use of a Railway Administration are liable to duty at 15½ per cent *ad valorem*, provided that, (i) at the time of delivering the bill of entry for warehousing a declaration is made thereon by the importer to the effect that the goods have been imported for supply from bond for the use of a Railway Administration, and (ii) a certificate from an Officer of the Railway Administration, duly empowered in that behalf by the Agent, is produced along with the application for clearance out of bond that the goods in question are not merely guaranteed stock, but will be definitely appropriated for the use of such Railway on clearance from bond

Finance.

The gradual evolution of the present financial organisation of India is in many respects a reflection of her constitutional development. Those who take a broad view of the history of Federal States—and by whatever name it may be called India must in its political structure be a Federal State—nothing is more impressive than the ebb and flow in what may be called the adjustment of Federal and State rights. There is a constant mutation in the powers of the central government and the federal components, though in India we use the terms "Government of India" and "Provincial Governments" to describe them. In the earliest days of British rule, the Provinces, and especially the older Presidencies, were for all practical purposes independent of the central government and responsible only to the authority sitting in London. After the middle of the nineteenth century the process was reversed, and the Government of India was all-powerful, controlling the Provinces down to the smallest items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon, who was so jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found too heavy in the days of his successors, and a continuous process of devolution set in. In the matter of finance the measures took the form of long-term "contracts" with the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing the dual authority and responsibility which had clogged progress. A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed. Here, for all practical reasons, Provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own financial houses. The reservation arose from the circumstance that the funds of the Government of India did not then permit them to do entirely without contributions from the Provinces. These contributions were fixed in the shape of definite sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in cash. They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient, to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its revenues to the point when they would balance without drawing from the Provinces. They were an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted. They finally disappeared from the Budget in 1928-29.

But this did not end the discussion. Indeed it was only the first phase. A large issue remains, and despite the extinction of the Provincial contributions the finances of some of the Provinces are in an unsatisfactory state. Broadly the issue may be put in this way. The Government of India has taken the growing heads of revenue those which issue from taxes on income and customs. The Provinces are left with resources which are either almost static, like land revenue, or which are actually declining, as with excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition. At the same time the Provinces are confronted with the great growing sources of expenditure, like those on education and sanitation which bulk largely in Provincial budgets. The burden is heaviest in the industrial provinces, such as Bombay and Bengal. The standard of living is high, wages and costs are a good deal above those of the agricultural provinces. This means an expensive administration. On the other hand the industrial progress which induces this costlier administration pours all its taxable product into the coffers of the Government of India. Rules made to give Bombay and Bengal some share in the Income Tax receipts have been inoperative in practice. Whilst therefore relief is felt at the abolition of the Provincial Contributions under the 1919 settlement, it is felt that this does not go far enough, and there is still this pressure for some share in the revenues from the taxes on income which, it is believed, alone can put the industrial Provinces on a satisfactory basis.

A Review

The financial organisation was, of course, reviewed as part of the work of the Round Table Conference. A sub-committee of the Federal Structure Committee was appointed under the chairmanship of Lord Peel to examine the question of federal finance and the principles embodied in the sub-committee's report were endorsed by the parent Committee as a suitable basis. A Federal Finance Committee with Lord Eustace Percy as Chairman was appointed at the end of 1931 to subject to the test of figures, the suggested classification of revenues by the Peel Committee and to estimate the probable financial position of the Federal and of the Provincial Governments under the proposed scheme. In the course of their report the Federal Finance Committee said that the transfer to the Provinces of taxes on income though defensible in principle would leave the Centre in deficit. Therefore the Peel Committee suggested a method of transferring to each Province a percentage of the share of income tax estimated to be attributable to it. But in view of the incomplete data on which the estimates were made a special review is said to be necessary at the time federation is established in order to fix the initial percentages. A strict allocation on a percentage basis would still leave some Provinces in deficit and so as to right their finances the committee suggested spreading the charge over the other Provinces by giving them back less in income tax than they were entitled to.

Regarding possible new sources of revenue, Federal or Provincial the Federal Finance Committee reported is follows —

Federal

Excise on Tobacco—The present position in regard to this tax appears to be that a substantial revenue may be expected from a system of vend licenses and fees, but that an excise duty imposed in the near future could not be relied on to yield a substantial revenue. There is general agreement that such a duty could not be imposed on the cultivator, and it is doubtful whether a duty on the manufactured product could be successful while manufacture continues to be so largely carried on in small establishments and even as a domestic industry. Vend licenses and fees can obviously be imposed only by the Governments of the Units and their imposition by the Provincial Governments is now being encouraged by the Government of India. The difficulties in the way of a federal excise may be overcome in course of time, but it would be unsafe for us to rely on this in the near future.

Excise on Matches—The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplating the existence of such a duty from the outset of federation. We are advised that the probable net yield of the tax for all India at a reasonable rate, with due allowance for reduced consumption, would be about 3 crores, of which at least 2.50 crores would be raised in British India.

Other Excises—It is possible that other excise duties may occupy an important place in the fiscal Policy of India in the future, but we do not feel warranted in relying upon the introduction of such measures in the early years of federation.

Monopolies—We have examined the suggestion, made at the Round Table Conference, that federal revenues should be augmented by a few selected monopolies. From the fiscal point of view it is only in very special circumstances that a monopoly, whether of production, manufacture or sale, is to be preferred to an excise duty as a means of raising revenue. Except in so far as the proposals already noticed in regard to tobacco may be regarded as a monopoly, we can suggest no new commodity to which the monopoly method could be applied with advantage. The manufacture of arms and explosives, which has been suggested as a possible monopoly, is already subject to license. Public utility monopolies stand on rather a different footing, but the only new federal monopoly of this kind that has been suggested to us is broadcasting, the revenue from which must be entirely problematical.

Commercial Stamps—In the Peel Report it was observed that "There is much to be said for federalising Commercial Stamps on the lines of various proposals made in the past, but no definite recommendation was made. We have examined this suggestion, but on the whole we cannot recommend it, at least as an immediate measure.

The yield of certain stamp duties which might be placed in this category was, in 1930-31, slightly more than one crore. This was a

sub normal year, and the normal yield should be somewhat higher. In 1929-31 about 40 per cent of the yield was received by Bombay (one eighth of this being attributable to Sind), 27 per cent by Bengal and 12 per cent by Madras. The loss of revenue resulting from the federalisation of these duties would therefore be unevenly distributed and their federalisation would not ease the problem of distributing income tax.

Further, there are obvious difficulties in the way of separating stamp duties into two classes, commercial and non-commercial. It could only be done by means of a schedule and a large element of purely arbitrary selection would be involved. The simple constitutional solution would be to class all stamp duties as provincial sources of revenue.

We have given some attention to the question, considered by the Federal Structure Committee, whether the Provincial Governments should be given power also to fix the rates of duty on all stamps, or whether legislation on this subject should be reserved, wholly or partially, to the Federal Government. We suggest that the Federal Government should retain the power to legislate on behalf of the Provinces in regard to those stamp duties which are the subject of legislation by the Central Government at the date of federation. The duties which are now the subject of central legislation are those on acknowledgments, bills of exchange, share certificates, cheques (not now dutiable), delivery orders in respect of goods, letters of allotment of shares, letters of credit, insurance policies, promissory notes, proxies, receipts and shipping orders. We understand that proposals have been under consideration for adding other duties to this list, and would suggest that, if any such additions are contemplated, that should be made before the establishment of the Federation.

We ought to add, in this connection, that difficulties already arise in estimating the share of each Province in the proceeds from the sale of postage stamps for use on taxed documents, and these difficulties may be expected to lead to considerable friction with the Provincial Governments unless a more satisfactory system can be devised.

Finally, in proposing that the proceeds of commercial stamps should be assigned to the Units, we have to some extent been influenced by a doubt whether the problems arising from the imposition of federal stamp duties in the States might not be disproportionate to the revenue involved. We do not, however, wish to prejudge the possibility that, as part of the general federation settlement with the States, it might be found desirable to include these duties among the sources of federal revenue. This consideration might well outweigh the reasons which have led us to recommend that commercial stamps should not be made a source of federal revenue.

Corporation Tax—From the financial point of view, it seems clear that, if a corporation tax were imposed on companies registered in the States on the same basis as the present super tax on companies in British India, the yield at present would be negligible.

Provincial

Taxation of Tobacco—We have already dealt briefly with this question and have suggested that the taxation of tobacco, otherwise than by excise on production or manufacture, should rest with the Units, but that the Federal Government should be given the right to impose a general federal excise. This distinction is, we think, justified by the fact that *ex hypothesi* the introduction of excise duties on manufacture will be difficult, if not impossible, until manufacture becomes more highly industrialised, and as that development takes place an excise levied at the factory by one Unit of the Federation would be a tax on consumers in other Units. It will be seen from our later proposals in regard to powers of taxation that the federalisation of tobacco excise would not preclude the Federal Government from assigning the proceeds to the Units, if it so desired.

There is, unfortunately, no material which would enable us to estimate the yield of any of these forms of taxation. The provincial taxes will take some time to mature, but eventually they may be expected to form at least a very useful additional source of provincial revenue.

Succession Duties—Bombay is, we believe, the only Provincial Government which has attempted legislation for the imposition of succession duties, and the attempt was unsuccessful. We understand that even that Government would have preferred that legislation should have been undertaken by the Government of India. We propose elsewhere that succession duties should be classed among taxes leviable by the Federal Government for the benefit of the Units, but clearly the facts would not justify reliance on them as a source of revenue in the near future.

Terminal Taxes—We have been asked to weigh the issues which arise from the proposal to introduce terminal taxes generally as an additional source of revenue for the Provinces. As the arguments for and against this proposal have been so fully set forth in previous reports, it scarcely seems necessary to restate them here. The feature of such taxation which has impressed us most seriously is its operation as, in effect, a surcharge on railway freights. Where municipal octrois are in force, there appears to be a tendency to substitute for the general levy of duties on all goods entering the municipal boundaries the simpler alternative of a terminal tax collected at the railway station, and there is already a danger that this habit may result in diversion of traffic to the roads. We therefore recommend that, if terminal taxes are to be regarded as a permanent part of the financial structure, they should be imposed by the Federal Legislature for the benefit of the Units. Such terminal taxes as are already in existence (mainly as municipal taxes) will fall into much the same category as other taxes classed as federal which, at the time of federation, are being levied by certain Units, but though it may be necessary for this reason to authorise the municipalities and Provinces concerned to continue to raise these taxes, they should be allowed to do so only within limits laid down by the Federal Legislature. Assam and Bihar

and Orissa are the two Provinces which, having few or no municipal taxes of the kind at present, are most desirous of deriving provincial revenue from this source. While we do not rule out the possibility of terminal taxes in these two Provinces and elsewhere as a temporary expedient, in view of the practice which has grown up in various parts of India, we are not prepared to regard terminal taxes as a normal source of revenue.

Taxation of Agricultural Incomes—We have not considered the broad issues of policy involved in the taxation of agricultural incomes, but we have considered, as we were commissioned to do the more limited question of "the possibility of empowering individual Provinces, if they so desire, to raise, or appropriate the proceeds of a tax on agricultural incomes." In view of the close connection between this subject and land revenue, we agree that the right to impose such taxation should rest with the Provinces. For the same reason, we think that this right should be restricted to the taxation of income originating in the Province concerned. There will presumably be no difficulty in drifting into the constitution a definition of agricultural income which has so long been recognised in Indian income tax law and practice.

We are not prepared to express a final opinion as to whether agricultural and non agricultural income should be aggregated for the purpose of determining the right of the assessee to exemption and the rate of taxation to which he is liable on either section of his income, and we doubt whether any provision need be inserted in the constitution on this point since we are advised that, in practice, it would scarcely be possible for either the Federal or a Provincial Government to take into consideration income not liable to taxation by it, except with the consent and co operation of the other Government.

We are aware of no reliable data for estimating the yield of such taxation.

Conclusion—In this survey of possible sources of additional revenue, we have deliberately left out of account the question whether or to what extent it would be possible to increase the yield of existing taxes. We have confined ourselves to an examination of new sources, and in this field the results of our survey are not encouraging. We have found that such provincial taxes as appear to be within the sphere of practical politics in the immediate future cannot be relied on to yield any substantial early additions to provincial revenues. In using the phrase "practical politics," we are not, of course, expressing an opinion as to whether this or that tax ought or ought not to be imposed, or even as to whether it is or is not likely to be imposed by the legislatures of autonomous Provinces when these are constituted. We are only noting the fact that the opposition to certain forms of taxation, or the difficulty of their imposition, is still so great that they are not likely to be adopted soon enough to influence the financial situation at the time when the Federation comes into being. In the federal sphere, the excise on matches is the only tax which we feel justified in taking into account as an immediate reinforcement of federal revenues.

Railway Finance.—The year 1924-25 was marked by a step of great importance in the better organisation of Indian finance. As is explained in detail under the section Railways (q r) the Government of India is a great railway owner. It owns and operates itself a very large proportion of the railway system through what are called State Railways: it is the principal shareholder in other lines which are leased to Companies which operate them. Prior to the year in question, the railway finances were incorporated in the general finances of the country. The effects of this were unfortunate. As the finances of a State are not managed on commercial lines, the railways were not conducted on commercial principles. Then the annual allotments to railway expenditure were not determined by the needs of the railways themselves, but by the amount at the disposal of the Government of India. The evil effects of this policy were forcibly exposed in the report of a strong committee of investigation, usually called after the name of its chairman, the Acworth Committee, which recommended the entire separation of the Railway Budget from the general finances. Some cash was incurred in giving

effect to this recommendation, but it was carried out in the year 1924-25. The basis of the settlement was complete separation of finance, a definite annual contribution from the railway revenues to the general revenues, and the creation of a Standing Finance Committee of the Legislative Assembly to review estimates of railway expenditure before they are placed before the Assembly. The railway contribution was settled on the basis of one per cent. on the capital at charge, plus one-fifth of the surplus profit: further, if after the payment of the contribution, so fixed, the amount available for transfer to Railway Reserve exceeds the sum of Rs. 3 crore, one-third of the excess should be paid to the General Revenues. The effects of this change are expected to yield to the General Revenues a fixed contribution from the railway property, instead of a varying figure destructive of accurate budgeting, and to give to the railways the benefit of their operation and secure management and development on commercial principles.

In the past few years, owing to the economic depression, the railways have been unable to make the contribution to general revenues

I RECENT INDIAN FINANCE

The year 1924 marked a distinct and very important stage in the finances of India. Those who have studied the history of Indian finance will remember the general trend of the country's balance sheet. Up to the outbreak of the war it was a record of very careful finance, with a general surplus of revenue over expenditure, all such surpluses, save when they were in the nature of 'windfalls' going to the avoidance of debt. Throughout the war the finances were carefully handled and with certain moderate increases in taxation the accounts were made to balance. But commencing in 1919 a lamentable change came over the situation. The wanton invasion of India by Afghanistan meant a war which cost the exchequer directly some 24 crores of rupees. Nor was this all. Whilst the military resistance of Afghanistan to the Indian forces was contemptible, and Kabul lay open to capture if it had been thought worth while to occupy it, the effect of this attack was to set a large part of the North-West Frontier ablaze and to thrust on the Government of India a series of costly expeditions. When these were concluded, there remained the necessity of establishing a new Frontier system to take the place of that which collapsed in 1919. This especially in the notorious troublesome country of Waziristan (c r Frontier) involved the occupation of certain dominating posts and of connecting them with each other and with the advanced military stations of India by a series of very expensive roads. This colossal expenditure dislocated the financial equilibrium of the whole country. Nor is it possible to acquire the Finance Department of the Government of India in the difficult post-war period of a relaxation of that close control of expenditure which in previous years had balanced the accounts, even in the years of famine and plague. The result was that the accumulated deficits of the Government of India reached the very high figure of Rs 100 crores. This led to two results:

Retrenchment and Taxation.—Owing to the insistent demand for retrenchment the Government of India appointed in 1922 a retrenchment committee, on the model of the Geddes Committee which overhauled the extravagant post-war expenditure of the British Government. This committee is generally called after its chairman, the Inchauspé Committee. It sat in 1923, and presented a report which recommended reductions in expenditure which amounted in the aggregate to Rs 18 crores.

Financial equilibrium was established and a surplus realised in the Budget of 1923-24.

Statement comparing the actual Revenue and Expenditure of the Central Government since 1921-22.

Year	In lakhs of Rupees.

(a) Whole surplus placed to provision for reduction or avoidance of debt.

(b) Surplus to Earthquake Fund.

II. THE PRESENT FINANCIAL POSITION

India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maximum the following year. The net result from the Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September. When Sir George Schuster faced the Legislative Assembly at the end of February, he had a sorry tale to tell. Trade depression, coupled with civil disobedience movement, had completely vitiated the estimates made for 1930-31. These estimates showed a surplus of Rs 86 lakhs; the revised estimates worked upto a deficit of Rs 13 56 crores, which the Finance Member said would remain uncovered and would be added to the unproductive debt. The main items of deterioration as compared with the Budget can be summarised as follows —

	Lakhs
Important revenue heads, viz, Customs, Taxes on Income, Salt and Opium (net)	12,10
Posts and Telegraphs (including the Indo-European Telegraph Department)	89
Finance headings, viz, Debt services, Currency and Mint	1,38
Other heads	5,
Total Rs	14,42

Turning to the estimates for 1931-32, the Finance Member said they must face a fall in tax revenue, as compared with the current Budget estimates, of no less than Rs 13 16 crores, including a drop of Rs 8 crores in Customs and 4½ crores in income tax. The total deterioration under Finance headings was Rs 376 lakhs and on commercial departments Rs 118 lakhs. This meant a total deterioration of Rs 18 10 crores as compared with the Budget estimates for the current year, and as those provided for a surplus of Rs 86 lakhs the net deficit would be Rs 17 24 crores. To meet this deficit the Finance Member announced a cut of Rs 175 lakhs in army expenditure and retrenchment to the extent of Rs 98 lakhs in civil expenditure, making a total saving of Rs 273 lakhs. The estimated deficit was reduced thereby to Rs 14 51 crores, which he proposed to cover by fresh taxation.

New Taxation Proposals—His proposals were grouped under two heads, Customs and Income Tax. Referring to the first the Finance

Member said "The heads in respect of which I propose alterations of the substantive tariff itself, are liquors, sugar, silver bullion, betelnuts, spices and exposed cinematograph films. The liquor duties are to be enhanced appreciably, the duty on beer and the like is at present undoubtedly low relatively to those on other alcoholic beverages and will be raised by about 66 per cent above the present level, while those on wines and spirits (except denatured spirit and spirit used in drugs and medicines) will be raised by between 30 and 40 per cent. The duty on silver bullion I propose to increase from 4 to 6 annas per ounce. The other items mentioned will be transferred from the general rate of duty (now 15 per cent *ad valorem*) to the "luxury" rate at 30 per cent. Of the surcharges, we have at a stroke added to the 10 per cent schedule a surcharge of 2½ per cent, to the general or 15 per cent schedule one of 5 per cent, and to the "luxury" or 30 per cent schedule one of 10 per cent. By far the most important of these surcharges is that 5 per cent on the general revenue schedule of 15 per cent, and connected with this, I must mention a feature of particular importance. We propose for this purpose to treat the basic duty of 15 per cent on cotton piece goods on the same lines as the general 15 per cent schedule and to place the surcharge of 5 per cent on these goods also. The surcharge on the 15 per cent schedule is expected to yield 90 lakhs for cotton piece goods and 2,63 lakhs for other goods. Coming now to the schedule of non-protective special duties, here we have made additions appropriate to the general scheme, and I need only mention specially the surcharges that I propose to levy upon kerosene and motor spirit. Both customs and excise duty on kerosene are to be raised by 9 pies per gallon, while motor spirit is to bear a surcharge of 2 annas per gallon. Finally, I must explain my proposals as regards sugar. The position is special, because, while I am now proposing an increase in the duty for revenue purposes, we had received, just when my budget proposals were on the point of completion, the recommendations of the Tariff Board for the protection of sugar. Summarised, the Board's recommendations are —(1) a basic duty of Rs 6-4-0 per cwt on all classes of sugar, including sugar candy, to be imposed for 15 years, (2) an additional duty of Re 1 per cwt on all classes of sugar to be imposed for the first 7 years, (3) power to be taken to add 8 annas per cwt to the duty at any time if the landed price of sugar at Calcutta ex-duty falls below Rs 4 per maund, (4) no protective duty on molasses. My own proposals for revenue purposes had been very close to this, for I had actually contemplated an extra duty round about Re 1 to Rs 1-8-0 per cwt. What I have now included is an increase of Rs 1-4-0 per cwt. on all grades of sugar. This, as I have said, must be regarded purely as a revenue

measure pending consideration of the Tariff Board's recommendations. The combined effect of all these proposals as regards Custom duties will be to produce an additional revenue next year of 9.32 crores. We shall also obtain about 50 lakhs more from the increased import duties on galvanized pipes and sheets which the House discussed on 28th January last. This will raise the additional yield to 9.82 crores. Incidentally, the new duties, which will operate from 1st March, and the increased duties on galvanized pipes and sheets, which came into force on 30th December, will add to our revenue for the current year a sum estimated at 88 lakhs, thus reducing the current year's deficit to 12.68 crores."

Increased Income Tax—Dealing with his proposed new tax on incomes, the Finance Member said: "The taxable minimum income for income tax—Rs 2,000—will not be lowered. The rate of tax on the lowest zone up to Rs 4,999 will be raised by 4 pies. The rates on higher grades up to Rs 39,999 will be raised in some cases by 5 pies, in some cases by 6 pies, and in the highest of these grades by 7 pies. At present the highest rate is reached at Rs 40,000. It is now 14 pies. I propose a rate of 25 pies on incomes from Rs 40,000 to Rs 99,999, and a maximum rate of 26 pies on incomes of Rs 1 lakh and over. The estimated yield of these increases is 5.07 lakhs gross or, deducting 53 lakhs on account of increased refunds, 4.54 lakhs net. In addition to this, I propose certain changes as regards super-tax. At present all assesses except Hindu undivided families are allowed a deduction of Rs 50,000 in computing the income liable to super-tax. This will be lowered to Rs 30,000 except for Hindu undivided families and companies, which will be allowed, as at present, a deduction of Rs 75,000 and Rs 50,000 respectively. In the new zone, Rs 30,001 to Rs 50,000 the super-tax rate will be 9 pies. Above Rs 50,000 the graduated scales will be increased by 2 pies throughout. The flat rate for companies will be 1 anna as at present. These changes will yield, it is estimated, 46 lakhs. Thus the total estimated additional net revenue from taxes on income will be 5 crores. Briefly they will add an extra charge of about 2 to 5 per cent on all incomes. The rates of additional tax have been so adjusted as to produce, in the final result, an evenly graduated scale of burden increasing as the income increases, and this object must be borne in mind in interpreting our proposals. The total yield from the proposed changes in Customs duties and taxes on income thus amounts to Rs 14.82 crores, as against which the gap to be filled is Rs 14.51 crores, so that I am left with a small surplus of Rs 31 lakhs."

Silver Duty—Referring to silver, the Finance Member said:—"It is necessary for me to make a special reference to the proposed increase in the tax on silver because this has a general bearing on the whole question of our policy in relation to silver and its effect on the world position. The increase of two annas an ounce which we are proposing is estimated to produce 75 lakhs from the import duty and 7 lakhs from the excise or 82 lakhs in all. In itself it is a clearly justifiable form of raising

revenue as part of the general plan designed to meet the situation which confronts us this year. The only possible objection to it might be based on broad grounds, that is to say, on a fear that it might tend to check consumption of silver in India and thus further weaken the price of silver to the disadvantage not only of India but of the whole world. We have given the fullest weight to this consideration, but with the very moderate increase in the duty which we now propose we do not think that the fear is justified. Similar apprehensions were expressed in certain quarters last year when we imposed the duty of 4 annas. But although this weakened the price for a few days, the market almost immediately recovered, and in spite of the duty and of the great decline of India's purchasing power, the consumption of silver in the current year is keeping up to the normal level. In fact, we anticipate a consumption, taking all sources of supply into account, of between 100 and 110 million ounces. India's consumption should not therefore this year be seriously affected by the increased duty, while, as regards helping to maintain the price of silver, we are prepared to consider action in other ways. I announced in my budget speech last year that the Government of India would be prepared to co-operate with other silver interests if any practical scheme could be devised for controlling the production of new silver and the sale of and new existing stocks. Unfortunately, the only response to my offer has been on the lines indicated in certain utterances which have appeared in the press by representatives of the main producing interests in America. In general, these gentlemen propose that their own production of new silver should remain unrestricted, but that Governments and others who hold large stocks of silver should refrain from realising their holdings, and leave the world's markets free for the new production. Now whatever criticisms non-official members in this House may have made in the past on our policy of selling silver, I am sure that they would not expect the Government of India to part with the country's rights by acceding to any such one-sided arrangement. The demand that the Government of India should refrain from selling is, indeed, an astonishing proposition when the facts are studied. For, in fact, the whole world depends on India as a consumer. In the five years ending March 31, 1930, India absorbed about 540 million ounces of silver or 108 million ounces per annum. According to present indications, her absorption, even in the current year, will be up to this average, so that the total absorption in 6 years will be about 650 million ounces. As against this, the Government of India have sold out of their own holdings a total of only about 90 million ounces since 1926. Yet it is suggested that even this moderate realisation is to stop, and that India is to stand aside and keep her own home market free to absorb the production from the Mines of Mexico and the United States. This is a clearly unacceptable idea, and however anxious we may be—as indeed we are—to help, we must, as a condition of co-operation, secure fair consideration of India's interests. In the meanwhile, we must retain a free hand."

WAYS AND MEANS.

The following is a summary of the estimates of ways and means in India during 1933 34 and 1934 35 —

(In crores of rupees)

	Budget, 1933 34	Revised, 1933 34	Budget, 1934 35
RECEIPTS			
1 Excess of Revenue of the Central Government over Expenditure charged to Revenue	35 82	32 56	32 96
2 Unfunded Debt incurred—			
(a) Post Office Cash Certificates (net)	5 00	7 80	5 50
(b) Post Office Savings Bank deposits (net)	3 40	9 10	6 00
(c) Other Savings Bank deposits (net)	4 80	5 40	5 99
3 Appropriation for reduction or avoidance of debt	6 88	3 00	3 00
4 Railway and Posts and Telegraphs Depreciation Funds	42	09	— 35
5 Post Office Cash Certificate Bonus Fund	1 35	70	1 10
6 Miscellaneous Deposits and Remittances (net)	24	41	1 67
TOTAL RECEIPTS	57 91	59 06	55 87
DISBURSEMENTS			
7 Capital Expenditure not charged to Revenue—			
(a) State Railways	2 00	— 75	2 96
(b) Posts and Telegraphs	16	16	40
(c) Other items	1 06	1 41	1 29
8 Permanent Debt discharged (net)	28 95	42 54	13 24
9 Floating Debt discharged (net)	8 00	13 82	
10 Loss on revaluation, sale transfer, etc., of assets of the Paper Currency Reserve (net)		7 89	05
11 Loans by the Central Government—			
(a) To Provincial Loans Fund	3 91	3 68	6 00
(b) Other Loans	— 19	28	1 49
12 Remittances between England and India—			
(a) Remittance from India for financing Home Treasury	28 00	50 00	35 60
(b) Transfers through the Gold Standard Reserve and the Paper Currency Reserve	— 50	—31 75	
(c) Sale of silver	50	5 08	
(d) Other transactions (net)	1 39	1 57	70
13 Balances of Provincial Governments	—2 76	—2 90	—2 91
TOTAL DISBURSEMENTS	70 52	91 03	58 82
NET DISBURSEMENTS	12 61	31 97	2 95
New Loan	12 00	30 82	
Reduction (+) or increase (—) of cash balance	+ 61	+1 15	+2 95
Opening Balance	11 73	14 59	13 44
Closing Balance	11 12	13 44	10 49

Reception by the Assembly—Strong opposition was manifested in the Assembly to the new income tax and super tax rates, and on the plea that Government's duty was to retrench expenditure still further, an amendment was passed reducing the proposed revenue from this source by Rs 240 lakhs. Government found themselves unable to accept this cut, and the Finance Bill was returned to the Assembly by the Governor General with the recommen-

dation that it should be passed with an amendment to the Finance Member's original scheme involving a reduction in the lowest grades of income tax and leaving the higher grades untouched. The estimated decrease in revenue was about a crore of rupees compared with nearly two and a half crores created by the Assembly's vote. The following were the rates recommended by the Governor General—

In the case of every individual, Hindu undivided family, unregistered firm and other association of individuals not being a registered firm or a company —		Rate
When the total income is less than Rs 2,000	Nil	
When the total income is Rs 2,000 or upwards, but is less than Rs 5,000	Six ples in the rupee	
When the total income is Rs 5,000 or upwards, but is less than Rs 10,000	Nine ples in the rupee	
When the total income is Rs 10,000 or upwards, but is less than Rs 15,000	One anna in the rupee	
When the total income is Rs 15,000 or upwards, but is less than Rs 20,000	One anna and four ples in the rupee	
When the total income is Rs 20,000 or upwards, but is less than Rs 30,000	One anna and seven ples in the rupee	
When the total income is Rs 30,000 or upwards, but is less than Rs 40,000	One anna and eleven ples in the rupee	
When the total income is Rs 40,000 or upwards, but is less than Rs 1,00,000	Two annas and one ple in the rupee	
When the total income is Rs 1,00,000 or upwards	Two annas and two ples in the rupee	
In the case of every company and registered firm, whatever its total income	Two annas and two ples in the rupee	

The Bill in its recommended form was, however, rejected by the Assembly by 60 votes to 56, and was sent to the Council of State where it was passed. It became law on being certified by the Governor General. The gap of Rs 105 lakhs caused by the amended income tax figures was partly filled by reduction of military expenditure to the extent of Rs 60 lakhs and by Rs 15 lakhs cut in civil expenditure.

Other cuts made by the Assembly and accepted by Government included token reductions of Rs 100 in the demands for Customs, Income Tax, Executive Council and Army Department. Two cuts of Rs one lakh and Rs 100 were made in the Railway Board demand and were accepted.

Supplementary Budget—It soon became evident that the worsening of the trade depression had seriously vitiated the revenue estimates in the February budget, and in September Sir George Schuster came before the Legislative Assembly

with a Supplementary Finance Bill. The Finance Member said that the returns for the first five months indicated that they would fall short of their budget estimates for customs by at least Rs 10 crores, the heaviest reductions being under cotton piece goods, sugar, silver, spirits and liquor, excise on motor spirit, iron and steel and in the jute export duty, while they expected a deficit of Rs 1½ crores on income-tax. Income from Railways and Posts and Telegraphs showed a similar decline. The total deterioration in income amounted to Rs 11.33 crores in tax revenue, Rs 5.48 crores on commercial departments, Rs 2.29 crores in general finance headings, Rs 23 lakhs under extraordinary receipts and Rs 23 lakhs under other heads. As the budget provided for a small surplus of Rs 1 lakh on the basis of the present estimates there would be a net deficit of Rs 19.55 crores. Putting the deficit for the current year and next year together they had a gap to fill of Rs 39.05 crores. He proposed

to deal with the situation on three distinct lines, firstly, to reduce expenditure, secondly, to impose an emergency cut in salaries, and thirdly, to impose fresh taxation. Retrenchment measures in civil expenditure he estimated would save about Rs 30 lakhs in the current year, and Rs 250 lakhs next year, while military expenditure next year would be curtailed by Rs 450 lakhs. A ten per cent cut in pay in both civil and military departments would lead to a saving of Rs 60 lakhs in the current year and Rs 190 lakhs next year. Turning to new methods of raising revenue the Finance Member said his first proposal would be an immediate increase in the salt revenue by abolishing the credit system, which would mean that the revenue would be increased by a crore of rupees each year on this account. The main plank of his new taxation proposals was to put a temporary surcharge on all existing taxes with the exception of Customs export duties, the surcharge being 25 per cent on the existing rates in each case. He proposed that the surcharge for the current year in income tax should only be 12½ per cent, but it would be collected at this rate on the whole year's income. Government held that in the present emergency they were justified in reducing the income-tax exemption limit and imposing a small tax of four ples in the rupee on incomes between Rs 1,000 and Rs 2,000 per annum. Dealing with special increases and new taxes, the Finance Member said "We propose to increase the import duty on artificial silk piece goods from 20 to 40 per cent and on artificial silk yarn from 10 per cent to 15 per cent. We also propose to increase the duty on brown sugar from Rs 6-12-0 to Rs 7-4-0 per cwt. This follows the Tariff Board's recommendation. As regards boots and shoes, we propose that there should be imposed as an alternative to the 20 per cent duty a minimum of 4 annas per pair. The duty will thus be 20 per cent or 4 annas a pair, whichever is the higher. We also propose to increase the duty on camphor and on electric bulbs from 20 to 40 per cent. As regards all these articles the surcharge will be levied on the increased duty."

"Then there are three items formerly on the free list on which we think it justifiable to impose a small duty on revenue grounds. The result of the surcharges imposed in last Budget and proposed now is that the level of the general revenue tariff has been increased from 15 to 25 per cent. There is, therefore, some justification for adding a 10 per cent duty to articles hitherto free. We propose to put duties of 10 per cent on machinery and dyes, and of ½ anna per lb on raw cotton. I must expect criticism of these duties especially from the cotton mills, and I must acknowledge that their imposition may appear to be in some ways inconsistent with previous policy. The justification must be the need for revenue, while as regards the cotton mills we may claim that on balance their position will be improved by our surcharge proposals, for under these the import duties on cotton piece-goods will be increased by one quarter. This more than offsets the burden of ½ anna per lb on goods made from imported cotton, and affords an effective answer to possible criticisms on the grounds to which I have referred. I have one more word to say as regards the income tax proposals. In considering the cut to be applied to the salaries of Government officials we considered what total

reduction of their emoluments could fairly be imposed. If the general rate of reduction is to be 10 per cent, that represents what we think fair, and if further increases of income tax were to be added, that would go beyond the reasonable limit. We therefore propose that increases of income tax both by way of surcharge on existing rates or by way of imposition of a tax for the first time on salaries from Rs 1,000 to Rs 2,000 should be merged in any general cut which we are imposing or which the Provincial Governments may impose."

The Finance Member's final proposal was to increase the postage for inland letters to 1½ annas instead of 1 anna and for postcards to 9 ples instead of 6 ples. That enhancement was expected to produce Rs 73 lakhs in a full year and go a long way to cover the deficit of Rs 92 lakhs in the working results of the Posts and Telegraphs Department which would be left even if the recommendations of the Posts and Telegraphs Accounts Enquiry Committee were accepted.

Need for Solvency—The net result for the current year was an estimated increase in taxation of Rs 711 lakhs which, together with Rs 37 lakhs from increased postal charges and Rs 100 lakhs from salt revenue, meant, with retrenchment measures, an improvement of Rs 938 lakhs as against an estimated deficit of Rs 19 55 crores. They would thus close the year with a deficit of Rs 10 17 crores. On the other hand, in 1932-33 they would feel the full benefit of the retrenchment measures and the extra taxation, making a total improvement of Rs 24 73 crores against an estimated deficit of Rs 19 50 crores. They should thus close the year with a surplus of Rs 5 23 crores. The combined result of the two years would be a deficit of Rs 4 94 crores, which they were justified in regarding as covered by making during this period of exceptional stress a reduction of about Rs 247 lakhs in each year for the provision for reduction or avoidance of debt. The net administrative expenditure would, according to their plans, proceed as follows—

1930-31	Rs 79 67 crores
1931-32	Rs 74 66 crores
1932-33	Rs 65 95 crores

Concluding his speech Sir George Schuster said "I referred at the outset of my speech to the dangers, now that we are divorced from a gold standard, of any inflationary action for the purposes of meeting the current expenditure of the Government. If once that process starts, it may be impossible to save the country from a complete collapse of its currency. That has been the experience of all countries whose currencies collapsed after the War. They all went through the same process. Budgetary deficits, met first by borrowing, then a reluctance of the public to subscribe to government loans or treasury bills, then recourse to the note-printing press and inflation to provide funds to meet current public expenditure, then collapse in confidence in the currency, notes printed faster and faster until the amounts reached astronomical figures, and finally the complete disappearance of any value to the currency at all. We want to erect a solid

barrier against the possibility of India getting on to that slippery slope. That is the essential justification for our proposals. We have heard much talk in the last days about the disappearance of our currency reserves. But no currency can be large enough to stand up against a lack of confidence in the currency. Reserves are only valuable to tide over temporary difficulties. The real safeguard must be confidence in the soundness of a country's financial situation. If a country meets current expenditure with current revenue, and if, further, it has a favourable balance of trade then it can face all the vicissitudes of fortune with confidence and its actual currency reserves are of minor importance.

Assembly Opposition—The Finance Member's statement and fresh taxation proposals came as a shock to the Assembly, and strong opposition to certain sections of the Bill was manifested from the start. Most of the non-official members maintained that larger cuts in expenditure should be made, instancing the need for still further retrenchment in the Army demands. When the Bill was discussed clause by clause a motion was carried placing mill machinery, etc. again on the free import list and the proposal to increase postal rates was rejected. Amendments to the income tax increases were carried omitting the reduction of the minimum taxable income from Rs 2,000 to Rs 1,000, and making the 25 per cent surcharge levied during 1932-33 applicable only to incomes over Rs 10,000 per annum. When the discussion finished the Bill was returned to the Assembly with a recommendation by the Governor-General that it should be passed in its original form. Lord Willingdon pointed out that the amendments made by the Assembly would reduce the expected revenue by Rs 4 crores over eighteen months, and added "I am satisfied that I cannot consistently with my responsibilities allow this deficiency to remain uncovered." The Bill as amended was, however, rejected by the Assembly by 63 votes to 48. It was taken to the Council of State where it was passed and was thereafter certified as law by the Governor-General.

The 1932-33 Budget—Presenting the 1932-33 budget on March 7th, 1932, the Finance Member explained that the circumstances were somewhat unusual. The supplementary budget had been introduced only six months earlier. He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931. On the basis of the supplementary budget in September it was hoped to reduce the deficit for the current year to Rs 10-17 crores and for the following year to realise a surplus of Rs 523 lakhs but experience had made it necessary to revise these estimates. A deterioration in the figures by about Rs 3 crores was to be allowed for each year and it was anticipated that the current year would close with a deficit of Rs 13-6 crores and that the surplus for 1932-33 would be Rs 2-15 crores. The Finance Member reminded the House that for the current year and the next year combined no less than Rs 13-71 crores was being provided from revenue for reduction or avoidance of debt.

Revenue Estimates—The budget estimates for customs receipts in 1932-33 were put at Rs 115 lakhs less than in the previous year in spite of the increased duties imposed by the emergency budget and which were expected to bring in an additional revenue of Rs 92 crores. The main deterioration occurred under the heads of sugar, silver, cotton piece-goods and liquor. Referring to the revenue from the commercial departments the Finance Member said that no contributions from the railways were expected either in the current year or the next. As regards Posts and Telegraphs the loss in working in the coming year was expected to be about Rs 16 lakhs.

Expenditure Estimates—The total civil and net military expenditure in 1932-33 was estimated at Rs 67-39 lakhs which was Rs 11-54 lakhs less than for 1930-31 and Rs 7-95 lakhs less than the current budget. On the subject of retrenchment the Finance Member said:

"For the present I would remind Honourable Members of the following broad facts, when they compare what we have achieved with the recommendations of the various Retrenchment Committees. The total recommended by the four civil Sub-Committees was Rs 1-09 lakhs, and we have against this achieved economies of Rs 4-33 lakhs or nearly 87 per cent—before allowing for terminal charges which, of course, the committees did not take into account."

"I would mention two other striking results in this connection. The first is the actual reduction in Expenditure. I have already given the figures from the accounts showing a reduction of 11-84 lakhs for Civil and Military Expenditure (excluding Posts and Telegraphs) since 1930-31. The position may also be stated in another way. If Honourable Members will look at the analytical table which is included in the Financial Secretary's memorandum (which is prepared now on a slightly different basis from that which I circulated in September) they will find that what I may describe as the net controllable administrative expenditure, civil and military (which excludes the cost of collection of taxes and of the administration of salt and Posts and Telegraphs expenditure) has been brought down from just over Rs 76 crores in 1930-31 to just over Rs 64 crores for 1932-33, a reduction of about 16 per cent."

The second fact is of a more distressing nature, but it indicates the magnitude of the effect which we have made. In pursuance of the retrenchment campaign the following appointments in the Civil Departments (including Posts and Telegraphs) have been or will shortly come under reduction so far as information is at present available—

Gazetted officers	299
Ministerial establishment and other superior establishment	5,279
Inferior establishment	1,485
Total	7,063

Army Expenditure—On the subject of military expenditure the Finance Member said—

"In September last I informed the House that His Excellency the Commander-in-Chief had agreed, as the Army's contribution in the national emergency, to accept a cut of 1.55 crores on his 1931-32 budget. I have now only to say that His Excellency has made good his undertaking in full, and that the estimate for the military budget in 1932-33, excluding the special grant for the Territorial Force, stands at 46.65 crores."

Honourable Members will find among their budget documents an Army Department paper giving a detailed account of the methods by which this reduced figure has been reached. The total reduction, which is valued at 51 crores to allow for certain unavoidable new items such as the establishment of the Indian Sandhurst, is made up of first 1.40 crores from cuts in pay, secondly, 3.10 crores from retrenchment measures in recurrent expenditure, and thirdly, 1 crore from postponement of projects with the special re-equipment programme. It is necessary to appreciate the exact significance of these savings. To take the first—the cut in pay, this except for certain categories of British Army personnel (in regard to whom the reduction following what has been done in England, is permanent), represents the general 10 per cent cut which we have imposed on all Government servants and, as we have undertaken that this cut will be restored as soon as conditions permit, most of this part of the reduction must be regarded as purely temporary. Turning to the second class, the retrenchment in recurrent expenditure, this to some extent is accounted for by special temporary savings, such as the eating down of stocks and postponement of essential buildings. As regards the third class, the postponement of the re-equipment programme, this cannot be regarded as permanently cancelled. It does, however, represent special non-recurring expenditure, and when conditions permit it will be necessary to consider special means for financing the completion of this programme."

"The significance of these remarks may be indicated in the following way. As regards the cut in pay, when the general cut of 10 per cent is removed this will automatically throw back on to the Army a recurrent liability of 1.23 lakhs—(1.40 less 17 which is a permanent cut). As regards the retrenchment in normal expenditure, about 65 lakhs of this represents savings which are not in the strict sense recurrent. About 20 lakhs represents drafts on stocks, etc. and 45 lakhs postponement of the provision for buildings which are regarded by the Army Department as essential. As regards the postponement of the re-equipment programme, the one crore saved on this for next year may have to be found later by some form of special non-recurring provision. The Army authorities have throughout made it clear that they have only agreed to postponement in order to help in meeting the present national emergency, and that the permanent cancellation of these measures could not—consistently with maintaining the efficiency of the Army—be effected."

"His Excellency the Commander-in-Chief has given an assurance that he will not relax his efforts to secure further reductions in recurrent expenditure both by pressing on with measures already adopted, and by developing in further lines that may present themselves, but he has made it clear that he does not see any hope of being able to find economies in normal expenditure, that is to say, economies from measures other than the reduction of fighting troops which raises quite different issues, which come near to balancing the burden of 1.23 lakhs which would arise from restoring cuts in pay combined with the disappearance of the 65 lakhs of special savings on recurrent expenditure from next year. In support of this he points out that in spite of the intensive examination of all sources of economy both by his own officers and by the Retrenchment Committee, it was only possible to work up to the present reduction of 51 crores by reducing troops at a saving of 55 lakhs. Further, although provision has been made in the estimates for 1932-33 for some rise in the prices of food grains as compared with those prevailing in 1931-32, the rates now taken are still far below the recent normal level, and, if prices should rise to, and be stabilised at, something like the 1929 level, this event, though welcome on general grounds, would mean an automatic increase in the military estimates. On these considerations His Excellency wishes it to be made clear that he cannot regard the Budget figure of 46.65 crores as representing a new standard level of standing charges, and that the normal cost of the forces at their present strength when the cut in pay is restored must be reckoned to be about 48 crores even if the prevailing low prices for grain, etc., continue. I have thought it right to let Honourable Members know the conclusions which His Excellency has drawn from the facts of the present situation and I can only add that the Government will continue to press for all possible efforts to secure further recurrent economies, and that the campaign for retrenchment will not be regarded as finally closed with the achievements of this year."

The 1933-34 Budget—In introducing the budget, the Finance Member summarised the results for the two previous years. The results for 1931-32 had turned out to be Rs. 2 crores better than anticipated in the budget speech and the account for the year showed a deficit after providing nearly Rs. 7 crores for the reduction of debt of Rs. 11½ crores. For the year 1932-33 the latest revised estimates indicated that the surplus would be Rs. 217 lakhs or Rs. 2 lakhs more than was estimated. He continued to estimate revenue for 1933-34—particularly customs revenue—is, in view of the completely uncertain and abnormal conditions, a task of quite unprecedented difficulty. Indeed I may say that accurate estimation is impossible. In these circumstances and for the reasons which I have explained, we have thought that the most reasonable course is to assume that the general position next year will be the same as for the current year, neither better nor worse, and in particular that India will be able to maintain the same purchasing power for commodities imported from abroad.

Customs—The assumption, however, that the value of imports will be maintained does not necessarily imply that the value of the import duties will also remain the same

I have already explained the special position as regards sugar, showing how the present development of the Indian industry is affecting our revenue. On these considerations we think it necessary to allow for a drop of one crore in receipts from the sugar import duties which will not be offset by any increase under other heads

In regard to cotton piece goods also, for reasons which I have explained, we think it necessary to regard the revenue from import duties—at least on Japanese goods—as to some extent abnormal and not likely to be repeated. Here therefore we have allowed for a drop of 30 lakhs

As against these reductions we have thought it safe to count on a small revenue (25 lakhs) from silver imports—because having closed the gap in our land customs line on the Burmese frontier, through which a large trade in silver from China was suddenly developing in the course of the last year, we think it reasonable to expect a moderate resumption of dutiable imports.

Making allowance for these and other minor variations, our customs revenue estimates for next year are put at 51.25 lakhs showing a reduction of 104 lakhs from the revised estimates of the current year

The position as regards net receipts may be summarised as follows —

	Revenue (Lakhs)
Budget Estimate, 1932-33	52.31 27
Revised Estimate, 1932-33	52.28 55
Budget Estimate, 1933-34	51.24 60

Debt Service—Regarding the service of debt the Finance Member said —

‘In the first place, as regards interest payments, the reductions shown are satisfactory, namely, 204 lakhs as compared with 1931-32, and 51 lakhs as compared with the revised estimate for 1932-33. I must however explain that the full result of the conversion operations recently undertaken is not yet revealed. The results indeed of the latest operation were not known at the time our estimates had to be compiled, but apart from this there are other special reasons. Although our main conversion scheme has been directed to substituting one form of permanent debt for another, the process has been a continuous one which is not yet completed, and the first actual result in the current year has been to reduce treasury bills held by the public and the Paper Currency Reserve by approximately Rs 34 crores. Current rates for treasury bills had fallen so low that this aspect of the conversion actually represents, initially at least, an increase in the

interest charges. It must be remembered, however, that this large reduction in our treasury bill outstandings is not only a sound operation in itself, but by strengthening the Government position enables it to reduce interest rates both for the remaining volume of treasury bills and for its permanent debt.”

Civil Expenditure—“The budget estimate of Civil expenditure for the current year (1932-33), i.e., excluding military expenditure, expenditure on Commercial departments and Debt services, was 20.65 lakhs. Our revised estimate now gives the figure as 20.89 lakhs. There is thus an apparent increase of 24 lakhs. But a closer examination shows that this increase, does not denote any increase in real expenditure, and, indeed, that the economy in recurrent expenditure has been greater than that which we promised. The figure of expenditure as shown in our accounts has had to be increased because special items amounting in all to 69½ lakhs, but the great bulk of which do not denote real expenditure, have had to be included

“Under the other heads of real expenditure we shall have achieved during this year economies of Rs 45 lakhs more than we promised. It may be remembered that in my budget speech in March last I stated that, broadly speaking, against a total retrenchment in expenditure of Rs 499 lakhs recommended by the four civil sub-committees, Government had achieved economies of 433 lakhs, or nearly 87 per cent before allowing for terminal charges which the committees did not take into account. The results according to the revised estimate for the current year which I have just given show that the actual economies achieved in normal expenditure amount to 45 lakhs more than this, that is to say, to a total of 178 lakhs, or nearly 96 per cent of the amount recommended by the retrenchment committees

“Turning to the estimates of expenditure under these civil heads for next year, I am glad to be able to report a still further improvement. As compared with the current year with its budget estimate of 20.65 lakhs and the revised estimate of 20.89 lakhs, the estimates for 1933-34 are 20.53 lakhs, that is to say, a reduction of 36 lakhs on the current year in spite of the following facts, first, that we have allowed for reducing the cut in pay to 5 per cent thereby incurring extra charges of 28 lakhs on these particular civil heads, secondly that we have to meet the normal increments in time scale pay which still involve an annual addition of something like 15 lakhs, and thirdly, that we have to meet new obligatory expenditure amounting to about 17 lakhs, the nature of which I shall shortly explain. If all these items are taken into account it will be seen that the total of the net reductions otherwise effected under the normal heads of expenditure amount to no less than 96 lakhs. Honourable Members may say that they are not concerned with this figure but only with the saving of 36 lakhs actually effected, but I have given these explanations in order to show how we are continuing the retrenchment effort and what a constant effort is required “merely to prevent expenditure from growing.”

1933-34 at 1 crore is 30 lakhs higher than the budget, the increase being mainly due to the receipt of a large payment of arrears. For next year we are only budgeting for 35 lakhs owing to declining sugar imports so that under this head there is a loss of 65 lakhs as compared with the revised estimate for 1933-34.

Then we must be prepared for a substantial drop in the machinery import duty. We expect to get 1,32 lakhs from this in the current year, or 17 lakhs more than our budget estimate but these high receipts are to the exceptionally large imports of sugar machinery. We cannot count on their continuance and we have reduced next year's estimate to 1 crore which means a drop of 32 lakhs on the revised estimates of the current year.

Another item which I will select for special mention, because I have some proposals to make about it later, is manufactured tobacco. Here the operation of our duties as a result of recent changes and surcharges has given a protective stimulus to the local manufacture of a class of cigarette which was hitherto imported. We budgeted for 50 lakhs in the current year, but on our revised estimates expect to get only 28 and on this we have to allow for a further loss of 8 lakhs next year unless a change is made.

The special items which I have selected for mention account for a loss in import duties next year of 4,00 lakhs as compared with the revised estimates for the current year. On all the other customs items combined we are budgeting for a net increase of 1,75 lakhs, so that the net deterioration under customs as compared with the revised estimates for the current year is 2,25 lakhs.

Other Revenue—The changes in other heads of Revenue do not call for any detailed comment. We are allowing for a slight recovery of 12 lakhs in Taxes on Income to a total of 17½ crores, and we should have put this 25 lakhs higher if it had not been for the losses which must be anticipated from the earthquake. We are also allowing for an increase of 18 lakhs on salt and for a drop in the gross receipts from Opium of 64 lakhs. The declining revenue from the latter item owing to the policy adopted in 1925 has been another cause of budgetary difficulties. Altogether the total drop to be allowed for in Revenue as compared with the Revised estimates for the current year is 2,74 lakhs, which is more than accounted for by the loss on sugar.

Expenditure—On the subject of expenditure Sir George Schuster said—

So far as concerns expenditure, we are still searching for further economies, and have rigidly maintained our rule that no new item of expenditure shall be admitted unless it is absolutely obligatory or unless it is likely to be economically productive. We have also, as I have already announced, decided that the 5 per cent cut in pay ought to be retained for another year. As a result there is a very satisfactory reduction of 2,12 lakhs in the Budget provision for next year as compared with the Budget for the current year, and of 2,90 lakhs as compared with the actuals for

last year (1932-33) for, while expenditure on Civil Administration has been kept practically unchanged in spite of the normal increments in pay, there is a substantial saving on interest charges due to conversion schemes and the improvement in Government credit, while the military contribution from His Majesty's Government means a big reduction in the Army Budget.

The demand under the Defence head stands for next year at 14.38 crores. This is 1½ lakhs less than the Revised estimates for the current year and 1,82 lakhs better than the Budget estimate. The latter big reduction is of course due to the payment now made by His Majesty's Government as a result of the finding of the Capitulation Tribunal, to which I have already referred. The House is fully informed as to the facts in this case, and I need not add further explanations but I wish to take this occasion to review the course of military expenditure during the period of my office as Finance Member. The salient fact is that the total demand has been reduced by no less than 10.72 crores, from 55.10 crores in 1929-30 to the present figure of 44.38 crores. This is a remarkable reduction and I venture to think that if I had prophesied its achievement in 1929, my prophecy would have been greeted either with incredulity or, among those who gave credence to it, with extreme satisfaction. In the debate at that time the great demand was always that we should get Defence expenditure down to the so-called Incheurpe figure of 50 crores. Yet now we are nearly six crores below that.

Debt Services—Regarding the interest on debt, the Finance Member said—It is a notable fact that the net figure for 1934-35 under Interest on Ordinary debt is less than nothing—in fact a surplus balance of about 1 lakh. This is a reduction of 1,17 lakhs on the budget for 1933-34, though it is actually about the same as for the revised estimates. The comparison is complicated by the position as regards war debt payments. In the budget of 1933-34 we provided 88 lakhs against this liability, but as no payment was made this amount was saved, and, as I have already explained, is the main reason for the saving on the revised estimates. As regards 1934-35, His Majesty's Government has already agreed to the postponement of the instalment due in June 1934, but we have made provision for the second half year's instalment, and we have also assumed that the outstanding arrears, excluding the amount in suspense, will be capitalised and the total discharged by equated payments ending 1952 to cover principal and interest. On this basis we are making provision for 58 lakhs in the 1934-35 budget. Excluding these War Debt provisions the comparison between 1933-34 and 1934-35 works out as follows—

1933-34 Budget	28 lakhs
1933-34 Revised	Nil
1934-35 Budget	—59 lakhs (i.e., net surplus)

There is thus really an improvement of 87 lakhs on the budget for 1933-34 and of 59 lakhs on the Revised.

Under Interest on Other Obligations there is an increase in the budget provision for 1934-35 of 72 lakhs over the budget for 1933-34 and 68

lakhs over the Revised estimate This is accounted for by an extra charge of 50 lakhs in respect of bonus on Post Office Cash Certificates, while the balance represents mainly interest on the increased amount of Post Office Savings Bank deposits

I might sum up the result by saying that as regards Interest charges, including both Interest on Ordinary Debt and Interest on Other Obligations, we have to provide next year 45 lakhs less than was allowed for in the budget of 1933-34, but 68 lakhs more than we are allowing in the revised estimates, and that as against the latter increase we are providing 58 lakhs more on War Debt and 50 lakhs more on Post Office Cash Certificates

Changes in Duties—The Finance Member announced the imposition of an excise duty on sugar in the following words —

After careful consideration we have decided to propose a dual policy, on the one hand the imposition of an *excise duty on factory produced sugar*, and on the other hand the introduction of legislation by the Central Government which will enable the Provincial Governments to apply schemes for enforcing a minimum price for cane to be paid by the factory to the grower. As I have already stated, the present duty of Rs 9-1-0 per cwt is Re 1-13-0 above the basic duty of Rs 7-4-0 recommended by the Tariff Board. In their report, however, the Tariff Board recommended that there should be power for Government to increase the measure of protection by 8 annas per cwt when Java sugar was being imported at a price less than Rs 4 per maund to Calcutta. We propose to assume that the conditions justifying this extra margin of protection are likely to continue in existence for the present, and therefore to leave a protective margin of Rs 7-12-0 per cwt and to impose an *excise duty of Re 1-5-0 per cut*. We assume that this will yield Rs 1.47 lakhs, and out of this we propose to set aside an amount equivalent to 1 anna per cwt, representing about 7 lakhs, as a fund to be distributed among the Provinces where white sugar is produced for the purpose of assisting the organisation and operation of co-operative societies among the cane growers so as to help them in securing fair prices, or for other purposes directed to the same end.

Tobacco Duties—The Finance Member said —

Under our present tariff, as modified by the two surcharges, the duty on cigarettes works out at something like double the duty on the tobacco used in making similar cigarettes in India, and the result has been to divert the manufacture of the great majority of the leading brands of cigarettes to factories in India belonging to the same interests as previously imported these brands from abroad. Such an industrial development has never made a claim—and I do not think it could make a good claim—that it satisfies the principles of discriminatory protection and should therefore receive abnormal encouragement from the tariff. We have now decided to fix the relation between the duty on cigarettes and the duty on raw tobacco on a more rational basis, and we have considerable hopes that, while not depriving the interest

concerned of reasonable assistance, it will bring back the class of cigarette concerned into the field of open competition between the imported and locally made article, and result, without detriment to the interest of the consumer, in some increase of revenue from import duties. We propose to take for cigarettes a specific duty roughly corresponding to the identical amount that would have been paid on the quantity of leaf contained in the cigarettes and to add to this specific duty the normal revenue duty of 25 per cent *ad valorem*, thus leaving the local industry with no more than the benefit which is enjoyed by every non-protected industry engaged in the manufacture of goods which are subject to our present normal revenue duty of 25 per cent. The details are as follows

At present what I may call the basic rate of duty on cigarettes is Rs 10-10 per thousand, while there are smaller classes which are assessed at Rs 15 and Rs 8-8 per thousand, the division between these classes being dependent upon values. The present rate of duty on raw tobacco is Rs 2 per lb standard and Re 1-8 preferential (Imports entitled to the benefit of preferential duty are negligible). The revised rates that we propose are —

On raw tobacco Rs 2-6-0 per lb standard and Re 1-14-0 per lb preferential

On cigarettes Rs 5 15 0 per thousand *plus* 25 per cent *ad valorem*

Silver—Announcing a reduction in the silver import by 2½ annas to 5 annas per ounce Sir George Schuster said —

At present the imports of silver have for all practical purposes ceased, so that against our budget estimate for the current year of 25 lakhs we only expected to receive 1 lakh, and there is no reason, if the present duty continues, to anticipate more next year. The decline in the import of silver is of course primarily due to the lack of purchasing power in the country which has turned India into an exporter of gold instead of an importer to the extent of many crores per annum of gold and silver. Therefore in present conditions the existence of this high duty can hardly be regarded as having any appreciable effect on the normal trade, though it is probably encouraging some smuggling, and it is certainly attracting movements of silver through any gaps which exist in our land customs regime. Last year I mentioned that we were taking steps to deal with this on the Burma frontier, and further steps in respect of other places are now under consideration. While this is an undesirable condition we think that the time has come on general grounds to take account of the fact that if India's purchasing power for silver were to revive the existence of a duty at the present level would not only provide an increased incentive to smuggling, but would also act as a serious obstacle to legitimate trade. Moreover we must also take into account our general policy in this matter. The part which the Indian delegates played in bringing about the silver agreement at the World Economic Conference, which has already been ratified by the Indian Legislature must be regarded as indicating our desire to co-operate with other countries and especially with the United States

of America in measures designed to improve its price. Although we must reserve our liberty to impose a duty on silver for revenue purposes, we must on the other hand recognise that a duty which is so high as to operate as a serious impediment to trade may also be unprofitable from the revenue point of view. Therefore, both as a measure of co-operation with the United States of America and other countries interested in silver, and also for the purpose of improving the prospects of our own revenue, we think the time has come to make a reduction in the silver duties.

The only consideration which can weigh with us on the other side is the effect of any such reduction on local prices. There can be no doubt that the existence of our duty throughout the last few years has done something to protect the internal price of a commodity which is an important store of value to the poorest classes. We do not wish to disturb this position, but as the facts are to day we think we can lower the duty without risk of doing so. Taking the prices of silver which have been ruling recently in London (about 19½d to 20½d per standard ounce), the prices in Bombay have been ruling round about Rs 55 per 100 tolas as against 19½d per ounce in London. On the basis of a London price of 19½d was calculated that the parity price in Bombay allowing for import duty and other charges, ought to be Rs 61-11-9 per hundred tolas, so that it looks as if the Bombay prices have been keeping at a level at least Rs 6-11-9 per 100 tolas below the full parity. The duty of 7½ annas per ounce is equivalent to Rs 17-9-3 per 100 tolas. It appears therefore that we might reduce the duty by one third i.e., by 2½ annas per ounce without thereby necessarily affecting the Bombay price at all, for it would still be somewhat below the London parity.

Export Duty on Hides—The export duty on raw hides was abolished by the 1934-35 budget.

Excise on Matches—Announcing that the Government intended to hand over half the jute export duty to the jute producing Provinces, the Finance Member said that the Government of India would recoup their losses by imposing a levy on matches at the rate of Rs 2-4-0 per gross of boxes on matches made in British India.

Assembly Decisions

The assembly accepted the whole of the financial plan except to the extent that government themselves accepted a change in the match excise duty. The changes as summed up by the Select Committee which examined the Bill, were the most important question which confronted us was whether the duty as fixed by the Bill would so react on the retail selling price of matches as to bring about a very serious diminution of sales. In order to avoid this it seemed to us essential that the duty be so regulated as to make it possible a reasonable sized box of matches retailed singly in bazaars at the price of one pie.

After very careful consideration we have come to the conclusion that if this result is to be achieved and a sufficient margin of profit left for retailers and manufacturers, the rate of excise

duty initially at least should not be fixed higher than one rupee per gross of boxes containing on average 60 matches.

We hold that the duty could be fixed at corresponding rates for matches in boxes of 60 or 80 and that the classification of matches according to these standards is most suitable and convenient from the administrative standpoint.

From matches packed otherwise we have left the duty to be fixed by the Governor General in Council.

Posts and Telegraphs—The following changes in postal and telegraph charges were announced—

Postal—(a) In the postal tariff we propose to lower the initial weight of inland letters from 2½ tolas to 1½ tola coupled with a reduction in the charge from 1½ anna to one anna. For heavier letters the charges will continue to be 1½ anna for letters not exceeding 2½ tolas, with additional 1½ anna for successive weights of 2½ tolas or fractions. This change introduces a lighter unit of weight and will undoubtedly benefit the poor citizens and the business community. Allowing for a recovery of 10 per cent in traffic we estimate that in the first year this reduction will involve a loss in revenue of 27 lakhs, but we have good reasons to hope that in the second year this loss will practically disappear, and that thereafter there will be a gradually increasing net gain.

(b) As a second change in postal charges we propose the remission of the extra pie per five pie embossed envelope which was imposed in 1931 to recover the cost of manufacturing the envelope. This is more of the nature of an administrative reform considered necessary on general grounds than a regrading of the rate, but it is again a reform which will benefit the ordinary citizen. We estimate a loss of revenue of two and a half lakhs from this change.

(c) Thirdly, as regards postal rates, we propose a small change in a contrary direction, namely, that the initial charge on inland book packets not exceeding 5 tolas in weight should be raised from 6 to 8 pias. The book packet method of transmission is undoubtedly being abused, and a change is urgently necessary to stop the diversion, with consequent loss of revenue, that is occurring of post card traffic to the book packet category. We estimate a gain of a little over 5 lakhs in revenue from this change.

Telegrams—The last change which we propose is as regards telegrams. Instead of having, as at present, a minimum charge for ordinary telegrams of 12 annas with a surcharge of one anna for a message of 12 words, we propose to introduce a minimum charge for a telegram of 8 words or 9 annas, while that for an express telegram of the same length will be one rupee and two annas. For each additional word in the two classes of telegrams the additional charge will be one and two annas respectively. We estimate a loss during the first year of 3 lakhs from this change, but here also, as in the case of the postal rates, we hope that in the second year this loss will disappear, while without making this change we consider that there is a prospect of a continuous decline in telegraph receipts.

THE LAND REVENUE

The principle underlying the Land Revenue system in India has operated from time immemorial. It may be roughly formulated thus—the Government is the supreme landlord and the revenue derived from the land is equivalent to rent. On strictly theoretical grounds exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The latter pays for it according to the value of his holding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary. Under the former the amount of revenue has been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe. The actual cultivators became the tenants of the landlords. While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State. This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1849. It also obtains in certain districts of Madras.

Temporary Settlements.

Elsewhere the system of Temporary Settlements is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographic surveys carried out by the Survey Department of the Government of India. Each village area, wherever the Temporary Settlement is in vogue, has been carefully mapped, property-boundaries accurately delineated and records of rights made and preserved. Under the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer are thus described in Strachey's *India* (revised edition, 1911)—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land. He has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly required several years of constant work. The establishment of agricultural departments and other reforms have however led to much simplification of the Settlement Officer's Proceedings, and to much greater

rapidity in the completion of the Settlements. All the work of the Settlement Officer is liable to the supervision of superior officers, the assessments proposed by him require the sanction of the Government before they become finally binding, and his judicial decisions may be reviewed by the Civil Courts. It is the duty of the settlement officer to make a record of every right which may form the subject of future dispute whether affecting the interests of the State or of the people. The intention is to alter nothing, but to maintain and place on record that which exists."

The Two Tenures

Under the Temporary Settlement land tenures fall into two classes—present holdings and landlord holdings, or *Ryotwari* and *Zemindari* tenures. Broadly speaking, the difference between the two in a fiscal sense is that in *Ryotwari* tracts the *ryot* or cultivator pays the revenue direct in *Zemindari* tracts the landlord pays on a rental assessment. In the case of the former, however, there are two kinds of *Ryotwari* holdings—those in which each individual occupant holds directly from Government, and those in which the land is held by village communities, the heads of the village being responsible for the payment of revenue on the whole village area. This latter system prevails in the North. In Madras, Bombay, Burma and Assam, *ryotwari* tenure is on an individual basis, and the Government enters into a separate agreement with every single occupant. The basis of assessment on all classes of holdings is now more favourable to the cultivator than it used to be. Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land during the ensuing period of settlement. Now the actual yield at the time of assessment alone is considered, so that the cultivator gets the whole of the benefit of improvements in his holding subsequently brought about either by his own enterprise or by "unearned increment." The Government, however, may at a new settlement reclassify a holding so as to secure for itself a fair share in an increment that may have resulted from public works in the vicinity, such as canals and railways, or from a general enhancement of values. But the principle that improvements effected by private enterprise shall be exempt from assessment is now accepted by the Government and provided for in definite rules.

Incidence of the Revenue

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circumstances of the holding. Under the Permanent Settlement in Bengal Government derive rather less than £3,000,000 from a total rental estimated at £12,000,000. Under Temporary

Settlements, 50 per cent of the rental in the case of *Zemindari* land may be regarded as virtually a maximum demand. In some parts the impost falls as low as 35 and even 20 per cent and only rarely is the proportion of one-half the rental exceeded. In regard to *Ryotwari* tracts it is impossible to give any figure that would be generally representative of the Government's share. But one-fifth of the gross produce is the extreme limit, below which the incidence of the revenue charge varies greatly. About sixteen years ago the Government of India were invited in an influential signed memorial to fix one-fifth of the gross produce as the maximum Government demand. In reply to this memorial and other representations the Government of India (Lord Curzon being Viceroy) issued a Resolution in defence of their Land Revenue Policy. In it was stated that "under the existing practice the Government is already taking much less in revenue than it is now invited to exact" and "the average rate is everywhere on the down grade." This Resolution, together with the statements of Provincial Governments on which it was based, was published as a volume, it is still the authoritative exposition of the principles controlling the Land Revenue Policy of the Government of India. In a series of propositions claimed to be established by this Resolution the following points are noted—(1) In *Zemindari* tracts progressive moderation is the key-note of the Government's policy, and the standard of 50 per cent. of the assets is more often departed from on the side of deficiency than excess, (2) in the same areas the State does not hesitate to interfere by legislation to protect the interests of the tenants against oppression at the hands of the landlords, (3) in *Ryotwari* tracts the policy of long-term settlements is being extended, and the proceedings in connection with new settlements simplified and cheapened, (4) local taxation (of land) as a whole is neither immoderate nor burdensome, (5) over assessment is not, as alleged, a general or widespread source of poverty, and it cannot fairly be regarded as a contributory cause of famine. At the same time the Government laid down as principles for future guidance—(a) large enhancements of revenue, when they occur, to be imposed progressively and gradually, and not *per saltum*, (b) greater elasticity in revenue collection, suspensions and remissions being allowed according to seasonal variations and the circumstances of the people, (c) a more general resort to reduction of assessments in cases of local deterioration

Protection of the Tenants

In regard to the second of the five propositions noted above, various Acts have been passed from time to time to protect the interests of tenants against landlords, and also to give greater security to the latter in possession of their holdings. The Oudh Tenancy Act of 1886 placed important checks on enhancement of rent and eviction, and in 1900 an Act was passed enabling a landowner to entail the whole or a portion of his estate, and to place it beyond the danger of alienation by his heirs. The Punjab Land Alienation Act,

passed at the instance of Lord Curzon, embodied the principle that it is the duty of a Government which derives such considerable proportion of its revenue from the land, to interfere in the interests of the cultivating classes. This Act greatly restricted the credit of the cultivator by prohibiting the alienation of his land in payment of debt. It had the effect of arresting the process by which the Punjab peasantry were becoming the economic serfs of money-lenders. A good deal of legislation affecting land tenure has been passed from time to time in other provinces, and it has been called for more than once in Bengal where under the Permanent Settlement (in the words of the Resolution quoted above), "so far from being generously treated by the *Zemindars*, the Bengal cultivator was rack-rented, impoverished, and oppressed."

Government and Cultivator

While the Government thus interferes between landlord and tenant in the interests of the latter, its own attitude towards the cultivator is one of generosity. Mention has already been made of the great advantage to the agricultural classes generally of the elaborate systems of Land Survey and Records of Rights carried out and maintained by Government. In the Administration Report of Bombay for 1911-12, it is stated—"The Survey Department has cost the State from first to last many lakhs of rupees. But the outlay has been repaid over and over again. The extensions of cultivation which have occurred (by allowing cultivators to abandon unprofitable lands) have thus been profitable to the State no less than to the individual, whereas under a *Zemindari* or kindred system the State would have gained nothing however much cultivation had extended throughout the whole of 30 years' leases." On the other hand, the system is of advantage to the *ryots* in reducing settlement operations to a minimum of time and procedure. In the collection of revenue the Government consistently pursues a generous policy. In times of distress, suspensions and remissions are freely granted after proper inquiry.

Land revenue is now a provincial head of revenue and is not shown in the All-India accounts. It may be taken roughly at £28 million, as compared with £84 million said to have been raised annually by Aurangzebe from a much smaller Empire.

The literature on the subject is considerable. The following should be consulted by readers who require fuller information—"Land Revenue Policy of the Indian Government," 1902 (Superintendent of Government Printing), Baden Powell's "Land Systems of British India," Sir John Strachey's "India, its Administration and Progress, 1911," (Macmillan & Co.), M. Joseph Chaillev's "Administrative Problems of British India" (Macmillan & Co., 1910), and the Annual Administration Reports of the respective Provincial Governments.

EXCISE

The Excise revenue in British India is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. It is a common place amongst certain sections of temperance reformers to represent the traffic in intoxicating liquors as one result of British rule. There is, however, abundant evidence to show that in pre-British days the drinking of spirituous liquors was commonly practised and was a source of revenue.

The forms of intoxicating liquor chiefly consumed are country spirit, fermented palm juice, beer made from grain, country brands of rum, brandy, etc., locally manufactured malt beer and imported wine, beer and spirits. Country spirit is the main source of revenue, except in the Madras Presidency, and yields about two thirds of the total receipts from liquors. It is usually prepared by distillation from the Mhowra flower, molasses and other forms of unrefined sugar, fermented palm juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Administration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a special shop was annually granted. This of course was a kind of control, but it only enabled Government to impose haphazard taxation on the liquor traffic as a whole by means of vend fees. It did not enable Government to graduate the taxation accurately on the still-head duty principle nor to insist upon a standard of purity or a fixed strength of liquor. Moreover for political and other reasons the extent of control could not at first be complete. There were tribes of aborigines who regarded the privilege of making their own liquor in their private homes as a long established right and who believed that liquor poured as libations to their god should be such as had been made by their own hands. The introduction of any system amongst those peoples had to be worked very cautiously. Gradually as the Administration began to be consolidated the numerous native pot stills scattered all over the country under the crude arrangements then in force began to be collected into Central Government enclosures called Distilleries, thus enabling Government to perfect its control by narrowing the limits of supervision, and to regularize its taxation by imposing a direct still head duty on every gallon issued from the Distillery. Under Distillery arrangements it has also been possible to regulate and supervise thoroughly the manufacture of its liquor and its disposal subsequent to leaving the Distillery by means of a system of transport passes, establishment supervision, improved distribution and vend arrangements.

Various Systems

The Out-Still System may be taken to include all systems prior in order of development

to the imposition of Still-head duty. Briefly stated the stages of development have been—First farms of large tracts, Second farms of smaller areas, Third farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area, Fourth farms of similar right subject to control of means and times for distilling and the like. The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Excise Administration in most provinces of British India has progressed on uniform lines the keynote lying in attempts, where it has not been possible to work with the fixed duty system in its simplest forms, to combine the farming and fixed duty systems with the object of securing that every gallon of spirit should bear a certain amount of taxation. The Out-Still System has in its turn been superseded by either the Free-supply system or the District Monopoly system. The Free supply system is one of free competition among the licensed distillers in respect of manufacture. The right of vend is separately disposed of. The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum still-head duty revenue in the monopoly area being guaranteed to the State during the term of the lease.

The recommendations of the Indian Excise Committee of 1905-06 resulted in numerous reforms in British India, one of them being that the various systems have been or are gradually being superseded by the Contract Distillery System under which the manufacture of spirit for supply to a district is disposed of by tender, the rate of still-head duty and the supply price to be charged are fixed in the contract and the right of vend is separately disposed of. This is the system that now prevails over the greater portion of British India. The other significant reforms have been the revision of the Provincial Excise Laws and Regulations, and the conditions of manufacture, vend, storage and transport, an improvement in the quality of the spirit, an improved system of disposal of vend licenses, reductions and re distributions of shops under the guidance and control of Local Advisory Committees and gradual enhancement of taxation with a view to checking consumption.

Excise has now been made over entirely to the Provincial Governments, and the duties vary from province to province. The governing principle in fixing these rates is the highest duty compatible with the prevention of illicit distillation. In the Bombay Presidency the issue of spirit to all country spirit shops has been rationed on the basis of consumption for the year 1920-21.

From that consumption reduced to proof gallons 10 per cent is deducted in the case of shops in Bombay City and 5 per cent elsewhere and the ration is then fixed for each shop according to the issues in the corresponding month of 1920-21. This is the most important step taken by the new Government to reduce consumption. Two large distilleries in the Presidency have been placed entirely under Government management, thus partially superseding the Contract Distilling system.

Sap of the date, palmyra, and cocoanut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma the sale of shop licenses is the sole form of taxation. Country brands of rum, and so called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer for European and Eurasian consumption.

Foreign liquor is subject to an import duty at the tariff rates, which are set out in the Customs Tariff (q v). It can only be sold under a license.

Since the war Brandy and Whisky have been manufactured in considerable quantities at Baroda.

The base used is the Mhowra flower. It is drunk in big towns as a substitute for German spirit, and is excised at tariff rates.

Drugs—The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately, and bhang, or the dried leaves of the hemp plant whether male or female cultivated or unculti-

vated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possession. Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charas has been prohibited in the Bombay Presidency except Sindh from the 1st April 1922.

Opium—Opium is consumed in all provinces in India. The drug is commonly taken in the form of pills, but in some places, chiefly on social and ceremonial occasions, it is drunk dissolved in water. Opium smoking also prevails in the City of Bombay and other large towns. The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned shops. Further legislation against opium smoking in clubs and dens is now under contemplation.

The revenue from opium is derived mainly from exports of what is called provision opium to foreign countries and from the sale to Provincial Governments of excise opium for internal consumption in India. The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export to foreign countries having been stopped with effect from 7th April, 1926. In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations.

It has been decided to reduce the total of the opium exported since the calendar year 1926 by 10 per cent annually in each subsequent year until exports are totally extinguished at the end of 1935.

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This opium is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from Province to Province.

SALT.

The salt revenue was inherited by the British Government from Native rule, together with a miscellaneous transit dues. These transit dues were abolished and the salt duty consolidated and raised. There are four great sources of supply, rock salt from the Salt Range and Kohat Mines in the Punjab, brine salt from the Sambhar Lake in Rajputana, salt brine condensed on the borders of the lesser Rann of Cutch, and sea salt factories in Bombay, Madras and at the mouth of the Indus.

The Salt Range mines contains an inexhaustible supply. They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana supply chiefly comes from the Sambhar Lake where brine is extracted

and evaporated by solar heat. In the Rann of Cutch the brine is also evaporated by solar heat and the product is known as Baragara salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923. In Bombay and Madras sea water is let into shallow pans on the sea-coast and evaporated by solar heat and the product sold throughout India. In Bengal the damp climate together with the large volume of fresh water from the Ganges and the Brahmaputra into the Bay of Bengal render the manufacture of sea-salt difficult and the bulk of the supply, both for Bengal and Burma is imported from Liverpool, Germany, Aden, Bombay and Madras.

Broadly, one-half of the indigenous salt is manufactured by Government Agency, and the remainder under license and excise systems,

In the Punjab and Rajputana the salt manufactures are under the control of the Northern India Salt Department, a branch of the Commerce and Industry Department. In Madras and Bombay the manufactures are under the supervision of Local Governments. Special treaties with Native States permit of the free movement of salt throughout India, except from the Portuguese territories of Goa and Damaun on the frontiers of which patrol lines are established to prevent the smuggling of salt into British India.

From 1888-1903 the duty on salt was Rs 2-8 per maund of 82 lbs. In 1903, it was reduced to Rs 2, in 1905 to Rs 1-8-0, in 1907 to Re 1 and in 1916 it was raised to Rs 1-4-0. The successive

reductions in duty have led to a largely increased consumption, the figure rising by 25 per cent between 1903-1908. In 1922 the duty was doubled bringing it again to Rs 2-8. In 1924 it was reduced to Re 1-4-0. The duty remained at Rs 1-4-0 from March 1924 to 29th September 1931. It was raised to Rs 1-9-0 with effect from 30th September 1931. Prior to 17th March 1931, the excise duty and import duty on salt were always kept similar, but by the Indian Salt (Additional Import Duty) Act XIV of 1931, a temporary additional customs duty of $\frac{1}{2}$ annas per maund was imposed on foreign salt. In March 1933 the customs duty was reduced by 2 annas.

CUSTOMS.

The import duties have varied from time to time according to the financial condition of the country. Before the Mutiny they were five per cent, in the days of financial stringency which followed they were raised to 10 and in some cases 20 per cent. In 1875 they were reduced to five per cent, but the opinions of Free Traders, and the agitation of Lancashire manufacturers who felt the competition of the Indian Mills, induced a movement which led to the abolition of all customs dues in 1882. The continued fall in exchange compelled the Government of India to look for fresh sources of revenue and in 1894 five per cent duties were re-imposed, yarns and cotton fabrics being excluded. Continued financial stringency brought piece goods within the scope of the tariff, and after various expedients the demands of Lancashire were satisfied by a general duty of $3\frac{1}{2}$ per cent on all woven goods—an import duty on goods by sea, an excise duty on goods produced in the country. The products of the hand-loom are excluded. These excise duties are intensely unpopular in India, for reasons set out in the special article dealing with the subject. In 1910-11, in order to meet the deficit threatened by the loss of the revenue on opium exported to China, the silver duty was raised from 5 per cent to 4d an ounce, and higher duties levied on petroleum, tobacco, wines, spirits, and beer. These were estimated to produce £1 million annually.

The Customs Schedule was completely recast in the Budget of 1916-17 in order to provide additional revenue to meet the financial disturbance set up by the war. The general import tariff, which had been at the rate of 5 per cent *ad valorem* since was raised to $7\frac{1}{2}$ per cent *ad valorem*, except in the case of sugar, as India is the largest producer of sugar in the world the import duty on this staple was fixed at 10 per cent. There was also a material curtailment of the free list. The principal article of trade which was not touched was cotton manufactures. For the past twenty years the position has been that cotton twists and yarns of all kinds are free of duty while a duty at the rate of $3\frac{1}{2}$ per cent is imposed on woven goods of all kinds whether imported or manufactured in Indian mills. The Budget left the position as it stood. The Government of India would have been glad to see the tariff raised to 5 per cent without any corresponding alteration of the excises, but were over-ruled by the Cabinet on the ground that this controversial matter must come up for discussion after the war. Finally

the Budget imposed export duties on tea and jute. In the case of tea the duty was fixed at Re 1-8-0 per 100 lbs., in the case of jute the export duty on raw jute was fixed at Rs 2-4-0 per bale of 400 lbs., approximately equivalent to an *ad valorem* duty of 5 per cent, manufactured jute was charged at the rate of Rs 10 per ton on sacking and Rs 16 per ton on Hessians.

The Customs Tariff was further materially modified in the Budget for 1917-18. In the previous year an export duty on jute was imposed at the rate of Rs 2-4-0 per bale of 400 lbs. in the case of raw jute and Rs 10 per ton on sackings, and Rs 16 per ton on Hessians, these rates were doubled, with a view to obtaining an additional revenue of £500,000. The import duty on cotton goods was raised from $3\frac{1}{2}$ per cent to $7\frac{1}{2}$ per cent without any alteration in the Excise, which remained at $3\frac{1}{2}$ per cent. This change was expected to produce an additional revenue of £1,000,000. The question of the Excise was left untouched, for the reason, amongst others, that the Government could not possibly forego the revenue of £320,000, which it was expected to produce. With these changes in operation the revenue from Customs in 1920-21 was Rs 32,37,29,000.

The Customs Tariff was further raised in the Budget of 1921-22 in order to provide for the big deficit which had then to be faced. The general *ad valorem* duty was raised from $7\frac{1}{2}$ to 11 per cent, a special duty was levied on matches of 12 annas per gross boxes in place of the existing *ad valorem* duty of $7\frac{1}{2}$ per cent. The duties on imported liquors was raised to 8 annas per degree of proof per gallon, the *ad valorem* duty of $7\frac{1}{2}$ per cent was raised to 20 per cent in the case of certain articles of luxury, the import duty on foreign sugar was increased from 10 to 15 per cent and the duty on manufactured tobacco was raised by 50 per cent. The Customs duties were further increased in the Budget of 1922-23. The Government proposals in this direction have been described in an early passage. They were to raise the general Customs duty from 11 to 15 per cent, the cotton excise duty from $3\frac{1}{2}$ per cent to $7\frac{1}{2}$ per cent, the duty on sugar from 15 to 25 per cent, a duty of 5 per cent on imported yarn, a rising duty on machinery, iron, steel and railway material from $2\frac{1}{2}$ per cent to 10 per cent together with the general duty on articles of luxury from 20 per cent to 30 per cent. In the course of the passage of the Budget through the Legislatures the cotton excise duty was

retained at $3\frac{1}{2}$ per cent, the duty on machinery was retained at $2\frac{1}{2}$ per cent and the duty on cotton piece-goods at 11 per cent, the other increases being accepted. In 1925 the Cotton Excise duties were finally abolished. Full details with regard to the customs duty are set out in the section on Indian Customs Tariff (qv). The Customs duties have been repeatedly raised in recent Budgets both as a protective measure and for revenue purposes. The latest duties will be found in detail in the Financial Section of the Year Book. The estimated revenue from the Customs in 1934-35 is Rs 44,62 lakhs.

The Senior Collectors were Covenanted Civilians specially chosen for this duty, before the introduction of the Imperial Customs Service in

1906. Since that date, of the five Collectorship at the principal ports (Calcutta, Bombay, Madras, Rangoon, and Karachi) three are ordinarily reserved for Members of the I C S (i.e., "Covenanted Civilians"). The other two are reserved for members of the Imperial Customs Service.

Assistant Collectors in the Imperial Customs Service are recruited in two ways (a) from members of the Indian Civil Service—3 vacancies, and (b) by the Secretary of State—19 vacancies. There are in addition a few Gazetted Officers in what is known as the Provincial Customs Service. These posts are in the gift of the Government of India, and are usually filled by promotion from the subordinate (in the Government sense of the word) service. The "subordinate" staff is recruited entirely in India.

INCOME TAX.

The income tax was first imposed in India in 1860, in order to meet the financial dislocation caused by the Mutiny. It was levied at the rate of four per cent or a little more than $9\frac{1}{4}$ d in the pound on all incomes of five hundred rupees and upwards. Many changes have from time to time been made in the system, and the present schedule was consolidated in the Act of 1886. This imposed a tax on all incomes derived from sources other than agriculture which were exempted. On incomes of 2,000 rupees and upwards it fell at the rate of five pies in the rupee, or about $6\frac{1}{4}$ d in the pound, on incomes between 500 and

2,000 rupees at the rate of four pies in the rupee or about 5d in the pound. In March 1903 the minimum taxable income was raised from 500 to 1,000 rupees. The income tax schedule was completely revised, raised, and graduated in the Budget of 1916-17 in the general scale of increased taxation imposed to meet the deficit arising out of war conditions.

Since then the process has been almost continuous and in every financial difficulty the authorities turn to the Income Tax as a means of raising fresh revenue. The last revision was in the Supplementary Finance Bill of 1931, when the scale was fixed as follows—

(RATES OF INCOME-TAX)

A In the case of every individual, Hindu undivided family, unregistered firm and other association of individuals not being a registered firm or company—

	RATE
(1) When the total income is less than Rs 2,000	(Vide Footnote)
(2) When the total income is Rs 2,000 or upwards, but is less than Rs 5,000	Six pies in the rupee
(3) When the total income is Rs 5,000 or upwards, but is less than Rs 10,000	Nine pies in the rupee
(4) When the total income is Rs 10,000 or upwards, but is less than Rs 15,000	One anna in the rupee
(5) When the total income is Rs 15,000 or upwards, but is less than Rs 20,000	One anna and four pies in the rupee
(6) When the total income is Rs 20,000 or upwards, but is less than Rs 30,000	One anna and seven pies in the rupee
(7) When the total income is Rs 30,000 or upwards, but is less than Rs 40,000	One anna and eleven pies in the rupee
(8) When the total income is Rs 40,000 or upwards, but is less than Rs 100,000	Two annas and one pie in the rupee
(9) When the total income is Rs 100,000 or upwards	Two annas and two pies in the rupee
B In the case of every company and registered firm whatever its total income	Two annas and two pies in the rupee

N B—Additional tax (Sur-charge) for the financial year—

1931-32	at 12½ per cent
	and
1932-33	at 25 per cent

over the rates prescribed by the Indian Finance Act, 1931, except in cases of income between Rs 1,000 to Rs 1,999

Tax at 2 pies on incomes between Rs 1,000 to Rs 1,999 for the year 1931-32 and

Tax at 4 pies for the year 1932-33 on the same income

The surcharge was continued in the budget of 1933-34, as resolved by the assembly the rate on incomes between Rs 1,000 & Rs 1,500 was reduced from 4 pies to 2 pies. The surcharge continues in 1934-35

RATES OF SUPER-TAX

In respect of the excess over thirty thousand of total income —

	RATE
(1) in the case of every company—	
(a) in respect of the first twenty thousand rupees of such excess	Nil
(b) for every rupee of the remainder of such excess	One anna in the rupee
(b) for every rupee of the remainder of such excess	One anna in the rupee
(2) (a) in the case of every Hindu undivided family —	
(i) in respect of the first forty five thousand rupees of such excess	One anna and three pias in the rupee
(ii) for every rupee of the next twenty-five thousand rupees of such excess	Nil
(b) in the case of every individual, unregistered firm and other association of individuals not being a registered firm or a company —	
(i) for every rupee of the first twenty thousand rupees of such excess	Nine pias in the rupee
(ii) for every rupee of the next fifty thousand rupees of such excess	One anna and three pias in the rupee
(c) in the case of every individual, Hindu undivided family, unregistered firm and other association of individuals not being a registered firm or a company	
(i) for every rupee of the next fifty thousand rupees of such excess	One anna and nine pias in the rupee
(ii) for every rupee of the next fifty thousand rupees of such excess	Two annas and three pias in the rupee
(iii) for every rupee of the next fifty thousand rupees of such excess	Two annas and nine pias in the rupee
(iv) for every rupee of the next fifty thousand rupees of such excess	Three annas and three pias in the rupee
(v) for every rupee of the next fifty thousand rupees of such excess	Three annas and nine pias in the rupee
(vi) for every rupee of the next fifty thousand rupees of such excess	Four annas and three pias in the rupee
(vii) for every rupee of the next fifty thousand rupees of such excess	Four annas and three pias in the rupee
(viii) for every rupee of the next fifty thousand rupees of such excess	Five annas and three pias in the rupee
(ix) for every rupee of the next fifty thousand rupees of such excess	Five annas and nine pias in the rupee
(x) for every rupee of the remainder of such excess	Six annas and three pias in the rupee

The head of the Income-Tax Department of a province is the Commissioner of Income-tax who is appointed by the Governor-General in Council. The rest of the income-tax staff in a province are subordinate to him and they are appointed and dismissed by him. His power of appointment and dismissal is, under section 5 (4) subject to the control of the Governor-General in Council, but the Governor-General in Council exercises this control through the local Government. The estimated yield of Income tax in 1934-35 is Rs 17.25 lakhs.

HISTORY OF THE COINAGE

The Indian mints were closed to the unrestricted coinage of silver for the public from the 26th June 1893, and Act VIII of 1893, passed on that date, repealed Sections 19 to 26 of the Indian Coinage Act of 1879, which provided for the coinage at the mints for the public of gold and silver coins of the Government of India. After 1893 no Government rupees were coined until 1897, when, under arrangements made with the Native States of Bhopal and Kashmir, the currency of those States was replaced by Government rupees. The re-coinage of these rupees proceeded through the two years 1897 and 1898. In 1899 there was no coinage of rupees, but in the following year it seemed that coinage was necessary, and it was begun in February 1900, the Government purchasing the silver required, and paying for it mainly with the gold accumulated in the Paper Currency

Reserve. In that and the following month a crore of rupees was coined and over 17 crores of rupees in the year ending the 31st March 1910. Including the rupees issued in connection with the conversion of the currencies of Native States. From the profit accruing to Government on the coinage it was decided to constitute a separate fund called the Gold Reserve Fund as the most effective guarantee against temporary fluctuations of exchange. The whole profit was invested in sterling securities, the interest from which was added to the fund. In 1906 exchange had been practically stable for eight years, and it was decided that of the coinage profits devoted to this fund, six crores should be kept in rupees in India, instead of being invested in gold securities. The Gold Reserve Fund was then named the Gold Standard Reserve. It was ordered in 1907 that only

one-half of the coinage profits should be paid into the reserve, the remainder being used for capital expenditure on railways

Gold.

Since 1870 there had been no coinage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891-92

A Royal proclamation was issued in 1918 establishing a branch of the **Royal Mint at Bombay**. It stated—Subject to the provision of this proclamation the Bombay Branch Mint shall for the purpose of the coinage of gold coins be deemed to be part of the Mint, and accordingly, (a) the Deputy Master of the Bombay Branch Mint shall comply with all directions he may receive from the Master of the Mint whether as regards the expenditure to be incurred or the returns to be made or the transmission of specimen coins to England or otherwise and (b) the said specimen coins shall be subject to the trial of the pxx under section 12 of the Coinage Act, 1870, so that they shall be examined separately from the coins coined in England or at any other branch of the Mint, and (c) the Deputy Master of the Bombay Branch Mint and other officers and persons employed for the purpose of carrying on the business of the Branch Mint may be appointed, promoted, suspended and removed and their duties assigned and salaries awarded and in accordance with the provisions of section 15 of the Coinage Act, 1870. Pending the completion of the arrangements at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign. Altogether 2,109,703 pieces of these new coins of the nominal value of Rs 3,16,45,545, were struck at the Bombay Mint. The actual coinage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff.

The Indian Currency Act of 1927 established a new ratio of the rupee to gold. It established this ratio at one shilling and six pence by enacting that Government would purchase gold at a price of twenty-one rupees three annas ten ples per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London. A rate of one shilling and five pence forty-nine sixths was notified as Government's selling rate for sterling to meet these obligations. Great Britain and India left the gold standard in September 1931 but the buying and selling rates for sterling are still maintained.

With the receipt of large consignments of gold, the Bombay Mint made special arrangements for the refining of gold by the chlorine process and at the end of the year 1919-20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold

Silver

The weight and fineness of the silver coins are —

	FINE SILVER grains	ALLOY grains	TOTAL grains
Rupee	165	15	180
Half-rupee	82½	7½	90
Quarter-rupee or 4-anna piece	41½	3¾	45
Eighth of a rupee or 2 anna piece	20¾	1¾	22½

One rupee = 165 grains of fine silver

One shilling = 80½ grains of fine silver

One rupee = shillings 2 0439

Copper and Bronze

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835 and into the Madras and Bombay Presidencies by Act XXII of 1844

The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows —

	Grains troy
Double pice or half-anna	200
Pice or quarter-anna	100
Half-pice or one eighth of an anna	50
Pie being one-third of a pice or one-twelfth of an anna	33½

The weight and dimensions of bronze coins are as follows —

	Standard weight in grains troy	Diameter in millimetres
Pice	75	25 4
Half-pice ..	37½	21 15
Pie .	25	17 45

Nickel

The Act of 1906 also provides for the coinage of a nickel coin. It was directed that the nickel one-anna piece should thenceforth be coined at the Mint and issue. The notification also prescribed the design of the coin, which has a wavy edge with twelve scollops, the greatest diameter of the coin being 21 millimetres and its least diameter 19 8 millimetres. The desirability of issuing a half-anna nickel coin was considered by the Government of India in 1909 but after consultation with Local Governments it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin. The two-anna nickel coin was introduced in 1917-18, and the four-anna and eight-anna nickel coins in 1919. The eight-anna nickel is now being withdrawn from circulation.

The Currency System.

The working of the Indian currency system which has commanded a large amount of public attention since 1893, was forced to the front in 1920, as the result of measures taken to stabilise the exchange value of the rupee after the fluctuations caused by the war. These assumed so

much importance, and they continue to bulk so largely in all Indian economic questions, that we propose to give here a short summary of the Indian currency system in non-technical language.

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallic system, with silver as the standard of value and a circulation of silver rupees and notes based thereon. But with the opening of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily *receded* in value. The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Government of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises. As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable increase in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange.

Closing the Mints—The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report. It was decided in 1893 to close the mints to the unrestricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupees to the circulation. Rupees remained unlimited legal tender and formed the standard of value for all internal transactions. Since Government refused, and no one else had the power to coin rupees, as soon as circumstances led to an increased demand for rupees, the exchange value of the rupee began to rise. By 1898 it had approached the figure of one shilling and four pence. Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve. These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy.

II THE NEW STANDARD.

The Fowler Committee rejected the proposal to re-open the Mints to the free coinage of silver. They proposed that the exchange value of the rupee should be fixed at one shilling and four pence, or fifteen rupees to the sovereign. They further suggested that the British sovereign should be made a legal tender and a current coin in India, that the Indian mints should be thrown open to the unrestricted coinage of gold, so that the rupee and the sovereign should freely circulate side by side in India. The goal which the Committee had in view was a gold standard supported by a gold currency. Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and four pence, save by the fraction which covered the cost of shipping gold to India. But if the balance of trade turned against India, it was still possible for the rate of exchange to fall. To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set aside in a special reserve, to be called the Gold Standard Reserve. Inasmuch as the cost of coining rupees was approximately elevenpence halfpenny, and they were sold to the public at

one and four pence, the profits were considerable, they were to have been kept in gold, so as to be freely available when required for the support of exchange.

A 16 pence Rupee—The Government of India professed to accept all the recommendations of the Fowler Committee, actually only a portion of them was put in practice. The official rate of exchange was fixed at one and fourpence. The sovereign and the half sovereign were declared unlimited legal tender in India. But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency. The gold mint was not set up. The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities. These practices gave rise to conditions which were never contemplated by the Fowler Committee. Reference has been made to the Home Charges of the Government of India which at the time amounted to about seventeen millions sterling a year. These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London. These Bills when presented

in India were cashed at the Government Treasuries. Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities. In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it, than to ship the gold to India. Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills. Considerable quantities of sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces.

Sterling Remittance—This system worked until 1907-08. A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak. In November this was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve. There had been very heavy coining of rupees in India and the amount in the Reserve was ample. But the Reserve was in securities not in gold, and was therefore not in a

liquid form, nor was the time an opportune one for the realisation of securities. Moreover the authorities did not realise that a reserve is for use in times of emergency. It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm up, meantime he would finance himself by drawing on the funds in the Gold Standard Reserve. But it was apparent that the stoppage of the sales of Councils was not enough, there was an insistent demand for the export of gold, or the equivalent of gold. The Government of India refused and exchange fell to one and threepence twenty-three thirds. Ultimately the authorities had to give way. It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirds, representing gold export point, and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve. Bills to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered. Thus were gradually evolved the main principles of the Indian currency system. It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London, it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation, some people invented for it the novel term of the gold *exchange standard*, a term unknown to the law of India. It was described by one of the most active workers in it as a "limping standard."

III THE CHAMBERLAIN COMMITTEE

This brings us to the year 1913. There were many critics of the system. Some hankered for a return to the open mints, others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country. But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee. But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office. These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India, at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure, at the transfer of a solid block of the Paper Currency Reserve from India to London, at the holding of a portion of the Gold Standard Reserve in silver in order to facilitate the coining of rupees, and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the require-

ments of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high. All these things were done, it was contended, on the *obiter dicta* of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme. The India Office for long ignored this criticism, until it was summarised in a series of articles in *The Times*, and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of silver for coining purposes from Messrs. Montagu & Co., instead of through their recognised and constituted agents, the Bank of England. The Government could no longer afford to stand aloof and yet another Currency Committee was appointed under the chairmanship of Mr Austen Chamberlain. This is known as the Chamberlain Committee.

New Measures—The conclusions of this Commission were that it was unnecessary to support the Gold Standard by a gold currency, that it was not to the advantage of India to encourage the internal use of gold as currency, that the internal currency should be supported by a thoroughly adequate reserve of gold and sterling, that no limit should be fixed to the amount of the Gold Standard Reserve, one half of which should be held in gold, that the silver branch of the Gold Standard Reserve should be abolished, that Reverse Councils should be sold on demand, that the Paper Currency should be made more elastic, and that there should be two Indian representatives out of three on the Finance Committee of the India Office. The Com-

mittee dealt conclusively with the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilty, but do not do it again." They gave a passing commendation to the idea of a State Bank. Sir James Begg, the only Indian banker on the Committee, appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when increases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign.

IV. CURRENCY AND THE WAR

The report was in the hands of the Government of India shortly before the outbreak of the war. Some immediate steps were taken, like the abolition of the silver branch of the Gold Standard Reserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the war broke out. The early effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sale of Reverse Councils, 68,707,000, being sold up to the end of January 1915. There were withdrawals from the Post Office Savings Banks, and a net sum of Rs 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold. Notes to the extent of Rs 10 crores were presented for encashment and the Government were obliged to suspend the issue of gold. But these were transient features and did not demand a moratorium, confidence was soon revived and Exchange and the Note issue continued strong. The difficulties which afterwards arose were from causes completely unanticipated by all students of the Indian currency. They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries, a heavy expenditure in India on behalf of the British Government, and a phenomenal rise in the price of silver. If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India. It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom, chiefly Treasury Bills, and the issue of coined

rupees. But simultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27½ pence per standard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within any limits and to provide a sufficiency to meet the demand.

Rise in Exchange—The measures adopted by the Government of India in these emergencies were to bring exchange under rigid control, confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council Bills, so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence—

Date of Introduction	Minimum Rate for Immediate Telegraphic Transfers
3rd January 1917	1 4½
28th August 1917	1 5
12th April 1918	1 6
13th May 1919	1 8
12th August 1919	1 10
15th September 1919	2 0
22nd November 1919	2 2
12th December 1919	2 4

V. THE 1919 COMMITTEE.

The effect of these measures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the rupee at one and fourpence. The war being over, a Committee was appointed to advise in regard to the future of Indian exchange and

currency. It sat in 1919 and reported towards the end of the year. Its main recommendations are summarised below—

(1) It is desirable to restore stability to the rupee and to re-establish the automatic working of the Indian currency system.

(vi) The reduction of the fineness or weight of the rupee, the issue of 2 or 3-rupee coins of lower proportional silver content than the present rupee, or the issue of a nickel rupee, are expedients that cannot be recommended.

(vii) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currency from the risk of becoming inconvertible cannot be entertained.

(viii) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benefit.

(ix) Indian trade is not likely to suffer any permanent injury from the fixing of exchange at a high level.

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fail to adjust themselves with equal rapidity to the lower level of prices, then it might be necessary to consider the problem afresh.

(x) The development of Indian industry would not be seriously hampered by a high rate of exchange.

(xi) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into consideration.

(xii) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control.

(xiii) The balance of advantage is decidedly on the side of fixing the exchange value of the rupee in terms of gold rather than in terms of sterling.

(xiv) The stable relation to be established between the rupee and gold should be at the rate of Rs 10 to one sovereign, or, in other words at the rate of one rupee for 11 30,016 grains of fine gold, both for foreign exchange and for internal circulation.

(xv) If silver rises for more than a brief period above the parity of 2s (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue. Such measures might be (a) reduction of sale of Council Bills; (b) abstention from purchase of silver; (c) use of gold to meet demands for metallic currency. If it should be absolutely necessary to purchase silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a loss.

(xvi) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term. There is no obligation to sell drafts to meet all trade demands, but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so, subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sterling cost of shipping gold to India. At present this rate will vary, but when sterling is again equivalent to gold, it will remain uniform.

The Government of India should be authorised to announce, without previous reference to the Secretary of State on each occasion, their readiness to sell weekly a stated amount of Reverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United Kingdom.

(xvii) The import and export of gold to and from India should be free from Government control.

(xviii) The statutory minimum for the metallic portion of the Paper Currency Reserve should be 40 per cent of the gross circulation.

As regards the fiduciary portion of the reserve, the holding of securities issued by the Government of India should be limited to 20 crores. The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's maturity, issued by Government within the British Empire.

The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s to the rupee. The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years.

(xix) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange.

Minority Report—The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note issue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form. In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase silver for coinage purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold all other recommendations are subsidiary thereto. But in this they were not unanimous, Mr Dadiba Dalal, of Bombay, appended a minority report in which he urged the adoption of the following course—

(a) The money standard in India should remain unaltered, that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1.

(b) Free and unfettered imports and exports by the public of gold bullion and gold coins.

(c) Free and unfettered imports and exports by the public of silver bullion and silver coins.

(d) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender.

(e) As long as the price of silver in New York is over 92 cents, Government should not manufacture silver rupees containing 10 per cent fine silver.

(f) As long as the price of silver is over 92 cents Government should coin 2 rupee silver coins of reduced fineness compared with that of the present silver rupee and the same to be unlimited legal tender.

(g) Government to sell Council Bills to competitive tenders for the amount defined in the Budget as required to be sent to the Secretary of State.

The Bill to regulate to show under separate heading the amount of Council Bills drawn for Home Charges, for Capital Outlay and Discharge of Debt. Council Bills to be sold for Government requirement only and not for trade purposes, except for the purpose of cotton in the next year of the year 1910.

(h) "Reverse" drafts to be sold only at 1s. 2d. The proceeds of "Reverse" drafts to be kept apart from all other Government funds and not to be utilised for any purpose except to meet drafts drawn by the Secretary of State at a rate not below 1s. 1d. 2d. per rupee.

VI. THE TWO SHILLING RUPEE

The fundamental recommendation of the Committee was that the rupee should be limited to gold and not to sterling, in view of the decline in the value of sterling, that it should be fixed at the rate of two shillings instead of the standard value, one and fourpence. All other recommendations were ancillary to this. But it is very important to bear in mind the twofold problem which confronted the Committee. It would be quite easy to fix any low rate provided the paper currency were made inconvertible, or the rupee debased to such a point that the Government in providing rupee currency, were independent of the price of silver. But if the convertibility of the rupee were to be maintained, and if the rupee were not to be debased, it was essential that the new ratio should be one at which the Government could reasonably rely on purchasing, without loss the silver necessary to meet the heavy demands for rupee in India. For reasons set out in the Report, the Committee came to the conclusion that the Government could reckon on purchasing silver for coining at a little under two shillings gold, and that powerfully influenced them in fixing the new ratio at two shillings gold.

The Report Adopted—The Currency Committee's Report was signed in December 1910, but it was not until February 1920 that action was taken thereon. In the first week of that month a Notification was issued in India accepting the principal recommendations in the Report and notifying that the necessary official action would be taken thereon. This action covered a wide field, but for the sake of clarity in this narrative we shall concentrate on the main issue, the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade. That may be summarised in a sentence. A policy which was avowedly adopted to secure fixity of exchange produced the greatest fluctuations in the exchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hundreds of big traders to the verge of bankruptcy.

Financial Confusion—This result was produced by many causes. It has been explained above that the essential features of the Indian currency system are the free sales of Council Bills at gold export point in London to prevent exchange from rising above the official standard and the sale of Reverse Councils in India at gold export point to prevent exchange from falling below the official standard. Now when the

Currency Report was issued the Indian exchanges were practically at two shillings gold. But the recommendation of the Report on the taking of official action, there was a sensation of fall in the sterling exchange, as measured in dollars, the dollar sterling rate, inasmuch as America was the only free gold market, being the dominating factor in the situation. Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification was issued. The Currency Committee's Report was issued, the Indian exchanges were two shillings and fourpence, and weak at that, the gold rate was about two shillings ninepence. There was an immediate and profitable demand for Reverse Councils, to the advantage of this like rate of exchange the market rate jumped up to two shillings eight pence.

Effect of the Rise—The effect of a rise in exchange has been well described in the words of the Currency Committee's Report, "It is that a rising exchange stimulates imports and impedes exports, the effect of a falling exchange is the reverse."

Now when the official notification of the two shilling rupee was made the Indian export trade was weak. The great consuming markets of Great Britain and America were glutted with Indian produce. The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit. The only Indian staples which were in demand were foodstuffs, and as the rains of 1920 failed over a wide area, the Government were not able to lift the embargo on the export for foodstuffs, save to a limited extent in the case of wheat. On the other hand, the import trade was strong. Orders had been placed for machinery and other manufactured goods during the war and after the Armistice for delivery at the discretion of manufacturers. These began to come forward.

Difficulties Accentuated—In accordance with the principles laid down by the Currency Committee these difficulties were accentuated by the action of Government in raising exchange by an administrative act. The weak export trade was almost killed. At the same time the temptation of a high exchange gave powerful stimulus to the import trade and orders were placed for immense quantities of manufactured goods, in which textiles filled a important place. Afterwards other forces intervened which accentuated the difficulties of the situation. There was a severe commercial crisis in Japan and this

checked the export of Indian cotton. Japan is the largest buyer of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trade was severely shaken and stocks accumulated at a great rate. Even before the 1920 crop came into the market the stocks in Bombay were double those in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabilisation of exchange at the high ratio attempted a hopeless proposition.

Confession of Failure—Government struggled long against these conditions in the desperate hope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the sterling-dollar exchange, which at one time took the rate for Reverse Councils to two shillings tenpence half penny. They sold two millions of Reverse Councils at a price, then five millions, then dropped down to a steady million. But their policy only aggravated the situation. In addition to arresting the export trade and stimulating the import trade at a time when the precise converse was demanded, their action created an artificial movement for the transfer of capital from India to England. Large war profits accumulated in India since 1914 were hurriedly liquidated and transferred to England. Then the difference between the Reverse Council rate and the market rate, which on some occasions was several pence, induced gigantic speculations. The Exchange Banks set aside all their available resources for the purpose of bidding for Bills, and at once sold their allotments at substantial profits. Considerable groups of speculators pooled their resources and followed the same course. In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The biddings assumed such proportions that it was necessary to put up fifty lakhs of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy speculators. Various expedients were tried to remedy the situation but without the slightest effect.

Sterling for Gold—The first definite break from the recommendations of the Currency Committee came at the end of June, when the Government announced the instead of trying to stabilise the dollar-sterling rate became par. The effect of this was to alter the rate at which Reverse Councils were sold from the fluctuating rate involved in the fluctuations of dollar-sterling exchange to a fixed sterling rate, namely, one shilling elevenpence nineteen-thirty seconds. But this had little practical effect. The biddings for Reverse Councils continued on a very big scale, and the market rate for exchange was always twopence or threepence below the Reverse Council rate. This practice continued until the end of September, when it was officially declared

that Reverse Councils would be stopped altogether. Exchange immediately slumped to between one and sixpence and one and sevenpence, and it continued to range between these narrow points until the end of the year. The market made its own rate, it made a more stable rate than the efforts of Government to attain an administrative stability.

Other Measures—Apart from the effort to stabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abandonment of the import duty on silver, always a sore point with Indian bullionists. Legislative action was taken to alter the official ratio of the sovereign from fifteen to one to ten to one, due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at fifteen rupees. As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive smuggling of sovereigns into India to take advantage of the premium. These measures were adopted to give greater elasticity to the Note Issue. Under the old law the invested proportion of the Note Issue was fixed by statute and it could be altered only by altering the law or by Ordinance. An Act was passed fixing the metallic portion of the Paper Currency Reserve at fifty per cent. of the Note Issue, the invested portion being limited to Rs. 20 crores in Indian securities and the balance in British securities of not more than twelve months' currency. The invested portion of the Paper Currency Reserve was revalued at the new rate of exchange, and an undertaking was given that the profits on the Note Issue would be devoted to writing off the depreciation, as also would be the interest on the Gold Standard Reserve when the total had reached £40 millions. Further, in order to give greater elasticity to the Note Issue, power was taken to issue its 5 crores of emergency currency in the busy season against commercial bills. These measures, save the alteration of the ratio, were generally approved by the commercial public.

Results—It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising exchange impedes exports and stimulates imports, a falling exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted. At the moment when it was sought suddenly and violently to raise the rate of exchange by the introduction of the new ratio of two shillings gold, the export trade was weak and the import trade in obedience to the delivery of long deferred orders was strong. The very principle enunciated by the Currency Committee wrecked the policy which they recommended. The rising rate of exchange scotched the weak export trade and gave a great stimulus to imports. Unexpected forces, such as the financial crisis in Japan, the lack of buying power on the Continent, and the movement for the transfer of capital from India to England at the

artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If left alone, the natural fall in exchange would have tended to correct the adverse balance of trade, the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand, importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55 millions of Reserve Councils before abandoning

their effort to stabilise exchange at the new ratio, the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India—was Rs 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamia—this expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

VII COMMISSION OF 1925-26.

These unfortunate experiments induced a period of great caution in dealing with Indian currency. The currency quacks having had their way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, followed. Left alone Exchange established itself round about the old ratio of fifteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Imperial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater elasticity was established in the currency by the power to issue emergency currency up to Rs 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now purchases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own strength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Strakosch as the chief gold expert. The personnel of the Committee was strongly criticised in India, on the ground that the Indian membership was inadequate, and that the individuals selected were not authoritative, a resolution was passed in the

Assembly hostile to the whole body. Nevertheless the Committee arrived in India in November 1925 and took evidence in Delhi, Bombay and Calcutta. It sailed for England in February 1926, and resumed its hearings in London, and reported on July 1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and they are textually reproduced in order that they may be above question—

(i) The ordinary medium of circulation should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.

(ii) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.

(iii) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.

(iv) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.

(v) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.

(vi) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.

(vii) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.

(viii) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is made as to the form of the note.

(ix) An obligation should be imposed by statute on the Bank to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required

(x) The conditions which are to govern the sale of gold by the Bank should be so framed as to free it in normal circumstances from the task of supplying gold for non-monetary purposes. The method by which this may be secured is suggested

(xi) The legal tender quality of the sovereign and the half-sovereign should be removed

(xii) Government should offer "on tap" savings certificates redeemable in 3 or 5 years in legal tender money or gold at the option of the holder

(xiii) The paper currency should cease to be convertible by law into silver coin. It should, however, be the duty of the Bank to maintain the free interchangeability of the different forms of legal tender currency, and of the Government to supply coin to the Bank on demand

(xiv) One rupee notes should be re-introduced and should be full legal tender

(xv) Notes other than the one-rupee note should be legally convertible into legal tender money, *i.e.*, into notes of smaller denomination or silver rupees at the option of the currency authority

(xvi) No change should be made in the legal tender character of the silver rupee

(xvii) The Paper Currency and Gold Standard Reserves should be amalgamated, and the proportions and composition of the combined Reserve should be fixed by statute

(xviii) The proportional reserve system should be adopted. Gold and gold securities should form not less than 40 per cent of the Reserve, subject to a possible temporary reduction, with the consent of Government, on payment of a tax. The currency authority should strive to work to a reserve ratio of 50 to 60 per cent. The gold holding should be raised to 20 per cent of the Reserve as soon as possible and to 25 per cent within ten years. During this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape. Of the gold holding at least one-half should be held in India.

(xix) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years

(xx) The balance of the Reserve should be held in self-liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years

(xxi) A figure of Rs 50 crores has been fixed as the liability in respect of the contractibility of the rupee circulation. Recommendations are made to secure that an amount equal to one-fifth of the face value of any increase or decrease in the number of silver rupees in

issue shall be added to or subtracted from this liability, and the balance of profit or loss shall accrue to or be borne by the Government revenues

(xxii) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department

(xxiii) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be left free, at its discretion, to employ such method or methods of remittance as it may find conducive to smooth working

(xxiv) During the transition period the Government should publish a weekly return of remittances made. A trial should be made of the system of purchase by public tender in India

(xxv) The cash balances of the Government (including any balances of the Government of India and of the Secretary of State outside India), as well as the banking reserves in India of all banks operating in India, should be centralised in the hands of the Reserve Bank. Section 23 of the Government of India Act should be amended accordingly

(xxvi) The transfer of Reserve assets should take place not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931

(xxvii) During the transition period the currency authority (*i.e.*, the Government until the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange. This obligation should be embodied in statutory form, of which the outline is suggested

(xxviii) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 1s 6d

(xxix) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel, should be on sale at post offices

(xxx) Measures should be taken to promote the development of banking in India

(xxxi) Every effort should be made to remedy the deficiencies in the existing body of statistical data

A Minute of Dissent—Whilst all the members of the Commission signed the report, one of their number, Sir Purshotamdas Thakordas, did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that their efforts were emasculated by successive Secretaries of State, who had in view some which was often called the Gold

convertibility of the Note Issue Wisely, it took the former alternative, the price of Council Drafts followed the price of silver. The effect of this would have been transitory, but for the attempt in 1920, on the advice of the Babington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all gold prices were crashing. It is easy to be wise after the event but if the Government had followed silver down, as it followed silver up, there is no room to doubt that the rupee would have returned to its 'permanent' ratio with no more disturbance than was inevitable under war conditions. However, this was not done. The vain effort to stabilise the new ratio was abandoned in September, 1920, and the two shilling rupee has since been a legal fiction. Left free from administrative action, the rupee fell below one shilling and threepence sterling and one shilling gold in 1921. Since under the influence of good harvests, it has climbed upwards, and has been in the neighbourhood of one shilling and sixpence gold for the past twelve months. But it is not always realised in London that under these vicissitudes the Indian standard has legally perished. In the words of the report, 'The stability of the gold value of the rupee is thus based upon nothing more substantial than a policy of the Government, and at present that policy can be found defined in no notification or undertaking by the Government. It has to be implied from the acts of the Government in relation to the currency, and those acts are subject to no statutory regulation or control.'

The responsibility remitted to the Commission was not therefore the mere stabilisation of the rupee, but the establishment of a standard which would command reasoned confidence in India, to link the rupee to that standard, and to provide for its statutory control, automatic working and stability, to bring the control of currency and of credit under a single authority and to free the Indian currency and exchange system from the dominance of the silver market. In short, it was to establish the rule of law in place of the practice of administrative discretion.

Scheme for Gold Currency—In the course of their inquiries in India the Commission had placed before them a scheme for the immediate establishment of a gold bullion standard, and its early conversion into the gold standard supported by the gold currency which a large body of Indian opinion has insistently demanded. The scheme was presented by the officials of the Finance Department, but it is known to be the work of the Finance Member, Sir Basil Blackett, whose work in India is of the greatest value.

The essential features of this Scheme were the undertaking of a statutory obligation by Government to buy and sell gold bullion in 400 oz bars, as soon as sufficient gold was available to put a gold coin in circulation, after a period tentatively fixed at five years to undertake to give gold coin in exchange for notes and rupees, and after a further period, also tentatively fixed at five years, make the silver rupee legal tender only for sums up to a small fixed amount. The scheme involved the

disposal of 200 crores of silver rupees, or 687 million fine ounces, in ten years, the acquisition in all of £103 millions of gold, and the establishment of credits in London or New York. The cost was estimated at one and two-thirds crores of rupees per annum during the first five years and thereafter from two thirds of a crore to 1 12 crore.

This scheme is subjected by the Commission to a detailed examination, and rejected on grounds which are convincing. The main grounds for this decision are that the estimates of the amount and time of the gold demand are uncertain, and the absorption by India of this £103 millions of gold, in addition to the normal absorption for the arts, hoards, etc., would powerfully react on the supplies of credit, the rates of interest, and gold prices throughout the world. The reaction on the silver market from the dethronement of the rupee and realisation of this large quantity of silver bullion would be even more marked, with severely prejudicial effects on the silver hoards of the people of India and the exchanges with China, where India still does a large business. Moreover, the capacity to raise the required credits is doubtful, and the cost is placed by the India Office at Rs 3 crores a year.

The evidence of the highest financial authorities in London and New York established beyond doubt that it is not in the interests of India to precipitate any currency reform that would violently disturb the gold and silver markets, however desirable that reform might be in itself. Also, that whilst London, working in close harmony with New York, would strain every nerve to supply India with the funds she might require for her own development, it could hardly be expected to provide credits for a scheme which would upset the gold and silver markets. But whilst on these grounds the Commission were not able to endorse Sir Basil Blackett's scheme, there is no doubt that they were profoundly influenced by it in their own recommendations. The ultimate evolution of a policy which promises a cure for India's currency bills is therefore in large measure due to the courage and resolution with which the Finance Authorities in that country faced them.

A Gold Bullion Standard—The currency system recommended by the Commission is a gold bullion standard. They propose that an obligation shall be imposed by statute on the currency authority to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee, but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required. The essence of this proposal is "that the ordinary medium of circulation in India should remain as at present the currency note and the silver rupee, and that the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold for all purposes, but that gold should not circulate as money. It must not circulate at first, and it need not circulate ever." In breaking adrift from any idea of a sterling exchange, or gold exchange standard, the Commission were powerfully influenced by two factors—the necessity for safeguarding the

at the two shilling rate caused the Government of India large losses, and inflicted a terrible blow on trade, after it was abandoned in September, 1920, the rupee fell below one shilling and threepence sterling and one shilling gold. Thereafter, under the influence of a succession of abundant harvests it recovered. In 1923, it was one shilling and fourpence sterling, in October, 1924, one and sixpence sterling and one and four gold. With the rise in the pound to gold parity, the rupee reached one and sixpence gold in June, 1925, and has remained there.

It is not, I think, open to doubt that if the vain attempt to stabilise the rupee at two shillings had not been made in 1920, or if advantage had been taken of its return to one and four the permanent standard might have been re-established without undue disturbance. Sir Purshotamdas Thakordas asserts in his minute of dissent that "the Executive had made up their minds to work up to a one shilling and sixpence ratio long before this Commission was appointed to examine the question. Indeed, they have presented to us the issue in this regard as a *fait accompli*, achieved by them, not having hesitated by manipulation to keep up the rate even while we were in session. I cannot conceive of any parallel to such a procedure in any country."

It is to my mind a great misfortune that the opportunity of restoring the permanent ratio of one and four was not seized when it offered. Not because there is any special sanctity in a ratio as such but because there is a sanctity in the legal standard of money payments. If this had been done the Commission's scheme would have received practically unanimous support in India, as it is a violent controversy will rage round this secondary issue, obscuring the great merit of the Commission's basic recommendation a true gold standard, statutory in its composition and automatic in action, with the coalescence of the currency and credit authorities. However, we have to deal with facts as we find them. The majority of the commission base their recommendation on the "conviction, which has been formed and cumulatively reinforced during the progress of our inquiry, that at the present exchange rate of about one shilling and sixpence, prices in India have already attained a substantial measure of adjustment with those in the world at large, and as a corollary, that any change in the rate would mean a difficult period of readjustment, involving widespread economic disturbance, which it is most desirable in the interests of the people to avoid, and which would in the end be followed by no countervailing advantage." Sir Purshotamdas Thakordas, in a closely-reasoned minute of dissent, supported by a wealth of figures, avers—and to my mind with conclusive force that the adjustments are far from complete, and cannot be completed in regard to wages without disastrous labour disputes. Both sides admit that their conclusions are weakened by the unreliability of the Indian index figures.

The truth, I suggest, lies between these two contentions. There have been very substantial adjustments to one shilling and sixpence no ratio could be operative for over a year without inducing this result. But it is clear that the adjustments, especially in regard to wages in

Western India, are not complete. In the matter of the indebtedness of the agricultural classes of India—seventy per cent of the whole population there has been no adjustment, not in relation to the land revenue they pay to Government. The ratio therefore cannot be determined as a question of academic principle, but is a matter of expediency.

Here, it seems to me, the decisive factor is the economic consequence of a return to one shilling and fourpence. There is no half-way house, the rate must be either the *de facto* one of one and sixpence, or the old permanent ratio of one and fourpence. The change would be immediate not a matter of weeks or months, but of hours or minutes. There would be an immediate rise in prices of twelve and a half per cent, with a consequent reduction of real wages by that proportion, there would be convulsive disturbance of the foreign trade, there would be violent speculation. I omit all calculation of the effect of the lower rate on the finances of the Government of India, because this is an influence which has been over-valued in the past, it is infinitesimal in comparison with the industrial and commercial interests involved. No one who realises the sensitiveness of the Indian market, and the proneness to speculation, can contemplate these violent disturbances without a feeling akin to dismay. The balance of advantage lies with stabilisation at one and six, the controversy which must ensue is part of the price to be paid for the neglect to re-establish the permanent ratio when it was practicable.

The Note Issue—Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency, the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakaway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900, it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market, and it placed the Indian currency system, as occurred during the war, at the mercy of the silver market. The maintenance of the convertibility of the note into silver rupees of the present fineness is only possible so long as silver does not rise above 48s an ounce. The removal of this anomalous provision, the Commission say, is an essential step in Indian currency reform which must be taken sooner or later. "No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value." Both proposition can be accepted in their entirety.

The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself, it was always convertible on demand, but from increased facilities for the encashment of notes, beginning with the introduction of universal notes of small de-

Composition of the Currency Reserve held against the note circulation at the end of each month (In lakhs of rupees)

THE RESERVE BANK

The following Act of the Indian Legislature received the assent of the Governor General on March 6, 1934, and is known as the Reserve Bank of India Act, 1934 —

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage,

And whereas in the present disorganisation of the monetary systems of the world it is not possible to determine what will be suitable as a permanent basis for the Indian monetary system,

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures,

It is hereby enacted as follows —

(1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of this Act

(2) The Bank shall be a body corporate by the name of the Reserve Bank of India, having perpetual succession and a common seal, and shall by the said name sue and be sued

Share Capital — (1) The original share capital of the Bank shall be five crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up

(2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one register to another

(3) A shareholder shall be qualified to be registered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a shareholder in more than one register, and no person who is not—

(a) domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or

(b) a British subject ordinarily resident in India and domiciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty, or

(c) a company registered under the Indian Companies Act, 1913, or a society registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies or a scheduled bank, or a corporation or company incorporated by or under an Act of Parliament or any law for the time being in force in any part of His Majesty's Dominions the

Government of which does not discriminate in any way against Indian subjects of His Majesty, and having a branch in British India,

shall be registered as a shareholder or be entitled to payment of any dividend on any share, and no person, who, having been duly registered as a shareholder, ceases to be qualified to be so registered, shall be able to exercise any of the rights of a shareholder otherwise than for the purpose of the sale of his shares

(4) The Governor-General in Council shall, by notification in the Gazette of India, specify the parts of His Majesty's Dominions which shall be deemed for the purposes of clauses (b) and (c) of sub section (3) to be the parts of His Majesty's Dominions in which no discrimination against Indian subjects of His Majesty exists

(5) The nominal value of the shares originally assigned to the various registers shall be as follows, namely —

(a) to the Bombay register—one hundred and forty lakhs of rupees,

(b) to the Calcutta register—one hundred and forty-five lakhs of rupees,

(c) to the Delhi register—one hundred and ten lakhs of rupees

(d) to the Madras register—seventy lakhs of rupees

(e) to the Rangoon register—thirty lakhs of rupees

Provided that if at the first allotment the total nominal value of the shares on the Delhi register for which applications are received is less than one hundred and fifteen lakhs of rupees, the Central Board shall, before proceeding to any allotment, transfer any shares applied for up to a maximum nominal value of thirty-five lakhs of rupees from that register to two equal portions to the Bombay and the Calcutta register

A Committee consisting of two elected members of the Assembly and one elected member of the Council of State to be elected by non-official members of the respective Houses shall be associated with the Central Board for the purpose of making public issue of shares and making after the first allotment of shares

(6) In allotting the shares assigned to a register, the Central Board shall, in the first instance, allot five shares to each qualified applicant who has applied for five or more shares, and, if the number of such applicants is greater than one-fifth of the total number of shares assigned to the register, shall determine by lot the applicants to whom the shares shall be allotted

(7) If the number of such applicants is less than one-fifth of the number of shares assigned to the register, the Central Board shall allot the remaining shares firstly, up to the limit of one-fifth of such remaining shares, to those applicants who have applied for less than five shares, and thereafter as to the balance to the various applicants in such manner as it may deem fair and equitable, having regard to the desirability of distributing the shares and the voting rights attached to them as widely as possible

(8) Notwithstanding anything contained in sub sections (6) and (7), the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be held by Government for disposal at par to Directors seeking to obtain the minimum share qualification required under sub section (2) of section 11

(9) If, after all applications have been met in accordance with the provisions of sub sections (6), (7) and (8), any shares remain unallotted, they shall, notwithstanding anything contained in this section, be allotted to and taken up by Government, and shall be sold by the Governor-General in Council as soon as may be, at not less than par, to residents of the areas served by the register concerned

(10) The Governor-General in Council shall have no right to exercise any vote under this Act by reason of any shares allotted to him under sub section (8) or under sub section (9)

(11) A Director shall not dispose of any shares obtained from Government under the provisions of sub section (8) otherwise than by re-sale to Government at par, and Government shall be entitled to re-purchase at par all such shares held by any Director on his ceasing from any cause to hold office as Director

Increase and reduction of share capital

—(1) The share capital of the Bank may be increased or reduced on the recommendation of the Central Board, with the previous sanction of the Governor-General in Council and with the approval of the Central Legislature, to such extent and in such manner as may be determined by the Bank in General meeting

(2) The additional shares so created shall be of the nominal value of one hundred rupees each and shall be assigned to the various registers in the same proportions as the shares constituting the original share capital

(3) Such additional shares shall be fully paid up, and the price at which they may be issued shall be fixed by the Central Board with the previous sanction of the Governor-General in Council

(4) The provisions of section 4 relating to the manner of allotment of the shares constituting the original share capital shall apply to the allotment of such additional shares, and existing shareholders shall not enjoy any preferential right to the allotment of such additional shares

The Bank shall, as soon as may be, establish offices in Bombay, Calcutta, Delhi, Madras and Rangoon and a branch in London, and may establish branches or agencies in any other place in India or, with the previous sanction of the Governor-General in Council, elsewhere

The general superintendence and direction of the affairs and business of the Bank shall be entrusted to a Central Board of Directors which may exercise all powers and do all acts and things which may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Bank in general meeting

(1) The Central Board shall consist of the following Directors, namely —

(a) a Governor and two Deputy Governors, to be appointed by the Governor General in Council of the recommendations made by the Board in that behalf

(b) four Directors to be nominated by the Governor General in Council

(c) eight Directors to be elected on behalf of the shareholders on the various registers, in the manner provided in section 9 and in the following numbers, namely —

(i) for the Bombay register—two Directors
(ii) for the Calcutta register—two Directors

(iii) for the Delhi register—two Directors,
(iv) for the Madras register—one Director,
(v) for the Rangoon register—one Director, and

(d) one government official to be nominated by the Governor General in Council

(2) The Governor and Deputy Governors shall devote their whole time to the affairs of the Bank, and shall receive such salaries and allowances as may be determined by the Central Board, with the approval of the Governor General in Council

(3) A Deputy Governor and the Director nominated under clause (d) of sub-section (1) may attend any meeting of the Central Board and take part in its deliberations but shall not be entitled to vote

Provided that when the Governor is absent a Deputy Governor authorized by him in this behalf in writing may vote for him

(4) The Governor and a Deputy Governor shall hold office for such term not exceeding five years as the Governor General in Council may fix when appointing them, and shall be eligible for re-appointment

A Director nominated under clause (b) or elected under clause (c) of sub-section (1) shall hold office for five years, or thereafter until his successor, shall have been duly nominated or elected, and, subject to the provisions of section 10, shall be eligible for re-nomination or re-election

A Director nominated under clause (d) of sub-section (1) shall hold office during the pleasure of the Governor General in Council

(5) No act or proceeding of the Board shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of, the Board

Local Boards—(1) Local Board shall be constituted for each of the five areas specified in the First Schedule, and shall consist of—

(a) five members elected from amongst themselves by the shareholders who are registered on the register for that area and are qualified to vote, and

(b) not more than three members nominated by the Central Board from amongst the shareholders registered on the register for that area, who may be nominated at any time

Provided that the Central Board shall in exercising this power of nomination aim at securing the representation of territorial or economic interests not already represented, and in particular the representation of agricultural interests and the interests of co-operative banks

(2) At an election of members of a Local Board for any area, any shareholder who has been registered on the register for that area, for a period of not less than six months ending with the date of the election, as holding five shares shall have one vote and each shareholder so registered as having more than five shares shall have one vote for each five shares but subject to a maximum of ten votes, and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an employee of the Bank

(3) The members of a Local Board shall hold office until they vacate it under sub-section (6) and, subject to the provisions of section 10, shall be eligible for re-election or re-nomination, as the case may be

(4) At any time within three months of the day on which the Directors representing the shareholders on any register are due to retire under the provisions of this Act, the Central Board shall direct an election to be held of members of the Local Board concerned, and shall specify a date from which the registration of transfer from and to the register shall be suspended until the election has taken place

(5) On the issue of such direction the Local Board shall give notice of the date of the election and shall publish a list of shareholders holding five or more shares, with the dates on which their shares were registered, and with their registered addresses, and such list shall be available for purchase not less than three weeks before the date fixed for the election

(6) The names of the persons elected shall be notified to the Central Board which shall thereupon proceed to make any nominations permitted by clause (b) of sub-section (1) it may then decide to make, and shall fix the date on which the outgoing members of the Local Board shall vacate office, and the incoming members shall be deemed to have assumed office on that date

(7) The elected members of a Local Board shall, as soon as may be after they have been elected, elect from amongst themselves one or two persons, as the case may be, to be Directors representing to the shareholders on the register for the area for which the Board is constituted

(8) A Local Board shall advise the Central Board on such matters as may be generally or specifically referred to it and shall perform such duties as the Board may, by regulations, delegate to it

(1) No person may be a Director or a member of a Local Board who—

(a) is a salaried government official or a salaried official of a State in India, or

(b) is or at any time has been adjudicated an insolvent, or has suspended payment or has compounded with his creditors or

(c) is found lunatic or becomes of unsound mind, or

(d) is an officer or employee of any bank or

(e) is a director of any bank other than a bank which is a society registered or deemed to be registered under the Co-operative Societies Act, 1912 or any other law for the time being in force in British India relating to co-operative societies.

(2) No two persons who are partners of the same mercantile firm, or are directors of the same private company, or one of whom is the general agent of or holds a power of procuration from the other, or from a mercantile firm of which the other is a partner, may be Directors or members of the same Local Board at the same time

(3) Nothing in clause (a), clause (d) or clause (e) of sub section (1) shall apply to the Governor, or to a Deputy Governor or to the Director nominated under clause (d) of sub section (1) of section 8

(1) The Governor General in Council may remove from office the Governor, or a Deputy Governor or any nominated or elected Director

Provided that in the case of a Director nominated or elected under clause (b) or clause (c) of sub section (1) of section 8 this power shall be exercised only on a resolution passed by the Central Board in that behalf by a majority consisting of not less than nine Directors

(2) A Director nominated or elected under clause (b) or clause (c) of sub section (1) of section 8, and any member of a Local Board shall cease to hold office if, at any time after six months from the date of his nomination or election, he is not registered as a holder of unencumbered shares of the Bank of a nominal value of not less than five thousand rupees, or if he ceases to hold unencumbered shares of that value, and any such Director shall cease to hold office if without leave from the Governor General in Council he absents himself from three consecutive meetings of the Central Board convened under sub section (1) of section 13

(3) The Governor General in Council shall remove from office any Director, and the Central Board shall remove from office any member of a Local Board, if such Director or member becomes subject to any of the disqualifications specified in sub section (1) or sub section (2) of section 10

(4) A Director or member of a Local Board removed or ceasing to hold office under the foregoing sub sections shall not be eligible for re-appointment either as Director or as member of a Local Board until the expiry of the term for which his appointment was made

(5) The appointment, nomination or election as Director or member of a Local Board of any person who is a member of the Indian Legislature or of a local Legislature shall be void, unless, within two months of the date of his appointment, nomination or election, he ceases to such member, and, if any Director or member of a Local Board is elected or nominated as a

member of any such Legislature he shall cease to be a Director or member of the Local Board as from the date of such election or nomination, as the case may be

(6) A Director may resign his office to the Governor General in Council and a member of a Local Board may resign his office to the Central Board and on the acceptance of the resignation the office shall become vacant

(1) If the Governor or a Deputy Governor by infirmity or otherwise is rendered incapable of executing his duties or is absent on leave or otherwise in circumstances not involving the vacation of his appointment, the Governor General in Council may, after consideration of the recommendations made by the Central Board in this behalf, appoint another person to officiate for him, and such person may, notwithstanding anything contained in clause (d) of sub section (1) of section 10, be an officer of the Bank.

(2) If an elected Director is for any reason unable to attend a particular meeting of the Central Board, the elected members of the Local Board of the area which he represents may elect one of their number to take his place, and for the purposes of that meeting the substitute so elected shall have all the powers of the absent Director

(3) Where any casual vacancy in the office of any member of a Local Board occurs otherwise than by the occurrence of a vacancy in the office of a Director elected by the Local Board, the Central Board may nominate thereto any qualified person recommended by the elected members of the Local Board

(4) Where any casual vacancy occurs in the office of a Director other than the vacancies provided for in sub section (1), the vacancy shall be filled, in the case of a nominated Director by nomination, and in the case of an elected Director by election held in the manner provided in section 9 for the election of Directors

Provided that before such election is made the resulting vacancy, if any, in the Local Board and any vacancy in the office of an elected member of such Board which may have been filled by a member nominated under sub section (3) shall be filled by election held as nearly as may be in the manner provided in section 9 for the election of members of a Local Board

(5) A person nominated or elected under this section to fill a casual vacancy shall, subject to the proviso contained in sub section (4), hold office for the unexpired portion of the term of his predecessor

(1) Meetings of the Central Board shall be convened by the Governor at least six times in each year and at least once in each quarter

(2) Any three Directors may require the Governor to convene a meeting of the Central Board at any time and the Governor shall forthwith convene a meeting accordingly

(3) The Governor, or in his absence the Deputy Governor authorized by the Governor under the proviso to sub section (3) of section 8 to vote for him, shall preside at meetings of the Central Board, and, in the event of an equality of votes, shall have a second or casting vote

General Meetings—(1) A general meeting (hereinafter in this Act referred to as the annual general meeting) shall be held annually at a place where there is an office of the Bank within six weeks from the date on which the annual accounts of the Bank are closed, and a general meeting may be convened by the Central Board at any other time.

Provided that the annual general meeting shall not be held on two consecutive occasions at any one place.

(2) The shareholders present at a general meeting shall be entitled to discuss the annual accounts, the report of the Central Board on the working of the Bank throughout the year and the auditors' report on the annual balance sheet and accounts.

(3) Every shareholder shall be entitled to attend at any general meeting and each shareholder who has been registered on any register, for a period of not less than six months ending with the date of the meeting, as holding five or more shares shall have one vote and on a poll being demanded each shareholder so registered shall have one vote for each five shares, but subject to a maximum of ten votes and such votes may be exercised by proxy appointed on each occasion for that purpose such proxy being himself a shareholder entitled to vote at the election and not being an officer or employee of the Bank.

(1) The following provisions shall apply to the first constitution of the Central Board, and, notwithstanding anything contained in section 8, the Central Board as constituted in accordance therewith shall be deemed to be duly constituted in accordance with this Act.

(2) The first Governor and the first Deputy Governor or Deputy Governors shall be appointed by the Governor General in Council on his own initiative, and shall receive such salaries and allowances as he may determine.

(3) The first eight Directors representing the shareholders on the various registers shall be nominated by the Governor General in Council from the areas served respectively by those registers, and the Directors so nominated shall hold office until their successors shall have been duly elected as provided in sub section (4).

(4) On the expiry of each successive period of twelve months after the nomination of Directors under sub section (3) two Directors shall be elected in the manner provided in section 9 until all the Directors so nominated have been replaced by elected Directors holding office in accordance with section 8. The register in respect of which the election is to be held shall be selected by lot from among the registers still represented by nominated Directors, and for the purposes of such lot the Madras and Rangoon registers shall be treated as if they comprised one register only.

As soon as may be after the commencement of this Act, the Central Board shall direct elections to be held and may make nominations, in order to constitute Local Boards in accordance

with the provisions of section 9, and the members of such Local Boards shall hold office up to the date fixed under sub section (6) of section 9, but shall not exercise any right under sub section (7) of that section.

Business—The Bank shall be authorized to carry on and transact the several kinds of business hereinafter specified, namely—

(1) the accepting of money on deposit without interest from, and the collection of money for, the Secretary of State in Council, the Governor General in Council, Local Governments, States in India, local authorities, banks and any other persons,

(2) (a) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn on and payable in India and arising out of *bona fide* commercial or trade transactions bearing two or more good signatures, one of which shall be that of a scheduled bank, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace,

(b) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn and payable in India and bearing two or more good signatures, one of which shall be that of a scheduled bank, or a provincial co-operative bank, and drawn or issued for the purpose of financing *seasc* *tions* or marketing of *'* within nine months from *'* purchase or rediscount, exclusive of days of grace,

(c) the purchase, sale and rediscount of bills of exchange and promissory notes drawn and payable in India and bearing the signature of a scheduled bank, and issued or drawn for the purpose of holding or trading in securities of the Government of India or a Local Government, or such securities of States in India as may be specified in this behalf by the Governor General in Council on the recommendation of the Central Board, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace,

(3) (a) the purchase from and sale to scheduled banks of sterling in amounts of not less than the equivalent of one lakh of rupees,

(b) the purchase, sale and rediscount of bills of exchange (including treasury bills) drawn in or on any place in the United Kingdom and maturing within ninety days from the date of purchase, provided that no such purchase, sale or rediscount shall be made in India except with a scheduled bank, and

(c) the keeping of balances with banks in the United Kingdom,

(4) the making to States in India, local authorities, scheduled banks and provincial co-operative banks of loans and advances, repayable on demand or on the expiry of fixed periods not exceeding ninety days, against the security of—

(a) stocks, funds and securities (other than immovable property) in which a trustee is authorized to invest trust money by any Act of Parliament or by any law for the time being in force in British India,

(b) gold or silver or documents of title to the same,

(c) such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank,

(d) promissory notes of any scheduled bank or a provincial co-operative bank, supported by documents of title to goods which have been transferred, assigned, or pledged to any such bank as security for a cash credit or overdraft granted for *bona fide* commercial or trade transactions, or for the purpose of financing seasonal agricultural operations or the marketing of crops,

(5) the making to the Governor General in Council and to such Local Governments as may have the custody and management of their own provincial revenues of advances repayable in each case not later than three months from the date of the making of the advance,

(6) the issue of demand drafts made payable at its own offices or agencies and the making, issue and circulation of bank post bills,

(7) the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of such purchase,

(8) the purchase and sale of securities of the Government of India or of a Local Government of any maturity or of such securities of a local authority in British India or of such States in India as may be specified in this behalf by the Governor General in Council on the recommendation of the Central Board

Provided that securities fully guaranteed as to principal and interest by the Government of India, a Local Government, a local authority or a State in India shall be deemed for the purposes of this clause to be securities of such Government, authority or State,

Provided further that the amount of such securities held at any time in the Banking Department shall be so regulated that—

(a) the total value of such securities shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and three fifths of the liabilities of the Banking Department in respect of deposits,

(b) the value of such securities maturing after one year shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and two fifths of the liabilities of the Banking Department in respect of deposits, and

(c) the value of such securities maturing after ten years shall not exceed the aggregate amount of the share capital of the Bank and the Reserve Fund and one fifth of the liabilities of the Banking Department in respect of deposits,

(9) The custody of monies, securities and other articles of value, and the collection of the proceeds, whether principal, interest or dividends, of any such securities,

(10) the sale and realisation of all property, whether movable or immovable, which may in any way come into the possession of the Bank in satisfaction, or part satisfaction, of any of its claims,

(11) the acting as agent for the Secretary of State in Council, the Governor General in Council or any Local Government or local authority of State in India in the transaction of any of the following kinds of business, namely—

(a) the purchase and sale of gold or silver,

(b) the purchase, sale, transfer and custody of bills of exchange, securities or shares in any company,

(c) the collection of the proceeds, whether principal, interest or dividends, of any securities or shares,

(d) the remittance of such proceeds, at the risk of the principal, by bills of exchange payable either in India or elsewhere,

(e) the management of public debt,

(12) the purchase and sale of gold coin and bullion,

(13) the opening of an account with or the making of an agency agreement with, and the acting as agent or correspondent of, a bank which is the principal currency authority of any country under the law for the time being in force in that country or any international bank formed by such banks, and the investing of the funds of the Bank in the shares of any such international bank,

(14) the borrowing of money for a period not exceeding one month for the purposes of the business of the Bank, and the giving of security for money so borrowed,

Provided that no money shall be borrowed under this clause from any person in India other than a schedule bank, or from any person outside India other than a bank which is the principal currency authority of any country under the law for the time being in force in that country

Provided further that the total amount of such borrowings from persons in India shall not at any time exceed the amount of the share capital of the Bank,

(15) the making and issue of bank notes subject to the provision of this Act, and,

(16) generally, the doing of all such matters and things as may be incidental to or consequential upon the exercise of its powers or the discharge of its duties under this Act

When, in the opinion of the Central Board or, where the powers and functions of the Central Board under this section have been delegated to a committee of the Central Board or to the Governor, in the opinion of such committee or of the Governor as the case may be, a special occasion has arisen making it necessary or expedient that action should be taken under this section for the purpose of regulating credit in the interests of Indian trade, commerce, industry and agriculture, the Bank may, notwithstanding any limitation contained in sub-clauses (a) and (b) of clause (2) or sub-clause (a) or (b) of clause (3) or clause (4) of section 17,—

(1) purchase, sell or discount any of the bills of exchange or promissory notes specified in sub-clause (a) or (b) of clause (2) or sub-clause (b) of clause (3) of that section though such bill or promissory note does not bear the signature of a scheduled bank or a provincial co-operative bank, or

(2) purchase or sell sterling in amounts of not less than the equivalent of one lakh of rupees, or

(3) make loans or advances repayable on demand or on the expiry of fixed periods not exceeding ninety days against the various forms of security specified in clause (4) of that section

Provided that a committee of the Board or the Governor shall not give in cases of special urgency, authorized action under this section without prior consultation with the Central Board and that in all cases action so authorized shall be reported to the members of the Central Board forthwith

Forbidden Business.—Save as otherwise provided in sections 17, 18 and 15, the Bank may not

(1) engage in trade or otherwise have a direct interest in any commercial industrial or other undertaking, except such interest as it may in any way acquire in the course of the satisfaction of any of its claims provided that all such interests shall be disposed of at the earliest possible moment

(2) purchase its own shares or the shares of any other bank or of any company, or grant loans upon the security of any such shares,

(3) advance money on mortgage of or otherwise on the security of immovable property or documents of title relating thereto, or become the owner of immovable property, except so far as is necessary for its own business premises and residences for its officers and servants

(4) make loans or advances,

(5) draw or accept bills payable otherwise than on demand,

(6) allow interest on deposits or current accounts,

Central Banking Functions

The Bank shall undertake to accept monies for account of the Secretary of State in Council and the Governor General in Council and such Local Governments as may have the custody and management of their own provincial revenues and such States in India as may be approved of and notified by the Governor General in Council in the Gazette of India, and to make payments up to the amount standing to the credit of their accounts respectively, and to carry out their exchange, remittance and other banking operations, including the management of the public debt

(1) The Governor General in Council and such Local Governments as may have the custody and management of their own provincial revenues shall entrust the Bank, on such conditions as may be agreed upon, with all their money, remittance, exchange and banking

transactions in India and in particular shall deposit free of interest all their cash balances with the Bank

Provided that nothing in this sub-section shall prevent the Governor General in Council or any Local Government from carrying on money transactions at places where the Bank has no branches or agent and the Governor General in Council and Local Governments may hold at such places such balances as they may require

(2) The Governor General in Council and each Local Government shall entrust the Bank on such conditions as may be agreed upon, with the management of the public debt and with the issue of any new loans

(3) In the event of any failure to reach agreement on the conditions referred to in this section the Governor General in Council shall decide what the conditions shall be

(4) Any agreement made under this section to which the Governor General in Council or any Local Government is a party shall be held as soon as may be after it is made before the Central Legislature and in the case of a Local Government before its local Legislature also

Bank Notes.—(1) The Bank shall have the sole right to issue bank notes in British India and may, for a period which shall be fixed by the Governor General in Council on the recommendation of the Central Board, issue currency notes of the Government of India supplied to it by the Governor General in Council and the provisions of this Act applicable to bank notes shall unless a contrary intention appears, apply to all currency notes of the Government of India issued either by the Governor General in Council or by the Bank in like manner as if such currency notes were bank notes, and references in this Act to bank notes shall be construed accordingly

(2) On and from the date on which this Chapter comes into force the Governor General in Council shall not issue any currency notes

Issue Department.—(1) The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department, and the assets of the Issue Department shall not be subject to any liability other than the liabilities of the Issue Department as hereinafter defined in section 34

(2) The Issue Department shall not issue bank notes to the Banking Department or to any other person except in exchange for other bank notes or for such coin, bullion or securities as are permitted by this Act to form part of the Reserve

Bank notes shall be of the denominational values of five rupees, ten rupees, fifty rupees, one hundred rupees, five hundred rupees, one thousand rupees and ten thousand rupees, unless otherwise directed by the Governor General in Council on the recommendation of the Central Board

The design, form and material of bank notes shall be such as may be approved by the Governor General in Council after consideration of the recommendations made by the Central Board

(1) Subject to the provisions of sub-section (2), every bank note shall be legal tender at any place in British India in payment or on account for the amount expressed therein, and shall be guaranteed by the Governor General in Council

(2) On recommendation of the Central Board the Governor General in Council may, by notification in the Gazette of India, declare that with effect from such date as may be specified in the notification, any series of bank notes of any denomination shall cease to be legal tender save at an office or agency of the Bank

The Bank shall not re-issue bank notes which are torn, defaced or excessively soiled

Notwithstanding anything contained in any enactment or rule of law to the contrary, no person shall of right be entitled to recover from the Governor General in Council or the Bank the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note

Provided that the Bank may, with the previous sanction of the Governor General in Council prescribe the circumstances in and the conditions and limitations subject to which the value of such currency notes or bank notes may be refunded as of grace and the rules made under this proviso shall be laid on the table of both Houses of the Central Legislature

The Bank shall not be liable to the payment of any stamp duty under the Indian Stamp Act, 1899, in respect of bank notes issued by it

(1) If in the opinion of the Governor General in Council the Bank fails to carry out any of the obligations imposed on it by or under this Act, he may, by notification in the Gazette of India, declare the Central Board to be superseded, and thereafter the general superintendence and direction of the affairs of the Bank shall be entrusted to such agency as the Governor General in Council may determine, and such agency may exercise the powers and do all acts and things which may be exercised or done by the Central Board under this Act

(2) When action is taken under this section the Governor General in Council shall cause a full report of the circumstances leading to such action and of the action taken to be laid before the Central Legislature at the earliest possible opportunity and in any case within three months from the issue of the notification superseding the Board

No person in British India other than the Bank or, as expressly authorized by this Act, the Governor General in Council shall draw, accept, make or issue any bill of exchange, hundi, promissory note or engagement for the payment of money payable to bearer on demand or borrow, owe or take up any sum or sums of money on the bills, hundis or notes payable to bearer on demand of any such person

Provided that cheques or drafts, including hundis, payable to bearer on demand or otherwise may be drawn on a person's account with a banker, shroff or agent

(1) Any person contravening the provisions of section 31 shall be punishable with fine which may extend to the amount of the bill, hundi, note or engagement in respect whereof the offence is committed

(2) No prosecution under this section shall be instituted except on complaint made by the Bank

Assets of the Issue Department

(1) The assets of the Issue Department shall consist of gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is not less than the total of the liabilities of the Issue Department as hereinafter defined

(2) Of the total amount of the assets, not less than two-fifths shall consist of gold coin, gold bullion or sterling securities

Provided that the amount of gold coin and gold bullion shall not at any time be less than forty crores of rupees in value

(3) The remainder of the assets shall be held in rupee coin, Government of India rupee securities of any maturity and such bills of exchange and promissory notes payable in British India as are eligible for purchase by the Bank under sub clause (a) or sub-clause (b) of clause (2) of section 17 or under clause (1) of section 18

Provided that the amount held in Government of India rupee securities shall not at any time exceed one-fourth of the total amount of the assets or fifty crores of rupees, whichever amount is greater, or, with the previous sanction of the Governor General in Council, such amount plus a sum of ten crores of rupees

(4) For the purposes of this section, gold coin and gold bullion shall be valued at 847512 grains of fine gold per rupee, rupee coin shall be valued at its face value, and securities shall be valued at the market rate for the time being obtaining

(5) Of the gold coin and gold bullion held as assets, not less than seventeen twentieths shall be held in British India, and all gold coin and gold bullion held as assets shall be held in the custody of the Bank or its agencies

Provided that gold belonging to the Bank which is in any other bank or in any mint or treasury or in transit may be reckoned as part of the assets

(6) For the purposes of this section, the sterling securities which may be held as part of the assets shall be securities of any of the following kinds payable in the currency of the United Kingdom, namely —

(a) balances at the credit of the Issue Department with the Bank of England

(b) bills of exchange bearing two or more good signatures and drawn on and payable at any place in the United Kingdom and having a maturity not exceeding ninety days,

(c) government securities of the United Kingdom maturing within five years

the Indian Coinage Act, 1906, in such quantities as may, in the opinion of the Bank, be required for circulation, and the Governor General in Council shall supply such coins to the Bank on demand. If the Governor General in Council at any time fails to supply such coins, the Bank shall be released from its obligations to supply them to the public.

Obligation to sell sterling—The Bank shall sell, to any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon and pays the purchase price in legal tender currency, sterling for immediate delivery in London, at a rate not below one shilling and five pence and forty-nine sixths of a penny for a rupee.

Provided that no person shall be entitled to demand to buy an amount of sterling less than ten thousand pounds.

Obligation to buy sterling—The Bank shall buy, from any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for immediate delivery in London, at a rate not higher than one shilling and six pence and three sixteenths of a penny for a rupee.

Provided that no person shall be entitled to demand to sell an amount of sterling less than ten thousand pounds.

Provided further that no person shall be entitled to receive payment unless the Bank is satisfied that payment of the sterling in London has been made.

Cash reserves of scheduled banks—(1) Every bank included in the Second Schedule shall maintain with the Bank a balance the amount of which shall not at the close of business on any day be less than five per cent of the demand liabilities and two per cent of the time liabilities of such bank in India as shown in the return referred to in sub section (2).

Explanation—For the purposes of this section liabilities shall not include the paid up capital or the reserves, or any credit balance in the profits and loss account of the bank or the amount of any loan taken from the Reserve Bank.

(2) Every scheduled bank shall send to the Governor General in Council and to the Bank a return signed by two responsible officers of such bank showing—

(a) the amounts of its demand and time liabilities, respectively, in India,

(b) the total amount held in India in currency notes of the Government of India and bank notes,

(c) the amounts held in India in rupee coin and subsidiary coin, respectively

(d) the amounts of advances made and of bills discounted in India, respectively and

(e) the balance held at the Bank, at the close of business on each Friday or if Friday is a public holiday under the Negotiable Instruments Act, 1881, at the close of business on the preceding working day, and such return shall be sent not later than two working days after the date to which it relates.

Provided that where the Bank is satisfied that the furnishing of a weekly return under this sub section is impracticable in the case of any scheduled bank by reason of the geographical position of the bank and its branches, the Bank may require such bank to furnish in lieu of a weekly return a monthly return to be despatched not later than fourteen days after the end of the month to which it relates giving the details specified in this sub section in respect of such bank at the close of business for the month.

(3) If at the close of business on any day before the day fixed for the next return, the balance held at the Bank by any scheduled bank is below the minimum prescribed in sub-section (1), such scheduled bank shall be liable to pay to the Bank in respect of each such day penal interest at a rate three per cent above the bank rate on the amount by which the balance with the Bank falls short of the prescribed minimum, and if on the day fixed for the next return such balance is still below the prescribed minimum as disclosed by this return, the rates of penal interest shall be increased to a rate five per cent above the bank rate in respect of that day and each subsequent day on which the balance held at the Bank at the close of business on that day is below the prescribed minimum.

(4) Any scheduled bank failing to comply with the provisions of sub-section (2) shall be liable to pay to the Governor General in Council or to the Bank, as the case may be, or to each, a penalty of one hundred rupees for each day during which the failure continues.

(5) The penalties imposed by sub sections (3) and (4) shall be payable on demand made by the Bank, and, in the event of a refusal by the defaulting bank to pay on such demand, may be levied by a direction of the principal Civil Court having jurisdiction in the area where an office of the defaulting bank is situated, such direction to be made only upon application made in this behalf to the Court by the Governor General in Council in the case of a failure to make a return under sub section (2) to the Governor General in Council, or by the Bank with the previous sanction of the Governor General in Council in other cases.

(6) The Governor General in Council shall, by notification in the Gazette of India, direct the inclusion in the Second Schedule of any bank not already so included which carries on the business of banking in British India and which—

(a) has a paid-up capital and reserves of an aggregate value of not less than five lakhs of rupees, and

(b) is a company as defined in clause (2) of section 2 of the Indian Companies Act, 1913, or a corporation or a company incorporated by or under any law in force in any place outside British India,

and shall by a like notification direct the exclusion from that Schedule of any scheduled bank the aggregate value of whose paid-up

ants or other persons to assist him in investigating such accounts, and may, in relation to such accounts, examine any Director or officer of the Bank

(2) The auditors shall make a report to the shareholders or to the Governor General in Council, as the case may be, upon the annual balance sheet and accounts, and in every such report they shall state whether, in their opinion, the balance sheet is a full and fair balance-sheet containing all necessary particulars and properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, and, in case they have called for any explanation or information from the Central Board, whether it has been given and whether it is satisfactory. Any such report made to the shareholders shall be read together with the report of the Central Board, at the annual general meeting

Returns—(1) The Bank shall prepare and transmit to the Governor General in Council a weekly account of the Issue Department and of the Banking Department in the form set out in the Fifth Schedule or in such other form as the Governor General in Council may, by notification in the Gazette of India, prescribe. The Governor General in Council shall cause these accounts to be published weekly in the Gazette of India

(2) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a copy of the annual accounts signed by the Governor, the Deputy Governors and the Chief Accounting Officer of the Bank, and certified by the auditors, together with a report by the Central Board on the working of the Bank throughout the year, and the Governor General in Council shall cause such accounts and report to be published in the Gazette of India

(3) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a statement showing the name, address and occupation of, and the number of shares held by, each shareholder of the Bank

Agricultural Credit Department—The Bank shall create a special Agricultural Credit Department the functions of which shall be—

(a) to maintain an expert staff to study all questions of agricultural credit and be available for consultation by the Governor General in Council, Local Governments, provincial co-operative banks, and other banking organisations

(b) to co-ordinate the operations of the Bank in connection with agricultural credit and its relations with provincial co-operative banks and any other banks or organisations engaged in the business of agricultural credit

(1) the Bank shall, at the earliest practicable date and in any case within three years from the date on which this Chapter comes into

force, make to the Governor General in Council a report, with proposals, if it thinks fit, for legislation, on the following matters, namely—

(a) the extension of the provisions of this Act relating to scheduled banks to persons and firms, not being scheduled banks, engaged in British India in the business of banking, and

(b) the improvement of the machinery for dealing with agricultural finance and methods for effecting a closer connection between agricultural enterprise and the operations of the Bank

(2) When the Bank is of opinion that the international monetary position has become sufficiently clear and stable to make it possible to determine what will be suitable as a permanent basis for the Indian monetary system and to frame permanent measures for a monetary standard it shall report its views to the Governor General in Council

(1) The Local Board of any area may at any time require any shareholder who is registered on the register for that area to furnish to the Local Board within a specified time, not being less than thirty days, a declaration, in such form as the Central Board may by regulations prescribe, giving particulars of all shares on the said register of which he is the owner

(2) If it appears from such declaration that any shareholder is not the owner of any shares which are registered in his name, the Local Board may amend the register accordingly

(3) If any person required to make a declaration under sub-section (1) fails to make such declaration within the specified time, the Local Board may make an entry against his name in the register recording such failure and directing that he shall have no right to vote, either under section 9 or section 14, by reason of the shares registered in his name on that register

(4) Whoever makes a false statement in any declaration furnished by him under sub-section (1) shall be deemed to have committed the offence of giving false evidence defined in section 191 of the Indian Penal Code, and shall be punishable under the second paragraph of section 193 of that Code

(5) Nothing contained in any declaration furnished under sub-section (1) shall operate to affect the Bank with notice of any trust, and no notice of any trust expressed, implied or constructive shall be entered on the register or be receivable by the Bank

(6) Until Local Boards have been constituted under section 9 the powers of a Local Board under this section shall be exercised by the Central Board in respect of any area for which a Local Board has not been constituted

(1) Nothing in the Indian Companies Act, 1913, shall apply to the Bank, and the Bank shall not be placed in liquidation save by order of the Governor General in Council and in such manner as he may direct

(2) In such event the Reserve Fund and surplus assets, if any, of the Bank shall be divided between the Governor General in Council and the shareholders in the proportion of seventy-five per cent and twenty-five per cent, respectively

Provided that the total amount payable to any shareholder under this section shall not exceed the paid up value of the shares held by him by more than one per cent for each year after the commencement of this Act subject to a maximum of twenty five per cent

(1) The Central Board may, with the previous sanction of the Governor General in Council, make regulations consistent with this Act to provide for all matters for which provision is necessary or convenient for the purpose of giving effect to the provisions of this Act

(2) In particular and without prejudice to the generality of the foregoing provision, such regulations may provide for all or any of the following matters, namely —

(a) the holding and conduct of elections under this Act, including provisions for the holding of any elections according to the principle of proportional representation by means of the single transferable vote,

(b) the final decision of doubts or disputes regarding the qualifications of candidates for election or regarding the validity of elections,

(c) the maintenance of the share register, the manner in which and the conditions subject to which shares may be held and transferred, and, generally, all matters relating to the rights and duties of shareholders,

(d) the manner in which general meetings shall be convened, the procedure to be followed thereat and the manner in which votes may be exercised,

(e) the manner in which notices may be served on behalf of the Bank upon shareholders or other persons,

(f) the manner in which the business of the Central Board shall be transacted, and the procedure to be followed at meetings thereof,

(g) the conduct of business of Local Boards and the delegation to such Boards of powers and functions,

(h) the delegation of powers and functions of the Central Board to the Governor, or to Deputy Governors, Directors or officers of the Bank,

(i) the formation of Committees of the Central Board, the delegation of powers and functions of the Central Board to such Committees, and the conduct of business in such Committees,

(j) the constitution and management of staff and superannuation funds for the officers and servants of the Bank,

(l) the manner and form in which contracts binding on the Bank may be executed,

(l) the provision of an official seal of the Bank and the manner and effect of its use,

(m) the manner and form in which the balance sheet of the Bank shall be drawn up and in which the accounts shall be maintained,

(n) the remuneration of Directors of the Bank,

(o) the relations of the scheduled banks with the Bank and the returns to be submitted by the scheduled banks to the Bank,

(p) the regulation of clearing houses for the scheduled banks,

(q) the circumstances in which, and the conditions and limitations subject to which the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note may be refunded, and

(r) generally, for the efficient conduct of the business of the Bank

(3) Copies of all regulations made under this section shall be available to the public on payment

In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted, namely —

“11 Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8 47512 grains troy of fine gold per rupee”

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927, are hereby repealed

In sub section (3) of section 11 of the Indian Companies Act, 1913, after the word ‘Royal’ the words ‘Reserve Bank’ shall be inserted

Trade.

India is pre eminently an agricultural country, and that fact dominates the course of its trade. The great export staples are the produce of the soil—wheat, seeds, cotton and jute. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such year as 1896-97 and 1899-1900. Well over thirty per cent of the culturable area of the Punjab is under irrigation, and huge new works are in progress to utilise the waters of the Sutlej, and of the Indus in Sind. Whilst these great works have been carried out or are in progress to spill on the land the floods of the snowed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South like the Cauvery are being harnessed to preserve their flood waters for Madras. All over India irrigation works, large and small, are being restlessly pressed forward, and their effect is to give a far greater stability to Indian agriculture.

The destination of these surplus crops is another factor of importance. The great customer for Indian cotton is Japan, and to a lesser extent the Continent of Europe. Continental Europe is also a large buyer of her oilseeds and another produce, and of her hides and skins. Whilst the United Kingdom is the great market for tea and wheat, foreign countries are very important facts in the Indian export trade, therefore India had a vital interest in the economic recovery of Europe. When the post-war boom collapsed it hit India hard and

for a year or two the export trade reeled under the shock. The progress of the Dawes Plan and the measures taken under the League of Nations to assist Austria and Hungary back to industrial health had a special bearing on the prosperity of India, they have been elements of importance in inducing her recovery of prosperity.

But whilst India is pre eminently an agricultural country, she ranks at the International Labour Office at Geneva as one of the great industrial countries of the world. Her manufacturing industries are few in number and are concentrated in a few areas, but they are of great importance. The largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the works of the Tata Iron and Steel Company where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has lost a considerable part of its export trade to Japan, the Far East and East Africa, the mills find their principal outlet in India itself, and even there they are subject to severe competition from Japan and China. The iron and steel industry is for the most part a home industry, though large quantities of Indian pig iron are shipped to the Far East, and in some years to the western ports of North and South America. Therefore, whilst India is still in the main an agricultural country, three quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing importance, and their prosperity every year affects in an increasing degree the general prosperity of the people.

I — GENERAL

Agricultural Conditions in India—The monsoon of 1932 was fairly normal and gave, on the whole, well distributed rains in spite of a rather weak start and a prolonged break in August. Averaged over the plains of India the total rainfall during the monsoon period was only 3 per cent below the normal. During the retreating period of the monsoon the rainfall was in excess in Bengal, Bombay, Mysore, Assam, Bihar and Orissa, Punjab, Hyderabad and Madras but defective elsewhere. Taking the year as a whole the total rainfall was within 20 per cent of the normal over most of the country. The season was generally favourable,

and crops fairly good. The outturn of rice, though it fell short of last year's plentiful harvest by 7 per cent was quite good being almost equal to the average of the preceding five years. A very good yield was obtained for the sugarcane crop of 1932-33 and the total production exceeded the previous year's record yield by 17 per cent. The outturns of cotton and sesamum increased by 12 and 14 per cent respectively, and those of groundnut and castor seed by 25 and 1 per cent respectively as compared with the preceding year. Under restricted cultivation the production of jute in 1932 amounted only to 5.8 million bales, which, though slightly

greater than the previous year's yield, was still about half the average production during the preceding five years. The wheat crop of 1931-32, which moved mostly during the year under review, was 3 per cent less than that of the preceding season, but was slightly above the average of the preceding five years. The production of rape, mustard and linseed (winter oilseeds) crops for 1931-32 also showed increases of 4 and 10 per cent respectively as compared with the preceding season.

Industrial Situation in India—The year 1932 must be considered as satisfactory so far as industrial disputes are concerned, for the numbers of strikes and of workers involved during the year were the lowest recorded for any year since 1920. Such strikes as did occur

during 1932 mostly affected the railways and jute mills, the only serious crises being the strikes in the workshops of the Madras and Southern Mahratta Railways at Perambur, Arkonum and Hubli and in the Howrah, Kinnison, Kelvin and Standard Jute Mills in Bengal. The first quarter of the year 1933, however, has already been marked by disputes in the Bombay cotton mills.

Volume of Trade—The following figures have been compiled to show the values of imports and exports of merchandise on the basis of the declared values in 1913-14. These statistics are necessarily approximate, but they are sufficiently accurate to afford a fairly reliable measure of the course of trade —

(In crores of Rupees)

	1913-14	1924-25	1925-26	1926-27	1927-28	1928-29	1929-30	1930-31	1931-32	1932-33
Imports	183	137	143	156	181	190	189	157	143	162
Exports	144	250	246	228	248	260	263	235	200	176
Total trade in merchandise excluding re-exports	437	387	389	384	429	450	452	392	343	338

The table above shows a further retrogression from the level of 1931-32, indicating as it does a decline of Rs 5 crores, on the basis of 1913-14 prices, in the total trade in merchandise (excluding re-exports). It is significant that the decline was confined to the export side, the imports having shown an increase of Rs 19 crores.

Prices in India—The index number for Calcutta wholesale prices fell by 43 per cent from September, 1929, to March, 1933. The index in September, 1931, was 91 as against 143 in the same month in 1929. For the five months October, 1931 to February, 1932, the index number was steady, ranging between 96 to 98, owing to the dissociation of the sterling from gold, but from March, 1932, the decline started again. Recently there has been a slight tendency generally to a rise in prices and the Indian Calcutta index number also records an increase from 82 in March, 1933, to 89 in June, 1933, which is a hopeful sign. Apart from the tendency, there were few indications, however, that the turning point in the world depression had been reached. The main characteristic of the Indian price index numbers during the past few years, is the larger fall in agricultural prices as compared with industrial prices. Another noticeable feature is that the distinct improvement in prices of most of the staple com-

modities, which marked the close of the year 1931 and the beginning of the year 1932, was not in evidence later. Coming to details the heaviest declines in December, 1930, were in cotton raw, jute raw, wheat and oilseeds, in December, 1931, in oilseeds, tea, hides and skins and rice, in December, 1932, in jute raw, oilseeds, and tea, rice, and hides and skins, in March, 1933, in oilseeds, rice and jute raw, hides and skins and tea, and in June, 1933, in oilseeds, jute raw, rice, cotton raw, and hides and skins. It will be thus seen that the heaviest declines have invariably been in raw materials. Among manufactured articles, the slump in prices of jute manufactures was consistently heavier than in the prices of any other manufactured article, cotton manufactures and metals following in order. Of agricultural products, sugar suffered least, largely as a result of the increased import duties on this article.

Imports—The total value of the imports of merchandise into British India during 1932-33 amounted to Rs 133 crores and that of exports to Rs 136 crores. Compared with the preceding year, there was an improvement of Rs 7 crores or 5 per cent in the case of imports, while there was a decline of Rs 25 crores or 15 per cent under exports. On the import side there was an improvement noticeable in India's demand for

foreign textiles The increase recorded under this head amounted to one of Rs 12 crores on a total of Rs 35 crores recorded in 1931-32. Expressed in percentages, this meant an advance of 34 per cent over the figures for 1931-32 and of 13 per cent over those of 1930-31. The advance under the textile group was primarily the result of larger imports of cotton piecegoods, the total receipts of which amounted to 1,225 million yards valued at Rs 21,26 lakhs as compared with 776 million yards valued at Rs 14,67 lakhs in 1931-32. All the principal descriptions of cotton piecegoods participated in this improvement, grey goods increasing by 107 million yards, whites by 133 million yards and coloured by 202 million yards. Imports from the United Kingdom as well as Japan recorded advances under all the descriptions. Arrivals of cotton twist and yarn also rose from 31.6 million lbs valued at Rs 2,99 lakhs to 45.1 million lbs valued at Rs 3,79 lakhs. There were concurrent advances under some of the other important items included in the textile group—notably an increase of Rs 1,59 lakhs under silk raw and manufactured, of Rs 1,34 lakhs under wool and woollens and of Rs 72 lakhs under artificial silk (including yarn and goods of artificial silk mixed with other materials). Owing to increased finer spinning in the local mills the imports of raw cotton rose still further from 79,000 tons to 85,000 tons. Under the metals group there was a decline of Rs 5 lakhs. Imports of iron and steel fell from 371,000 tons to 326,000 tons in quantity and from Rs 6,32 lakhs to Rs 5,30 lakhs, in value. Under machinery and mill work there was a decline of Rs 38 lakhs, although sugar and textile machinery recorded increases. The value of hardware imported advanced from Rs 2,61 lakhs to Rs 2,99 lakhs. The year witnessed a further diminution in the imports of motor vehicles from Rs 2,89 lakhs to Rs 2,43 lakhs, the number of motor cars imported having fallen from 7,220 to 6,201 and that of omnibuses from 4,302 to 2,676. Concomitantly with the reduction under motor vehicles, the value of the imports of rubber manufactures also declined from Rs 2,21 lakhs to Rs 1,98 lakhs. Mainly as a result of the increased local production under the shelter of the protective duty, India's requirements of foreign sugar of all kinds fell from 556,000 tons valued at Rs 6,16½ lakhs to 401,000 tons valued at Rs 4,23 lakhs. Arrivals of mineral oils also declined from 217 million gallons to 188 million gallons and in value from Rs 9,04 lakhs to Rs 6,70 lakhs. Imports of kerosene oil declined from 85.7 million gallons to 59.5 million gallons, while those of fuel oils advanced from 100.8 million gallons to 104.5 million gallons. Consignments of provisions also contracted from Rs 3,41 lakhs to Rs 2,93 lakhs, chiefly due to a falling off in the value on vegetable products, condensed milk and farinaceous foods. Imports of paper and pasteboard recorded an improvement of 449,000 cwts in quantity and of Rs 36 lakhs in value. Arrivals of wheat fell away from 111,300 tons to 33,500 tons in quantity and from Rs 73 lakhs to Rs 29 lakhs in value.

Exports.—On the export side, the outstanding feature was a further slump in the raw cotton trade due to comparatively high prices of the Indian staples. Despatches of raw cotton fell from 2,369,000 bales valued at Rs 23 crores to

2,063,000 bales valued at Rs 20 crores. Cotton manufactures (including twist and yarn) recorded a decline of Rs 1½ crores and amounted to Rs 3 crores. Exports of twist and yarn receded from 22 million lbs to 15 million lbs in quantity and from Rs 1,28 lakhs to Rs 79 lakhs in value. Owing to severe competition from Japan in practically all the usual markets abroad shipments of Indian cotton piecegoods dropped from 104.6 million yards worth Rs 3,24 lakhs to 66.4 million yards worth Rs 2,09 lakhs. The downward movement in the export trade in jute continued during the year and the decline in the value of raw and manufactured jute exported amounted to one of about Rs 1½ crores. Shipments of raw jute declined from 3,285,000 bales to 3,153,000 bales in quantity and from Rs 11,19 lakhs to Rs 9,73 lakhs in value. Exports of gunny bags, however, advanced from 389 millions valued at Rs 10,94 lakhs to 415 millions valued at Rs 11,16 lakhs, while those of gunny cloth shrank from 1,021 million yards worth Rs 10,45 lakhs to 1,012 million yards worth Rs 10,24 lakhs. Under goods grams the value of the shipments declined from Rs 20,37 lakhs to Rs 16,08 lakhs and the quantity from 2,614,000 tons to 2,056,000 tons. Exports of wheat which had amounted to 20,000 tons in 1931-32 fell away to 2,000 tons only in 1932-33. Despatches of rice dropped from 2,372,000 tons to 1,887,000 tons in quantity and from Rs 18,14 lakhs to Rs 14,46 lakhs in value. Shipments of tea improved in quantity from 342 million lbs to 379 million lbs, but on account of the low level of prices the value declined from Rs 19,44 lakhs to Rs 17,15 lakhs. Exports of oilseeds amounted to 733,000 tons valued at Rs 11,31 lakhs, which meant a decline of 26 per cent in quantity and of 22 per cent in value in comparison with the exports of the preceding year. The decline was chiefly due to a falling off in the demands for groundnuts from 672,000 tons to 433,000 tons, for linseed from 120,000 tons to 72,000 tons, and for castor-seed from 104,000 tons to 86,000 tons. Rapeseed, however, recorded an improvement of 61,000 tons in quantity and of Rs 80 lakhs in value. Despatches of metals and ores declined from 829,000 tons worth Rs 5,47 lakhs to 695,000 tons worth Rs 4,68 lakhs. There was a decline in the shipments of hides and skins from 49,300 tons valued at Rs 8,92 lakhs to 41,700 tons valued at Rs 7,43 lakhs. Exports of lac amounted to 418,300 cwts valued at Rs 1,24 lakhs which represented a decline of 10 per cent in quantity and of 33 per cent in value in comparison with the corresponding figures for 1931-32. Exports of coffee rose by 18,000 cwts in quantity and by Rs 15 lakhs in value.

Balance of Trade.—The visible balance of trade in merchandise and treasure for the year 1932-33 was in favour of India to the extent of Rs 68 crores as compared with Rs 90 crores in 1931-32, Rs 38 crores in 1930-31 and the record figure of Rs 109 crores in 1925-26. The transactions in treasure on private account resulted in a net export of treasure, amounting to Rs 65 crores as against Rs 55½ crores in the preceding year. Gold showed a net export of Rs 6½ crores and silver a net import of Rs 73 lakh. Net exports of currency notes amounted to Rs 13 lakhs.

Tariff Changes—The changes in the tariff made under the various Acts passed during the latter part of 1931 and the earlier part of 1932 were dealt with in the preceding year's Review. Since then seven Acts have been passed, introducing numerous changes in the tariff.

The most important of these Acts is the Indian Tariff (Ottawa Trade Agreement) Amendment Act, 1932, which gave effect to the tariff changes necessitated by the Trade Agreement made by the Government of India and His Majesty's Government in the United Kingdom at the Imperial Economic Conference held at Ottawa during July-August, 1932. Hitherto the Indian tariff was a single decker one and did not differentiate between imports from different countries, except in the case of certain protected classes of iron and steel goods and cotton piecegoods where higher rates of duty on goods manufactured in countries other than the United Kingdom were imposed. Under the Ottawa Trade Agreement India for the first time departed from the single decker tariff policy and adopted, on terms of reciprocity, tariff preference for certain classes of goods produced or manufactured in the United Kingdom. The Agreement also provided for the exchange of preference with the non self governing Colonies and Protectorates.

On the part of India this Agreement involved the grant to the United Kingdom of a 7½ per cent tariff preference on certain classes of motor vehicles (motor cars and motor omnibuses, chassis for motor omnibuses, motor vans and motor lorries and parts and accessories thereof) and a 10 per cent tariff preference on the following classes of goods—

Apparel (excluding hosiery and articles made of silk or artificial silk), certain arms and ammunition, asbestos manufactures, boots and shoes of leather, brushes and brooms, certain building and engineering materials, buttons, certain chemicals and chemical preparations excluding manures, cocoa and chocolate, confectionery, cordage and rope other than of jute and cotton, cork manufactures, cutlery, drugs and medicines except narcotics, earthenware and porcelain, furniture and cabinet-ware, glue, hardware excluding electro-plated ware, instruments apparatus and appliances and parts thereof (electrical, musical, photographic, scientific and philosophical, surgical, wireless and miscellaneous), leather and certain manufactures thereof, liquors (ale and beer, spirit in drugs, etc., and perfumed spirit), certain machinery and millwork, metals (aluminium, brass, bronze and similar alloys, copper, German silver, certain classes of iron and steel, lead wrought and zinc wrought or manufactured), oils (fish oil, certain essential oils, mineral lubricating oil, petroleum in paints, etc., and vegetable oils other than coconut groundnut and linseed), oil cloth and floor cloth, engine and boiler packing, certain paints and painters' materials, certain classes of paper and pasteboard, certain kinds of provisions and oilman's stores, rubber manufactures, smokers' requisites, toilet soap, stationery, textiles (haberdashery and millinery), woollen manufactures other than blankets and rugs, toilet requisites, toys and requisites for

games and sports, umbrellas and umbrella fittings, vehicles not mechanically propelled and cycles.

In most of these classes of goods the preference was subject to certain specified exceptions and also to the general reservation that it did not extend to—

- (a) commodities to which protective duties are applicable,
- (b) commodities which were free of duty at that time, or
- (c) commodities on which on grounds of national policy a specially low rate of duty had been imposed.

In the class of iron and steel goods, the preference extended only to those commodities which were not subject to protective duties and in the class of machinery only to those articles which paid ordinary revenue rate of 25 per cent *ad valorem* and not to those which in the interests of agriculture and industries were free of duty or were subject only to the temporary duty of 10 per cent *ad valorem*. In the class of textiles it extended only to articles of apparel, haberdashery and millinery which were dutiable at 25 per cent *ad valorem* and to woollen manufactures, with specified exceptions in each case. As regards goods made of cotton, silk or artificial silk, it was agreed that a 10 per cent preference would be extended to these goods with the exception of certain cotton manufactures (twist and yarn, piecegoods, thread for sewing, blankets, handkerchiefs in the piece, hosiery, rope and towels in the piece), silk and artificial silk yarn, piecegoods and thread for sewing certain goods of silk and artificial silk mixed with other materials (twist and yarn, piecegoods and thread for sewing) and articles on which protective duties might be imposed as a result of the Indian Tariff Board's enquiry which was being conducted at that time.

In the case of Colonies and Protectorates, the Agreement provided for the grant by India of preference to certain staple exports of the Colonial Empire including—

Specified gums and resins, oil seeds, vegetable and essential oils, unground spices, coconuts and coconut products, fish, fruits and vegetables, sago and tapioca, tea, coffee rum and unmanufactured tobacco.

A Supplementary Agreement regarding iron and steel was entered into between the two Governments in the September following, which provided for the adjustment of the Indian import duty on galvanised sheets as shown below—

Rs 30 per ton on sheet made in the United Kingdom from Indian sheet bar

Rs 53 per ton on sheet made in the United Kingdom from other sheet bar

Rs 83 per ton on sheet not made in the United Kingdom

These revised duties will remain in force till the 31st March 1934.

The Tariff Amendment Act mentioned above made necessary changes in Schedule II to the Indian Tariff Act, 1894, with effect from 1st

January, 1933 The articles subject to the preferential rates of duty are included in two new parts, VIII and IX, to Schedule II Part VIII contains all the articles which were dutiable under Part V at the general revenue duty of 25 per cent *ad valorem* and which are now liable to the standard rate of 30 per cent and the preferential rate of 20 per cent for British goods Part IX contains all the articles on the preferential list which were dutiable at special rates, that is, at rates either higher than or lower than the general revenue rate In these cases the necessary preference has been provided for either by entirely raising the previous rate or partly by raising and partly by lowering it, the standard rate having in no case gone beyond 50 per cent *ad valorem*

The Cotton Textile Industry Protection (Amendment) Act, 1933, extended the operation of the protective duties imposed under the Cotton Textile Industry (Protection) Act, 1930 These duties were to expire on the 31st March, 1933, but the Amendment Act extended their operation up to 31st October, 1933, pending the consideration by the Government of India of the Tariff Board's Report on the Indian cotton textile industry

The Wheat Import Duty (Extending) Act, 1932, extended the operation of the temporary customs duty on wheat and wheat flour to 31st March 1934

The Salt Additional Import Duty (Extending) Act, 1933, extended for another year the operation of the 1931 Act, subject to certain modifications, as recommended by the Salt Industry Committee of the Legislative Assembly It reduced the additional duty from 4½ as to 2½ as per maund and extended its operation to 31st March, 1934

The Indian Finance Act, 1933, fixed (i) a minimum specific duty of 2 as (excluding surcharge) on uppers of boots and shoes not entirely made of leather and (ii) minimum specific duties of 4 as per square yard and 2 as 3p per square yard respectively, with no surcharge, on artificial silk piecegoods and silk or artificial silk mixtures It also rounded off the *ad valorem* duty of 34½ per cent (including surcharge) on these mixtures to 35 per cent with no surcharge This Act was passed on the 31st March, 1933, but under the provisions of the Provisional Collection of Taxes Act, 1931 the tariff changes mentioned above came into force on the 1st of that month

The Indian Tariff (Ottawa Trade Agreement) Supplementary Amendment Act, 1933, corrected, with effect from the 8th April 1933, a few inaccuracies and discrepancies in the 1932 Act which had been brought to light by a further scrutiny of the schedules to that Act and by practical experience of the new tariffs The

reference to ferrous sulphate was deleted from item No 88 as it had already been specified elsewhere as green copperas Alum, the protective duty on which lapsed on the 31st March, was included in the non-preferential descriptions of chemicals The preference inadvertently given to British manufactures in respect of moist white lead and newsprinting paper was withdrawn Copper braziers were grouped with copper sheets liable to preferential rate Tea chests and parts and fittings thereof were specified separately and were made liable to the ordinary non-preferential rate The preference to British incandescent mantles was made clear, while, on administrative grounds, the lubricating oil item was re drafted to include oils other than mineral, pure and mixed, which are not ordinarily used for any purpose other than lubrication The preferential rate for colonial products was withdrawn in the case of certain glass-making chemicals Gold and gold-plated pen nibs were specified separately with the United Kingdom preference, while in the interest of the Indian industry, two glass-making materials, liquid gold and covered crucibles, were given a specially low preferential rate of duty

The Indian Tariff (Amendment) Act, 1933, amended sub items (i) and (ii) in item No 148A relating to galvanized iron or steel sheets of British manufacture and made it clear that the preferential rate is applicable only to sheets manufactured from Indian sheet bar imported into the United Kingdom after the ratification of the Ottawa Trade Agreement

The protective duties imposed under the **Heavy Chemical Industry (Protection) Act, 1930**, on hydrochloric, nitric and sulphuric acids, alum, aluminium sulphate, copper sulphate, magnesium sulphate, sodium sulphate, sodium sulphide and zinc chloride lapsed on the 31st March, 1933, and these became liable to the ordinary duty with or without preference, to the United Kingdom manufacture Magnesium chloride, however, continues to be liable to the protective duty

Besides the statutory changes mentioned above, the period of operation of the additional protection accorded to iron or steel galvanized sheets, fabricated, and pipes and tubes made therefrom has been extended to 31st March, 1934, under section 3 (4) of the Indian Tariff Act, 1894 Similarly, under section 3 (5) of the above Act, the import duty on non-British cotton piecegoods was increased to 50 per cent *ad valorem* with a minimum specific duty of 5½ as per lb in the case of plain grey with effect from 30th August, 1932 With effect from 7th June, 1933, these rates have been further increased to 75 per cent *ad valorem* and 6½ as per lb respectively

Imports—(continued)

(In thousands of Rupees)

	1928-29	1929-30	1930-31	1931-32	1932-33	Percentage on total imports of merchandise in 1932-33

Cotton Manufactures (Rs 26,83 lakhs)—The total value of the imports of cotton manufactures in the year under review amounted to Rs 26,83 lakhs as against Rs 19,15 lakhs in the preceding year and Rs 25,26 lakhs in 1930-31. Thus it will be seen that the imports under this head revived considerably as compared with the preceding year and even exceeded the figure of 1930-31. As compared with 1929-30, however, there was still much leeway to be made up, the value of the imports in that year having amounted to Rs 59,49 lakhs. Imports of cotton twist and yarn amounted to 45.1 million lbs valued at Rs 3,79 lakhs as against 31.6 million lbs valued at Rs 2,99 lakhs in 1931-32. Thus there was an increase of 13.1 million lbs or 43 per cent in the imports under this head. Imports of piecegoods in the year under review were 1,225 million yards valued at Rs 21,26 lakhs as compared with 776 million yards valued at Rs 14,67 lakhs in 1931-32 and 890 million yards valued at Rs 20,05 lakhs in 1930-31. The increase in yardage as compared with the preceding year was, therefore, 450 million yards and even compared with 1930-31 that was 335 million yards. Compared with the last normal year, 1929-30, however, the imports were 694 million yards less.

It will be seen from the above figures that the import trade in cotton manufactures showed a distinct improvement as compared with the preceding year or even with 1930-31. Compared with 1929-30, the last normal year, however, the trade was still considerably smaller. The improvement in the year under review was of considerable magnitude and it will be worth while examining the causes of this upward movement. The first cause which suggests itself is a probable revival in the demand for piecegoods, the consumption of which had fallen off considerably in the previous two years. It will be seen from the table that the

amount available for consumption was 333 and 364 crores of yards in 1930-31 and 1931-32 respectively as compared with 419 crores of yards in 1929-30, 365 crores of yards in 1928-29 and 413 crores of yards in 1927-28. Thus the postponement of demand which was the result of the peculiar conditions of the two previous years may have led to a better demand in the year under review. A second cause which also improved the demand was the considerably lower prices of piecegoods which ruled in the year under review. The declared values of all classes of piecegoods touched lower levels, the fall being greater in the cases of white and coloured goods. The Calcutta index number in the case of cotton manufactures, which is an index of internal prices, fell much further than in the previous years. The index was 127 in April 1931, and in spite of a very slight fall in the end of the year 1931-32 it remained at 127 in April 1932. By April, 1933, however, the index had fallen to 112. This fall in the prices of cotton manufactures certainly encouraged their consumption, especially as this fall tended to reduce, to some extent, the wide disparity between the fall in the agricultural incomes of the masses and the fall in the cost of the imported goods which they bought. The chief cause of the fall in prices of cotton piecegoods was the selling of cotton piecegoods in India by Japan at very low rates. The depreciating yen exchange helped Japan in this respect and even the additional duty placed on these imports in the middle of the year did not stem the tide, as the Japanese manufacturers' advantage increased with the further depreciation of the rupee yen exchange. The very low prices at which Japanese goods were offered greatly increased their consumption and the prices of competing goods of other than Japanese origin had also to be lowered to keep pace. These lower prices created a better effective demand for piecegoods and consequently the consumption as well as imports

improved considerably. This has been one of the most important causes of the improvement in piecegoods imports. A third cause of the increase in imports is to be found in the comparative weakness of the boycott agitation in the year under review. Owing to the measures adopted by Government the agitation had been considerably weakened and the trade in imported piecegoods became profitable again. These causes led to an increase in imports both from Japan and the United Kingdom, but owing to the low prices which Japan would take her share increased far more than that of the United Kingdom.

The value of the different classes of cotton manufactures imported during the past five years and the pre war year 1913-14 is set forth below —

	1913-14 (pre war year)	1928-29	1929-30	1930-31	1931-32	1932-33
	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)
Twist and yarn	1.16	6.20	6.00	3.08	2.00	3.70
Piecegoods—						
Grey (unbleached)	25.45	20.10	20.93	6.87	3.02	5.07
White (bleached)	11.20	15.33	13.27	6.20	5.11	7.33
Coloured, printed or dyed	17.86	17.35	15.15	6.82	5.05	8.34
Fents of all descriptions	54	94	90	16	37	52
Total Piecegoods	58.14	53.81	50.25	20.05	14.67	21.26
Hosiery	1.20	1.45	1.41	.88	.15	.67
Handkerchiefs and shawls	.80	.16	.17	.5	.2	.6
Thread	.39	.71	.81	.60	.54	.56
Other sorts	1.52	.82	.82	.50	.45	.40
Grand Total	66.30	63.24	59.19	25.25	19.15	26.83

Cotton Twist and Yarn (Rs 3.79 lakhs)—The imports of cotton twist and yarn amounted to 45.1 million lbs in quantity and Rs 3.70 lakhs in value in 1932-33 as compared with 31.6 million lbs and Rs 2.90 lakhs in 1931-32. The quantity of yarn imported in the year under review increased by 13.5 million lbs as compared with the previous year, the increase in value being Rs 80 lakhs. As compared with 1929-30, the last normal year, there was an increase in the quantity of imports in the year under review by 1.2 million lbs. In value, however, there was a decline of Rs 2.21 lakhs. The average declared value per lb of yarn imported during the year was Re 0.135 as compared with Re 0.152 in the previous year, Re 0.111 in 1930-31 and Rs 1.510 in 1929-30. Of the total imports, 18.1 million lbs came from Japan, the largest supplier, 13.4 million lbs from the United Kingdom and 13.3 million lbs from China. Imports from these countries in 1929-30 were 10.9 million lbs, 20.1 million lbs and 10.6 million lbs respectively. Thus in 1930-31, the imports from the United Kingdom shrunk by 6.7 million lbs, while those from Japan and China had gone up by 7.2 million lbs and 2.7 million lbs, respectively. It is obvious therefore that Japan had considerably improved her position in this trade as compared with the preceding year or with 1929-30. The position of Japan is even stronger than is shown merely by the imports from Japan, as the mills in China are largely owned by Japanese interests.

Cotton Piece-goods (Rs 21.26 lakhs)—The imports of cotton piecegoods, including fents, increased from 776 million yards in 1931-32 to 1,225 million yards in 1932-33, an increase of 449 million yards or 58 per cent. As compared with 1929-30, however, there was still a deficit of 694 million yards in yardage. The value of the imports increased from Rs 14.7

crores to Rs 21.3 crores, an increase of Rs 6.6 crores. The value figure in the year under review is, however, considerably less than in 1929-30 when it amounted to Rs 50 crores. Compared with the prewar year 1913-14, the imports of 1932-33 were less by 1,073 million yards. The figures for the three important classes of cotton piecegoods from 1913-14 onwards are given in the following table —

	Grey (unbleached)	White (bleached)	Coloured printed or dyed
Year	Million yards	Million yards	Million yards
1913-14	1,342	793	831
1914-15	1,320	604	404
1915-16	1,148	611	378
1916-17	847	589	474
1917-18	625	502	305
1918-19	783	286	227
1919-20	533	322	208
1920-21	580	421	489
1921-22	635	306	138
1922-23	931	402	243
1923-24	704	415	347
1924-25	845	548	407
1925-26	709	465	365
1926-27	718	571	147
1927-28	875	556	504
1928-29	838	554	506
1929-30	925	473	483
1930-31	365	271	245
1931-32	249	270	223
1932-33	556	412	421

It appears from the above table that in the year under review imports of grey goods increased from the low figure of the previous year and amounted to 556 million yards as compared with 249 million yards in 1931-32. Compared,

however, with 1929 30 the imports are seen to be of relatively small dimensions. The imports of plain grey goods amounted to 218 million yards in 1932 33 as compared with 166 million yards in 1931-32 and 423 million yards in 1929 30. Imports of bordered grey goods amounted to 138 million yards as compared with 83 million yards in the preceding year and 502 million yards in 1929 30. These figures show that the trade under this item, though showing some signs of revival as compared with the preceding year, was still far behind the figure of 1929 30. Imports of white goods increased considerably in the year under review from 280 million yards in 1931-32 to 413 million yards, an increase of 133 million yards. Even compared with 1929 30, the imports of the year under review were only less by 61 million yards. Coloured goods increased from 223 million yards in 1931-32 to 425 million yards in 1932 33, an increased of 91 per cent. The declared value of grey goods declined from 3 as 7 p in 1929 30 to 2 as 6 p in 1931-32 and to 2 as 3 p in 1932 33. The decline in the case of white goods was from 4 as 6 p in 1929 30 to 2 as 11p in the year under review, whereas for the same period, coloured goods fell from 5 as to 3 as 2 p. The following table shows the declared value per yard of the three classes of goods for a number of years —

Cotton piecegoods	13 14	24 25	25 26	26 27	27-28	28 29	29 30	30 31	31-32	32 33
	l p	l p	l p	l p	l p	l p	l p	l p	l p	l p
Grey (unbleached)	2 8	5 5	4 11	4 2	3 11	3 10	3 7	3 0	2 6	2 3
White (bleached)	2 11	5 11	5 6	4 11	4 5	4 5	4 6	3 8	3 1	2 11
Coloured, printed or dyed	3 5	7 10	6 11	6 2	5 7	5 6	5 0	4 5	3 8	3 2

The imports of coloured, printed and dyed goods from 1925 26 are set forth below —

—	1925 26		1926 27		1927 28		1928 29	
	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)
Total printed goods	166 9	6,55	176 8	6,13	235 3	7,53	244 4	7,41
Total dyed goods	106 8	4,88	157 0	6,17	158 3	5,61	155 6	5,62
Total woven coloured goods	92 1	4,49	113 6	4,92	111 2	4,38	106 9	4,32

—	1929 30		1930 31		1931-32		1932 33	
	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)	Million yards	Rs (lakhs)
Total printed goods	109 9	5,77	106 5	2,61	104 9	2,08	237 0	3,07
Total dyed goods	151 0	4,92	93 1	2,69	93 0	2,29	147 7	3,37
Total woven coloured goods	132 5	4,47	46 1	1,52	25 4	68	40 1	1,00

Imports in the year under review in all the three lines increased considerably as compared with the preceding year, the increase being largest in the case of printed goods. Even as compared with 1929 30, the figures showed a considerable decline only in the case of woven coloured goods, whereas in the case of printed goods it actually showed an increase. Under printed goods the quantity imported was 237 million yards as compared with 105 million yards

in the previous year and 200 million yards in 1929 30. Imports of dyed goods amounted to 148 million yards as compared with 93 million yards in 1931 32 and 151 million yards in 1929 30. Thus, the imports of the year under review were only 3 million yards less than in 1929 30. Imports of woven coloured goods rose from 25 million yards in 1931 32 to 40 million yards in 1932 33, but compared with 1929 30, there was a decrease of over 92 million yards. The

million yards in 1931-32 to 71 million yards in 1932-33. Imports in 1929-30 were 87 million yards. Imports under cambrics, prints and chintz increased from 20 and 25 million yards in 1931-32 to 41 and 50 million yards in 1932-33, the imports in 1929-30 being 43 and 61 million yards respectively. The other items also showed increases as compared with the preceding year. Thus, it will be seen that under white and

coloured goods the trade had regained to some extent the position which it had occupied in 1929-30.

The percentage shares in 1913-14 and the past five years of the United Kingdom and Japan, the two principal competitors for the Indian piece goods import trade in each of the three important classes of piecegoods are set forth below—

Percentage shares of the United Kingdom and Japan in the imports of cotton piecegoods

	1913-14		1928-29		1929-30		1930-31		1931-32		1932-33	
	United Kingdom	Japan	United Kingdom	Japan	United Kingdom	Japan	United Kingdom	Japan	United Kingdom	Japan	United Kingdom	Japan
Cotton piecegoods—												
Grey	98.8	5	69.4	28.8	56.2	12.5	39.2	59.8	23.9	74.3	31.2	68.5
White	98.5		94.8	1.0	92.1	2.9	84.6	10.3	74.0	21.4	68.1	29.2
Coloured	92.6	2	66.2	21.7	57.6	31.9	60.0	30.2	49.4	42.4	45.7	50.4

The share of the United Kingdom increased to some extent under greys as compared with the preceding year. There was a consequential drop in the share of Japan. The share of the United Kingdom in the year under review amounted to 31 per cent as compared with only 24 per cent in the preceding year and 56 per cent in 1929-30. Japan's share in the year under review was 68.5 per cent as compared with 74 per cent in the preceding year and 42.5 per cent in 1929-30. The decrease in Japan's share in the year under review is of a very small magnitude. The increase in her share in the past few years has been largely due to the attractively low prices at which Japan has offered her goods. On the other hand, the share of the United Kingdom which had been falling off considerably for 4 or 5 years up to 1931-32 shows some signs of revival in the year under review. As regards white goods,

Japan has been making considerable progress in the last four years. In 1929-30 her share in white goods was under 3 per cent. By 1930-31 it had risen to over 10 per cent. In 1931-32 it had gone up to 21 per cent and in the year under review it was a little over 29 per cent. The share of the United Kingdom, on the other hand, declined from 92 per cent in 1929-30 to 68 per cent in 1932-33. In coloured goods also Japan is fast capturing the Indian market from the United Kingdom and in the year under review Japan has ousted the United Kingdom from the position of the largest supplier of these goods. The share of the United Kingdom dropped from 58 per cent in 1929-30 to 46 per cent in 1932-33, whereas Japan's share went up from 32 per cent in 1929-30 to over 50 per cent in 1932-33. The percentage shares of the principal sources in the total imports of piece goods into India are shown below—

Percentage shares in the total quantities of piecegoods imported

	13-14	23-24	24-25	25-26	26-27	27-28	28-29	29-30	30-31	31-32	32-33
United Kingdom	97.1	88.8	88.5	82.3	82.0	78.2	75.2	65.0	58.8	49.4	48.7
Japan	3	8.2	8.5	13.9	13.6	16.4	18.4	29.3	36.1	43.8	47.3
United States	3	5	5	1.0	9	1.4	1.5	1.7	1.0	2.5	1.7
Netherlands	8	7	6	1.1	1.1	1.0	1.0	1.1	1.5	9	4
Other countries	1.5	1.8	1.9	1.7	2.4	3.0	3.9	2.9	2.6	3.4	1.9
Total	100	100	100	100	100	100	100	100	100	100	100

The outstanding feature of the table, as was noted in the Reviews for the last three years, is the definite, and continuous trends, in opposite directions, of the percentage shares of the United Kingdom and of Japan during the past nine years. Japan increased her share from 44 per cent in 1931-32 to 47 per cent in 1932-33. The share of the United Kingdom, on the other

hand, further declined from 49.4 per cent to 48.7 per cent. Thus, the share of the United Kingdom was reduced from 97 per cent in 1913-14 to a little under 49 per cent in 1932-33, whereas Japan from a position of no importance whatever increased her share enormously, and is now responsible for almost half the total quantity of piecegoods imported into India.

compared with 4.1 million yards valued at Rs 18 lakhs in 1931-32. The imports in 1929-30 amounted to 2 million yards valued at Rs 10 lakhs. It is clear, therefore, that Japan had reduced her prices very considerably as although the quantity imported from that source had more than quadrupled as compared with 1929-30 the total declared value had gone up by 50 per cent only. Imports from the United Kingdom, Germany and Italy increased from 185,000, 170,000 and 31,000 yards in 1931-32 to 250,000, 258,000 and 85,000 yards respectively in 1932-33. The share of France fell slightly from 51,000 to 47,000 yards.

Wool, raw and manufactured (Rs 2.96 lakhs)—There has been a very considerable increase in the value of imports under this head as compared with the preceding year. The increase has been general and was shared by all the sub-heads under this head except carpets and rugs. Imports of raw wool increased from 6.7 million lbs valued at Rs 31 lakhs to 7.2 million lbs valued at Rs 32 lakhs in 1932-33. Australia was the largest supplier with 3 million lbs valued at Rs 15 lakhs in the year under review as compared with 2.9 million lbs valued at Rs 15 lakhs in the preceding year. The United Kingdom increased her share very considerably from a little under a million lbs valued at nearly Rs 9 lakhs in 1931-32 to 2.1 million lbs valued at Rs 18 lakhs in 1932-33. Thus, the United Kingdom ousted Persia as the second largest supplier of raw wool to India. The share of the latter country amounted to 1.3 million lbs valued at Rs 3 lakhs as compared with nearly 2 million lbs valued at Rs 5 lakhs in the preceding year. Imports of worsted yarns for weaving increased from 568,000 lbs valued at Rs 9 lakhs in 1931-32 to 912,000 lbs valued at Rs 15 lakhs in 1932-33. Imports of knitting wool went up from 739,000 lbs valued at Rs 14 lakhs to 996,000 lbs valued at Rs 18 lakhs.

Woollen piecegoods—Imports of woollen piecegoods in 1932-33 increased by over 8 million yards as compared with the preceding year and even exceeded the imports of 1929-30 by about a million yards. Imports in the year under review amounted to 13.9 million yards as compared with 5.5 million yards in the preceding year and 12.6 million yards in 1929-30. The value of the imports of 1932-33 amounted to Rs 1.61 lakhs as compared with Rs 69 lakhs in 1931-32 and Rs 2.33 lakhs in 1929-30. The countries which accounted for the great rise in imports under this head in the year under review were France, Italy, Japan and the United Kingdom. The shares of the first three countries amounted to 4.6, 3.6 and 1.4 million yards as compared with 2.1, 4 and 0.1 million yards respectively in the preceding year. The share of the United Kingdom also went up from 1.3 million yards valued at Rs 25 lakhs to 2.8 million yards valued at Rs 52 lakhs. The other countries, except Netherlands, also showed increases in their shares. The average declared value per yard of the French, Italian and Japanese supplies were Rs 0.120, Rs 1.28 and Rs 0.89, whereas that of the imports from the United Kingdom was Rs 1.13-11.

There was a considerable increase in the number of shawls imported. These amounted

to 338,000 pieces valued at Rs 11 lakhs as compared with 164,000 pieces valued at Rs 6 lakhs in the preceding year. The imports in 1929-30, however, were 658,000 pieces valued at Rs 27 lakhs. As usual, Germany was the largest single source of supply, her share going up from 114,000 pieces to 186,000 pieces. Imports from the United Kingdom and from other countries also showed considerable increases.

Imports of carpets and floor rugs declined from 267,000 lbs valued at Rs 5 lakhs in 1931-32 to 185,000 lbs valued at Rs 4 lakhs in 1932-33. In 1929-30 the imports were 601,000 lbs valued at Rs 10 lakhs. Imports from the United Kingdom were the highest amounting to 81,000 lbs valued at Rs 1.8 lakhs as compared with 76,000 lbs valued at Rs 2 lakhs in the preceding year. The share of Persia receded considerably from 146,000 lbs valued at Rs 2 lakhs in 1931-32 to 78,000 lbs valued at Rs 80,000 in 1932-33. The declared value per lb of the United Kingdom supplies was Rs 2.2-10 and those from Persia Rs 1.04. Imports under the head blankets and rugs other than floor rugs increased from 2.4 million lbs valued at Rs 19 lakhs in 1931-32 to 4.2 million lbs valued at Rs 34 lakhs in 1932-33.

Metals and manufactures thereof (Rs 9.73 lakhs)—The imports of metals and manufactures thereof declined by 23,000 tons or 5 per cent in quantity from 418,000 tons in 1931-32 to 395,000 tons in 1932-33 and by Rs 4 lakhs or less than 1 per cent in value from Rs 9.77 lakhs to Rs 9.73 lakhs. Iron and steel represented Rs 5½ crores of this total as compared with Rs 6½ crores in 1931-32 and, as in the preceding year, occupied the fifth place in order of importance among India's imports, the first four being cotton manufactures, machinery and millwork, mineral oils and raw cotton. If such items as machinery and millwork, hardware, cutlery, implements and instruments and vehicles are grouped with metals and manufactures thereof under one head, the total value would aggregate Rs 32 crores, while the value of yarn and textile fabrics, usually the most important group among India's imports, amounted to Rs 38 crores in the year under review. In the preceding year the metals group accounted for Rs 32½ crores, while the textile head totalled Rs 27 crores.

Iron and steel (Rs 5.30 lakhs)—The world's production of pig iron in 1932, estimated at 38½ million tons, was 30 per cent less than in 1931 and steel output, estimated at 49 million tons, was 28 per cent less. The biggest declines were registered in the United States, Germany and France, while the decrease in the case of Belgium and Luxemburg was comparatively small. In the United Kingdom the production of pig iron fell by only 5 per cent from 3.77 million tons in 1931 to 3.57 million tons in 1932, but steel output recorded a small increase of 1 per cent from 5.20 million tons to 5.26 million tons. Considering the prevailing world depression, it is surprising that the British manufacturers maintained their output to this remarkable extent in spite of the fact that the export trade, particularly with India, suffered from the severe competition from Continental producers.

In India, the imports of all classes of iron and steel, including pig iron and old iron or steel, in 1932-33 were even lower by 12 per cent than the poor record of the preceding year and amounted to 326,000 tons as compared with 371,000 tons in 1931-32 and 614,000 tons in 1930-31. The year of maximum importation was 1927-28 when 1,197,000 tons of manufactured iron and steel were received. Since then the imports have been steadily declining with a corresponding decrease in the share of the United Kingdom except in 1931-32, when as a result of her departure from the gold standard, the portion of the United Kingdom in the total trade was slightly higher than in the preceding year. In 1932-33, however, there was a set-back and the share of the United Kingdom stood at 43 per cent as compared with 44.2 per cent in 1931-32 and 43.8 per cent in 1930-31. There were also similar decreases in the case of France and the United States of America. On the other hand, the shares of Belgium and Germany were well maintained, being approximately 32 and 7 per cent respectively as in 1931-32. The efforts made by these two Continental countries to

retain the ground in the Indian market led them to cut prices to an extent sufficient to overcome not only the effect of the depreciation of sterling but also the additional duties levied on certain classes of iron and steel materials of non British origin.

Other metals (Rs 4.42 lakhs)—Imports of metals, other than iron and steel, rose from 47,000 tons valued at Rs 3.44 lakhs in 1931-32 to 69,000 tons valued at Rs 4.42 lakhs in 1932-33, there being an increase under each description of non ferrous metals with the exception of aluminium and lead.

Machinery and millwork (Rs 11.16 lakhs)—The value of the imports of machinery and millwork declined by 4 per cent from Rs 11.57 lakhs in 1931-32 to Rs 11.16 lakhs in 1932-33. The trade, however, showed a noticeable expansion in some directions, notably under sugar, textile and tea machinery, while in most other branches depressed conditions prevailed. The following table analyses the imports of machinery and millwork according to classes during the last five years —

	1928-29 Rs (lakhs)	1929-30 Rs (lakhs)	1930-31 Rs (lakhs)	1931-32 Rs (lakhs)	1932-33 Rs (lakhs)
Prime movers	3.04	4.12	2.74	1.56	1.00
Electrical	2.37	2.41	2.39	2.16	1.56
Boilers	1.15	1.09	.97	.56	.45
Metal working (chiefly machine tools)	.33	.36	.30	.19	.15
Mining	.80	.61	.74	.66	.38
Oil crushing and refining	.40	.43	.40	.35	.19
Paper mill	.35	.7	.7	.6	.5
Refrigerating	.23	.20	.22	.10	.9
Rice and flour mill	.21	.24	.22	.10	.9
Saw mill	.7	.9	.7	.3	.3
Sewing and knitting	.89	.85	.59	.51	.45
Sugar machinery	.18	.9	.14	.30	1.53
Tea machinery	.40	.28	.17	.11	.21
Cotton machinery	2.16	2.10	1.78	1.93	2.08
Jute mill machinery	1.30	1.44	.81	.32	.36
Wool machinery	.2	.6	.1	.1	.3
Typewriters, including parts and accessories	.32	.26	.25	.13	.7
Printing and lithographing presses	.24	.23	.14	.15	.9
Belting for machinery	.83	.90	.64	.50	.53

Motor vehicles (Rs 2.43 lakhs)—As might be expected from the state of general trade and the income of the people, the use of motor vehicles was greatly restricted during the year. There was, therefore, a continuation of the decrease in the imports of motor vehicles into India, but of these reduced imports, the percentage share of the United Kingdom showed a noticeable expansion. The improvement in the British proportion in the total importation, which was in evidence since the suspension of the gold standard by Great Britain in September 1931, was greatly accentuated during 1932-33, especially in the latter half of the year. The total imports of motor cars in 1932-33 numbered 6,201 valued at Rs 1.29 lakhs as compared with 7,220 valued at Rs 1.48 lakhs in 1931-32 and 12,601 valued at Rs 2.58 lakhs in 1930-31. The number of British cars advanced from

2,178 or 30 per cent (valued at Rs 50½ lakhs) in 1931-32 to 3,958 or 64 per cent (valued at Rs 80 lakhs) in 1932-33, of which no fewer than 3,076 cars were imported during the second half of the year. The number of cars imported from the United States of America declined from 3,368, valued at Rs 65 lakhs to 1,201 valued at Rs 28½ lakhs and of those from Canada fell from 676 valued at Rs 10 lakhs to 296 valued at Rs 6½ lakhs. The combined imports from these two countries represented only 24 per cent of the total number of cars imported in 1932-33 as compared with 56 per cent in 1931-32 and 66 per cent in 1930-31. This decrease in the purchases of American cars was due to the exchange handicap and to the growing insistence of buyers for greater economy in the cost of maintenance and operation.

Of the total number of cars imported during the year under review 2,525 cars (3,325) were received in Bombay, 1,634 (1,801) in Bengal, 1,004 (860) in Madras, 642 (824) in Sind and 396 (410) in Burma, the corresponding figures for the preceding year being given in brackets.

The number of motor omnibuses, vans, lorries, etc., imported which had receded from 8,913 valued at Rs. 1,42 lakhs in 1930-31 to 4,302 valued at Rs. 67 lakhs in 1931-32 further declined

to 2,676 valued at Rs. 41 lakhs in the year under review. Of the total imports in 1932-33, 93 per cent or 2,484 represented chassis with a total value of Rs. 33 lakhs as against 62 per cent or 2,685 valued at Rs. 47 lakhs in 1931-32. Here again the share of the United Kingdom improved at the expense of the United States of America and Canada. The following table shows the number of all classes of motor vehicles registered in the different provinces of British India up to the end of March 1933.—

Number of motor vehicles registered in British India up to 31st March 1933.

Provinces	Motor cars, including taxi cabs	Motor cycles, including scooters and auto wheels	Heavy motor vehicles (lorries, buses, etc.)	Total
	Number	Number	Number	Number
Bengal including Calcutta	36,861	5,168	4,724	46,753
Bombay City (a)	8,559	496	932	9,987
Bombay Presidency (excluding Bombay City and Sind) (a)	10,208	775	46	11,029
Madras City	13,606	3,168	2,094	18,868
Madras Presidency (excluding Madras City) (a)	7,251	1,493	5,691	14,435
United Provinces (b)	12,117	2,041	4,831	18,989
Punjab	5,415	1,058	4,741	11,214
Burma (a) (b)	9,842	1,165	5,738	16,745
Bihar and Orissa	11,085	1,495	2,680	15,260
Central Provinces (a)	3,077	623	1,658	5,358
Sind	2,046	408	463	2,917
Delhi	6,811	1,241	1,657	9,709
North-West Frontier Province	3,649	1,509	2,709	7,867
Ajmer-Merwara	742	195	202	1,139
Assam (b)	1,947	198	1,606	3,751
Total	133,216	21,033	39,772	194,021

(a) Actually running

(b) Figures relate to the year ending 31st December 1932

Hardware (Rs. 2,99 lakhs)—The value of the total imports of hardware which had fallen from Rs. 3,60 lakhs in 1930-31 to Rs. 2,61 lakhs in 1931-32 improved, in 1932-33, to Rs. 2,99 lakhs which was still below the pre War average of Rs. 3,17 lakhs.

Mineral oils (Rs. 6,70 lakhs)—Imports of all kinds of mineral oils into India declined from 216.6 million gallons in 1931-32 to 187.8 million gallons in 1932-33. Imports of kerosene oil decreased from 85.7 million gallons to 59.5 million gallons, and petrol from 13 million gallons to 5 million gallons. Imports of fuel oil rose from 100.8 million gallons to 104.5 million gallons, and batching oil from 7 million gallons to 9 million gallons.

Sugar (Rs. 4,23 lakhs)—Imports of sugar all sorts, excluding molasses, decreased from 516,000 tons in 1931-32 to 370,000 tons in 1932-33, thus showing a decline of 146,000 tons or 28 per cent. The decline in value was from Rs. 6,01 lakhs to Rs. 4,12 lakhs or 31 per cent. The imports in the year 1929-30 were 940,000 tons valued at Rs. 15,52 lakhs. Imports of sugar 23 D S and above decreased from 365,000 tons valued at Rs. 4,42 lakhs in 1931-32 to

327,000 tons valued at Rs. 3,67 lakhs in 1932-33. The main fall was in the imports from Java, which amounted to 295,000 tons as compared with 336,000 tons in the preceding year. Imports from the United Kingdom went up from about 1,000 tons to 12,000 tons.

The total amount of beet sugar imported during the year was 41,000 tons valued at Rs. 42 lakhs as compared with 118,000 tons valued at Rs. 1,25 lakhs in the preceding year. Imports from the United Kingdom increased from 19,000 tons valued at Rs. 23 lakhs in 1931-32 to 23,000 tons valued at Rs. 24 lakhs in 1932-33. Imports from Russia, on the other hand, went down from 68,000 tons valued at Rs. 66 lakhs to 9,000 tons valued at Rs. 9 lakhs. Imports from Poland dried up completely and those from Germany amounted to 249 tons only as compared with 15,000 tons and 11,000 tons in the preceding year.

Provisions (Rs. 2,93 lakhs)—Under this comprehensive head, which covers a large variety of articles such as canned and bottled provisions, farinaceous and patent foods, condensed milk, biscuits and cakes, confectionery, bacon and ham, cheese, jams and jellies, pickles

and saucers, butter, cocoa and chocolate, kingly glass, oil, lard and vinegar, the total value of the imports recorded showed a further decline from Rs 311 lakhs in 1931-32 to Rs 293 lakhs in 1932-33.

Chemicals (Rs 2.71 lakhs)—The total imports of chemicals (excluding chemical manures and medicines) in 1932-33 were valued at Rs 2.71 lakhs, an increase of Rs 11 lakhs in comparison with 1931-32. Sodium compounds accounted for 17 per cent of the total imports of chemicals as in 1931-32 and amounted to 1,639,000 cwt. valued at Rs 1.28 lakhs as compared with 1,515,000 cwt. valued at Rs 1.21 lakhs in the preceding year. Imports of sodium carbonate amounted to 1,103,000 cwt. (Rs 65 lakhs) as compared with 1,016,000 cwt. (Rs 62 lakhs), the United Kingdom, as usual, remaining the chief source of supply. The total consignments of caustic soda drawn chiefly from the United Kingdom, Russia and the United States of America rose from 261,000 cwt. valued at Rs 32 lakhs to 285,000 cwt. valued at Rs 34 lakhs. Among other descriptions of sodium compounds the quantities of sodium bichromate, sodium sulphide and borax showed increases part of which was counterbalanced by decreases under sodium silicate, sodium cyanide and sodium bicarbonate. Imports of acids further declined from 29,000 cwt. to 26,000 cwt. in quantity and from about Rs 8½ lakhs to Rs 7½ lakhs in value.

Drugs and Medicines (Rs 1.86 Lakhs)—The total value of drugs and medicines imported recorded a fall of 3 per cent from Rs 1.91 lakhs in 1931-32 to Rs 1.86 lakhs in 1932-33. Imports of camphor fell from 1,933,000 lbs. valued at Rs 29 lakhs to 1,753,000 lbs. valued at Rs 25 lakhs.

Paper and Pasteboard (Rs 2.86 Lakhs)—The total imports of paper and pasteboard increased from 2,191,000 cwt. valued at Rs 2.50 lakhs in 1931-32 to 2,610,000 cwt. valued at Rs 2.86 lakhs in 1932-33, of which 2,220,000 cwt. (Rs 2.49 lakhs) represent paper of all kinds as against 1,915,000 cwt. (Rs 2.24 lakhs) in the preceding year. Imports of printing paper amounted to 679,000 cwt. valued at Rs 83 lakhs as compared with 616,000 cwt. valued at Rs 80 lakhs in 1931-32. Both news printing and other kinds of paper recorded increases the former rising from 399,000 cwt. valued at Rs 45 lakhs to 457,000 cwt. valued at Rs 47½ lakhs and the latter from 217,000 cwt. valued at Rs 35 lakhs to 223,000 cwt. valued at Rs 36 lakhs.

Liquors (Rs 2.26 Lakhs)—Imports of liquors in 1932-33 did not show any great variation in comparison with the preceding year and totalled 5.4 million gallons valued at Rs 2.26 lakhs as against 5.7 million gallons valued at Rs 2.27 lakhs in 1931-32. Compared with 1930-31, the imports showed a much greater decline being less by 25 per cent in quantity and by 32 per cent in value. Of the total quantity of liquors imported, ale, beer and porter accounted for 69 per cent split for 28 per cent and wines for only 3 per cent. Imports of ale, beer and porter remained almost unchanged at 3,718,000 gallons.

Salt (Rs 79 Lakhs)—The imports of foreign salt by sea into British India advanced by 21 per cent in quantity from 151,000 tons in 1931-32 to 181,000 tons in 1932-33 and by 10 per cent in value from Rs 72 lakhs to Rs 79 lakhs. With the exception of Aden, the principal source of supply almost all the other countries sent more than in the preceding year. Of the total quantity imported in 1932-33, nearly 285,000 tons or 72 per cent came from Aden as compared with 311,000 tons or 70 per cent of the total in the preceding year. Germany raised her supplies from 26,000 tons to 57,000 tons, Spain from 1,000 tons to 25,000 tons and Italian East Africa from 67,000 tons to 103,000 tons. There were also larger receipts from Egypt which amounted to 40,000 tons as against 15,000 tons in 1931-32, while the United Kingdom slightly reduced her supplies from 26,000 tons to 25,000 tons.

Dyeing and Tanning Substances (Rs 2.50 Lakhs)—Imports of dyeing and tanning substances showed a decline, the total value amounting in 1932-33 to Rs 2.50 lakhs, a decrease of Rs 18 lakhs in comparison with 1931-32 and of Rs 9 lakhs in comparison with 1930-31. Coal-tar dyes representing the bulk of the imports under this head, showed a decrease from 17.9 million lbs. valued at Rs 2.33 lakhs to 13.0 million lbs. valued at Rs 2.17 lakhs. This set-back was due almost entirely to a decrease in the imports of dyes other than alizarine from 15 million lbs. to 10.6 million lbs. in quantity and from Rs 2.15 lakhs to Rs 1.99 lakhs in value. Imports under this head represented 84 per cent of the total imports of coal-tar dyes as against 83 per cent in 1931-32. Imports of alizarine dyes showed a decline of about 910,000 lbs. in comparison with the imports of the previous year, which had been returned at 3.2 million lbs. but the value recorded declined slightly from Rs 18 lakhs to Rs 17 lakhs.

Spices (Rs 1.72 Lakhs)—There was a slight increase in the imports of spices, the quantity of which in 1932-33 amounted to 1,272,000 cwt. as against 1,270,000 cwt. in 1931-32. The value, however, showed a further decline from Rs 2.08 lakhs to Rs 1.72 lakhs. Betelnuts showed an increase in quantity from 1,101,000 cwt. to 1,117,000 cwt. but the value fell off from Rs 1.45 lakhs to Rs 1.19 lakhs.

Glass and Glassware (Rs 1.42 Lakhs)—The total value of the imports of glass and glassware amounted to Rs 1.42 lakhs as compared with Rs 1.22 lakhs in 1931-32. Almost all the important descriptions under this head recorded improvements. Of the principal countries participating in this trade Japan retained the foremost position and the value of her supplies advanced to Rs 65 lakhs in 1932-33 from Rs 42 lakhs in 1931-32 and Rs 55 lakhs in 1930-31.

Tobacco (Rs 97 Lakhs)—Imports of unmanufactured tobacco which had improved from 1.6 million lbs. in 1930-31 to 2.8 million lbs. in 1931-32 advanced further to 5.1 million lbs. in the year under review and exceeded those in 1929-30 by half a million lbs. Supplies from the United States of America accounted for 91 per cent of the total quantity imported in

1932-33 as against 87 per cent in the preceding year and totalled 47 million lbs as compared with 25 million lbs in 1931-32

Precious Stones and Pearls (Rs 84 lakhs)—The trade in precious stones and pearls showed signs of a slight recovery, the value of the consignments having risen from the abnormally low level viz., Rs 45 lakhs recorded in 1931-32 to Rs 84 lakhs in 1932-33. Of these, diamonds accounted for Rs 71 lakhs and pearls, unset for Rs 10½ lakhs as compared with Rs 32 lakhs and Rs 10½ lakhs respectively in 1931-32. The imports of other precious stones were comparatively small, being valued at Rs 2½ lakhs in 1932-33 as against Rs 2 lakhs in the preceding year.

Cement (Rs 29 lakhs)—Imports of cement showed a further decline from 88,000 tons to

83,000 tons in quantity and from Rs 41 lakhs to Rs 29 lakhs in value. The bulk of the consignments during the year came from Japan, supplies from which source amounted to 39,000 tons (Rs 8 lakhs) as against 29,000 tons (Rs 9½ lakhs) in 1931-32. There was a further falling off in the contribution of the United Kingdom from 45,000 tons valued at Rs 25 lakhs to 34,000 tons valued at Rs 17 lakhs.

Coal (Rs 6½ lakhs)—Imports of foreign coal declined by 37 per cent in quantity from 56,000 tons in 1931-32 to 35,000 tons in 1932-33 and by 42 per cent in value from Rs 11½ lakhs to Rs 6½ lakhs. Bombay, the largest consumer of imported coal, reduced her takings from 28,000 tons to 11,000 tons. The following table shows the sources of the imports of foreign coal during the past five years—

—	1928-29	1929-30	1930-31	1931-32	1932-33
	Tons	Tons	Tons	Tons	Tons
United Kingdom	39,000	19,000	23,000	24,000	16,000
Natal	105,000	197,000	121,000	23,000	14,000
Japan	1,000	1,000	1,000	1,000	
Portuguese East Africa	21,000		5,000		
Australia	1,000	2,000	1,000	4,000	3,000

III—EXPORTS OF MERCHANDISE

The following table shows the comparative importance of the principal articles exported from British India—

EXPORTS.

(In thousands of Rupees)

—	1928-29	1929-30	1930-31	1931-32	1932-33	Percentage on total exports of merchandise in 1932-33
Jute, raw	32,34.92	27,17.38	12,88.47	11,18.81	9,73.03	7.35
Jute manufactures	56,90.49	51,92.68	31,89.44	21,92.42	21,71.18	16.40
Cotton, raw and waste	66,69.10	65,60.35	46,72.65	23,78.19	20,69.95	15.63
Cotton manufactures	7,79.56	7,18.67	5,21.54	4,81.83	3,29.11	2.49
Tea	26,60.44	26,00.64	23,55.93	19,43.74	17,15.28	12.96
Grain, pulse and flour	33,69.42	34,79.16	29,88.19	20,37.18	16,07.69	12.14
Seeds	29,62.52	26,46.76	17,86.18	14,58.83	11,30.68	8.54
Leather	9,44.32	8,16.24	6,39.11	5,35.20	4,76.42	3.60
Metals and ores	8,91.03	10,33.96	7,94.04	5,47.10	4,68.18	3.54
Hides and skins, raw	9,53.98	7,98.27	5,46.63	3,65.71	2,76.87	2.09
Paraffin wax	2,45.54	3,17.69	2,81.83	2,31.74	2,01.88	1.52

Cotton (Rs 23 45 Lakhs)—In Indian Cotton crop of the season 1932 33 was estimated at 4,516,000 bales of 400 lbs each as compared with 4,025,000 bales in the preceding year. The comparatively high parity of Indian cotton led to its gradual replacement by American cotton in Japan and in the Orient in general. The world consumption of Indian cotton for the 12 months ending January 31, 1933 amounted to just over 4 million bales and was far short of the normal annual consumption of 5½ million bales. The high parity thus discouraged the consumption of Indian cotton abroad. Consequently, exports of Indian cotton naturally decreased in the year under review as compared with the preceding year. Exports of Indian cotton in 1932 33 amounted to 2 063,000 bales as compared with 2,369,000 bales in 1931-32 and 4,070,000 bales in 1929 30, and 1932 33 gave the lowest figure of export in the post-War period. The value of the exports amounted to Rs 20,37 lakhs as compared with Rs 23,45 lakhs in the preceding year. Japan as usual, was India's biggest customer and her share amounted to 1,085,000 bales valued at Rs 11,12 lakhs as compared with 1,080,000 bales valued at Rs 11,05 lakhs in the preceding year. China took only 134,000 bales valued at Rs 1,33 lakhs as compared with 437,000 bales valued at Rs 4,52 lakhs. The United Kingdom slightly increased her takings to 161,000 bales valued at Rs 1,61 lakhs as compared with 166,000 bales valued at Rs 1,54 lakhs in the preceding year. Exports to Italy declined from 183,000 bales valued at Rs 1,62 lakhs in 1931 32 to 150,000 bales valued at Rs 1,44 lakhs in 1932 33. Exports to Belgium, France and Spain rose from 121,000, 81,000 and 45,000 bales to 129,000, 124,000 and 52,000 bales respectively. The following statement gives the monthly exports of Indian

cotton during the last five years together with the pre-War average —

Exports of Indian cotton in bales of 400 lbs

(In thousands of Rupees)

—	Pre war average 1909 14	1928 29	1929 30	1930 31	1931-32	1932 33
April	303,600	323,600	386,300	424,700	307,300	95,000
May	248,800	372,800	401,900	341,700	283,400	135,400

Cotton Manufactures (Rs 3.29 Lakhs)— Exports of yarn amounted to 15 million lbs as compared with 22 million lbs in the preceding year. The exports of Indian piecegoods declined from 105 million yards to 66 million yards. Exports to most of the countries showed considerable decreases. Persia took only 8 million yards in the year under review as compared with 20 million yards in the preceding year. Similarly, exports to Ceylon amounted to 13 million yards in 1932-33 as compared with 17 million yards in 1931-32. The shares of Iraq, Tan

ganyika Territory and Arabia declined from 13, 11 and 6 million yards in 1931-32 to 5, 6 and 4 million yards respectively in 1932-33. The shares of most other countries also showed declines.

The total value of the piecegoods exported in 1932-33 declined from Rs 3.24 lakhs to Rs 2.09 lakhs. Grey goods accounted for Rs 13 lakhs, coloured goods Rs 1.95 lakhs and white goods for a little over Rs 1 lakh.

Detailed figures of exports for the past three years compared with 1913-14 are given below —

—	1913 14 (pre war year)	1930 31	1931-32	1932 33
Grey and bleached piece goods—	Million yards	Million yards	Million yards	Million yards
Shirtings	2 2	3 9	4 1	1 7
Chaddars and duties	7 6	2 1	2 3	1 9
T cloth and domestics	21 6	1 3	6	4
Drills and jeans	6	1	1	2
Other sorts	12 2	2 8	1 7	8
TOTAL	44 2	10 2	8 8	5 0
Coloured piece goods	45 0	87 5	95 8	61 4
TOTAL PIECE GOODS	89 2	97 7	104 6	66 4

Jute and Jute Manufacturers (Rs 31.44 lakhs)—The total area under jute in 1932 was estimated at 2,143,000 acres as compared with 1,862,000 acres in the preceding year. The yield for the 1932 crop was estimated to be 5,845,000 bales since revised to 7,097,000 bales of 400 lbs each as against 5,567,000 bales in the preceding year. The total weight of raw and manufactured jute exported during the year amounted to 1,213,000 tons, or 7,000 tons less

than in the preceding year. The total value declined from a little over Rs 31 crores in 1931-32 to nearly Rs 31 crores in 1932-33, a drop of Rs 11 crores. Raw jute accounted for 31 per cent of the value and jute manufactures for 69 per cent as compared with 34 per cent and 66 per cent respectively in the preceding year. The following statement compares the quantities exported during the year 1931-32 and each of the past three years—

	1931-32	1930-31	1931-32	1932-33
Jute (in thousand tons)	768	620	587	563
Bags (in millions)	169	134	380	415
Cloth (in million yards)	1,061	1,271	1,021	1,012

The quantity of raw jute exported was 1 per cent less than in the preceding year and 27 per cent less than in the pre War year 1913-14. Exports of gunny bags increased in number from 389 millions to 415 millions, but those of gunny cloth declined slightly from 1,021 million yards to 1,012 million yards. The production of Indian mill consumption and exports of raw jute for the last 20 years are given in table No. 29 and detailed figures of exports of manufactures are given in tables Nos. 30A and 30B.

The total exports of raw jute declined from 587,000 tons valued at Rs 11 crores in 1931-32 to 563,000 tons valued at Rs 9½ crores in 1932-33. Exports to Germany amounted to 123,000 tons valued at Rs 2.14 lakhs in 1932-33 as compared with 131,000 tons valued at Rs 2.44 lakhs in 1931-32. The share of the United Kingdom in the year under review decreased to 130,000 tons valued at Rs 2.24 lakhs from 154,000 tons valued at Rs 3.11 lakhs. Exports to France amounted to 69,000 tons valued at Rs 1.16 lakhs in 1932-33 as compared with 52,000 tons valued at Rs 99 lakhs in 1931-32. Spain took 42,000 tons as compared with 36,000 tons in the preceding year, whereas the United States of America, Italy and Belgium reduced their shares from 49,000, 44,000 and 46,000 tons to 36,000, 37,000 and 39,000 tons respectively.

Foodgrains and flour (Rs 16.08 lakhs)—The exports under this head declined considerably in the year under review, both in quantity and value, as compared with the preceding year. The total quantity of foodgrains exported amounted to 2,372,000 tons valued at Rs 16.08 lakhs as compared with 2,372,000 tons valued at Rs 20.37 lakhs in the preceding year. Exports of rice declined from 2,372,000 tons to 1,887,000 tons. Consignments of wheat dwindled to the paltry figure of 2,000 tons as compared with 20,000 tons in the preceding year and 197,000 tons in 1930-31. Decreases

were also noticeable in the shipments of wheat flour, barley, and jowar and bajra from 43,000, 27,000 and 59,000 tons in 1931-32 to 21,000, 17,000 and 16,000 tons respectively in 1932-33. The only increase in exports was in the case of pulses from 91,000 tons to 111,000 tons. There were no exports of maize as in the preceding year.

Tea (Rs 17.15 lakhs)—The total production of tea in India in 1932 was estimated, as remarked above, at 433 million lbs as compared with 394 million lbs in 1931, 391 million lbs in 1930 and 473 million lbs in 1929. As usual, Assam contributed the largest share viz., 257 million lbs or 60 per cent of the total output and Southern India 62 million lbs or 14 per cent. Production in Assam increased by 13.8 million lbs and in the rest of Northern India by about 19.6 million lbs. The total area under tea in 1932 was 807,500 acres as against 806,700 acres in 1931.

The total shipments of tea during the year recorded an advance of 11 per cent in quantity, but the value fell by 12 per cent. There were no exports of green tea during the year and the entire quantity of 379 million lbs consisted of black tea. Exports to the United Kingdom improved from 291 million lbs to 331 million lbs, but the value recorded a decline from Rs 17 crores to Rs 15 crores. The share of the United Kingdom was 87 per cent of India's total exports as compared with 85 per cent in the preceding year. Re-exports of Indian tea from the United Kingdom amounted to 40 million lbs in 1932-33 as against 50 million lbs in 1931-32. Stocks in London amounted to 187 million lbs at the end of the year as compared with 139 million lbs at the corresponding date of the preceding year. Re-exports of Indian tea from the United Kingdom to the Irish Free State were 14.6 million lbs as against 17.8 million lbs a year ago. Re-exports to Russia amounted to 6.3 million lbs in the year

under review is compared with 3.8 million lbs in the preceding year. Direct shipments to Russia recorded a slight decline from 3.5 million lbs to 2.9 million lbs in 1932-33. Thus the total exports of Indian tea to Russia advanced from 7.5 million lbs in 1931-32 to 9.2 million lbs in 1932-33. From the London market other European countries took Indian tea to the extent of 8.7 million lbs as compared with 10.8 million lbs in the preceding year. Re-exports from the United Kingdom to the United States of America contracted from 7.9 million lbs in 1931-32 to 6 million lbs in 1932-33. Direct shipments to the United States of America, however, advanced from 9.8 million lbs to

11.1 million lbs. Thus the total exports to the United States of America declined slightly from 17.7 million lbs to 17.1 million lbs. Re-exports from the United Kingdom to Canada and Newfoundland fell from 6.9 million lbs in 1931-32 to 3.2 million lbs in the year under review. Direct shipments to Canada, however, showed an increase from 14.1 million lbs to 16.7 million lbs. Exports to China fell away from 1.2 million lbs to 4,500 lbs only. Exports to Australia, including New Zealand also dropped from 3.5 million lbs to 2.8 million lbs and to Egypt from 3.3 million lbs to 2 million lbs. Exports to Persia declined from 2 million lbs to 1.5 million lbs.

Exports of tea by sea to foreign countries

—	1906-07	1915-16	1927-28	1928-29	1929-30	1930-31	1931-32	1932-33
	lbs (1,000)	lbs (1,000)	lbs (1,000)	lbs (1,000)	lbs (1,000)	lbs (1,000)	lbs (1,000)	lbs (1,000)
From Northern India (Calcutta and Chittagong)	217,951	301,103	315,100	309,845	326,363	307,117	295,201	323,825

From Bombay, Sind and Burma	1,713	11,227	761	436	600	517	323	500,115
TOTAL	233,644	338,170	361,611	359,602	376,634	356,209	311,518	878,837

Oilseeds (Rs 11.31 lakhs)—The total exports of Indian oilseeds declined by 26 per cent in quantity from 988,000 tons in 1931-32 to 733,000 tons in 1932-33 and by 22 per cent in value from Rs 11.59 lakhs to Rs 11.31 lakhs. An examination of the detailed figures given on the margin shows that there has been a substantial decline in the exports of all the principal oil bearing seeds with the exception of rapeseed.

The following are the quantities of oilseed exported in recent years —

	Pre war 1930-31	1931-32	1932-33
	average		
	(Thousands of tons)		
Linseed	379	257	120
Rapeseed	273	33	54
Groundnuts	212	601	672
Castor	114	91	104
Cotton	240	41	12
Sesamum	119	1	12
Copra	31		
Others	85	13	14
TOTAL	1,453	1,037	988

Hides and Skins (Rs 7.43 lakhs)—The trade under this head has been progressively smaller in the last two or three years. The total value of the trade has fallen from Rs 8.92 lakhs in 1931-32 to Rs 7.43 lakhs in the year under review, a fall of 16 per cent. The main reason for this decline, as explained in earlier

issues of this Review, is the trade depression, which led to a reduction in the demand for hides and skins. The average declared value for raw hides and skins declined from 7 as 9 p to 7 as 2 p, whereas in the case of tanned hides and skins, the decline was from Rs 1.7-10 per lb to Rs 1.7-0 per lb. Shipments of raw hides and skins during the year amounted to 27,300 tons valued at Rs 2.77 lakhs as compared with 33,600 tons valued at Rs 3.66 lakhs in the preceding year. Exports of raw hides declined from 16,600 tons valued at Rs 91 lakhs in 1931-32 to 13,300 tons valued at Rs 63 lakhs in 1932-33. Exports of raw skins declined in weight from 16,500 tons to 13,300 tons. The total value of the consignments declined from Rs 2.74 lakhs in 1931-32 to Rs 2.14 lakhs in 1932-33. Exports of tanned or dressed hides or skins decreased from 15,700 tons valued at Rs 5.26 lakhs in 1931-32 to 14,500 tons valued at Rs 4.66 lakhs in 1932-33. Exports of tanned hides amounted to 9,000 tons valued at Rs 1.62 lakhs in the year under review as compared with 10,300 tons valued at Rs 2.13 lakhs in the preceding year. There was a slight increase in the exports of tanned skins from 5,400 to 5,500 tons, but the value showed a decline from Rs 3.14 lakhs in 1931-32 to Rs 3.01 lakhs in 1932-33.

Lac (Rs 1.24 lakhs)—Business in the lac markets abroad continued to decline, the depressed conditions in the large consuming industries being pronounced throughout the year.

The total exports of lac fell by 10 per cent in quantity from 464 000 cwts in 1931-32 to 418,000 cwts in 1932-33 and by 33 per cent in value from Rs 1,84 lakhs to Rs 1 24 lakhs the decrease being noticeable in the case of shellac, button lac and stick lac

Raw Wool (Rs 1.23 lakhs)—The trade in Indian raw wool received a setback the exports falling from 41 million lbs to 32 million lbs in quantity and from Rs 2,77 lakhs to Rs 1,23 lakhs in value. Of the total quantity shipped the United Kingdom took 28 million lbs or 87 per cent as compared with 35 million lbs or 85 per cent in the preceding year while the remainder went mainly to the United States of America and, to a less extent to Germany and other Continental countries. Besides Indian wool a fairly large quantity of foreign wool of Tibetan and Central Asian origin is imported across the frontier and then re-exported from India.

Oils (Rs 54 lakhs)—The total exports of oils consisting mostly of vegetable oils were valued at Rs 54 lakhs in 1932-33 as compared with Rs 57 lakhs in 1931-32. Shipments of vegetable oils increased from 1,900,000 gallons valued at Rs 30 lakhs to 2 444 000 gallons valued at Rs 38 lakhs. Exports of castor oil continued to increase and amounted to 1 125 000 gallons valued at Rs 17 lakhs as compared with 982 000 gallons valued at Rs 15 lakhs in the preceding year and 477 000 gallons valued at Rs 9 lakhs in 1930-31. Exports of groundnut oil showed a remarkable expansion and totalled 917 000 gallons in 1932-33 as compared with 455,000 gallons in 1931-32 and 166 000 gallons in 1930-31. Despatches of coconut oil declined from 36 000 gallons in 1931-32 to 29,000 gallons in 1932-33.

Metals and Ores (Rs 4.68 lakhs)—The total exports of ores amounted to 227 000 tons valued at Rs 1 36 lakhs in 1932-33 as compared with 235,000 tons valued at Rs 1,47 lakhs in 1931-32. Exports of manganese ore which represent about 87 per cent of the total quantity of ores exported were even lower than the poor record of the preceding year and totalled 198 000 tons as compared with 212 000 tons in 1931-32 and 486,000 tons in 1930-31. As usual, France was the largest purchaser, but she reduced her takings from 80,000 tons to 75,000 tons. Shipments to Belgium also declined from 35,000 tons to 32 000 tons. Exports to the United Kingdom, which had fallen from 114,000 tons in 1930-31 to 54,000 tons in 1931-32, improved to 55 000 tons in the year under review. A noticeable feature of the trade was the increased participation of Japan which took 31,000 tons in 1932-33 as against 6,000 tons in the preceding

year. There were smaller shipments to Germany and the Netherlands, amounting to 1,300 tons and 2 000 tons respectively. Exports to the United States of America, which had declined from 49,000 tons in 1930-31 to 28,000 tons in 1931-32, ceased altogether in the year under review. The export trade in manganese ore was largely confined to Bengal and Bombay, the former accounting for 69 per cent and the latter 23 per cent as compared with 70 and 30 per cent respectively in the preceding year the remainder being shipped from Madras. There were no exports of ferro manganese and ferruginous manganese ore during 1932-33.

Exports of pig iron further declined by 38 per cent in quantity from 351,000 tons in 1931-32 to 218 000 tons in 1932-33 and by 40 per cent in value from Rs 1 23 lakhs to Rs 74 lakhs. Normally, Japan is the best purchaser of Indian pig iron but her takings were considerably reduced from 188,000 tons in 1931-32 to 72,000 tons in the year under review. It may be pointed out that in June 1932 Japan raised the import duty on pig iron from 1 70 yen to 6 00 yen per ton. India has been the principal exporter of this material to Japan and the enhancement of the duty has led to a substantial reduction of exports to that country. Exports to the United States of America also declined from 108 000 tons in 1930-31 to 51,000 tons in 1931-32 and further to 33,000 tons in 1932-33. These losses were to some extent compensated by increased shipments to the United Kingdom, which amounted to 76,000 tons in 1932-33 as against 69,000 tons in the preceding year. Exports to China also showed an advance from 15 000 tons to 17,000 tons while those to Germany declined from 13,000 tons to 8,000 tons. The following table shows the production of pig iron and steel in India during the past three years—

(In thousand tons)

	1930-31	1931-32	1932-33
Production of pig iron	1,140	1,070	880
“ “ steel	625	602	591
Production of finished steel	434	450	427

Other Exports—Other important exports from India include paraffin wax (Rs 2,02 lakhs), oilcakes (Rs 1,96 lakhs), Coffee (Rs 1,10 lakhs), spices (Rs 72 lakhs), teakwood (Rs 40 lakhs), dyeing and tanning substances (Rs 75 lakhs), unmanufactured tobacco (Rs 73 lakhs)

Index Numbers of Prices.

The Director General of Commercial Intelligence, Calcutta, publishes from time to time an addendum to the publication *Index Numbers of Indian Prices 1861-1926* which brings up-to date (1) the unweighted index numbers of 28 exported articles, (2) the unweighted index numbers of 11 imported articles, (3) the general un-weighted index number for 39 articles and (4) the weighted index numbers of 100 articles on base 1873-100

The following table contains these index numbers since the year 1925 —

Year	Exported articles 28 (un weighted)	Imported articles 11 (un weighted)	General Index No for all (39) Articles (un weighted)	Weighted Index No (100) Articles equated to 100 for 1873
1925	233	211	227	205
1926	225	195	216	260
1927	209	185	202	258
1928	212	171	201	261
1929	216	170	203	254
1930	177	157	171	213
1931	125	140	128	
1932	120	144		

Besides the above wholesale price index numbers, the Director General of Commercial Intelligence Calcutta, compiles a wholesale price index number for Calcutta while the Bombay Labour Office compiles similar statistics for Bombay and Karachi

The following table gives these index numbers since 1925

Wholesale price index numbers for Calcutta, Bombay and Karachi (Base 1914)

Year	Calcutta	Bombay	Karachi
1925	159	163	151
1926	148	149	140
1927	148	147	137
1928	145	146	137
1929	141	145	133
1930	116	126	108
1931	96	109	95
1932	91	109	99
1933	87	98	97

About the end of the year 1929 there began a sharp decline in wholesale prices which continued during 1930 and 1931. During 1932 although wholesale prices were slightly lower than in 1931, the fluctuations were within narrow limits. In 1933 prices again recorded a considerable fall.

The various Provincial Governments publish in their respective *Gazettes* fortnightly and monthly statements of retail and wholesale prices of certain important commodities. In addition to these, however, some of the Provincial Governments also publish working class cost of living index numbers. Such index numbers are being published regularly every month for the following centres, for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay, for Nagpur and Jubbulpore by the Department of Industries, Central Provinces and Berar, for seven centres in Bihar and Orissa by the Department of Industries, Bihar and Orissa, and for Rangoon by the Office of the Director of Statistics and Labour Commissioner, Burma, Rangoon.

The Bombay working class cost of living Index number with base July 1914 100 stood at 931 in December 1933, the average for the year being 103. The Ahmedabad cost of living index number with base August 1926 to July 1927-100 stood at 71 in December 1933 while the Sholapur cost of living index number with base February 1927 to January 1928 100 stood at 68 in December 1933. The Nagpur cost of

living index number on base January 1927-100 was 59 in November 1933 while the Jubbulpore Index on the same base was 55. For Rangoon, four different index numbers with base 1931-100 are compiled for (a) Burmese, (b) Tamils, Telugus and Oriyas, (c) Hindustanis and (d) Chittagonians. The Index Number in December 1933 for these were 88, 91, 91 and 87 respectively.

The catastrophic fall in prices which commenced at the end of 1929 continued also during 1931 although with less vigour than in 1930. In 1932 prices ruled at a slightly lower level than in 1931. In 1933 the downward tendency of prices continued.

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry and the majority of the Indian Economic Enquiry Committee of 1925 made many suggestions for the improvement of price statistics and advocated the passing of a Census and Statistics Act. This latter suggestion was also endorsed by the Whitley Commission on Indian Labour and the Government of India have already taken up the consideration of the subject. It is to be hoped that Messrs Bowley and Robertson who have recently arrived here at the invitation of the Government of India will make recommendation for putting Indian price statistics on a sound footing.

Air Routes.

Imperial Airways service provide through transport from Karachi to Europe and London arriving at Karachi from Europe each Thursday evening where it connects with Indian Trans-Continental Airways whose service departs from Karachi on Thursday evening reaching Jodhpur the same night leaving Jodhpur on Friday morning, it proceeds via Delhi and Allahabad arriving at Calcutta on Friday evening. On Saturday morning it leaves for Rangoon and Singapore.

From Calcutta Indian National Airways operate a daily service to Dacca and a bi-weekly service to Rangoon via intermediate ports.

In the reverse direction through air transport is provided from Singapore to Karachi by Indian Trans-Continental Airways and on to Europe and London by Imperial Airways westbound service, leaving Karachi each Wednesday morning.

The Tata Air Mail Service connects at Karachi with Imperial Airways Eastbound and Westbound services and provides through air transport to Ahmedabad, Bombay, Bellary and Madras.

The following are the Time Tables for the various services —

East Bound

	Time (Local) (Standard) Day
London, (<i>Croydon</i>)	Dep 12 30 Sat
Paris	Dep 17 15 "
Cairo	Dep 03 00 Tues
Baghdad	Dep 03 00 Wed

West Bound

Karachi	Dep 09 00 Wed
Baghdad	Dep 04 30 Fri
Cairo	Dep 04 30 Sat
Paris	Dep 09 30 Mon
London, (<i>Croydon</i>)	Arr 11 45 "

Intermediate calls are made at Brindisi, Athens, Mirabella, Alexandria, Giza, Ruthbah, Basra, Koweit, Bahrain, Shajrah and Gwadh in both directions.

The fares from Karachi are as follows — to Baghdad, £34, to Athens £71, to London £95. The through fare from Karachi to London allows for a weight of 100 kilos (221 pounds) per passenger, and a passenger is entitled to free conveyance of luggage to the extent of the difference between his own weight and the 221 pounds mentioned above.

If the difference between the weight of the passenger and 221 lbs is less than 30 lbs an additional 33 lbs of luggage may be carried free. The rate for excess luggage is just over twelve shillings per kilo. Children in arms are weighed with and carried under the same tickets as their mothers or nurses, and other children are charged full fare.

Africa and the Far East

Several new air services which are of considerable importance to India have been inaugurated, and of these the most notable is the England-Africa service which connects with the England-India service at Cairo to and provides an entirely new route between Delhi and South Africa.

Other important air lines established are the French service between Paris and Saigon and the Dutch service between Amsterdam and Batavia, both of which pass through Baghdad and Karachi.

Baghdad, in particular, is developing rapidly in importance and it is said, not without reason, that it will soon become the Clapham Junction of the air. This will certainly be the case if the projected services from Persia and Russia materialise.

The proposed extension of the England-India Air Mail to Australia is expected to be brought into operation shortly and a service already operates as far as Singapore.

The Indian Stores Department.

A detailed account of the organisation of the Indian Stores Department at Government of India headquarters and of the successive orders issued by Government to assure as far as possible the purchase of stores of Indian manufacture or in India is to be found in earlier issues of the Indian Year Book. The current rules to regulate stores purchase prescribe that preference in making purchases shall be given in the following order—

First, to articles which are produced in India in the form of raw materials or are manufactured in India from raw materials produced in India, provided that the quality is sufficiently good for the purpose,

Second, to articles wholly or partially manufactured in India from imported materials, provided that the quality is sufficiently good for the purpose.

Third, to articles of foreign manufacture held in stock in India provided they are of suitable type and quality requisite.

Fourth, to articles manufactured abroad which need to be specially imported.

The new rules were calculated materially to widen the scope of operations of the Department.

The total value of orders placed by the Department during the year 1932-33, the latest period for which figures are yet available, was Rs 3,30,90,903, as compared with Rs 3,60,00,006 during 1931-32. The fall in business was a result of the all round contraction and this was a direct consequence of the curtailment of the activities of the Spending Department imposed by prevailing conditions of trade depression and aggravated by a further drop in commodity prices.

As a result of the close observance of the Rupee Tender Rules by departments of the

Central Government and other provincial governments, the number of stores indents submitted for sending to the Director General in India Store Department, London, was 835 and their value Rs 70,36,880 against 951 for stores valued at Rs 93,84,301 in the preceding year.

The Department continued throughout the year to assist manufacturers in India to improve the quality of their products. The means adopted included technical advice and suggestions. Every endeavour was made to substitute supplies of indigenous manufacture, wherever possible, without sacrificing economy and efficiency. Among the more notable instances of developments in this direction the Department in their annual report give foremost place to the textile industry.

The final accounts of the Department for the year 1931-32 closed with a total revenue of Rs 13,84,370 and expenditure of Rs 24,89,699 showing nett deficit of Rs 11,05,329. The expenditure of the year 1932-33 is provisionally shown at Rs 21,67,056. The reduction which the figures indicate, in spite of a normal growth of expenditure, due to annual increments estimated at Rs 40,000 per annum, was produced by vigorous retrenchment measures. There was, however, a heavy fall on the credit side of the account, the total earnings amounting to Rs 10,14,439 as against Rs 13,84,370.

The question of definitely declaring the Department to be a commercial or service undertaking was under consideration of Government and they decided in January 1930 that it could not for the present be declared a commercial undertaking, as some of its activities were admittedly not of a commercial character, and that it should therefore be treated as a public service department.

Bombay Stamp Duties.

The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the Indian Year Book. The Congress was founded in 1885 by Mr Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year, the fundamental principles of the Congress were laid down to be —

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India,

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved, and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the Extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

“The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country.”

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal. But

the union then effected was purely superficial, the difference between the Moderates and the Extremists was fundamental, the Extremists captured the machinery of the Congress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr Gandhi and his lieutenants. In 1927 the Congress actually adopted independence as the goal of India. In the following two years the Congress made what the extreme leftists described as a climb-down, while the Liberals moved towards the left, with the result that for a time there appeared to be a commonness of purpose between the Liberals and Congressmen. At its 1928 Session the Congress, while adhering to Independence, agreed to accept Dominion Status if granted, before the end of 1929. Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England and the two Indias. Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfilment of the “ultimatum” issued at its previous Session, the Congress, at its 1929 Session, declared for complete independence or “Purna Swaraj.” Throughout the year 1930 the Congress was engaged in a defiance of the law of the land which, it was hoped, would help India, to attain complete independence. Early next year the Congress actually suspended civil disobedience by virtue of an agreement arrived at with the Government, but the fulfilment of the terms of this agreement gave rise to trouble and another agreement was concluded. As a result of this Mr Gandhi, on behalf of the Congress, actually went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its subversive activities and succeeded fully in its object. Congress was crushed and all forms of Congress work throughout the country were successfully prevented. In fact as well as in law Congress ceased to exist. It became impossible for Congressmen even to hold their annual sessions since 1932. For some time it existed in fact, though not in law, but of late it has ceased to exist even in fact.

THE NON-CO-OPERATION MOVEMENT.

It was in 1920 that Mr Gandhi, who had only in the previous year unsuccessfully started his Passive Resistance struggle as a protest against the Rowlatt Act, conceived his idea of non-co-operation. Originally intended to be a protest against the British policy towards

Turkey, the “fighting” of two other grievances was later on added to its first object, namely, the punishment of officials in the Punjab Martial Law regime and the securing of Swaraj for India. Mr Gandhi and Mr Shaikat Ali were able in 1920 to get the Calcutta Special Congress

to endorse their programme of "progressive non-violent non-co-operation" which was reiterated by the annual session at Nagpur which, on Mr. Gandhi's motion, changed its old creed into 'the attainment by India of Swaraj by all legitimate and peaceful means'. The stern measures adopted by local Governments led to the imprisonment of a large number of active Congress men with the result that the Ahmedabad Congress in 1921 made a 'grim resolve' to challenge the repression movement by appointing Mr. Gandhi as dictator and by resolving to start a 'No Tax' campaign at Bardoli. The riot in Chauri Chaura in 1922 preceded by the Bombay riot in 1921 during the Prince of Wales's tour in 1920 and 1924 editions of his book opened Mr. Gandhi's eyes to the impossibility of maintaining a non-violent atmosphere under existing conditions. He suspended his proposed civil disobedience campaign and replaced it by what is known as the Bardoli Programme which checked all the aggressive items of non-co-operation in favour of the promotion of inter-communal unity and Khaddar. Soon after Mr. Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for six years (See 1923 and 1924 editions).

This turn of events threw cold water on the enthusiasm of non-co-operators who got discouraged. In order, therefore, to sound the country's readiness for aggressive action once more, the Congress appointed a Disobedience Committee, in June 1922.

The Committee toured the country and in October, 1922, produced two reports, one favouring Congress entry to offer co-operation to Government and the other recommending the adoption of the Bardoli Programme. A battle royal ensued between the two parties for two or three years, the Swarajists—or the "Co-operators," as they were derisively called by the non-co-operators—carrying the day throughout. Every little triumph of the Swarajists meant a diminution of the prestige and influence of the No Changers. This went on for some time until the Belgium session of the Congress, presided over by Mr. Gandhi himself, suspended the non-co-operation programme. Thereby the movement was practically killed, and strange to say it received its death blow at the hands of the very author of its being. But the fond parent did not lose heart and bided his time. His chance came in 1928 when the Congress was split into two warring camps. One was ready to accept Dominion Status for India, while the other would have nothing short of independence. At the psychological moment Mr. Gandhi staged a re-entry into the political arena—he had been, but a silent spectator during the five preceding years—and, professing to effect a compromise within the Congress, provided a loophole for the revival of non-co-operation. Although Dominion Status was actually declared in 1929 to be the goal of Indian political progress Mr. Gandhi insisted on having it on the spot and when that was naturally refused he returned to his old love non-co-operation and boycott. He had been biding his time, and the astute politician, that he is, he reintroduced in December 1929 his formula that had been dead five years. Indeed the Congress Executive

was authorized to give the signal for a campaign of non-co-operation of taxes and civil disobedience. Even in 1929 the Congress Executive appointed Mr. Gandhi as Dictator for all India and gave him power to launch civil disobedience and when he thought fit. The Mr. Gandhi in March and practically the whole of the year 1930. The Congress and Government of the day showed the kind of faith in him, the effects of the Government to put down all the Congress. The movement was the only of the very thing, the effect of the Government and civil disobedience to the Government. In 1929 a year of negotiations between the Viceroy and Mr. Gandhi. The year 1930 was a year of a situation although the discussion centered on all the issues of the Viceroy and Mr. Gandhi. The efforts for the year were carried to the point of India in Mr. Gandhi to participate in the Round Table Conference in London to formulate a constitution for India. All this however proved to be a full in the storm which had started out in full force early in the New Year. On the ground that the Government had broken the understanding arrived at between the Viceroy and Mr. Gandhi the Congress had declared in favour of a revival of non-co-operation. The Government however was apparently prepared for it, simultaneous with the announcement of the Congress decision the Government set in motion its powerful machinery and grappled with the revived non-co-operation movement before it had time to get rooted in civil disobedience was cooled before it was born this time. In short the Government killed the non-co-operation movement. Another attempt was made in the middle of 1931 to revive it in its attenuated form but the "Individual civil disobedience," as it was called, was still born. (See later).

Congress in 1925-32

The career of the Congress between the Belgium session, when the N.C.O. movement was suspended, and the years 1929-30 when civil disobedience was revived was comparatively dull. During the first half of 1925 the Congress policy was one of aimless drift. The death of Mr. C. R. Das demoralized the Swarajists. Mr. Gandhi promptly went to their rescue and at the end of the year the Swarajists' political programme was formally adopted by the Calcutta Congress. The 11th session of the Congress, which met in Assam during Christmas week in 1926, set its face against the acceptance of ministerialships or other offices in the gift of the Government—in other words disavowed the 'Responsive Co-operation', a new creed which had sprung up within the Swarajist ranks—and approved of the policy of rejection of budget and refusal of supplies until a response to the 'national demand' was forthcoming.

All this talk and quarrel about the internal affairs of the Congress were set at rest by the non-inclusion of Indians on the personnel of the Royal Commission on Indian Reforms. Most of the leaders fancied that it would be an insult to India if Indians were not appointed members of the Commission. Even moderates, reputed for their sobriety and reasonableness, affected extremism. The Viceroy endeavoured—but in vain—to explain the position to Indian leaders (See Year Book of 1928).

Congressmen, of course, met during Christmas 1927 and resolved to boycott the Simon Commission, declared independence as the goal of India and offered some solutions for the Hindu-Muslim problem. In the following year the Congress, in its plenary session at Calcutta, declared that Dominion status would be acceptable to India. This, it will be recalled, marks a return to 1908 when, soon after the Surat split, it was stated that the objects of the Congress were, among other things, "the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire." This, however, proved to be a mere smoke-screen raised by Congress tactics to conceal from the world their real intention which was disclosed in December 1929.

The Congress which met in Calcutta during Christmas in 1928 under the presidency of Pandit Motilal Nehru, was divided into three camps, the advocates of complete independence, those who wanted Dominion status and nothing beyond that, and Pandit Motilal sandwiched between the two, with one foot in either camp. This was just the opportunity for which Mr. Gandhi had apparently been waiting, and he staged a come back at the psychological moment. He threw in his weight with Pandit Motilal and sponsored a compromise formula. This satisfied neither wing but eventually a resolution was adopted which approved of the Nehru Reports embodying a "Swara," constitution framed by a committee under the Chairmanship of the Pandit Motilal Nehru and consisting of members of all parties) as a great step in political advance and, whilst adhering to the Madras resolution on independence, the Congress was prepared, subject to the exigencies of the political situation, to adopt the Nehru constitution, if it was accepted by the British Parliament before the expiry of 1929, and if that did not happen the Congress would revive non-violent non-cooperation. Congressmen could, in the meanwhile, carry on propaganda for independence.

The political outlook was gloomy, indeed, and there was a clear call for a generous gesture from Britain. Lord Irwin, the sympathetic Viceroy, saw this and strove his utmost to elicit legitimate Indian feeling. He undertook a trip to England on four months' leave and had long conversations with the Indian Office Chief and the newly formed Labour Cabinet of Britain. He returned in the last week of October and within a few days of his arrival issued from Delhi a statement which has since become famous as the **Viceroy's Declaration of October 31, 1929**. I am authorised, he said, on behalf of His Majesty's Government, to state clearly that, in their judgment, it is implicit in the Declaration of 1917 that the natural issue of India's constitutional progress, as there contemplated, is the attainment of Dominion Status. His Excellency announced the British Government's intention to summon a conference of representatives of British India and Indian States to discuss British Indian and All Indian problems for seeking the greatest possible measure of agreement for the final proposals to be placed before Parliament.

The main feature of the Congress session held shortly after was the reascendancy to power of Mr. Gandhi. The principal resolution went through successfully and, in fulfilment of the Calcutta Congress ultimatum, "Independence was declared when the New Year was rung in and the "Independence flag" was hoisted.

Events moved very fast in India in 1930 which has been epochal in the country's political history. On the one hand the British Government took practical measures to devise a constitutional machinery that would place India on the highroad to responsible self-government (see Round Table Conference section), on the other, the Congress, the premier political organisation of the country, made a bold bid for complete independence—or **Purna Swaraj**."

Civil Disobedience Movement

In pursuance of the resolution of the Lahore Congress, it was decided by the Congress leaders early in the year to test the strength and willingness of the country to undertake and carry on a programme involving loss, suffering and sacrifice, and with this end in view they organised what has since been called the "Independence Day" demonstration. The response according to the Congress leaders, "exceeded anticipations." Having thus ventilated the new revolutionary policy of the Lahore Congress and satisfied themselves that their methods would obtain general support in the country, the Working Committee appointed at Lahore met at Ahmedabad and decided to inaugurate mass civil disobedience. It appointed Mr. Gandhi as the 'Dictator' of the Congress and gave him full powers to launch, conduct and carry on the movement.

Before taking what he described as his "final plunge" in politics, Mr. Gandhi wrote in his first week of March his famous letter to the Viceroy announcing his determination to launch civil disobedience if his demands were not met. They were the famous Eleven Points of Mr. Gandhi—total prohibition, reduction of the rupee ratio to 1s 4d, reduction of the land revenue to at least 50 per cent and making it subject to legislative control, abolition of the salt tax, reduction of the military expenditure to at least 50 per cent, to begin with, reduction of the salaries of the higher grade service men to one half or less, so as to suit the reduced revenue, protective tariff on foreign cloth, the passage of the Coastal Traffic Reservation Bill, discharge of all political prisoners, withdrawal of all political prosecutions abrogation of section 124-A, of the Regulation of 1818 and the like and permission to all Indian exiles to return, the abolition of the C. I. D. or its popular control and the issue of licenses to use fire arms for self-defence, subject to popular control.

The reply sent to Mr. Gandhi by the Private Secretary to the Viceroy regretted that Mr. Gandhi contemplated "a course of action which is clearly bound to involve violation of the law and danger to the public peace."

When his impossible demands were turned down, Mr Gandhi outlined a programme of civil disobedience consisting of various items calculated to subvert the Government by breaking certain laws, reducing its income from excise and customs duties, inducing Government servants to resign, picketing liquor shops and shops dealing in foreign, particularly British, goods, mainly British cloth, and urging the masses not to pay land revenue, chowkidari tax and forest grazing fees. The salt Act was the first target.

After organising his forces in various centres in the country, Mr Gandhi inaugurated his civil disobedience movement by setting out on a march on foot from his Ashram at Sabarmati with the object of breaking the salt law and defying the Government. He reached Dandi on the seashore and picked up salt with out paying duty. The police did not interfere. This was the signal for Congressmen to break the law all over the country simultaneously.

On the first few occasions, the Government merely looked on, but the law-breaking fever spread fast and wide. Eventually the authorities took measures to prevent the manufacture and sale of illicit salt. They were resisted by Congress volunteers who formed a cordon round the spot where salt was made and defied the police to arrest them. The police arrested them at first, but they could not obviously arrest hundreds of spectators who, though not actually engaged in salt making, were encouraging the law breakers, jeering at the police and indulging in hostile demonstrations. When these crowds began to indulge in violence against the police the latter had perforce to disperse them by means of the regulation staff known as "lathi". This went on for a while without bringing Purna Swaraj any nearer. Mr Gandhi found a way out of the rut by declaring that he proposed to raid the salt works at Dharasana, near Surat. Similar raids were planned on the salt depot at Wadala, in Bombay. Shortly after this, however, Mr Gandhi was arrested under the provisions of a century old Regulation and confined during the pleasure of the Government as a state prisoner whose activities were a danger to the Government established by law.

The raids on the salt works at Dharasana and Wadala were carried out repeatedly and hundreds were injured when the police repelled the raid and dispersed the raiders and sympathisers. The advent of the monsoon put an end to salt making and salt depot raids. But other illegal activities were taken up.

The anniversary of a dead leader, "Independence Day" or some such pretext was utilised to organise anti Government demonstrations. The arrest of persons who were courting arrest was also the occasion for a display of hostility against the Government. Such disturbances occurred in several places and the police had to impose a ban on meetings, processions, demonstrations and the like which invariably disturbed the public peace and led to clashes. Even these prohibitory orders were disobeyed thereby compelling the police to use force. Two such instances

occurred in **Sholapur and Peshawar**. In the former place the police were attacked, constables mobbed and murdered in broad daylight, and Government buildings and law courts set on fire. Martial law was introduced and quiet restored after a long time. In Peshawar also rowdy crowds defied the police and even the military British troops were stoned. People were so much inflamed that it took a number of weeks for the return of normal conditions. It was revealed during the Peshawar disturbances that the Congress propaganda had to some extent interfered with the discipline of a few Indian sepoys.

Nor did the Congress stop here. Thanks to its persistent propaganda, the martial races inhabiting the border were taught to hate the British and to expect the establishment of "Gandhi Raj" at an early date. A belief that the British administration was weakening spread across the border to the Afridis who carried out a series of raids on Peshawar. Not that these were by any means successful, they were easily repelled and severely punished. But it would not do to allow them to continue in the false belief that they could defy the British Government with impunity. The Government, therefore, took prompt punitive measures and put an end to the raids.

Congressmen living in inland areas stirred up villagers against the Government and persuaded them to refuse to pay dues for grazing cattle in the forests. Forest regulations were broken.

Gujarat, where Mr Gandhi's influence was greatest, was the stronghold of the movement for non payment of land revenue. In all the four districts of Gujarat ryots were persuaded to withhold payment of arrears of the previous years and, later on, of the instalments of the following year.

The non tax campaign and the seditious appeals calculated to disturb the loyalty of the police and the troops could not be allowed to continue. Similarly, the authorities could not look on when Government servants in Gujarat, who refused to resign their posts in obedience to the Congress mandate, were subjected to countless hardships in the shape not only of social boycott but also refusal of daily supplies and even of water. In several instances Government servants were coerced and prevented from doing their duty—things were made so hot for them. The activities of the Congress in other spheres also became too mischievous to be tolerated any longer and the Viceroy issued a **series of Ordinances**. One of these gave power to the Government to confiscate the premises of Congress offices whence baneful doctrines emanated. Refusal of normal supplies and services to Government servants was also made an offence. Later in the year all the Congress and allied bodies were declared unlawful associations under another Ordinance.

One of the main objects of the Congress was to deplete the Government treasury by attacking the excise and customs revenue. Excise was the main source of revenue to most provinces and customs to the central government. It was also intended seriously to affect British industry, particularly the Lancashire textile

trade For this purpose systematic picketing of liquor and foreign (especially British) cloth shops was resorted to. This work was reserved for the large number of women who, for the first time in the history of politics in India, joined the movement in response to Mr Gandhi's appeal. The willing co-operation of the commercial community made the task of the women pickets somewhat easy, but in several cases coercion replaced peaceful persuasion and the consuming public were put to untold hardships. The Viceroy issued an Ordinance making picketing accompanied by intimidation or coercion punishable.

The upheaval had its own effect on impulsive and immature youths and the year witnessed a large number of revolutionary outrages, in many of which bombs and fire arms were used. Police officers were killed and an attempt was made to assassinate the Governor of the Punjab. An armed raid was made on the Chittagong armoury. Many deplored these incidents, but the mischief had been done.

The year 1931, however, opened bright, for before the end of January Mr Gandhi was again a free man. His release was a magnanimous gesture on the part of the British Government, intended to create a favourable atmosphere in India for the reception of the Premier's statement of 19th January and to give the Congress a fair chance to consider the offer embodied therein. On the very day on which the Premier made his famous pronouncement (See 'Indian Round Table Conference') leading delegates in London urged the Premier to follow up his statement with a generous gesture in the shape of general amnesty to all political prisoners. Mr MacDonald complied and within a week the principal Congress leaders were released from prison.

They soon met together and considered the Premier's statement which, of course, they deemed unacceptable, a deadlock was again threatened but, thanks to the good offices of eminent Liberal leaders, the Congress secured the Government's assent to what has since become famous as the Irwin Gandhi Pact or the Delhi Pact. (See 1932 *Indian Year Book*)

This "truce" was signed on the 5th of March and was hailed all over the country as the dawn of a new era of co-operation. The past was for a time forgotten and there was a lull in political activity. All were eagerly looking forward to the Congress delegates contributing the weight of their influence and experience to the success of the second Round Table Conference. Nevertheless, a strong under current of resentment ran through the ranks of the Congress who openly complained that Mr Gandhi had weakly surrendered to the Government in agreeing to call off the struggle. This feeling, which was held by the wild men of the left and impetuous youths, was enhanced by the execution of Bhagat Singh and his accomplices who had been judicially found guilty of murder and other terrorist crimes. The execution was the signal for a furor in the country, much to the chagrin of Mr Gandhi.

It was in this state of feeling that the forty-fifth session of the Congress met at Karachi under the Presidentship of Mr Vallabhbhai Patel. (See last year's *Indian Year Book*)

The outstanding feature of the Karachi session was the unprecedented outburst of revolutionary sentiment which throughout characterised its proceedings. It was always there, but dormant, and the execution of Bhagat Singh stirred it up. The revolutionaries, particularly from Bengal, asserted themselves publicly and a determined effort was made to torpedo the Delhi Pact. The intensity of feeling could be gauged by the action of a few youths who on the arrival of Mr Gandhi went to the length of presenting him with a black flower in token of Bhagat Singh's execution. Thus Mr Gandhi had to work against insuperable odds and it speaks volumes for his great personal influence that he managed to carry the day. This, however, he achieved only by subscribing to a resolution which only half-heartedly condemned terrorist outrages, extolling at the same time the terrorists' motives and their "courage and self-sacrifice". In this connection it may be noted that following this resolution a number of revolutionary crimes were perpetrated during the year. (See last year's *Indian Year Book*)

To return to the Karachi Congress. Such was the charm exercised by Mr Gandhi over his followers, sober as well as terrorist, that, in the midst of cries denouncing the Delhi Pact as a surrender, the open session of the Congress almost unanimously ratified it and nominated Mr Gandhi to proceed to the R T C as its representative.

The resolution ran "This Congress, having considered the provisional settlement between the Working Committee and the Government of India, endorses it, but desires to make it clear that its cult of independence remains intact. The Congress delegation will work for this goal so as to give the nation control over the army, external affairs, finance and economic policy and to have a scrutiny by an impartial tribunal on the financial transactions of the British Government in India and to examine and assess the obligations to be undertaken by India and England—with right for either party to end the partnership at will. Provided, however, that the Congress delegation will be free to accept such adjustments as may be demonstrably necessary in the interests of India, the Congress appoints Mr Gandhi as its delegate to the R T C with the addition of such representatives as the Working Committee may add later."

Another important resolution passed by the Congress defined "Purna Swaraj". This again was a sop to the clamant left wing and its passage gave a clear indication of the way the wind was blowing. The main idea underlying the resolution was the creation of a socialistic state as outlined by Pandit Jawaharlal Nehru in his presidential address to the previous session of the Congress at Lahore. Astute politician that Mr Gandhi is, he saw in this resolution a formula which would prevent an alternative revolutionary programme from taking the field.

"Purna Swaraj" was defined as a government which would secure certain specified fundamental rights for the people, living wage for the workers,

reduction of land revenue, levy of inheritance tax, adult suffrage, free primary education, reduction in military expenditure and in civil servants' salaries, control of key industries, etc

The feeling that prevailed at Karachi characterized the activities of the Congress throughout the rest of the year—the same restlessness at having to accept the Delhi Pact, the same lip condemnation of terrorism side by side with sympathy with terrorists. The "War Lords" of the Congress were chasing under the enforced silence and could hardly resist the tendency to create mischief.

It was very easy for them to pick a quarrel with the Government over the implementing of the Delhi Pact. They accused Government of being slow and niggardly. In releasing political prisoners they insisted on the reinstatement of all village officials who had resigned when the Congress campaign was at its height—even in the case of those who had been replaced since. They claimed substantial if not wholesale remissions of land revenue on the slightest pretext. They bitterly complained against alleged excesses of the police in collecting land revenue. Taking shelter under the withdrawal of the anti-picketing ordinance they continued their picketing operations as they did during the civil disobedience movement. This last led to several clashes, notably in Cawnpore where aggressive picketing resulted in serious and prolonged Hindu-Muslim rioting—described as a "ghastly holocaust"—involving widespread massacre.

Speaking of the Cawnpore disturbances and the communal tension that they led to, one is reminded of the growing differences between the Congress and the Muslims that were a feature of the year's politics. Ever suspicious of Congress bona fides towards Muslim rights the Mahomedans kept aloof from the civil disobedience movement and any attempt on the part of Congress leaders to rope them in resulted in a clash. Mr. Gandhi however, made repeated attempts to placate the Muslims, making numerous offers to meet their demands from time to time. The bulk of the Muslim community was particularly angry with Mr. Gandhi and the Congress for the tactics adopted by them to secure the support of the entire community to an agreed formula. Mr. Gandhi and the Congress sought to make capital of the presence of a few Muslims in the Congress, calling themselves Nationalist Muslims. Congress was ready it was stated, to accept any scheme on which the entire Muslim community, including the Nationalist Muslims, put forward and attempts were accordingly made in Bombay, Ahmedabad, Bhopal, Delhi and Simla in various parts of the year, to evolve a communal formula, but all fell through.

The Congress made two more attempts in July to arrive at a formula and eventually drew up a "compromise between undiluted communalism and undiluted nationalism." Joint electorates were to form the basis of representation in the future constitution of India, but it was agreed that there should be reservation of seats in the Federal and Provincial Legislatures on the basis of population with the right

to minorities to contest additional seats in any province where they were less than 25 per cent. This was, of course, not acceptable to the Muslims, who, to a man, stood by the Fourteen Points.

Disappointment at the failure to solve the communal tangle rendered the political outlook gloomy and the Congress leaders began to wonder whether any good would result from their participation in the Round Table Conference. Meanwhile those of them who were itching for a fight had succeeded in working up in the country parts, particularly in Gujarat and the U. P., a situation which the Government could hardly tolerate.

In the United Provinces particularly an agrarian dispute of a purely economic character, aggravated by growing trade depression was turned to political advantage by Congressmen. In the result although the no rent campaign being part of the civil disobedience movement was abandoned under the Delhi Pact, it was revived now, nominally as an economic agitation but really as a political weapon. The Government had perforce to take measures to ensure the collection of land revenue, but the Congress protested against them. This was added to the long list of sins of omission and commission, of which the Congress accused the Government. Similarly in Gujarat, it was alleged that the police were using excessively coercive measures to collect Government dues.

On all these grounds, cumulatively, Mr. Gandhi declared that the Delhi Pact had been broken by the Government and that therefore, he was released from his obligation thereunder to participate in the Round Table Conference on behalf of the Congress. "The civilians have undone the statesman's work," Mr. Gandhi complained. Mr. Gandhi released for publication what he described as a charge sheet against the Government, who replied with an equally long list of instances in which the Congress agents had broken the Delhi Pact. Lengthy correspondence passed between Mr. Gandhi and the officers of the Government of Bombay and the Government of India, the main point of which was Mr. Gandhi's demand that the Congress should be recognised as an intermediary between the people and the Government and the Government's firm repudiation of that contention. Numerous interviews took place between Congress leaders and Government officers all of which unfortunately proved fruitless. This new deadlock again darkened the political horizon but Mr. Gandhi was induced to ask for an interview with the new to "clear up certain

Then began what were known as the Simla talks. Mr. Gandhi asked for an impartial inquiry into the incidents at Bardoli and once again the Government of India turned it down. Nor was the Congress allowed to negotiate with the Government as a parallel body on an equal footing. Eventually, however, the Government offered to institute a departmental inquiry into the charges made by the Congress against officials in Bardoli and this provided a loop hole for the Congress to get out of the awkward corner into which it had placed itself. Affected to be satisfied with this concession, Mr. Gandhi agreed to go to London.

(The part played by Mr. Gandhi at the R T C is referred to in the "Indian Round Table Conference" section)

With Mr. Gandhi away, conditions worsened in India and his lieutenants continued their activities in defiance of both the Delhi and the Simla Pacts. Very soon an unsatisfactory situation was created in India which found its counterpart in the poor progress made in London towards reaching an agreed formula for the future constitution of India.

Congress propaganda in areas like the North West Frontier Province, easily susceptible to subversive doctrines, resulted in a flare up. Tribes on and across the Frontier were led to believe that the British authority was on the wane and Peshawar was actually invaded. The "Red Shirt" movement, organised by a follower of Mr. Gandhi, was assuming menacing proportions and the Government had to act. An Ordinance was promulgated with a view to checking the spread of this movement, and Khan Abdul Gaffar Khan, its author, was deported from the scene of his operations.

Similarly an Ordinance was issued to check the aggressive no rent campaign in the United Provinces, and Pandit Jawaharlal Nehru was arrested for disobeying certain orders passed on him under this Ordinance.

The hollowness of the Congress charges was revealed by the findings of the Inquiry Officer who went into the allegations against the police and the Government in Bardoli. He held that there had been no cases of undue coercion and found most of the Congress charges unfounded.

This gloomy situation coincided with the return of Mr. Gandhi on the 28th of December, without having achieved anything substantial at the Round Table Conference beyond re-stating the impossible Congress demands proclaimed many a time before. The stage was thus set for another political struggle in the country, which began in the first few days of the new year with the arrest of Mr. Gandhi.

Congress in 1931-32

The Government had planned out its programme thoroughly and was ready to meet any emergency. Within a few hours of the arrest of Mr. Gandhi the Government issued ordinances of a comprehensive character giving wide powers to the executive to deal with the civil disobedience movement with determination, so that there was little scope for escape on the part of Congressmen. (See last year's *Indian Year Book*)

With such wide powers put into operation with extraordinary speed and rigidity, Congressmen all over the country were hauled up within the very first week after the issue of the ordinance. In most cases they were rounded up on suspicion arising out of their past conduct. Later on option was given to them to give undertakings about their future behaviour and thereby obtain their release. In some cases the authorities

succeeded in securing such undertakings, but in the majority of cases Congressmen remained firm. In the first three months of the operation of the ordinance the jails in almost every province were full to overflowing and special accommodation had to be found for the thousands of prisoners who were incarcerated under the new policy.

When the life of the ordinances was about to expire at the end of six months the Government in the centre as well as in the various provinces acknowledged that they had almost succeeded in scotching the Congress movement, but they pleaded that, although the movement had been brought under control, the danger of its revival was not absent. It was therefore decided to consolidate all the ordinances into one omnibus ordinance and renew them till the end of December. Before the year closed the Government came forward with Bills both in the centre and in the provinces to put into the form of a statute the more important provisions of the consolidated ordinance. The legislatures in the country had no strong Congress element on account of the boycott of councils adopted by the Congress during the last general election, so that the Government did not find much difficulty in getting the ordinance bills passed into statutes. The only concession they made was to limit its duration to one or two years in the different provinces.

After the first flush of the operation of the ordinances the Congress movement gradually weakened. No doubt the Congress had its so-called Emergency Councils and Dictators carrying on civil disobedience activities in a spasmodic manner, but it became apparent as the year 1932 advanced that the support from the country became less and less month by month.

Early in the year 1932 an attempt was made to hold the annual session of the Congress at Delhi. Similarly another attempt was made early in 1933 also. On both occasions Pandit Madan Mohan Malaviya came forward to preside. Batches of Congressmen went from different parts of the country to Delhi and Calcutta, respectively, but they were all arrested on leaving their places or before reaching their destination and set free again after the date of the projected session. The Congress claimed that in spite of all this obstruction they held the sessions and passed resolutions reaffirming the civil disobedience movement, but the whole thing was practically reduced to a farce. It was really a game of hide and seek. It is not impossible in such large cities like Delhi or Calcutta for a handful of men to meet in spite of the determination of the police to prevent any formal meetings. Such was really the case. When the police were not within sight and before they could come a few men crowded together, "held the session" and passed resolutions. No sooner was this done and, in fact, while the "session" was in progress, the police arrived, dispersed the meeting and arrested those who participated in the "proceedings".

One side effect of the movement for the boycott of British goods was the riot between Hindus and Muslims in the city of Bombay. It appears

that the Muslim community was against the boycott movement and in the attempt to assert its liberty to purchase whatever goods it wanted it came into conflict with the Hindu section of the commercial public. Words led to blows and quarrels led to a riot which lasted nearly two months levying a heavy toll of nearly 400 killed and several thousands wounded.

Thus from very early in the year 1932 the country was in the grip of the civil disobedience movement and the measures which the Government adopted to suppress it. After the Government had put about 75,000 persons in jail all over the country, the movement, as stated before, began to wane and by the end of the year it had nearly disappeared.

In the latter half of 1932 His Majesty's Government published what is known as the Communal Award laying down what it considered to be an equitable settlement of the mutual claims of the different religious sections in the country as regards seats in the legislatures and the proportion in which they should be divided among them. This award was necessitated by the failure of the representatives of different communities to arrive at a common settlement during the first two sessions of the Round Table Conference. In the course of the second R T C the minorities, consisting of the Muslims, the depressed classes and the Anglo-Indians, arrived at a mutual settlement known as the Minorities Pact which, they claimed, had the support of 45 per cent of the population of India.

When the Award was published it was strongly resented by the Hindu community and by the extreme section of the Muslim community which did not get everything that was claimed for the community. In the Punjab and Bengal, especially, it led to a strong agitation on the part of the Hindus.

A section of public men made repeated attempts to arrive at a mutual settlement in order to replace the Award as provided in the Award itself, but nothing resulted.

Similarly there was great dissatisfaction among the Hindu community about the separate electorates on which basis provision had been made in the Communal Award for the representation of the depressed classes. The Hindus claimed that the depressed classes, being but a section of the Hindu community, should not be permanently separated from the bulk of the Hindu community. Mr Gandhi from his prison cell made it a question of conscience and suddenly declared a fast unto death unless the Communal Award was amended in respect of the representation of the depressed classes by means of separate electorates.

This sudden declaration led to a commotion in the country and several leaders gathered together in Poona and, with the help of Dr Ambedkar and Rao Bahadur Raje, representing the two rival groups of the depressed classes, and the help of representative Hindus like Pandit Malaviya, arrived at a formula known as the Poona Pact, which was a modification of that portion of the Communal Award which dealt with the representation of the

depressed classes. As the crisis in Mr Gandhi's life was approaching, owing to prolonged fast, the Prime Minister and the British Cabinet lost no time in effecting a modification of the Award as desired by the signatories to the Poona Pact (See last year's *Indian Year Book*).

An incidental effect of this fast of Mr Gandhi was that it served to bring him once more in the limelight after months of obscurity. As during the past two or three years the Congress stood for Mr Gandhi and *vice versa* and as the Government had successfully suppressed the Congress movement, Mr Gandhi's name and personality receded into the background at least temporarily. This oblivion into which Mr Gandhi had been forcibly thrust was shattered by the "fast unto death", and he became once more the dynamic influence of the previous year. It is true that his activities were confined to the uplift of the depressed classes, but the contact that he was thereby enabled to establish with the outer world served to hearten his sympathisers. During the fast he was given the option of leaving the jail and choosing his own residence, provided he undertook not to take any part in the civil disobedience movement, but Mr Gandhi did not avail himself of this conditional offer of freedom and continued to remain in jail.

Even after he broke his fast he was permitted to continue his activities for the amelioration of the condition of the depressed classes and to work for the abolition of untouchability from within his prison cell. His agitation for a change in the age-long social law among Hindus provoked a counter-agitation on the part of orthodox Hindus who went to the length of suggesting that even if it meant Mr Gandhi's death they would not surrender an inch. The outburst of social reformist enthusiasm engendered by the "fast unto death" gradually waned and in certain respects even a set back ensued. Untouchables' claim for equality with caste Hindus in the matter of entry into temples led to clashes. These circumstances induced Mr Gandhi to undertake an unconditional fast for twenty-one days. Thus once again Congress leaders and sympathisers had the satisfaction of seeing the author of non co operation in the public eye, though in a non political sphere.

In consideration of the moral and spiritual value attached by Mr Gandhi to his new fast and in view of his old age and weakened state of health, Government unconditionally released him the day after the commencement of the fast. Immediately after his release Mr Gandhi suspended civil disobedience for six weeks, and the period of suspension was subsequently extended till August 1. The fast ran its prescribed course and was broken at the end of three weeks. Mr Gandhi is an adept in fasting for long periods and therefore stood the ordeal very well. Very soon he regained his normal health. During his convalescence he held consultation with Mr M S Aney, the acting President of the Congress, and with Dr M A Ansari and Dr B C Roy, two leading Congressmen, who were attending upon him as his medical advisers. As a result of these conversations, Mr Gandhi convened an informal conference of such of the leading Congressmen as were out of jail at the

time for considering how far and in what direction the Congress should change its policy. The Conference met in Poona in the middle of July and was attended by representative Congressmen from all over the country.

Mr. Gandhi had in the meanwhile sent for the Rt. Hon. V. S. Sastri, who came from Combarore. One could now gauge what his advice must have been, but it is clear that the Congress leader paid little heed to his counsel.

The proceedings of the Conference were thorough, lively. Two schools of thought emerged from the discussions: one held that civil disobedience had had sufficient trial but had failed to relieve the end in view, "as the repressive policy of Government has proved too strong for it"; the other school was not willing to admit defeat. Even though the number of persons ready to go to jail and make sacrifices for the country was steadily falling, it was argued, it was not numbers but the determination to win freedom which was an important factor in changing the mentality of Government. Many favoured the abandonment of civil disobedience and openly acknowledged the failure of the movement, but it seemed clear that Mr. Gandhi refused to surrender, according to him a Satyagrahi should not rest until his objective was attained.

Eventually the Conference resolved to withdraw civil disobedience as from August 1, provided an honourable agreement was reached with the Viceroy by Mr. Gandhi, who was authorised to seek an interview with his Excellency for that purpose. The Conference refused unconditionally to withdraw civil disobedience or to accept Mr. Gandhi's suggestion to replace mass civil disobedience by individual civil disobedience.

In pursuance of this resolution, Mr. Gandhi requested the Viceroy to grant him an interview, but the request was turned down on the ground that the interview was for the purpose of initiating negotiations with Government regarding conditions for the withdrawal of civil disobedience and that Government could not enter into any negotiations for the withdrawal of a wholly unconstitutional movement. A second request by Mr. Gandhi, offering to explain to the Viceroy that the proceedings of the Poona Conference, taken as a whole, were calculated to bring about honourable peace, met with a similar fate. The reply to the second request was that there could be no question of holding conversations with the representative of an association which had not abandoned a movement intended to coerce Government by means of unlawful activities.

Soon after the conclusion of the Conference, Mr. Aney, the acting President of the Congress, issued a statement in which he refused unconditionally to withdraw the civil disobedience movement, but ordered the discontinuance for the time being of all mass civil disobedience, including the no tax and no rent campaigns, reserving the right to any individual who might be ready for suffering. The secret methods adopted till then were to be abandoned and all

Congress organisations, including the office of the A. I. C. C., should cease to exist for the time being.

Meanwhile, Pandit Jawaharlal Nehru was released from jail a short while before his time, owing to the serious condition of his mother's health. This gave him an opportunity of meeting Mr. Gandhi and they had several days' close consultations. It was agreed that they should record their respective opinions on the Congress policy in the form of letters to each other and these were later published. Sharp differences of opinion manifested themselves during these conversations but the two leaders agreed to ignore them for the present and concentrate on such aspects of Congress work which were common ground between them. From the published correspondence between them it became known that Pandit Nehru insisted that the Congress should put into practice its professed sympathy for the masses and not rest content with mere paper resolutions. He would have the Congress come into the open and engage itself in active work in the cause of the peasants and workers. In short, he adumbrated an economic scheme based on his socialistic ideals. Mr. Gandhi, however, accepted the young leader's scheme as an ideal, but refused to adopt it as a working programme for the immediate future. They agreed to differ and each pursued his own course.

Mr. Gandhi left Poona and reached Ahmedabad through Bombay. Anticipating his sudden arrest, he dismantled his Sabarmati Ashram, giving the inmates full freedom to act as they liked, either to follow him to jail or to work for their ideals according to their lights. He offered the Ashram property to Government and at the same time intimated his desire to march to the village of Raas, accompanied by a few devoted followers, to practice "individual civil disobedience." The contemplated march was prevented and Mr. Gandhi and his followers were taken into custody. The Congress dictator was taken to Yeravda and served with an order under the Criminal Law Amendment Act restricting his movements, which he naturally disobeyed. Thereupon he was re-arrested, tried in court and sentenced to one year's imprisonment in "A" class. He was thus no more a State prisoner detained under a century-old regulation at the will of the executive government, enjoying extra-penitentiary rights in respect of interview, etc., but an ordinary prisoner like other political offenders. This circumstance notwithstanding, Mr. Gandhi insisted on being given the same facilities to do propaganda on behalf of the Harijans as he enjoyed during his incarceration under Regulation III of 1818. As a special case Government waived certain of the jail rules and allowed him, within limits, to direct the Harijan uplift movement. He first accepted these concessions, but changed his mind and announced a hunger strike until he was given the former facilities. Government remained unmoved and after a few days' fast he was removed to hospital still as a prisoner. When, however, he entered the danger zone, he was unconditionally released on medical advice. He broke his fast, but declared that he would not exploit the release granted under such peculiar circumstances to

further political ends. He would consider himself a political prisoner till the expiry of the period of sentence imposed on him. During all this period there was very little Congress activity. Government did not allow the Congress to raise its head. What little interest there was in Congress work was side-tracked and people's attention was diverted to Harijan work—one more instance of how the Congress was Mr. Gandhi and *vice versa* during the past few years. He threw himself heart and soul into the Harijan campaign, but as far as politics were concerned he issued on himself a self-restricting ordinance. Government let him free to tour the country urging the removal of untouchability, collecting funds for the education and social amelioration of the Depressed Classes, pleading with high class Hindus to open the doors of caste temples to Harijan worshippers and to give them the use of public roads, wells, etc. He visited several places in the Karnatak, Andhra, the Tamil Districts and Malabar, including Mysore, Cochin, Travancore and Hyderabad States. He met with opposition from orthodox Hindus, and rowdy scenes and even clashes occurred at more than one place between the Sanatanists (orthodox people) and the reformers.

The tour was interrupted by the disaster in Bihar where unprecedented earthquake shocks had laid waste fields and reduced towns to ruin. On reaching Patna after some delay Mr. Gandhi found that the situation called for immediate and sustained relief and reconstruction, and at a meeting of the Central Relief Committee he announced his readiness to offer the respectful co-operation of the Congress with Government in affording relief to the destitute victims. Once before Congress leaders had taken an active interest in the proceedings of the Assembly in connection with the Temple Entry Bill (which has been circulated for eliciting public opinion), and now in the face of a great disaster the Congress again decided to co-operate. Many attached great significance to this gesture and foresaw the development of co-operation in other fields of public activity.

In fact, the country had been prepared for a change in Congress policy. One small but important section of Congressmen in Maharashtra (including the Berars) proclaimed a revolt against civil disobedience and started a separate party within the Congress to work for the lifting of the ban on Councils and to contest the elections under the new reform scheme. The Democratic Swaraj Party (as the new organisation was called) was composed predominantly of right wing Congressmen of the Maharashtra districts of Bombay and C.P. This constituted a definite move to break the influence of Mr. Gandhi and his junta on nationalist opinion in the country. The three articles of the Party are firstly, the achievement of complete independence by all legitimate and peaceful means should be the country's goal, secondly, civil disobedience, whether of the individual or mass variety, should in the present circumstances of the country be withdrawn, and, thirdly, all representative institutions from the village panchayats to the Central Legislature should be captured for the political advancement of the country.

These efforts were assisted by similar action by other sections of Congressmen in Madras and the Andhra Provinces. The intensity of revolt grew steadily until an attempt was made to convene a conference during the Easter at Delhi to discuss the re-orientations of Congress policy. Nothing definite, however, has happened upto the time of writing this review, but indications point to a swing to the right. A change in Congress policy seems certain soon after the publication of the report of the Joint Select Committee.

Indian Princes and Reforms—During the past four or five years the Indian Princes have figured largely in discussions on the future constitutional machinery of British India. They became actively interested in British Indian Reforms with the announcement made by representative Princes at the First Round Table Conference that they would join an All-India federation provided there were adequate safeguards for them. This enthusiasm, however, waned in 1931 when some prominent Princes began to entertain doubts about the advisability of their joining the Federation. The Congress resolution which set its goal as the establishment of a socialist state and the subsequent pronouncements of Congress leaders, including Mr. Gandhi, on their intentions if they gained power, made the Princes pause before they plunged. The Maharaja of Patiala was the first to come into the open to warn his brother Princes against the dangers to their very existence involved in the Federal Structure Committee's plan. He declared that smaller States were bound to suffer the fate of the smaller German principalities under the Confederation of 1815 and disappear from the map of India. He suggested the advisability of a Union of Indian States directly in relationship with the Crown. He was later followed by other Princes, who shared his fears, and the view gained in strength that unless adequate guarantees were given for the continued maintenance of their rights and privileges, they should not give their consent to join the proposed Federation.

When the Maharaja of Bikaner accepted the idea, on behalf of his brother Princes, at the first Round Table Conference, to join the All-India Federation, no details of the scheme for the entry of the Princes were discussed. When the question was later gone into at the Federal Structure Sub-Committee of the R.T.C. it became evident that the Princes had a number of mental reservations and conditions precedent to their entry. On their return to India they had mutual consultations and the Maharaja of Patiala became the sponsor of a modified plan of federation, namely, that, instead of each Ruler entering the Federation singly on his own terms, the matter should be discussed by the Chamber of Princes and the terms for their entry should be so settled that the Princes as a body should form one group of their own and join the federation only for certain specific purposes and to the extent that they consented to do so.

This gave a new aspect to the whole question. For some time there was difference of opinion between one section of Princes led by the Maharaja of Bikaner and another led by the Maharaja of Patiala.

Later on they arrived at a settlement between themselves and a common plan was evolved whereby the Princes were to settle the terms of entry of all of them, it was also proposed that unless a proportion of over fifty per cent of the States joined no State should join singly. As regards their representation in the two federal Chambers, it was found that however widely the legislatures were enlarged seats could not be provided for each one of the 600 odd Indian States. Out of these 600 more than half are what may be called small or minor States. And the larger States like Hyderabad, Mysore and Bikaner naturally objected to be placed on the same level as the smaller States which are no more than mere principalities. Then an attempt was made to give representation to the smaller States on the group system. At the meeting of the Chamber of Princes held in Delhi in March 1933 the Princes made a serious attempt to bring about a settlement of this question. Efforts were also made since then to settle this thorny problem, but the general opinion seemed to be in favour of leaving it to be settled by Government.

Apart from this the main anxiety of the States in joining the federation is that their integrity and their rights under treaties should not in any way be affected except to the extent that they voluntarily agree to accede in which are called treaties of accession. They fear that once they enter democratic chambers they will not be able to hold on against the onslaught of democracy and by a process of wearing down they will soon be reduced to the position of mere principalities. It was with this object that the late Jam Saheb of Nawanagar, as the Chancellor of the Chamber of Princes, proposed several safeguards for guaranteeing the position of the States against the danger foreshadowed above.

Almost all the Princes of India or their representatives had gathered at Delhi about the time of the publication of the White Paper. The scheme was generally supported by the Princes, subject to the incorporation in the Constitution Act of safeguards for the maintenance of internal autonomy, an equitable distribution of seats among the States in the federal legislature and a satisfactory settlement of the claims made by the Princes under the vague term "paramountcy". The White Paper laid down, among other things, that the allocation of seats for States in the legislature should be dependent (in the case of the upper chamber) on the rank and importance of the States as indicated by dynastic salutes, etc., and (in the case of the lower chamber) on population. On this question the White Paper left room for adjustments among the Princes themselves. In the absence of a settlement, it became clear, in Award by the British Government might become necessary.

Interest next shifted to London where the Joint Parliamentary Committee took evidence on the Reforms proposals. Representatives of the Standing Committee of the Princes Chamber demanded statutory provisions rendering it permissible for States to enter the proposed Federation collectively through a confederation,

measures to secure weightage for the representation of States in the Legislature in the event of a bare minimum federating at the outset, prohibition of discussion of the domestic affairs of States in the Federal Legislature, co-ordinate powers for the Upper House in voting supplies at joint sessions, freedom for States from direct taxation and inviolability of treaties. These conditions were considered essential, but entry into federation would depend on the final completed picture of the Indian constitution.

Some difference of opinion was noticeable amongst the representatives of the Indian States on the question of confederation. Mr Maqbool Mahmood said that 40 out of 109 Chamber members favoured confederation, which was not opposed to federation but was intended to be a collective organisation to keep the States together for exchange of views with British Indian representatives. Sir Akbar Hydari opposed this idea. He said Hyderabad would not join a confederation, but did not object to the option of joining being available to other States.

In the course of the proceedings of the Committee the Princes representatives declared that the States would not take more than a year after the Constitution Act and the Treaty of Accession had been finally formulated to come to a final decision on federation, provided the door was left open for federating at a later stage.

On the question of finance, Sir Akbar Hydari announced that if the Budget of British India, central and provincial, was balanced at the time the Constitution Act was passed, the States would immediately enter the federation on the basis of the position then existing.

A certain amount of confusion was created by the claim made by Sir Manubhai Mehta on behalf of the Chamber of Princes, for the right to secede if the Princes felt it necessary to do so after their experience over a period of time. He conceded the same right to Burma. Sir Akbar Hydari, however, opposed this. The proposal was stoutly opposed by the Secretary of State also. Sir Samuel Hoare said in the course of his evidence before the Committee that when the Crown placed the power acquired from the Indian States at the disposal of the Federation for the functioning of the Federation, it became part of the Federation and the Crown could not return it to the States nor could the States demand or resume it later on.

Yet another sensation was caused by the insistence of Mr Churchill and his followers that the Princes were being jockeyed into accepting Federation so that the White Paper scheme could be pushed through. This, however, was unequivocally repudiated by the representatives of the Princes themselves and by the Secretary of State.

Meanwhile the States peoples met in conference and urged that it should be made obligatory on the Princes to join the Federation and demanded that the States peoples must be represented on the Federal Legislature.

The National Liberal Federation

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (vide 1919 edition of this book) witnessed the birth of the National Liberal Federation which has since then, been the platform of Indian moderate leaders. It held its first session in Bombay in 1918. Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress.

Those who had held the Federation in high esteem for its moderation, sobriety and balanced judgment suffered a rude shock in 1927 when the Liberal body and its leading lights proved the saying, 'If you scratch a Liberal you will find an extremist'. Liberal leaders bade goodbye to their avowed principle of co-operation with the Government if when they expressed themselves in favour of a boycott of the Royal Commission on Indian Reforms on the ground that there was no Indian on it.

Thenceforward Liberal politics became negative and barren, and leaders who had enjoyed a reputation for sane thinking came to be regarded as the 'wild men' of the Congress. Boycott was the breath of their nostrils, although they were declaring now and then that the door was still open for Government to 'make a gesture of co-operation'. Their monotonous stagnation was, however slightly relieved by the efforts at constitution making undertaken at the instance of the Congress. Liberals heartily co-operated in this endeavour and attended the All Parties Conference summoned by the Congress in the middle of the year. Sir Tej Bahadur Sapru, President of the Liberal Federation, consented to serve on the Committee appointed by the Conference to draft a constitution for India. After months of toil the Committee produced a constitution according to which India would enjoy the status of the Dominions of the British Empire. The report also offered a solution for the communal dissensions and a formula to govern the relations between British India and the Indian States. It was in a sense, a Liberal document, for the Liberals were the only group of men in the country who unanimously and unreservedly accepted the entire report.

The plea for the grant of Dominion Status was very strongly urged by Sir Chimanlal Setalvad, President of the 1928 Session of the Liberal Federation, who said that the trusteeship of England was coming to an end. The British had to deal with a people who had attained majority and were demanding from the so called trustees their property and also asking for accounts. The British must change their mentality and must realise the feeling that was growing in the country, which if not guided properly, would swallow everything. This firm attitude on the part of the Liberals whom Government were not slow to recognise as their allies served to hasten the advent of a new era. The changing

political situation was exhaustively reviewed at personal interviews between the British Cabinet and the India Office and Lord Irwin, who had come home on four months leave. As a result of these conversations the Viceroy made soon after his return from leave what is now famous as the Proclamation of October 31, 1920. (For details see Congress section).

By the time the Liberals foregathered at Madras things had moved pretty rapidly in Congress circles. Congress a talk of severance of British connection led Liberals to break away from the extremists. Once again the Liberals expressed disapproval of Congress methods. Sir Phiroze Sethna, who presided denounced the movement which aimed at the severance of India's connection with the Empire and opposed the campaign of civil disobedience.

The Liberal Party's leaders had a busy time of it throughout the year 1920. They had on the one hand to set their faces against the civil disobedience movement conducted by the Congress and on the other, to prepare a strong case for Indian Reforms such as would withstand the attack of diehards in Britain.

The annual session of the Liberal Federation during Christmas had to be postponed owing to the absence of many of its leaders in London and owing to the fact that the discussions at the Round Table Conference had not concluded by then.

The session met in July 1931 under the presidency of Mr C Y Chintamani.

The principal resolutions passed by the Federation demanded that the Federal Executive should be made responsible to the popular Chamber of the Legislature, the residuary powers must be vested with the Central Government, a definite scheme for the Indianisation of the Defence Forces including officers and men within a specified time should be immediately propounded and provision of facilities for the training of Indians for service in all arms of defence, so as to complete the process within a specified period should be in charge of a Minister responsible to the Legislature, the future Government of India must have complete freedom to adopt measures for the promotion of basic trades and industries, no special powers must be given to the Governor General and the Governors except in extreme cases of emergency, separate electorates should be done away with and there should be joint electorates with reservation of seats for minorities, there should be no statutory fixation of a majority and the position of all important minorities should be equitably considered in the determination of weightage.

This firm attitude was further stiffened when details of the Round Table Conference scheme began to be worked out both in England and in India in the latter half of 1931.

Early in the year 1932 the personnel of the three committees foreshadowed by the second R T C was announced. The Indian States Committee, presided over by the Rt Hon T C C Davidson, dealt with the Indian States only and considered the problems arising out of the federation of the Indian States with British India. Similarly the Percy Committee concerned itself with the financial aspects arising out of the All India Federation from the Indian point of view. Neither of these committees included any Indian public men from British India. The most important of the three committees was the Franchise Committee presided over by Lord Lothian. It contained a good number of Indians. The recommendations of the Franchise Committee were practically endorsed by the third R T C. But the White Paper containing the proposals of His Majesty's Government for the constitutional reform of India has not embodied these recommendations in important particulars.

While the committees were drafting their reports Sir Samuel Hoare, the Secretary of State for India, took up the question of constituting the third Round Table Conference. In doing so the British Cabinet at first adopted a plan and procedure radically different from that of the two previous conferences. The proceedings were to be in camera; the agenda was to be fixed; the number of delegates was considerably cut down; in short, the conference method, according to political opinion in India, was materially whittled down.

This led to angry protests from the progressive Indian section of the R I C. They held meetings and leading members like Sir J B Sapru threatened non co operation. The Council of the Liberal Party met simultaneously and announced the conditions on which it would co operate with the Cabinet in the matter of the R T C and called upon the Government to make a public announcement accepting these conditions.

In response to these protests and appeals a slightly more liberal scheme was announced. The Liberal Party complained that the Cabinet had paid no heed to the conditions published by it and the party as such refused to co operate with the R I C. Sir J B Sapru and the progressive section which worked with him, however, accepted the modified plan and consented to work in the third R T C.

When the results of the third R T C were known in India they led to protests on the part of the Liberals and other politically minded sections. A manifesto signed by about one hundred leading and influential public men was issued pointing out many defects in the scheme of the Secretary of State.

When the White Paper embodying the proposals of His Majesty's Government were actually issued the Liberals began to complain even more bitterly and affirmed that the White Paper proposals were to some extent even more retrograde than the announcement at the Round Table Conference. Even communal parties were not satisfied with it.

The main point of criticism was that the White Paper was based on entire mistrust of the capacity of Indians to bear the burden of respon-

sible government. Consequently, it was argued, it was overweighed with so many checks and safeguards that, in their desire to keep the control of affairs in the hands of Parliament and the Secretary of State by means of the special powers of the Governor-General and the Governors, real responsibility was almost blotted out both in the federal centre and the provinces. Similarly, some Liberal leaders contended, the reservations in the Central Government in respect of defence, foreign relations etc., and important deductions from the control of the legislatures, had placed a bar sinister against the evolution towards Dominion Status. As regards finance, nearly eighty per cent of the budget was earmarked, so that the financial responsibility of the legislature was circumscribed to one fifth portion of the budget. "Questions like tariffs, currency, exchange and the development of indigenous trade and commerce" some complained, will practically be controlled from Whitehall through the agency of the Governor-General in the exercise of his special powers. The scheme does not lay down any time limit for bringing to an end the period of transition, nor does it provide any constituent powers for the democratic growth of the constitution without reference to Parliament.

A session of the Liberal Federation was held at Calcutta during the Easter of 1933. Dewan Bahadur Ramchandra Rao, a member of the first two R T Cs, presided. Leading Liberals like the Rt Hon V S Sistri took prominent part in the deliberations. The Federation, after two days full discussion in committee, passed a comprehensive resolution pointing out what in its opinion are defects in the White Paper scheme and suggesting modifications therein so as to render it acceptable to moderate sections in the country. The Liberal Party as such was not represented in the body of Indians chosen to be associated with the Joint Select Committee, nor did the Party as such send any witnesses to give evidence before the Joint Committee.

About this time fresh attempts were made to induce the Liberal Party to co operate with the Joint Parliamentary Committee, but they remained firm and kept themselves aloof as a party. But Sir Phiroze Sethna and Mr N M Joshi (both Liberals) were invited to go to England, and went in their individual capacity. Free to take their own action, Liberals organised opinion in the country and issued a manifesto signed by members of all parties pointing out the defects in the White Paper. The press and the platform were also utilised to carry on propaganda against the White Paper.

As the Joint Committee began to take evidence they suspended their activities for a while, watching how the Government's proposals were re-shaping themselves under pressure of cross-examination in the committee.

During the interval they held the Annual Session of the Liberal Federation at Madras in Christmas week when the resolutions of the Calcutta Session were reiterated. The most important part of the proceedings of the Federation at Madras was a resolution authorising its President, Mr J N Biju, to take the initiative on behalf of the Liberal Federation as soon as the report of the Joint

Committee was published and convened a conference of all progressive parties in the country to discuss the recommendations made by the committee. At the time of writing, the report is being drafted.

From the Indian point of view, the evidence led before the Joint Parliamentary Committee was incomplete in that the two leading political organisations of the land, namely the Congress and the Liberal Federation, did not co-operate. Opinion in India steadily hardened as evidence of a reactionary character continued to be tendered to the Committee. (See Round Table Conference Chapter)

As the Congress had practically ceased to function during this period, Liberals and other progressive sections in the country thought it advisable to meet to discuss the White Paper

and suggest modifications in it. The Liberals took the lead in this matter and circulars were sent to various leaders. The response, however, was not encouraging and it did not seem easy to reconcile the various elements in the country and bring them to agree to a common basis. For example, if the Communal Award was to be discussed the Muslims would not join, and if it was to be excluded, the Hindu Mahasabhas would stay aloof. Similarly, Congressmen did not look with favour on the scheme when they found that the proposed conference would have no sanction to enforce its demands. Partly in consideration of these circumstances and partly because it was realised that the White Paper had been sufficiently criticised, the idea of calling a conference was deferred until after the publication of the report of the Joint Select Committee.

MUSLIM ORGANISATIONS

The awakening of political consciousness among Muslims in India is a separate entity dated back to 1906 when the All India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the thirties, and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. Muslim attention had already been diverted towards the end of the War by the Khilafat agitation carried on by the Khilafat Committee. The growing weakness of the League and the dissensions within it were at once the cause and effect of the birth of rivals which while it contributed to wider political education of the community, diffused the energy of its leaders and divided their loyalty among different organisations. The constitutional discussions in the Round Table Conference and later served to check the spread of this fissiparous tendency. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation. At the time of writing, thanks to the efforts of the Aga Khan and other leaders, the League has been unified, the various Muslim organisations brought into closer and co-ordinated activity and encouraging progress made in the task of bringing in the Conference also into the Muslim Unity Scheme.

The Moslem League—The All India Muslim League came into being in 1906 out of the universal desire among leading Musslimans of that time for an effective organisation to

protect their communal interests. With a view to secure separate Muslim representation in the legislative bodies of the land under the Minto Morley scheme of constitutional reform then under discussion, Indian Moslems who had been hitherto keeping aloof from politics organised the League. Its original objects were the promotion of loyalty to British Government, the protection of political and other rights of Musslimans and to place their needs and aspirations before Government in temperate language and to promote intercommunal unity without prejudice to the other objects of the League. Moslem opinions slowly advanced and in 1913 the securing of self-government within the British Empire was included in the objects. The League was a powerful and influential body in 1916 and 1917, and what is known as the Lucknow pact of communal representation arrived at between the League and the Congress in 1916 was bodily incorporated in the Government of India Act, 1919. The birth of the Khilafat Committee however overshadowed the League which from 1919 had almost disappeared till April 1923 when it met for a brief period under the presidency of the late Mr. Bhurgin, but had to be adjourned for want of a quorum. In 1924 however some influential Moslem leaders like Mr. M. A. Jinnah thought that the Khilafat Committee's functions having ceased in view of the Turkish deposition of the Khalifa decided to revive the League which met under Mr. Jinnah's chairmanship at Lahore in May 1924. The Lahore session practically did nothing else save to reorganise the scattered branches of the League.

The 1925 and 1926 sessions of the League were noted for their virility. The Muslims displayed greater allegiance to their communal organisation in proportion to the loyalty of the Hindus to their *Mahar Sabha*. Suspicion and distrust, enmity and open hostility began to prevail between the two communities. Proportionate distribution of the loaves and fishes of office, on the political side, and the questions of the Hindus playing music before mosques and the Mohammedans killing cows, on the religious side, constituted the points of difference which frequently led to intercommunal riots. The situation was regarded with grave concern by serious minded leaders, some of whom, under

the leadership of Mr Jinnah, met at Delhi early in 1927 and offered, in the name of the Muslims, to surrender their right to communal electorates, provided, among other things, Sind was constituted into a separate province and reforms were introduced in the N-W Frontier Provinces and Baluchistan. This offer, however, was acceptable neither to the Hindus nor the Muslim masses who insisted on the continuance of the separate electorates. A schism set in the Muslim League which was accentuated by the announcement of the personnel of the Statutory Commission on Indian Reforms. The non inclusion of Indians on the Commission was construed by a certain section of the Muslims as an insult to India, and those who held this view decided to boycott the Commission. The majority of the community, however, thought otherwise. The gulf between the two sections widened during 1928. The 1929 Session served to strengthen the new organisation, the All Parties Muslim Conference. Refusing to walk into Mr Jinnah's parlour the supporters of the All Parties Muslim Conference were engrossed in their constructive work. They were joined by the members of the Shafi section of the League who had come to Delhi in the hope of making up their differences with the Jinnah group but who were sadly disillusioned. The two organisations have since been functioning independently, the Conference daily gaining strength and the League losing its grip on the community and suffering from internal differences. The League's domestic quarrels were, however, settled early in 1934 and at the time of writing attempts are being made for bringing the League and the Conference together.

The All Parties Muslim Conference —

The publication of the Nehru Report hastened the advent of the All-Parties Muslim Conference. The Conference was called in 1928 to counteract the effect of the Nehru Report and to formulate the Muslim community's demand in regard to the future constitution of India. Notwithstanding the refusal of the Jinnah Leaguers to participate in the proceedings, the Conference was attended by almost all the prominent Muslim leaders of the country, including a very large number of the members of the Councils and the Assembly. There was ready agreement on the unsuitability of the Nehru Report, but difference of opinion prevailed with regard to the goal of India. Persons like Mr Mahomed Ali stood for complete independence and, of course, for the boycott of the Commission while Sir Mahomed Shafi, who had a very large following, favoured co-operation with the Commission in the framing of a constitution within the Empire. Things wore a gloomy aspect for a while, but thanks mainly to the tact of the President, the Aga Khan, a compromise was reached whereby the mention either of "Dominion status" or "Independence" was omitted from the resolution put before the Conference which demanded merely "a federal constitution." Similarly it referred neither to the Simon Commission nor to the Nehru Report, but insisted on compliance with the demands of the Conference by any agency which devised a constitution. The Conference has since held the field as the most important and authoritative exponent of the community's views, despite repeated challenges by the League, etc.

Muslim Activities in 1931-33 — Unlike the Congress, the Muslim political organisations used to be known for their lethargy except during the week when their annual meetings are held. During the past three or four years, however, they displayed unusual activity. This is no doubt due to the summoning of the Round Table Conference to settle the basis of India's future constitution. Unattracted by the negative but spectacular programme of the Congress, the majority of the Muslims appreciated the danger of allowing their case to go by default at the momentous London Conference and took a lively interest in its work before and during its proceedings. Repeated attempts were made throughout 1930, particularly during the latter half, to bring Indian Muslim leaders together for ventilating the community's demands. The credit for this useful activity goes to the All-India Muslim Conference, the Muslim League remaining practically inert. In July the Executive Board of the All-Parties Muslim Conference met at Simla and formulated the community's demands. The Simon Report was examined and rejected, but the Round Table Conference was welcomed. Shortly after the opening of the Round Table Conference, the All-Parties Muslim Conference met at Lucknow and reiterated what have come to be known as Mr Jinnah's Fourteen Points, which demand a series of provisions calculated to protect the community against possible Hindu aggression. The more important of the Fourteen Points are federal constitution with residuary powers vested in the provinces, uniform provincial autonomy, effective representation for minorities in all provincial legislatures, one third representation for Muslims in the Central Legislature, guarantee against a disturbance of the Muslim majority in the Punjab, Bengal, the N-W Frontier Province, full religious liberty, no prejudicial communal legislation except under certain conditions, share for Muslims in the cabinet and the services, reforms for the N-W F P and Baluchistan, separation of Sind, protection of Muslim culture, and insistence on separate electorates unless the above points are conceded. The Hindus seemed in no mood to concede their demands, the Congress persisted in its civil disobedience campaign, paying little heed to the Muslim desire to settle the communal problem before fighting the Government, the Hindu delegates in London did not allay Muslim fears—these factors produced among the Muslims a frame of mind which found expression in the presidential address delivered by Sir Muhammad Iqbal, at Allahabad towards the far end of the year. Typifying the prevalent Muslim exasperation, Sir Muhammad demanded the formation of a Muslim State in the North-West, comprising Sind, the Punjab and the N-W Frontier Province, within the State of India. Such a state would afford a permanent solution of the communal problem, he said and averred that the cultural development of the community demanded it.

In the year 1931, communal agreement became a necessity in view of the important deliberations in London concerning the future constitution of India. The ratification of the Delhi Pact by the Congress and its resolve to participate in the London Conference brought the communal issue to the forefront. The first Round Table Conference had ended with an assurance by the Premier that no legislation

would be undertaken without satisfaction being afforded to the minorities. And if the Congress wished to have its scheme accepted by the Conference it was up to it to carry the Muslims with it. Faced with the task of making constructive proposals, the Congress seriously set about making provisions satisfactory to the Muslims and other minorities.

The leaders of the community, who had not much faith in promises made by the Hindu ridden Congress, refused to be satisfied with anything less than statutory guarantees for the protection of their rights and privileges. Their suspicions were increased by the manner in which a few members of their community, styling themselves as Nationalist Muslims, were playing into the hands of the Congress leaders. The task of carrying on negotiations was thus rendered more complex. A series of conversations was held in the summer between Mr Gandhi the Muslim leaders and the Nationalist Muslims, but no useful scheme emerged.

The Muslim leaders on the other hand strove to consolidate the position of the community and to present a united front at the Round Table Conference. A special session of the All India Muslim Conference reiterated the Muslims Fourteen Points and affirmed that the continuance of the majority community in its present state of mind would produce civil war. It accused the British authorities of spineless handling of the position and warned them that their pandering to the Congress would ruin the country.

The Conference was so strong on the question of guarantees for the continued enjoyment of their rights that a proposal was seriously discussed that if their demands were not conceded the Muslim delegates should refuse to co-operate with the Round Table Conference and oppose Dominion Status or responsibility at the centre. The discussion, however, was adjourned *sine die*.

As time passed on it became increasingly evident to the Muslim leaders that Mr Gandhi was trying to play off the Nationalist Muslims against the whole community, and Mr Shaukat Ali gave a stern warning to Mr Gandhi and the Congress.

Shortly after the All India Conference had held its special session, the Nationalist Muslims met in conference and passed a resolution which favoured the introduction of a federal constitution, residuary powers vesting in the federating units. Representation in the Legislatures was to be on the basis of (a) universal adult franchise, (b) joint electorates, (c) reservation of seats in the Federal and Provincial Legislatures on a population basis for minorities less than 30 per cent. The resolution added that Nationalist Muslims were prepared to negotiate for a settlement of the outstanding questions on the basis of joint electorates and adult franchise.

In pursuance of this offer, negotiations were opened between the two wings of the Muslim community, but it came to nothing.

The latter half of 1932 and the early months of 1933 were marked by countless attempts not only to consolidate the ranks of the Muslims but also as between the Muslims and the other communities. Real activity started only with the publication of the Communal Award. The Council of the All India Muslim League met in September and resolved that although the Award fell short of the minimum demands of the Muslims it represented a method which removed a great obstacle from the path of constitutional advance. This represented the bulk of Muslim opinion.

The unity move took various shapes and engaged the attention of numerous conferences. Paradoxically enough it led to unity and discord at the same time. While it brought together those Muslims who wished to consolidate what they had achieved for the community in recent years by securing for it the seal of approval of the other communities and carry these latter with them through the remainder of the constitutional discussions, it alienated the leftist Muslims who would be party to no compromise with Hindus and others who, they argued, had denied them their due until the British Government came to their rescue. The latter section was led by Sir M. Iqbal, Dr S. Ahmed, Maulvi Sahib Dinwoodi and others.

The first of these important conversations were held in Lucknow in October when Muslims of almost all shades of opinion except the Iqbal school accepted thirteen of the famous Fourteen Points. As for the 14th, namely, the nature of the electorate, the leaders gathered agreed to start negotiations on the basis of what is known as the Mahomed Ali Formula which makes it obligatory upon a successful candidate to the councils to secure ten per cent minimum of the recorded votes of his own community. For this method it was claimed that it was better than either joint or separate electorate as "it would enable the right type of Hindu and Muslim to be returned." This was definitely opposed by the Muslim Conference group led by Sir M. Iqbal.

Then followed what were called Unity Conferences in November and December—the latter to ratify the conclusions reached at the former. In connection with both of these, progressive Muslims, including Maulana Shaukat Ali, but excluding the Iqbal group, held their own communal meetings and drew up a formula embodying the maximum they were prepared to concede for the sake of unity and peace, and their formula was later discussed at the regular Unity Conference. The two sessions of the Unity Conference dragged on for a number of days and after numerous deadlocks reached in understanding on most of the points in dispute such as Sind, Baluchistan, Punjab, residuary powers etc. But when the efforts had all but succeeded the conversations ended abruptly owing to the uncompromising attitude adopted by the Bengal Hindus who refused to yield even an inch.

Thus after months of negotiations the position was as it had been before the publication of the Communal Award. Indeed, it became slightly

worse to the extent that it definitely isolated the Iqbal group and the Punjab Muslims. This unfortunate development found expression in the way in which a provisional settlement arrived at on the Punjab communal question with the aid of Sir Fazl-i-Hussain was rejected by the Punjab Muslims in the first few months of 1933.

Muslim Activities in 1933-34—Notwithstanding these reverses, a renewed attempt was made early in 1933 to amalgamate the Conference and the League. These met with instant failure. Far from securing the end, they resulted in creating a split in the ranks of the League. When a proposal was made in the Council of the League in March to amalgamate the League with the Conference, the question was raised whether the Council could take a decision binding on the parent body. The motion was ruled out by the acting President, Mian Abdul Aziz, who was physically thrown out of the chair for giving that ruling. The meeting ended amidst scenes of confusion and violence. The differences were soon composed, but on the understanding that no controversial subjects like amalgamation with the Conference would be brought up. A manifesto signed by leaders of various provinces urged the rehabilitation of the League into the "Parliament of Indian Muslims" and a cable was sent to Mr. M. A. Jinnah, who was then in England, to return to India, assume charge of the League and restore it to its original status and influence. Despite this, the peace in the League proved to be short-lived. In May the trouble reappeared, and the officers of the League were suspended by the acting President for "improperly" convening a meeting of the Council. At a meeting of the Council in the end of that month, the scenes of March were repeated and the President was again pushed out of the chair. These incidents served to emphasise the breach that had occurred in the ranks of the followers of the League. The gulf became wider towards the end of the year when two sessions of the League were held, one in Calcutta and the other in Delhi. The dispute continued right up to February 1934 when, thanks to the good offices of the Aga Khan, the League was reunited under the presidency of Mr. Jinnah.

The publication of the White Paper set the various Muslim organisations busy. The executive board of the All India Muslim Conference met together and asked for the largest measure of fiscal, administrative and legislative autonomy for the provinces, demanded the curtailment of the Governor's powers and urged statutory safeguards for the protection of the personal law, education and culture of Muslims. Similarly, the League session at Calcutta expressed dissatisfaction with such of the provisions of the Communal Award and the White Paper as fell short of the Muslim demands in respect of their representation in the legislatures. The Delhi Session of the League wanted the Governor's powers to be clearly defined in the constitution and opposed all efforts to change the Communal Award.

Meanwhile Mr. Shaukat Ali returned to India from his American tour and forthwith got into touch with Pandit Madan Mohan Malaviya to

bring about inter-communal unity. The move, which did not progress very smoothly owing to the stiff attitude adopted by the leaders of the Hindu Mahasabha, had to be abandoned when the attention of the Hindus was diverted by Mr. Gandhi's fast. The refusal of the Congress in July to give up civil disobedience made it impossible for Muslims to continue to negotiate with Hindus who were wedded to an unconstitutional body.

Mr. Shaukat Ali instead took active interest in a new move to bring about complete unity among all Muslim organisations, so that the community could act as one when the reforms were introduced. The unity talks continued throughout the year and even in the first two months of 1934. The plan met with considerable opposition from the All India Muslim Conference and the Hafiz Hidayat Hussain section of the League, who felt that the object of the promoters of unity was to compromise on the electorate question. In spite of the non-co operation of these two bodies, the unity conference met at Lucknow in December under the presidency of the Raja of Salempur. Representatives of the other League, the Khilafat Committee, the Nationalist Muslim Party and the Jamiat-ul-Ulema took part.

The President denied the charge that it was an electioneering stunt and affirmed that the object was to secure the political and social amelioration of the community and to weld the various sections into one body working for their common good. The idea was to form a unity board consisting of representatives of the various organisations each of which would continue to function as a separate entity.

The President criticised the White Paper, but added that they had to accept the Communal Award in the absence of a better and more satisfactory substitute based on inter-communal agreement.

The unity board suggested was formed shortly after, but by way of practical work, not much has been done up to the time of writing.

The Aga Khan had meanwhile arrived in India and his presence acted like a tonic on the League. After a series of conferences between the leaders of the two sections, it was decided that the officers of both sides should resign and submit to the Aga Khan's arbitration. This was done and His Highness suggested that the League should be reunited and Mr. Jinnah requested to become its President. Mr. Jinnah agreed and the League emerged once again a harmonious body after years of strife. The Aga Khan's efforts to bring together the League and the Conference did not meet with success.

The Khilafat Committee—The origin of the Central Khilafat Committee is to be found in the closing days of the Great War when Turkey was feeling the consequences of defeat at the hands of the Allies. Mussulmans in India naturally sympathised with their co-religionists in Turkey and carried on ceaseless agitation against the division of Turkey into small bits among the Allies. Being anxious for the safety of the holy places of Islam and opposed

to the dismemberment of Turkey, they felt a considerable amount of bitterness against the British, who as the principal Allied Power, were dictating their own terms to vanquished Turkey. Formed thus for the protection of the Khilafat as a temporal as well as a religious Power, the Central Khilafat Committee was exploited to good purpose by the leaders of the Congress movement in India which had found in "the Punjab Wrongs" an effective means of propaganda against the British rule in India. Commonness of ill feeling towards the British brought the two closer. While it gave impetus to the Congress by securing for the Congress support from the Muslims, it also received support from the Congress in agitating for the "righting of the Khilafat wrongs". Thus the two worked side by side, mutually helpful.

Madras Khilafat Conference under the chairmanship of Mr Shaukat Ali unfolded a programme of progressive non-co operation and appealed to the country for support. The Khilafat Committee, with the huge funds at its disposal, was able to draft in a large number of delegates to the Calcutta special Congress in 1920 when the non co operation programme was accepted by that body, with two more objects added to it, namely the obtaining of Swaraj and the righting of the Punjab wrongs.

With the deposition of the Khilafat by the Kemalists and the revival of the Moslem League, the Committee's activities have been considerably restricted. Recently the Committee sent a deputation to Nejd to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Committee to Turkey, the Turkish Government did not quite like the idea which had consequently to be abandoned.

The 1925 session of the Khilafat Conference was rendered lively by Mr Hasrat Mohani whose speech strongly criticising Sultan Ibn Saud was subsequently expunged. The resolution adopted by the conference under the presidency of Mr Abul Kalam Azad condemned the British policy in Iraq and the League's decision on Mosul and declared that if the Turks went to war on the latter issue the Conference would deem it its duty to help them.

For some years since then one heard little about the public activities of the Committee, although many of its domestic quarrels engaged the attention of the public. Funds, however, continued to be collected for the "activities" of the Committee which could hardly be specified. Things dragged on until the latter half of 1927, when the leaders found the Khilafat organisation a useful tool for purposes of their propaganda for boycotting the Statutory Commission on Indian Reforms. This was successfully achieved by the extremist wire pullers at Madras in 1927.

In the next year, however, a peculiar situation arose as the result of the publication of the Nehru Report. This document raised many controversial issues. Its two main recommendations, namely, Dominion Status for India and joint electorates with temporary reservation of seats, were not acceptable to the Khilafatists,

whose ideal was an extreme type of nationalism coupled with rank communalism. They wanted complete independence for India but insisted on the continuance of separate electorates. This state of mind found expression at the annual session of the Khilafat Conference which met in 1928 at Calcutta.

In the years following the publication of the Nehru Report, the Khilafat Committee reappeared on the Indian political stage and vigorously strove to repudiate that document. This it succeeded in doing, as the Muslims with one voice condemned it as pro Hindu. As months passed by, it became increasingly clear to the Muslims that the Congress was getting more and more Hindu ridden and that they could not expect due protection for their communal rights from the Congress or its leaders. The appreciation of this situation by the Muslim masses was mainly due to the activities of the Khilafat Committee and its leaders. Thus when the Khilafat Conference met in Lahore in 1929 it was resolved that the Khilafatists should participate in the Round Table Conference convened by the British Government to settle the future constitution of India, although in the same breath the Conference declared itself in favour of independence. This latter, however, was but a wordy sop to the extremists, as the main body of Khilafat workers started in 1929 and continued since then a regular fight against the Congress.

In the past few years, in addition to the effective prevention of the Muslims from joining the Congress unless the communal question was satisfactorily settled, the Khilafat Committee did a considerable work abroad. The Ali brothers, who were the soul of the Khilafat movement, worked for the Arab federation and the Tanzim of Mussulmans all over the world. During this time, the movement lost Maulana Mahomed Ali, who passed away in London in the midst of his strenuous work for his country and his co religionists, and the work of carrying on the increasing activities of the Khilafat Committee fell on the shoulders of his brother Maulana Shaukat Ali. The invitation to bury the departed leader in the mosque of Omar in Jerusalem brought the Indian Muslims closer to the Arabs. This fellow feeling among Muslims in different parts of the globe found expression in a huge conference held in Jerusalem which served to create a new spirit of internationalism among the followers of Islam—one of the cherished objects of the Indian Khilafatists.

The advent of the Nazi regime in Germany and its anti-semitic policy turned the Jews out of that country. This led to an increasing concentration of Jews in Palestine. Jews all over the world were stirred by the plight of Jewish exiles from Germany and this gave vigour to the movement for a national home for Jews in Palestine. Muslims there were adversely affected by this and involved the sympathy of their co religionists in India who readily responded. The Khilafat organisation took a leading part in this activity. A Palestine Delegation paid a visit to India and Indian Muslims, whose extra territorial patriotism was

aroused, called meetings and sent deputation to the authorities. Arrangements were also made for sending a deputation to London.

As the representatives of Indian Muslims in the London Conference, the Ali brothers effectively safeguarded their interests. In addition, Maulana Shaukat Ali repeatedly impressed on British audiences and leaders the advisability of keeping the Indian Muslims contented as it would please Muslims in other parts of the world.

The history of the Khilafat movement followed a peculiar course on the North-Western Frontier Province of India. There the Khilafat organisation conducted a ceaseless agitation over the local grievances of the Muslim population and the disaffection towards the Government thus created was promptly exploited by the Congress for furthering its own lawless activities. Being sturdy people accustomed to fighting, they often found it impossible to observe the Congress creed of non-violence. A number of clashes ensued, with attendant casualties.

The fourteenth session of the Khilafat Conference met at Ajmer in September 1932 under the presidentship of Sheikh Abdul Majid. He condemned the caste system among Hindus which, according to him, was responsible for the demand of separate electorates by the

depressed classes. As for separate electorates for Mussalmans, he held there was no choice left to them except to ask for such a safeguard. He reiterated the fourteen points, but was none the less in favour of a compromise if it was possible on honourable lines. He suggested the voluntary dissolution of all the existing political organisations of Mussalmans and the formation of one comprehensive body. At the open session of the conference a resolution was passed characterising the communal award as absolutely unsatisfactory in that only three out of the fourteen points had been conceded by it.

The All India Khilafat Committee met at Lucknow in December 1933, when the Palestine Conference was also held. The President, Mr. Murtaza Bahadur, protested against the Balfour Declaration which "converted the home of Arabs for centuries, which was sacred to the Muslim world, into a national home for Jews." A resolution was passed deciding to reorganise Khilafat Committees in all parts of India, so that they might "safeguard the sacred lands from occupation and invasion by non-Muslims." The Conference also resolved to send a deputation to the Viceroy, to organise a party of Indian Muslims to visit Palestine and later to place their case before British Ministers.

The Round Table Conference.

The first session of the Indian Round Table Conference, which was held in London during the autumn of 1930 and January 1931, was remarkable for the spirit of unity. At the first sitting Sir Tej Bahadur Sapru, on behalf of the British Indian Delegates, extended an invitation to the Princes and States to consider entering an All Indian Federation, which would establish a federal government and a federal executive, embracing both the British Provinces and the Indian States in one whole, associated for common purposes, but each securing control of their own affairs, the Provinces autonomous, and the States sovereign and autonomous. This, though it struck an unexpected note at the Conference, was no more than the fruition of an old idea. The authors of the Montagu-Chelmsford Report, which laid the foundations of the great Reform Act of 1919, visualised the steady progression of the federal idea, but the notable passage in which they indicated this purpose slipped into the background in the confused and difficult days that followed. Sir John Simon and his colleagues, who conducted the parliamentary inquiry into the working of this Act, declared their adhesion to the federal idea, and proposed as a contribution to it the establishment of a Council of Greater India, in which the representatives of British India and the Indian States should sit for the discussion of matters of common concern. The Govern-

ment of India, in a lengthy despatch on the Simon Report, also adhered to the federal principle, though they expressed the view that it was a distant ideal. Many Indian publicists had declared the faith that without the adoption of the federal principle no substantial growth of the Indian constitution was practicable. But although federalism had always been in the background, none had possessed sufficient courage to bring it into the forefront until Sir Tej Bahadur Sapru invited the Princes to consider it. The invitation was promptly accepted. His Highness the Maharaja of Bikaner, speaking for the general body, at once declared that subject to the incorporation in the statute of certain defined conditions—they were in substance the guaranteeing of the sovereignty and treaty rights of the States, and the protection of their essential interests—the Princes and States would favourably consider any such proposal, later he avowed his belief that, provided the completed picture was satisfactory, seventy-five per cent of the States would join a federation.

Real Progress—By common consent, this patriotic offer by the Princes and States transformed the situation. The goal of the British-Indian publicist was the establishment of responsible government in India, with "safeguards" during the transitional period, and ultimate

Domunion status for that responsible government. With the assurance of the participation of the Princes and States, bringing a powerful element of stability into the governing machine, Lord Reading, speaking for the Liberals, accepted the crucial proposition of a responsible government at the centre. Later, the spokesmen for the Conservative Party took up the same position, though perhaps in more cautious terms. On this guiding principle substantial progress was made in sketching the outline of a federal constitution. True, the Minorities Question, that is to say the adequate protection of the minorities in the Indian population, especially the great Moslem community, remained unsettled and Moslem acceptance of responsibility at the centre was conditional on the solution of this very thorny issue. But the measure of progress was so satisfactory before the Conference separated in January 1931, that speaking for His Majesty's Government the Prime Minister, Mr Ramsay MacDonald, was in a position to make the following announcement:

'The view of His Majesty's Government is that responsibility for the Government of India should be placed upon Legislatures, Central and Provincial, with such provisions as may be necessary to guarantee, during a period of transition, the observance of certain obligations and to meet other special circumstances, and also with such guarantees as are required by minorities to protect their political liberties and

'In such statutory safeguards as may be made for meeting the needs of the transitional period, it will be a primary concern of His Majesty's Government to see that the reserved powers are so framed and exercised as not to prejudice the advance of India through the new constitution to full responsibility for her own Government.'

Participation of Congress—But representative as it was in all other respects, the first session of the Congress embraced no representative of The Indian National Congress. For various reasons that stood aloof. During the interval between the rising of the first session, and the convening of the second, negotiations were carried on with a view to the Congress suspending the Civil Disobedience Movement on which it had embarked and joining in the task of framing the new constitution. These discussions ended in what was called 'The Gandhi Iram Pact', which embodied a settlement covering the whole field in dispute, and an undertaking on the part of the Congress to participate in the Round Table discussions, and to suspend civil disobedience. After many hesitations Mr Gandhi, who was appointed sole representative of the Congress, sailed for England, and others who had remained aloof from the earlier proceedings joined the Delegation. At first Mr Gandhi's contribution to the work of the Conference was helpful. Though he was perhaps more anxious to justify Congress, and to maintain its right to speak for India, and to accept the principle of federation, and the task of making it easy for the Princes and States to enter therein. But afterwards his contribution was less helpful. Specially was this the case in relation to the Minorities.

The Communal Award

The decision of the British Government in regard to the representation of the various communities in British India in the Provincial Legislatures, on which the communities themselves were unable to agree, was published in August 1932. The award followed a thorough and comprehensive inquiry into the proportions and position of the various communities in the Provinces. The decision was not given on strictly arithmetical lines, thus the Sikhs with 32 seats out of a total of 175 in the Punjab Legislature secured a larger representation than they would on a population basis. The table of distribution avoided the term Hindu. Its place was taken by the heading 'General', but it was clear that those under that heading would be overwhelmingly, if not entirely, Hindu, for Muslims, Sikhs, Indian Christians (with some exceptions) Anglo Indians and Europeans would vote in separate communal constituencies. The seats were distributed as follows: General, 705; Depressed Classes, 61; Backward races, 20; Sikhs, 35; Muslim, 480; Indian Christians, 21; Anglo-Indians, 12; Landholders, 35; Commerce and Industry, 54; 38.

With regard to the Depressed Classes, it was explained that they would vote in the general constituencies, but in order to ensure adequate representation to them special seats were also allotted. It was contemplated that this arrangement, which gave the members of these classes two votes, should be limited to 20 years. As came to the decision to limit the electorate for each special woman's seat to voters from one community.

Accompanying the award was an explanatory statement by the Prime Minister in the course of which he observed as follows:

'Our duty was plain. As the failure of the communities to agree amongst themselves had placed an almost insurmountable obstacle in the way of any constitutional development, it was incumbent upon the Government to take action. In accordance, therefore, with the pledges that I gave on behalf of the Government at the Round Table Conference in response to the repeated appeals from representative Indians and in accordance with the statement approved by the Government are to day publishing a scheme of representation in the provincial assemblies that they intend, in due course, to lay before you. In the meanwhile the agree upon a better plan.

"We should be only too glad if at any stage before the proposed Bill becomes law the communities can reach an agreement amongst themselves. But guided by the past experience the Government are convinced that no further negotiations will be of any advantage and they can be no party to them. They will, however, be ready and willing to substitute for their scheme any scheme whether in respect of any one or more of the Governors Provinces or in respect of the whole of British India that is generally agreed to and accepted by all the parties affected."

THE THIRD CONFERENCE

Following the publication of the communal award, the third session of the Round Table Conference was summoned in London. The Congress did not participate in it. Most of its leaders including Mr. Gandhi were in prison for reviving the civil disobedience movement. Profiting by past experience Government refused to consider the question of releasing them unless and until the lawless movement which they had initiated was unconditionally called off. The Conference was nevertheless attended by representatives of all other parties in India and lasted from 17th November 1932 to 24th December 1932. Its achievements were summed up by Sir Samuel Hoare the Secretary of State for India, in his concluding speech at the final plenary session. He said:

I would venture to sum up the results in two sentences. I would say, first of all, we have clearly delimited the field upon which the future constitution is going to be built. In a much more detailed manner than in the last two years we have delimited the spheres of activity of the various parts of the constitution. Secondly, and I regard this result as much more important than even that important first result, we have I believe created an *esprit de corps* amongst all of us that is determined to see the building that is going to be reared upon the field that we marked out both completely in itself and completed at the earliest possible date. Lord Chancellor, I said that we had marked out the ground. Let me explain by a few examples what I mean by that assertion. I take the various parts of the constitutional structure in order:

I begin with the part that Indian India, the India of the States, is to play in the Federation. There we have made it quite clear that there is no risk in any respect to the Treaties or to the obligations into which they and we have entered. I hope that I have made it quite clear that all questions governed by that general term 'paramountcy' do not enter into the Federal scheme at all. I think also I may say that we made some progress in the enquiry over which Lord Irwin presided one day this week into the methods by which the States will accede to the Federation.

Let me say in passing—for I think it may help our future discussions both here and in India—that we have always regarded an effective Federation as meaning the accession of a reasonable number of States and, as at present advised, we should regard something like not less than half the States seats and not less than half the population as the kind of definition that we have in mind.

Next I come to the Federation and the Units. Here, again, I think we have made great progress in delimiting the field between the Centre on the one hand and the Provincial and States Units on the other. We have been very carefully through the lists of Federal and non-Federal activities, and we have got much nearer to agreement than we have ever reached before.

Next there is the very difficult question of Federal finance, one of the most vital questions in the whole field of Federal activities. Unfortunately we were discussing that question at a time of great difficulty. We have been discussing it at a time when no Government in the world has sufficient money for its needs. But I think I can claim that there again we have made some substantial progress. I fully admit that there are differences still to be recognised and to be reconciled. I do not think it could be otherwise in any question of this kind.

As regards the size of the Chamber, I had hoped that we should have reached a greater measure of agreement than we have found possible during these last weeks. It has been made clear that there still are differences to be reconciled, not only differences between British India and the States, but differences between the bigger States and the smaller States, differences even between some members of the Chamber of Princes and other members of the Chamber of Princes.

Then there was the question of the representation of the communities in the Centre particularly of the Muslim Community. There I think I can say definitely—I think I have said it indirectly very often before—that the Government consider that the Muslim Community should have a representation of 33½ per cent of the British Indian seats in the Federal Chambers. So far as Indian India is concerned, that must be a matter for arrangement between the communities affected and the India of the Princes. But so far as the British Government has any part in the question, we will at any time give our good offices to making it as easy as possible for an arrangement between those parties in regard to future allocation of seats. There again I venture to say that definitely to day, because I am anxious that that factor in the problem should not in any way impede the future progress in elaborating the further stages of the Constitution.

Now, with all these Federal questions, I can see that there is a grave anxiety in the minds of many members of the Conference—and I am sympathetic with that anxiety—lest the various complications of which I have just given you certain instances should take too long to settle, and that the Federation itself will drift into the dim distance and will cease to be a reality in practical politics.

Feeling that anxiety, Sir Tej Bahadur Sapru asked last night that a definite date should be placed in the Bill at which time the Federation should come into being. He qualified his request—and qualified it, no doubt, quite rightly—with the reservation that if the conditions were not fulfilled, Parliament must have some means at its disposal for postponing the date of the Federation.

Now I agree with him that the last thing in the world that we wish to see the Federation drift back into being simply an idea and not an

integral part of the Indian Constitution. But I think I ought to say, that I do find a difficulty in agreeing—if indeed this is the time to agree or disagree—to anything in the nature of a definite date in the provision of the Act. The difficulties that are in my mind are twofold. I am not quite sure—and here I am speaking very candidly in the presence of representatives of the States—what reaction something that might appear to be rather in the nature of an ultimatum might have on the Indian States themselves.

Again, I find this difficulty, I feel the machinery of the Constitution will be of an extremely complicated nature, and I think that Parliament, if it were confronted with a definite date, might demand a longer interval and more cautious provisions than it would require if there were no fixed date. After all the machinery for bringing the Act into operation is going to be of a very complicated nature. I have always contemplated that some such method as a Parliamentary Resolution of both Houses would be adopted for bringing the Federation into operation, and that that method would be adopted at the earliest possible opportunity.

What I can say to Sir Tej Bahadur Sapru is that we are going to do our utmost to remove every obstacle in the way of Federation and to remove it at the earliest possible date. Let me also say to him, we do not intend to inaugurate any kind of provincial autonomy under conditions which might leave Federation to follow on as a mere contingency in the future.

Lastly, let me say a word upon another side of this part of our discussions. For the last two years we have discussed the question of certain new Provinces. We have discussed the question of Sind from the very opening of our deliberations two years ago. Last year we discussed in detail for the first time the question of Orissa. Since those discussions we have had expert enquiries into both questions.

Basing our views upon the Reports of those enquiries, basing our views still more on what appears to be a very general agreement both in India and in Great Britain, we have come definitely to the conclusion that Sind and Orissa should both be separate Provinces. No doubt there will be details of machinery to settle and some of them of a rather complicated kind.

Lord Chancellor, I have now dealt with the more prominent of the features of our discussions that emerge upon the more directly constitutional side of the Federation itself. Let me now come to the other series of problems that in some cases affect more directly Great Britain and in other cases affect certain communities and certain interests in India itself. I mean by this all that chapter of questions that by a rough and ready phrase we have described as 'safeguards'. Lord Chancellor, let me say at the outset of my observations that I regard the safeguards not as a stone wall that blocks a road, but as the hedges on each side that no good driver ever touches but that prevent people on a dark night falling into the ditch. They are not intended to obstruct a real transfer of

responsible power. They are not intended to impede the day to day administration of any Indian Minister. They are rather ultimate controls that we hope will never need to be exercised for the greater reassurance of the world outside both in India and in Great Britain. Let me take the two instances that have been most prominent in this part of our discussions. Let me take the most difficult question of all the difficulty of a transfer of financial responsibility. There, Lord Chancellor, I am not disclosing any secret when I say that during the last twelve months the British Government have fully accepted the fact that there can be no effective transfer of responsibility unless there is an effective transfer of financial responsibility. We have fully accepted that fact and we have done our best in the very difficult circumstances that have faced us to reconcile the legitimate demand of every Indian politician for financial control with the legitimate demand of every one who is interested in finance, not only for stability, but for a situation in which there would not even be a suggestion that stability could be questioned. For in the field of finance it is not only the fact itself that matters, but it is what people say about that fact.

Now our difficulties have arisen from two sources. In the first place, there is the fact that, as things are at present, a large part of the Indian revenue has to be devoted to meeting the obligations that have grown up during these years of partnership between India and Great Britain. That in itself—and I am sure no one would question the justice of the point of view—makes people here, investors who invested their money in Indian securities, men and women whose families are interested in the meeting of the old obligations, extremely nervous of any change. Secondly, there is the fact that we are passing through, I suppose the most difficult financial crisis that has faced Asia and Europe for many generations. In the case of India there is a peculiar difficulty, namely, that a large body of short-term loans raised under the name of the Secretary of State in London, fall due for payment in the next six years. That means that, if the Federation is to start with a good name, if its solvency is to be assured, some means must be found for meeting these short-term maturities without impairing the future of Indian credit.

Lord Chancellor, those are the hard facts that have faced the Government during the last twelve months. Those are the hard facts that we discussed in great detail and with great goodwill at the Financial Safeguards Committee. The British Government, the British delegation, and sections of the Conference, came to the view that in those conditions certain safeguards were absolutely necessary if we were to keep the confidence of the world outside and if we were to make it possible in the future for a Federal Government to raise money upon reasonable terms. That, gentlemen, in a few sentences is the history of the safeguards. That, in particular, is the history of the safeguards that has loomed very largely in our discussions this year, the history of the Reserve Bank. We feel that, if confidence is to be maintained in the financial stability and credit of India, a Reserve Bank must be in effective operation.

I come now to the question of Defence, a question that again has loomed very large, and rightly so, in our discussions. We had first of all, as you all remember, a debate in full Conference—a debate in which I think I may claim that there was complete unanimity that Defence, until it can be transferred to Indian hands, remains the sole responsibility of the Crown. It was, however, clear to me in the course of the discussions, and afterwards in an informal talk that I was able to have with certain leading members of the Conference, that there were differences of opinion as to the methods by which Indian political opinion might be consulted in the administration of the Reserved subject.

Let me take in order two or three of the principal points to which Sir Tej Bahadur attached importance in these discussions. First of all, there was the question of the discussion of the Defence Budget. We were all agreed that it should be non-votable. In the nature of things, I think that was inevitable, but we are quite prepared to take the necessary steps to see that the Budget should be put, as he and his friends wish, in blocks, not in a perfunctory manner simply to be discussed as a whole.

Next he was anxious about the employment of Indian troops outside India without the approval of the Federal Government or the Federal Legislature. There I think he and his friends were agreed that where it was actually a case of the defence of India, in which no Imperial considerations entered at all, the defence was, of the Frontier of India itself, there the responsibility—the sole responsibility—of the Crown should remain undiluted. More difficult questions arose in cases when Indian troops might be employed for purposes other than direct Indian purposes. Now in those cases I can say to him I would prefer not to be precise as to the exact method. I myself feel sure that a means will be found to leave the decision in some manner to the Federal Ministry and to the Federal Legislature.

Next, there was an important series of questions connected, first of all, with the Indianisation of the Army, that is to say, the greatest participation of Indians themselves in the defence of India, and, secondly, as to the bringing into consultation as much as possible the two sides of the Government. He and his friends were anxious that statutory provision should be made in some way for both these objects. The Lord Chancellor and the British Government still take the view, and we feel we must maintain it,

that statutory provision is too inflexible, if you define statutory provision in the narrow sense. But I think I can meet him and his friends effectively by including directions to the Governor General in both these respects in the Instructions.

Now he said, quite rightly, that his attitude towards that proposal would depend very much upon the Instructions themselves. As regards the Instructions we intend first of all to allude to them in the body of the Statute. And then we intend to ask Parliament to agree to a novel procedure, but a procedure that I believe is well fitted to the conditions with which we are faced, namely, that before certain of them are submitted to His Majesty, both Houses of Parliament should have the opportunity of expressing their views upon them. The effect of that would be to give the Instructions a Statutory framework by the allusion in the Act itself, and to give them a Parliamentary framework by the Resolutions that would be passed approving of them before they are submitted for His Majesty's approval.

As to the other proposals that Sir Tej made in the matter of Defence, we still feel that the Governor General should have an unfettered power in selecting his Defence Minister, but we will make it quite clear in the Instructions that we wish the two sides of the Government to work in the close co-operation, and that we do definitely contemplate—I would ask his attention to this point, and we will make an allusion to it in the Instructions—that before the Estimates are actually put to the Federal Assembly the Finance Minister and that doubt the Prime Minister should have an opportunity of seeing them and giving to the Governor-General their views upon them.

We have been planning a scheme and a very complicated scheme, but we have also been trying to create a spirit of co-operation. Several members of the Conference were very kind to me last night when they said that I had played some small part in helping to foster this spirit of co-operation during the last few weeks. I thank them for what they said, but I say that their kind words were really undeserved. The spirit of co-operation is due to much greater events and to much greater people than any with whom I am connected or any that I could ever hope to emulate.

Immediately after the conclusion of the Conference, His Majesty's Government, in pursuance of their pledges, proceeded to draft the White Paper incorporating their tentative conclusions.

The White Paper.

The proposals of His Majesty's Government for Indian constitutional reform which are now under examination by a joint Committee of Parliament were issued in March this year in the form of a White Paper. Though the intention is to speed up the process of legislation, no date is suggested in the White Paper for the actual change in the Indian system of Government. The Royal Proclamation inaugurating the new system shall not be issued until both Houses of Parliament have agreed on the date.

By the proposal put forward the Provinces are given out in any and to a Federal Government is conceded to the Government over the whole field of administration allotted to the Federation except in regard to certain reserved subjects. The Federation will consist of the autonomous provinces of British India and the Indian States and the Indian States will be united by the Princes surrendering their present sovereignty but retaining internal autonomy in respect of rights not so surrendered, subject to any other consideration than the existing suzerainty of the Crown.

If a condition of the setting up the Federation - (1) That rulers of States representing not less than half the aggregate population of the Indian States and entitled to not less than half the States seats in the Upper House of the Legislature shall have executed the necessary Instrument of Accession and (2) That a League Bond free from political influence, will have been set up and already successfully operating. These conditions fulfilled, it will be the duty of both Houses of Parliament to move the Crown by an address to issue a Royal Proclamation inaugurating the Federation.

Services of any rights provided for them by the Constitution and the safeguarding of their legitimate interests (5) The protection of the rights of any Indian State (6) The prevention of commercial discrimination (7) Any matter which affects the administration of the reserved departments.

In fulfilment of these special responsibilities the Governor General is empowered to act either without or contrary to the advice of his Ministers and can himself press a Governor-General's Act to secure any of these purposes and is given all powers to secure the necessary finance.

Apart from the reserved departments and these special responsibilities there is another category of prerogatives or powers, the majority of them such as are usually associated with the head of a Constitutional State, the others to meet the particular conditions of India - (a) The power to summon, prorogue, and dissolve the Legislature (b) The power to assent to or withhold assent from Bills or to reserve them for His Majesty's pleasure (c) The power to summon joint sessions of the two Houses of the Legislature in cases of urgency.

(d) The grant of previous sanction to the introduction of legislation - (1) Repealing, amending, or repugnant to any Act of Parliament extending to British India or any Governor-General's or Governors Act or Ordinance, (2) affecting any department reserved to the control of the Governor-General, (3) affecting coinage and currency of the Reserve Bank, (4) affecting religion, (5) affecting the procedure relating criminal proceedings against European British subjects.

Federal Legislature

The Federal Legislature resembles the existing Central Legislature in composition and will consist of two Chambers—the Upper Chamber or Council of State consisting of 260 members, 100 appointed by the Princes, 150 elected by members of the Provincial Legislatures of British India, and 10 nominated members, the other, the Lower Chamber or House of Assembly, consisting of 375 members, of whom 125 will be appointed by the Princes and the others elected directly according to the seats allocated to each Province and to the several communities and interests in each Province. In the present British India Legislature Chambers only a proportion of the members is elected.

The Legislature will be debarred from passing laws of a discriminatory character. In particular it will be unable to pass laws subjecting any British subject or company domiciled in the United Kingdom to any disability or discrimination in the exercise of certain specified rights, if a British Indian subject or company would not be subjected in the United Kingdom to a disability or discrimination of a similar character.

The Provinces

In the Provinces certain subjects (Reserved subjects) have hitherto been administered by the Governor-in-Council and others (Transferred subjects) by the Governor and Ministers in the Legislature. But Governors, like the Governor-General, are given special responsibilities, with corresponding powers to discharge these responsibilities, confined in scope of course to the Province.

The Provincial Legislatures are enlarged and the allocation of seats and method of election are in accordance with the provisions of His Majesty's Government's Communal Award of August 4 last. The present nominated members and official bloc disappear in favour of wholly elected Legislatures, so far as the Lower Houses in the Provinces are concerned. In Bengal, the United Provinces, and Bihar the Legislatures will be bicameral with a small proportion of nominated members (not officials) in the Upper Chambers, in the other eight Provinces unicameral.

For the franchise for the Lower Chamber of the Federal Legislature the proposals lay down qualifications the effects of which should be to enfranchise between 2 and 3 per cent of the population of British India, and similar but lower qualifications for the franchise for the Provincial Legislatures should produce a

Provincial electorate in the neighbourhood of 14 per cent of the total population of British India or some 27 per cent of the adult population. Women can vote for and will have seats reserved for them in both the Federal Assembly and Provincial Legislatures.

Public Services

The proposals confirm existing rights of the Public Services. The Secretary of State will continue to make appointments to the Indian Civil Service, the Indian Police, and the Ecclesiastical Department, and the conditions of service of persons so appointed will be regulated by rules made by the Secretary of State. He will determine the number and character of such appointments and may prohibit the filling of any post declared to be a reserved post otherwise than by the appointment of a person appointed by the Crown, the Secretary of State or the Secretary of State in Council.

At the expiry of five years from the commencement of the Constitution Act a statutory inquiry will be held into the question of future recruitment for the Indian Civil Service, Indian Police, and the Medical and Railway services, and the Governments in India will be associated with the inquiry. The decision on the results of the inquiry will rest with His Majesty's Government and will be subject to the approval of both Houses of Parliament. Pending the decision on this inquiry, the present ratio of British to Indian recruitment will remain unaltered. The administration of the Railways is by a Statutory Railway Board so composed as not to be subject to political interference.

The Secretary of State's Council for India is abolished and its place is taken by not less than three and not more than six advisers to be consulted as the Secretary of State may think fit, except that their concurrence is required in relation to certain service matters.

A Federal Court with both an Original and Appellate jurisdiction in cases raising constitutional issues such as the spheres of the Federal, Provincial and States authorities is set up and power is given to establish a Supreme Court to act as a Court of Appeal in British India.

It has not been possible to include Burma in the proposals, as Burma has delayed a decision as to whether it wishes to be separated from India in accordance with the constitution outlined for it at the close of the Burma Round Table Conference or to remain a Province of India.

JOINT PARLIAMENTARY COMMITTEE.

After the publication of the White Paper, steps were taken to appoint members of the House of Commons and the House of Lords to a Joint Select Committee to consider the proposals and report to Parliament. The White Paper was to be regarded as embodying the Government's scheme, but the Committee had full liberty to produce any plan it thought proper. There was more than one debate in the two Houses of Parliament for the nomination of members to the Joint Committee, and ultimately the three leading parties in Parliament, Conservatives, Liberals and Labour, agreed to appoint their representatives. While the Labour Party showed some unwillingness in the beginning to appoint its nominees, it yielded eventually, but the Right Wing section of the Conservatives in both Houses, represented by Mr Winston Churchill and Lord Lloyd, refused to co-operate and kept themselves free to deal with the report of the Joint Committee in any manner they thought proper.

Simultaneously steps were taken to select representatives from British India and Indian States to co-operate in the Joint Committee's inquiry. Some difficulty was experienced in fixing the status of these nominees while under the British constitution Parliament could not appoint any outsiders to its Committee, the Indians would not accept any position except that of practical equality with members of Parliament serving on the Committee. The difficulty was solved by styling the Indian representatives as assessors, and giving them liberty to cross-examine witnesses and hold discussions with the members of the Committee, but not to join in the report or sign it.

The question of the procedure to be adopted by the Committee and the nature and quantum of evidence to be led before it presented an initial obstacle, in view of the wide scope of the inquiry and the voluminous nature of the material to be dealt with, but this was soon tided over. Another real trouble in the initial stages of the Joint Committee's work was the disinclination of almost all political parties in India to co-operate with the Committee or lead evidence before it on their behalf. This objection too disappeared after a time, and the Committee eventually examined a large number of Indian witnesses representing various schools of thought. The inquiry lasted about six months, and all interests, including the Indian Service, voiced their cases. Even die-hard Conservatives like Mr Churchill appeared before the committee, but the principal witness was Sir Samuel Hoare himself, although he was a member of the Committee. His evidence occupied more than a fortnight and covered the entire ground of the White Paper, in the course of which he submitted several memoranda in order to elucidate doubts and fill gaps. By common consent Sir Samuel Hoare ably maintained his ground against the representatives of die-hard Conservatives on the Committee, but Indian political opinion held that on several points he had to yield, Indians looked with disfavour on his explanations in respect of

domination and India's right to retaliate against Dominions which discriminated against her, which were construed as weakening India's constitutional position.

Immediately on the publication of the White Paper, Indian politicians, even of the moderate variety, expressed themselves in strong terms against some of its provisions.

On the other hand, it had the support of a number of communal parties, including the Muslims.

While the Joint Committee inquiry was in progress, Sir Tej Bahadur Sapru, one of the leading British Indian delegates, was unable to continue in London longer than July and placed on record suggestions for the improvement of the Reform proposals with a view to rendering them acceptable to Indian opinion. Similarly His Highness the Aga Khan, the leader of the British Indian delegation, and his British Indian colleagues submitted a joint memorandum towards the close of the sittings of the Joint Committee in the hope that their suggestions would be taken into consideration at the time of the drafting of the report.

Both these memoranda cover a wide ground and demand a number of radical changes in the White Paper scheme. Sir Tej Bahadur said that "no constitution, which fails to satisfy certain essentials, will meet with the needs of the situation in India. Those essentials are responsibility at the centre and provincial autonomy with certain safeguards for the period of transition, reserved subjects, army, air, foreign and ecclesiastical departments to be under the control of the Governor General for the period of transition which should not be long or indefinite, adoption of a definite policy in respect of reserved departments facilitating their transfer to the legislatures within the shortest period compatible with safety of the country and efficiency of administration, and a definite declaration in the statute of the constitutional position of India within the British Commonwealth of Nations."

The other memorandum is specially notable because it was signed by all the Indian Delegates, majority and minority representatives. It made it clear the modifications suggested would not affect the basic structure of the scheme. It was intended to ensure that the reserved powers were so framed and exercised as not to prejudice the advance of India to full responsibility and to secure that the period of transition was not indefinitely extended. It urged that the preamble to the Constitution Act should contain a definite statement that the "natural issue of India's constitutional progress is the attainment of Dominion Status." Indian public opinion, it said, had been profoundly disturbed by the attempts made during the last two or three years to qualify the repeated pledges given by responsible ministers on behalf of His Majesty's Government. "Following the precedent of some of the Dominion constitutions, a definite date after the passing of the Act should be fixed for the inauguration of the Federation."

The memorandum also demanded greater control over defence, finance and the services. The signatories urged that the Army Counsellor should be a non-official Indian, there should be a definite programme of Indianisation, the cost of defence should be substantially reduced and the Indian Army should not be employed outside the country except for Indian defence.

On the subject of financial safeguards they did not object to the appointment of an adviser to the Governor-General for a limited period, provided he did not interfere in the day-to-day administration and that he should advise the Governor-General only when he considered the financial stability or credit of the Federation to be in danger. Legislation in respect of currency, coinage and the Reserve Bank must not be subject to the previous consent of the Governor-General.

They demanded statutory recognition of India's freedom to regulate her fiscal policy without reservations or qualifications and, while they had no objection to a general declaration about British subjects holding public offices or practising any profession or trade, they stoutly opposed any provision which would make it impossible for India to discriminate against the subjects of the Dominions and Colonies which imposed disabilities on Indian subjects. The proposal to continue the recruitment to the Services by the Secretary of State was also objected to and the demand was put forth that the Central Services should be recruited by the Federal Government and the Provincial Services by the Provincial Governments.

Mr N M Joshi submitted a separate memorandum making suggestions for health insurance for workers and invalid and old age pensions and seeking to improve the provisions for labour legislation and representation.

THE FUTURE OF BURMA

Throughout the discussions on the Indian Reforms proposals the question of Burma's future occupied a secondary position, as nothing could be definitely settled until the Burmans themselves decided whether they would join the proposed Indian Federation and share the lot of the Indian provinces, or become a separate unitary entity with constitutional advance analogous to that conferred on India, subject to similar safeguards. It was thought that a new election to the Burma Legislative Council would give the electorates an opportunity to express their views on this question. The election was held and resulted in a majority for the antiseparationists. However, the new Council was called to give a straight answer to the question of Federation on the lines of Majesty's Government's proposals. A large number of resolutions were tabled, but not one of them provided any indication of the people's mind. Even the antiseparationists did not vote for Federation but expressed a desire to cast their lot with India as an experimental measure, reserving the right to withdraw from the Federation at a later date. Several adjournments were used to enable the parties to arrive at a compromise resolution and, after the Governor refused further to prolong the sittings, the Council had lasted several days, the special session of the Council was prorogued.

Burma herself gave an inconclusive verdict, the British Government could not remain idle, the population would have been unfair both to India and to Burma. Therefore, a few months later (in 1931) Sir Samuel Hoare presented to the Parliamentary Committee a memorandum embodying Government's proposals for future constitution of Burma if it were decided to separate Burma from India. However, it made it clear that if the Joint Committee decided that Burma should be included in the Indian Federation, the proposals of the White Paper (subject to consequential adjustments) would apply to Burma in the same way as they would apply to any other province

of India. As the Burma Council had refused to choose separation on the basis of the constitution outlined by the Premier, he suggested that the Committee should invite some Burma representatives for consultation to assist in determining which of the two courses would be in the best interests of Burma. Assuming that Burma was to be separated, he outlined a scheme of constitutional advance under which executive authority in a unitary Burma would vest in the Governor, who would also be the Commander-in-Chief. He would himself direct and control the administration of finance, external affairs, ecclesiastical affairs, monetary policy, currency, coinage, and matters connected with scheduled areas. Other subjects would be administered by Ministers elected by, and responsible to, the Council. The Legislature would be bicameral.

Shortly after the submission of this memorandum Sir Samuel expressed the opinion that an overwhelming body of Burmans had supported separation from India. He added that Burma could not be granted the right of secession, as it would be a bad precedent and would be fatal to Federation.

In pursuance of the policy of giving Burmans the fullest opportunity to determine the future form of their constitution, the Joint Parliamentary Committee decided in November to invite twelve representative Burmans for consultation. A prolonged discussion took place in December, in which both sides freely ventilated their respective points of view. "The result of the elections to the special session of the Burma Council should be construed as a vote against separation", "There are no two opinions in Burma, all are for separation, the so-called federationists are also for separation—but after a time." These were the conflicting views expressed in London. On behalf of His Majesty's Government, Sir Samuel made it plain that Britain had no axe to grind and that she was actuated solely by the desire to do the best for Burma. There the matter rests pending the report of the Parliamentary Joint Select Committee on the White Paper.

The Indian Legislature.

The Annual Budget Session of the Indian Legislature opened in New Delhi with a meeting of the Legislative Assembly on Wednesday, 1st February, when His Excellency the Viceroy delivered an inaugural address. In the course of this, His Excellency specially referred to the declining civil disobedience movement and, having re-emphasised the determination of his Government not to relax the measures in force against it so long as circumstances made them necessary, referred to the recently passed Legislation on the subject and said "The Acts which are now on the Statute Book will not be permanent, but will be in force during the difficult period of transition from the present to the new constitution, when there is a special risk of certain elements in the population trying to substitute the methods of revolution for those of constitutional and orderly progress. I trust that when the period for which these Acts will remain in force has expired those in whose hands the power will then rest will find themselves able safely to discard them and that the threat which direct action presents to the evolution of constitutional self-government will have been destroyed. I regret that there is not as yet any open sign of a recognition on the part of the leaders of the civil disobedience movement of the harm their policy has caused to the country. Though their efforts to revive enthusiasm meet with little success, they still remain pledged to that policy. I am firmly convinced, however, that the march of events will gradually carry them further and further away from the sterile methods of negation and obstruction, and that in spite of themselves they will find that they are caught up in the living forces of constructive politics which the near approach of the new constitution is releasing on all sides."

His Excellency also specially referred to the terrorist movement in Bengal, and there had been some improvement in the situation and declared that the despatch of troops to the Province had had a reassuring effect upon the local population.

His Excellency expressed great satisfaction at the general good will exhibited at the recent Third Round Table Conference and said "My last and strongest impression is of work well done and of another milestone behind us on the road of constitutional advance. There is no tarrying on that road. Steadily and surely the march to federation proceeds." The Viceroy showed with what interest he had met individual Indian Delegates since their return from the Conference to India.

His Excellency forecast the introduction of a Bill to establish an Indian Reserve Bank and expressed keen satisfaction at the success of the Finance Department loan conversion programme whereby 50 crores of loan money was dealt with in a manner which must be a record in the financial history of the Government. His Excellency noted how at each step in the fulfilment of the programme the level of Government's credit had been raised, so that whereas in June 1932, Government borrowed on a basis of somewhat over 5½ per cent the latest transactions showed Government's credit established very nearly at a 4 per cent level.

In conclusion the Viceroy, after emphasising the need for further economy in expenditure said "I think it is true to say that there is now in the world and particularly in India, a growing sense that in present world conditions some sort of economic planning is necessary for every country. My Government are very much alive to this feeling and here again we have our eyes on the future and desire to prepare for the new Government measures for providing more accurate statistical information, and for evolving a co-ordinated economic policy." His Excellency went on specially to refer to investigations lately undertaken to deal with the competition of road and rail transport.

Among the mass of official legislation of a minor character with which the session started was a Bill to prohibit the pledging of labour of children. This came up on report by Select Committee and was passed into law. A motion to refer to Select Committee a Bill to amend the Auxiliary Force Act was passed. The aim of the Bill was to provide for a certain amount of reorganisation and was primarily an economic measure. One of the most important measures brought forward during the session was a Bill to establish a Medical Council in India and to provide for the maintenance of a British Indian Medical Register. This, after prolonged discussion on various days, was referred to a Select Committee on 12th April. An official Bill to regulate the payment of wages to people employed in industry, a measure brought forward to deal with the undue withholding of wages and the late payment of wages, by employers, was ordered for circulation to elicit public opinion. Other bills dealt with taxation of incomes, with the possession of wireless, receiving apparatus and the extension of the current protection of Indian wheat, cotton, textiles and salt.

A Bill of great importance introduced on 8th April was one to provide for the imposition of additional Customs Duties on imported goods for the purpose of safeguarding industries in British India. The provision of the Bill provided for a duration of the measure until 31st March 1935. The reason for its introduction was the need to deal with the influx of Japanese manufactured goods at destructive competitive rates. The Commerce Member informed the House that Government had taken steps to denounce the Indo-Japanese Trade Convention. The denunciation required six months' notice and would, therefore, not come into operation until 10th October. The new Bill armed Government with extensive powers for the imposition of safeguarding duties by executive order as soon as the denunciation took effect. The Bill was after considerable discussion, passed by the House without a division on 12th April.

Another important measure brought before the House by Government was a Bill to supplement the provisions of measures passed by the Bengal, Bihar & Orissa, Bombay, United Provinces and Punjab Governments and Legislatures to take the place of numerous Ordinances for the suppression of civil disobedience. The Government of India's bill was instituted for the enactment of certain provisions beyond the

competence of Provincial Governments and their Legislatures. The Central measures were the subject of prolonged debate, but the general purport of the speeches was to show a preponderating body of opinion heartily in support of Government's determination to eradicate civil disobedience. The Bill was finally passed by 48 votes to 30, non-official Muhammadans being almost unanimously on the side of Government, while several other non-official Indian members voted in the official Lobby and other elected members who did not feel themselves able to vote for the measure nevertheless assisted its passage by absenting themselves from the division, the total number of votes cast, being only 78 out of a House of 146.

Railway Budget

The Annual Railway Budget was presented to the Assembly on 16th February by the Hon'ble Sir Joseph Bore, Member for Railways. He pointed out that it was unavoidable that the Railway estimates should reflect the prevalent severe economic depression but said there were legitimate grounds to hope that the country had at last touched rock bottom and that though recovery might yet be delayed the worst had in all probability already been passed. On that assumption the estimates were framed. The loss in the working of commercial lines in the year 1931-32 finally turned out to be 7½ crores or a quarter of a crore less than anticipated. The loss on strategic lines was, as usual, just under two crores. The total loss of 9½ crores, was met to the extent of just under 5 crores by the withdrawal of the uninvested balance of the Reserve Fund and for the remaining 4½ crores, an equivalent amount was taken as a temporary loan from the Depreciation Fund.

The Budget for 1932-33 anticipated a total deficit on commercial lines of 7½ crores. The Estimates when the Budget was presented in February, 1933, indicated that the results would be 1½ crores worse, the deterioration being due to a further fall in earnings. Traffic receipts were estimated to be 2½ crores below the budget figures. The loss on lines including 2 crores on strategic lines was thus expected to be 9½ crores, a figure only slightly above the loss of 1931-32. This sum was withdrawn from the Depreciation Fund. The balance to the credit of that fund, which was nearly 15 crores at the beginning of 1932-33 and under the current budget received an increase of about 8 crores (owing to the nett accretion due to the surplus of payments into the fund over withdrawals from it to meet current expenses and renewals) so that at the end of the year it would stand at 13½ crores.

For the year 1933-34 the estimates showed total traffic receipts 88½ crores and total working expenses, including depreciation, just over 63 crores, nett traffic receipts thus being nearly 25½ crores. It was calculated that nett revenue would be insufficient to meet interest charges by about 7½ crores. This deficit, of which 5½ crores was in respect of commercial lines, had again to be found by a temporary loan from the Depreciation Fund, which would thus at the end of 1933-34 stand at 13½ crores. In anticipation that the lowest depths of the economic depression had already been touched, the estimates provided for an increase of 1½ crores, or a little under 2 per cent on the current year's figures.

It was announced in connection with the Railway Budget that the 10 per cent cut in pay previously introduced throughout the Government services would not fully be continued during 1933-34, but could not, on the other hand, completely be restored, and that for the coming year there would again be a cut of 5 per cent in pay and that in conjunction with that official salaries would for the first time come under the 25 per cent income tax surcharge already introduced as an emergency measure on all income except non-official ones.

General Budget

The Finance Member, the Hon'ble Sir George Schuster, presented the Annual General Budget on the evening of 28th February. At the outset he said that the emergency plan introduced in September, 1931, to produce budgetary equilibrium for the years 1931-32 and 1932-33 had worked successfully. The results for 1931-32 turned out nearly 2 crores better than was anticipated in March, 1932, and the accounts for the year showed a deficit, after providing nearly seven crores for the Reduction of Debt, of 11½ crores. For the year 1932-33 the latest revised estimates indicated an almost exact realisation of the budget forecast of a surplus of 215 lakhs, the actual surplus being placed at 217 lakhs, again after providing nearly seven crores for the Reduction of Debt. The results for the two years combined thus showed a total budgetary deficit of 9.58 crores, against which may be set a total provision of 13.73 crores for reduction and avoidance of debt. The Finance Member expressed satisfaction that in the two years from the beginning of April 1931 to the end of March 1933, "which I think may fairly be described as the two most difficult years for finance that the world in times of peace has ever known, India would not only have paid her way but have provided a nett sum of 415 lakhs for reduction of debt."

Reviewing the trade returns of the concluding year, the Finance Member said they seemed to reinforce one of the points which he emphasised in his speech a year previously, namely, the extreme power of resistance, in spite of diminished purchasing power, which India showed in maintaining the consumption of certain standard necessities of the masses. As regarded the three articles which were taken as necessities for the masses, the quantities for consumption were in all cases higher for 1932 than for the ten-year average 1920-30. Piece goods, with a total of 5,827 million yards as compared with 4,923 million yards for the earlier period, were 18 per cent up. Kerosine Oil, with a total 235 million gallons as compared with 232 million gallons for the earlier period, was 1 per cent up. Salt, with a consumption of 2,106,000 tons as compared with 1,965,000 tons for the earlier period, was 7 per cent up. The returns showed a fall in value for machinery and mill work of about 40 per cent, a fall both in quantity and in value of lubricating oil of between 30 and 40 per cent, an increase in quantities of cement, accompanied by a fall in values, and an increase of 26 per cent in the value of chemicals, the total value of all these articles for 1932 being 70 per cent of the value for the ten years ending 1930, for which figures had been tabulated. Turning to what he called luxuries, the Finance

Member showed that the imports of motor cars in 1932 was 5,300 compared with an annual average of 11,400 in the earlier ten years. Tobacco consumed in 1932 represented 61 per cent in quantity and 51 per cent in value of the earlier period, liquors 93 per cent and 73 per cent respectively. "Altogether, the total value of the three luxury articles consumed in 1932 represents 58 per cent of the average value for the earlier period." Sir George Schuster added that the figures indicated very heavy decreases in the consumption of certain luxury and quasi luxury articles.

With exports for the ten months, April January, at 101½ crores and imports at 112½ crores, India had an adverse balance of trade in merchandise, but this was more than made up by sales and export on private account of gold. Out of £80 millions which represented the proceeds of the export of gold Government acquired £70 millions and £10 millions served to repay foreign funds temporarily invested in India. Government out of its £70 millions used £34½ millions to meet its own current requirements and £35½ millions to repay sterling loans and strengthen its reserves. Therefore, out of the total £80 millions of gold proceeds only £34½ millions were used to meet current requirements and the balance of £45½ millions went to reduce India's external obligations and strengthen her public reserves.

"Looking at the matter from the side of the Indians who have sold the gold, they have acquired 107½ crores of rupees and of this, while a portion has been spent in meeting current requirements (i.e., paying customs duty on imported goods and other taxes), a very substantial portion also, as is clear from the figures which I have given, must have been retained in currency or invested in Government securities."

The Finance Member estimated civil expenditure for 1933-34 at 20.53 lakhs, that is, 36 lakhs less than in the preceding year. He showed nett military expenditure at 46.20 crores.

The Budget, in the course of general discussion, had as good a reception from the non official benches as could be expected. The Indian Finance Bill was passed without a division on 28th March without having been amended to an extent unacceptable by Government.

Other Business

The House, on 8th March, received with expressions of regret by the leaders of all parties a message from His Excellency the Viceroy signifying his acceptance of the resignation of the Hon'ble Sir Ibrahim Rahimtulla of his office of President of the Assembly. The election of a new President was fixed for 14th March and on that date Sir R. K. Shanmukham Chetty was unanimously elected, being the only member nominated. Approval of his election was speedily notified by His Excellency the Viceroy and Mr Chetty was formally congratulated by leaders of all parts of the House. The election of a new Deputy President in place of Mr Chetty took place on 20th March. There were seven candidates. The election was keenly contested. Five of the candidates withdrew before the ballot was held and the result of the ballot was the election of Mr Abdul Matin

Chaudhury by 64 votes, the other candidate in the ballot, Mr Muhammad Yamin Khan, receiving 56 votes.

These took place during the session a two days debate on His Majesty's Government's White Paper containing proposals for Indian constitutional reform. The Hon'ble Sir Brojendra Mitter, as Leader of the House, formally started the discussion by moving that the White Paper be taken into consideration. To this Sir Abdul Rahim moved on behalf of the Opposition Parties an amendment which substituted for the original motion one running as follows—

"This Assembly requests the Governor-General in Council to convey to His Majesty's Government that, in the opinion of this Assembly, unless the proposals of His Majesty's Government for Indian Constitutional Reform are substantially amended in the direction of conceding greater responsibility and freedom of action to the representatives of the people in the Central and Provincial spheres of Government, it will not be possible to ensure peace, contentment or progress of the country."

The amendment was carried without a division. Government did not participate in the debate.

An important non official Bill before the Assembly during the session was one by Mr C. S. Ranga Iyer "to remove the disabilities of the so called Depressed Classes in regard to entry into Hindu Temples." Mr Ranga Iyer, on 24th March, moved that it be circulated for the purpose of eliciting public opinion by 30th July 1933. The debate on the motion did not conclude before the end of the session.

Autumn Session

The annual autumn session of the Legislature commenced with meetings of the Legislative Assembly in Simla, beginning on 22nd August. The first business of importance was a motion for the adjournment of the House in order to raise the question "whether this Assembly wholly approve of the attitude of Government in restricting facilities afforded to Mahatma Gandhi, restricting these much more unlike the previous occasion, which has compelled him to resort to fast unto death." The motion referred to correspondence between Government and Mr M. K. Gandhi, who was in jail at Yeravda after conviction and sentence by the District Magistrate of Poona for breach of the law. Mr Gandhi, on the last occasion when he was in jail, was not a convict but was restrained by executive order. He now claimed the same privileges of correspondence and publicity work as he enjoyed on the former occasion. These privileges Government were ready to concede only in part and Mr Gandhi went on hunger strike in order to coerce Government into conceding the whole. The outstanding feature of the debate in the Assembly was the widespread expression of opinion on the non official benches in support of Government's decision. The debate proceeded to within half a minute of the two hours permitted to it under the Legislative Rules. The President then informed the member in possession of the House that he only had half a minute more. That member thereupon read a telegram just received from Poona by a news agency and stating that Mr. Gandhi

had unconditionally been released, that he was looking very weak and that he had broken his fast. This concluded the discussion. Government had, as a special case, informed the Provincial authorities, that they authorised the release when it became evident that his fast would result in his death.

His Excellency the Viceroy addressed both Houses of the Legislature at a joint sitting on 30th August. His Excellency reviewing events since his last address to the Legislature, referred to the negotiations arranged to take place with Japan and Lancashire in regard to imports of cotton piece goods. His Excellency pointed to the depreciation of the Japanese currency relatively to the rupee as the main cause necessitating the recent denunciation of the Indo-Japanese Trade Convention, and welcomed the representatives of the Japanese Government and the representatives of the Japanese textile industry now on their way to India for negotiations with Indian official and industrial delegates respectively. His Excellency also noted that the industrial delegation from Lancashire was on its way to India and emphasised the significance of the fact that the Lancashire industrialists were to take part in a tri-partite industrial conference with Indian and Japanese industrialists and not with Government.

His Excellency reminded the Legislature that when he addressed the Assembly in February he expressed the belief that the march of events would gradually carry the leaders of the civil disobedience movement further and further away from sterile methods of negation and obstruction and that they would find themselves caught up in the living forces of constructive politics. His Excellency added "I think that what has happened in the last few months has borne out that belief. It is true that civil disobedience still maintains a precarious existence through the personal influence of its author, but the popular judgment has really discarded it, and the pathway to happier conditions is broadening out before us. The minds of men and women are turned in the direction of constructive work rather than of continuing an unmeriting struggle. I hope we can feel that an unhappy page in the history of the country has been turned over, and that advanced political thought in India can henceforth address itself to the problems of the future."

His Excellency pointed out that in that new India to which we were advancing there was need, and there would be scope, for the co-operation of many diverse elements. His Excellency was also able to point out that conditions in Bengal were slowly improving though there had recently, in Madras, been a reminder of the manner in which the infection of the poisonous doctrines of terrorism might spread.

His Excellency noted that the White Paper containing the proposals of His Majesty's Government for Constitutional Reform was now in the hands of the Joint Parliamentary Committee, to which he wished all success. His Excellency concluded his address with an appeal in which he said "If we are to ensure the rapid progress which we all desire in the way of Constitutional Reforms, we must create the

atmosphere in which that progress can develop. Little can be done by Government alone. An equal responsibility must lie upon Honourable Members themselves and other leaders of political thought in India, to whom we must look to use their influence by their speeches, by public meetings and propaganda to see that the electorates of the future are made fully aware of the great advance we are striving to achieve through the White Paper proposals. I appeal to you, therefore, with all the sincerity at my command, to take up the responsibility with courage and energy so as to help your country forward to the attainment of her ultimate goal as an equal partner in the shaping of the destinies of the British Empire."

On the first non official bill day of the session the first business was the resumption of consideration of a motion made in the Legislative Assembly by Mr C S Ranga Iyer on the 24th March, for the circulation of a bill "to remove the disabilities of the so called depressed classes in regard to entry into Hindu temples." This motion was, after a one day's debate, carried.

An important official measure introduced during the session was a new Indian States (Protection) Bill, the purpose of which was to prevent agitation or movements in British India organised for the purpose of subverting the administrations of the Indian States. This measure, on the Home Member's motion for consideration, was subject to much apprehensive discussion. There appeared to be general agreement that conspiracies for the subversion of the States' administrations should not be permitted in British India, but it was felt that the Bill was too widely drafted and there were both apprehension that the measure might interfere with the liberty of discussing in British India the affairs of the States and determination that publicists in British India should not be prevented from joining in such discussion. Eventually, the Home Member accepted a suggestion by the leader of the Independent Party that the Bill should be sent for circulation for eliciting public opinion. Further debate was stopped by a closure motion, which was carried by 57 votes to 9, and the motion for circulation was carried by 66 votes to 7.

The Finance Member on 8th September introduced a Bill to institute a Reserve Bank. Owing to the special importance of the occasion, he made a brief explanatory speech in doing so. It explained that he had brought forward the measure now in order that it might eventually be dealt with in a special session of the Legislature to be held before the next Budget Session in Delhi. The Finance Member, therefore, moved reference of the measure to a Joint Committee of both Houses of the Legislature. The debate spread over three days and the motion was then accepted without a division. The motion to refer to the same Joint Select Committee a Bill to amend the Imperial Bank of India Act in order to make changes in it in conformity with the new Reserve Bank Bill was also accepted.

The Hon ble the Member for Industries and Labour secured the assent of the House to a motion to refer to a Select Committee his bill to consolidate and amend the law regulating labour in factories. Both Houses of the Legislature debated at length a former motion submitted

The report of the Select Committee on the Indian Medical Council Bill was presented. A leading feature of it was a proposal to limit to the Bill eliminating the provision for the establishment of an Indian medical college and thus ending the discussion concerning who should have a right to place on the board. The Bill was passed by the Assembly on 20th September and was subsequently passed without for the allocation to the Council of State.

The Assembly reported to the Government of Victoria the fact that the Executive had failed to establish a London and Manchester railway along the bank of England for the route from London to the old pits in the Humber were thrown out, and that the spirit of cooperation between the old and new oil fields.

[illegible]

Steel Industry (Protection) Act of 1927, provided for an earlier inquiry in regard to its continuance. Stop in instituting this new inquiry. Government gave the following terms of reference --

(b) Special consideration to be observed in regard to the wire nail industry to the claims of industries making iron and steel products and in regard to whether the legislature's original motion affirming the principle of discriminating protection is fulfilled.

The Board's report was not published by the end of the year.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is a borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Risley (Caste, Tribe and Race, Indian Census Report, 1901; the Gazetteer of India, Ethnology and Caste, Volume I, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negritos may be disregarded.

The Turko-Iranian, represented by the Baloch, Brahui and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turkic and Persian elements, in which the former predominate. Stature above mean, complexion fair, eyes mostly dark but occasionally grey, hair on face plentiful, head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall, complexion fair, eyes dark, hair on face plentiful, head long, nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Rajputana, and in Bihar and represented in its upper strata by the Hindustani Brahman and in its

lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Aryan and Dravidian types. The head-form is long with a tendency to medium, the complexion varies from lightish brown to black, the nose ranges from medium to broad being always broader than among the Indo-Aryans, the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans, while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Bengal Brahmans and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad, complexion dark, hair on face usually plentiful, stature medium, nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa, the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu, the Lepchas of Darjeeling and Sikkim, the Limbus, Murms and Gurungs of Nepal, the Bodo of Assam, and the Burmese. The head is broad, complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, face characteristically flat, eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Panyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical specimens the stature is short or below mean, the complexion very dark, approaching black, hair plentiful, with an occasional tendency to curl, eyes dark, head long, nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest-clad ranges, terraced plateau, and undulating plains which stretch roughly speaking, from the Vindhya to Cape

Comorin On the east and the west of the peninsular area the domain of the Dravidian is continuous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro like proportion of his nose. In the upper strata of the vast social

deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realize clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.

TOWN AND COUNTRY.

The progress of urbanisation in India—if there has been any progress at all—has been very slow during the past thirty years, the whole increase being a little more than one per cent. The percentage of the urban population to the total is only 11, which however shows an increase of 0.8 per cent since the last census, due partly to the natural increase of the pre-existing urban population and partly to migration from rural areas. The percentage of urban population ranges from 3.4 in Assam to 22.6 in Bombay which is the most urbanised of the major provinces. Compared to this, the urban population in France is 49 per cent, in Northern

Ireland 50.9 per cent, in Canada 53.7 per cent, in the U. S. A. 56.2 per cent and in England and Wales 50 per cent.

The greatest degree of growth has been in the number of towns with a population of from 20,000 to 50,000, the total population of which is now nearly double that of towns of 50,000 to 100,000. All classes of towns have increased in population, except those with populations of between 5,000 and 10,000 and those having under 5,000. Thus the large industrial and semi-industrial towns have benefited at the expense of the smaller towns.

DISTRIBUTION OF POPULATION IN GROUPS OF TOWNS ACCORDING TO SIZE AND IN RURAL TERRITORY

Class of Places	1931		1921		Percentage of total Population				
	Places	Population	Places	Population	31	21	11	01	'01

Towns having under 5,000	674	2,205,760	691	2,333,129	6	7	6	6	6

Migration—Of the population of the Indian Empire only 730,546 were enumerated as born in other parts of the world. Of these 595,078 are of Asiatic birth, 118,089 of European birth and 17,379 others. The emigration from India is approximately 2.5 million, the balance of migration being against India.

Nearly all of these migrants are resident in other parts of the British Empire. There are about 165,500 Indians in the Union of South Africa, of whom 142,979 are found in Natal. There are 26,759 in Kenya, the other overseas Indian communities in order of size are Mauri-

tius 268,870, Trinidad and Tobago 138,667, British Guiana 130,540, Fiji 75,117 and much smaller numbers in Tanganyika, Jamaica, Zanzibar, Uganda and Hong Kong. There are about 11,000 Indians scattered in numbers of under 2,000 in various other parts of the British Empire and probably about 9,000 in the British Isles. The total number of Indians in the Empire outside India is 2,300,000. Outside the Empire there are about 100,000 Indians, 25,000 in the Dutch East Indies, 35,000 in Dutch Guiana, 7,500 in Madagascar and smaller numbers in Portuguese East Africa, the U. S. A., Persia, Iraq and other countries.

The Chart below gives at a glance the changes in India's population in decade the 1921-31—the total, sex, urban rural and literacy

‡ 1891-1931

POPULATION OF PRINCIPAL TOWNS

It is claimed that the city of Calcutta contains 35,000 more inhabitants than Bombay which is the next largest city in India. There are nearly twice as many inhabitants in Calcutta proper as there are in Madras and almost three times as many as there are in Rangoon. Alone of the large cities of India, Bombay records a decrease in population since the 1921 census.

Lahore which has expanded to more than half as large again as it was in 1921 has increased its population by actually a large number during the decade than Calcutta. The same is true of Delhi and Madras which increased by 47 per cent over their population of 1921. On the other hand, although the increase of 119,470 in the population of Calcutta during the last decade is greater than has been recorded in any of the other cities the percentage increase amounts to only 11 as compared with 21.5 in Karachi, 15.9 in Rangoon, 11.5 in Ahmedabad and 14.2 in Lucknow. Taking the suburban areas into account the population of Calcutta is 1,485,582 of which 1,196,731 are to be found in the city proper included in the municipal area.

† For Delhi and New Delhi Cities only

Marriage—The subject of polygamy has been discussed fully in the report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

The table below shows the percentage for each sex of married persons who are under the age of 15 years.

Number per 1,000 of total married who are under 15 years

Provinces, etc	Males	Females
India	65.7	157.3
Burma	1.8	6.7
India Proper	68.0	161.8
Hindus	73.1	164.1
Muslims	59.4	174.3
Jains	32.5	108.3
Tribal	49.6	93.3
Sikhs	26.9	74.6
Christians	15.4	13.3

Widows and Remarriage—Infant marriage naturally involves infant widowhood, a feature of no significance where remarriage is allowed, but of serious importance where it is not. Widows among Hindus numbered just under two millions in 1931, but the general ratio of widows has decreased as compared with 1921. In the 1921 census there were 175 widows in every 1,000 females, a figure which had fallen in 1931 to 155. It is, however, Jains and

Hindus who place an effective ban on widow remarriage and in both these communities the total ratio of widows has fallen, Jain widows in 1931 were 253 per 1,000 females, but in 1921 only 221 and the 1921 figure of 191 widows in every 1,000 Hindu females had fallen to 169 in 1931. On the other hand, there has already been a very remarkable increase in child widows particularly under the age of 5 years which can be attributed to the rush of marriages anticipatory to the Child Marriage Restraint Act, a rush which it is to be feared will contribute large numbers of young widows to the figures of the 1941 census unless there is before then a very pronounced change of attitude towards widow remarriage in Hindu society generally. In every thousand Hindu women there are still 169 widowed, 22 of whom are under thirty years of age and over a quarter of those under 20. In spite of reformist movements to popularise widow remarriages, they are still uncommon enough to attract attention in Indian papers whenever they take place.

Proportion of widows in the population per 1,000 of all religions

SOCIAL AND ECONOMIC CONDITIONS

Literacy—The number of persons in India literate in the sense of being able to write a letter and read the reply

Literacy, in the sense of ability to write a letter and to read the answer to it, has grown enormously in the past fifty years, although it is at present not very high in comparison with countries in the west. Ninety-five out of every 1,000 of the population are now literate, as against 82 ten years ago and less than 40 half a century ago. Burma leads the provinces in the matter of literacy, for in that province literacy, even if not of a very high order, is a habit, traditional in both sexes and all classes, both boys and girls being taught in the monasteries of which almost every Burman village has at least one. Cochin, Travancore and Baroda follow Burma in the order of literacy. Cochin State, in spite of a very rapid growth

in population and in spite of having started with a very high ratio, has been able to do more than keep pace with that growth.

Literacy is much more prevalent in towns than in the country, as both the need for, and the opportunities of, acquiring it are greater. An analysis of the population of the cities shows that 348 out of 1,000 males and 149 out of 1,000 females are literate, while the corresponding figures for literacy in English in towns are 1,473 males and 434 females.

The country taken as a whole, female literacy is comparatively absent in India proper except in Kerala. Cochin State has more than one literate female to every two literate males and Travancore only a little less, while Malabar has nearly one to every three. Coorg a little less than one to every three, Baroda a little fewer and Mysore one to every five. Besides the

AGE AND SEX.

The table below shows the age distribution of 10,000 males and females of the Indian population by 10-yearly age groups at the last two censuses —

Age group	1931		1921		Age group	1931		1921	
	Males	Females	Males	Females		Males	Females	Males	Females
0—10	2,802	2,889	2,673	2,810	40—50	968	891	1,013	967
10—20	2,086	2,062	2,087	1,896	50—60	561	545	619	606
20—30	1,768	1,856	1,640	1,766	60—70	269	281	347	377
30—40	1,431	1,351	1,461	1,398	70 and over	115	125	160	180
					Mean age	23 2	22 8	24 8	24 7

The mean age in India is only 23 02, as against 30 6 in England and Wales. The rate of infant mortality in India in the decade 1921-31 shows an appreciable reduction on the rate of the previous decade, even if allowance

be made for the heavy mortality of the influenza years. It is in the towns that the highest infantile mortality is found. The table below shows the rates from 1925 to 1930 for presidency towns and certain provincial capitals.

INFANTILE MORTALITY RATES PER 1,000 LIVE-BIRTHS DURING

City	1925	1926	1927	1928	1929	1930
Bombay	357	255	316	314	301	298
Calcutta	326	372	340	276	259	268
Madras	279	282	240	289	259	246
Rangoon	352	320	294	341	321	278
Lucknow	260	287	256	301	269	329
Lahore	222	241	201	204	214	187
Nagpur	258	302	254	299	291	270
Delhi	183	238	201	210	259	199

Special causes contribute to the high mortality of infants in India.

Owing to the custom of early marriage, cohabitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and unsanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from diarrhoea or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases, coming next, then convulsions, then diarrhoea and enteritis.

Sex Ratio—The figures of the population of India by sexes, as recorded by the latest census, show a further continuation of the steady fall in the proportion of females to males that

has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all India ratio is 901 females per 1,000 males for Muslims and 951 females per 1,000 males for Hindus. The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded. Where females are in excess, the excess is still most marked in the lower castes and does not always extend to the higher. Among the aboriginal tribes, however, the numbers of the two sexes are approximately equal.

The necessity of a common medium of conversation and intercourse, which has given rise to bi-lingualism and the consequent displacement of tribal languages, has formed the subject of a considerable amount of discussion and suggestion during the last decade and a good deal has been written on the possibility of a *lingua franca* for India. The combined speakers of Eastern and Western Hindi considerably exceed in number the strength of any other individual language in India, and if we add to these two languages Bihari and Rajasthani, which so resemble Hindi as to be frequently returned under that name in the census schedules we get well over 100 millions of speakers of tongues which have some considerable affinities and cover a very large area of northern and

central India. In their pure forms these four languages may be scientifically distinct, but this is not the popular view. There is a common element in the main languages of northern and central India which renders their speakers, without any great conscious change in their speech, mutually intelligible to one another, and this common basis already forms an approach to a *lingua franca* over a large part of India.

Infirmities—These are classes under four main heads—insanity, deaf mutism, blindness and leprosy. The appended statement shows the number of persons suffering from each infirmity at each of the last six censuses and the proportion per hundred thousand of the population—

Infirmity	NUMBER AFFLICTED WITH RATIO PER HUNDRED THOUSAND OF THE POPULATION					
	—	1921	1911	1901	1891.	1881
Insane	120,301 34	88,105 28	81,006 26	60,205 23	74,279 27	81,132 35
Deaf-mutes	230,895 66	189,614 60	199,801 64	153,168 52	190,861 75	197,215 86
Blind	601,370 172	479,037 152	443,653 142	374,104 121	458,868 167	526,748 229
Lepers	147,911 42	102,513 32	109,091 35	97,340 33	126,244 46	131,968 57
TOTAL		860,099 272	831,644 267	670,817 229	856,252 315	937,061 407

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901 many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons falling from 315 to 267. The increase in ratio as well as in numbers since then is attributed to increased accuracy of enumeration.

Occupation—It is a well known fact that the majority of the people in India live on agriculture. The latest census puts down the number of those engaged in the exploitation of animals and vegetation at 103,300,000, while those engaged in industry number 15,400,000. Thus about 67 per cent of the country's workers are employed in the former and 10 per cent in the latter. This does not, however, mean that all the 103 millions are land owners. Rights in land in India are complicated and involved to a degree, incredible to persons familiar only with the simpler tenures of western Europe.

Between the man who cultivates land and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land. If a comparison is made between the area of land under crops and the number of agriculturists actually engaged in cultivation in British India, it is that for each agriculturist there are 2.9 acres of cropped land of which 0.65 of an acre is irrigated. The cultivation of special crops occupies under two per cent of the population concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea. Forestry employs fewer than special cultivation.

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before. Transport by road has attracted more men, while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea. About five million persons are engaged in organised industry.

It is noteworthy that less than one million people, who man, the army, the Navy, the police, the police, the services, etc., manage the administration of this vast country in other words, 350 odd millions are ruled by one million servants of the state.

There has of late been increasing unemployment, especially among the educated classes. An attempt to include these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs 10 per mensem and are held fortunate in getting even that.

difficulty, still felt very strongly in most provinces, of getting good women teachers, one of the most serious obstacles to the spread of female education is the early age of marriage, which causes girls to be taken from school before they have reached even the standard of the primary school leaving certificate

Treated in communal or religious groups, the greatest progress has been made by Sikhs, Jains, Muslims and Hindus, in that order, but the leading literate communities are the Parsis, Jews, Buimans, Jains and Christians. The following table analyses the position of the Indian communities in respect of literacy —

Religion	Number per 1,000 who are literate
All religions (India)	95
Hindus	84
Sikhs	91
Jains	353
Buddhists	90
Zoroastrians (Parsis)	791
Muslims	64
Christians	279
Jews	416
Tribal	7
Others	19

hundred and twelve out of every 10,000 males and 28 out of every 10,000 females are literate in English and both sexes taken together 123 out of 10,000. Viewed in relation to the various religions and communities, the figures are as follow —

Religion	Number per 10,000 aged 5 and over who are literate in English
All religions (India)	123
Hindus	113
Sikhs	151
Jains	306
Buddhists	119
Zoroastrians (Parsis)	5,041
Muslims	92
Christians	919
Jews	2,636
Tribal	4
Others	28

Territorially Cochin State leads in literacy in English with 307 per 10,000, Coorg follows with 238, Bengal (211) and Travancore (158) coming next

Languages—In the whole Indian Empire 225 languages were returned at the census, dialects, as has been previously explained, not having been separately considered

English Language—Literacy in English language is still less in India and is confined mostly to the town dwelling population. Two

The principal languages are given in the following statement —

Language	Total number of speakers (000 omitted)				Number per 10,000, of total population	
	1931		1921		Males	Females
	Males	Females	Males	Females		
Western Hindi	37,743	33,804	50,210	46,304	2,090	1,990
Bengali	27,517	25,952	25,239	24,055	1,523	1,527
Telugu	13,291	13,083	11,874	11,727	736	770
Marathi	10,573	10,317	9,296	9,095	585	607
Tamil	10,073	10,339	9,284	9,496	558	608
Punjabi	8,799	7,040	8,961	7,272	487	414
Rajasthani	7,271	6,627	6,656	6,025	403	390
Kanarese	5,690	5,516	5,253	5,121	315	325

Lahnda (or Western Punjabi)	4,603	3,963	3,050	2,602	255	233

Origin of Indian Emigration—Immigration is prohibited by the Hindu Shastras and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purposes of labour dates from the beginning of the 19th century. From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tobacco, and coconut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1810, when a French merchant, named Joseph Armand, carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1833 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Reunion and Bourbon, which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government, was passed legalising and regulating emigration to Reunion, Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated

and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to medical control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1873 brought to light a number of points requiring amendment.

Recent Legislation—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Act's regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N.W.P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were received by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specifies the countries to which emigration is lawful, but empowers the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out

Indians Overseas.

NUMBERS—The total Indian population resident in the countries to which Indians mainly emigrate for purposes of settlement, according to the latest available returns, is as follows —

Name of country		Indian population	Date of Information
<i>British Empire</i>			
1	Ceylon	6,50,577†	1932 Agent's Report
2	British Malaya*	6,24,009	1931
3	Hong Kong	2 555	1911
4	Mauritius	2,65,796	1931 Protector of Immigrants Report
5	Seychelles	332	1911
6	Gibraltar	50 (approximately)	1920

* Including Straits Settlements, Federated and Unfederated Malay States

† Indian Estate Labourers only

(c) Rights and disabilities of Indians domiciled overseas

These questions may be considered separately

Control of Emigration—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows—

"10 (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor-General in Council, by notification in the *Gazette of India*, may specify in this behalf

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber, either without modification or addition, or with modifications and additions to which both Chambers agree, but, upon such approval being given, the notification may be issued in the form in which it has been so approved"

Under this law emigration has been legalised to Ceylon on the following conditions—

(1) The emigrant shall—

(a) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of Ceylon, or

(b) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

(2) The emigrant shall not, before leaving British India, have entered into a contract of service for a period exceeding one month

(3) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void

(4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fund to be raised in such manner and managed by such agency as may appear suitable to the Colonial Government

(5) The Government of Ceylon shall at any time when so desired by the Governor-General in Council admit and give all facilities to an Agent appointed under section 7 of the Act

(6) Within one year of his arrival in Ceylon any emigrant who has been assisted to emigrate at the cost of the common fund referred to in clause (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which he is required to do is un-

suitable to his capacity, or that he has been unjustly treated by his employer, or for any other sufficient reason, be repatriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters' Association

(7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Ceylon shall appoint a person to perform the duties of the Agent as set forth in clause (6)

(8) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by a recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable

(9) The Government of Ceylon shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of persons emigrating to Ceylon in accordance with this Notification.

Similar conditions have been imposed in the case of Malaya. Emigration was also permitted to Mauritius for a period of 1 year only with effect from May 1st, 1923, and limited to a number not exceeding 1,500 labourers. The terms were more onerous than in the case of nearer Colonies and the arrangement has now lapsed

Emigration to British Guiana for the purpose of unskilled work has also been declared lawful on the terms and conditions given below, but the date from which emigration is to commence has not yet been fixed—

Emigration to British Guiana—Emigration to British Guiana for the purpose of unskilled work shall be lawful with effect from such date as the Governor-General in Council may with the concurrence of the Governor of British Guiana notify in the *Gazette of India* on the following terms and conditions, which shall thereupon become operative—

(1) The family shall be the unit for the purposes of emigration. Not more than 500 families shall be permitted to emigrate and the number of persons included in the said 500 families shall not exceed 1,500

(2) The emigrants shall either have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of British Guiana, or have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him

(3) No part of the cost of his recruitment of subsistence during transport shall be recoverable from any emigrant and all expenses in this connection shall be borne by the Government of British Guiana or met from funds at their disposal

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs McNeill and Chimanlal, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Present Position—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three—

(a) Control of emigration

(b) Rights of Indians to admission to other parts of the Empire.

composition of its own population by means of restriction on immigration from any of the other communities

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education, such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (a) That not more than one wife and her children shall be admitted for each such Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian "

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuited to the requirements of the Union. Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unless he possesses in his own right 250 dollars. Newfoundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are recorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter the British

Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population

Rights and Disabilities of Indians Lawfully Domiciled Overseas—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised "

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position

The Right Hon'ble Srinivasa Sastri visited the Dominions of Australia, Canada, and New Zealand in the course of 1922 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of his mission was to appeal to the Governments and public of Canada and Australia fully to enfranchise qualified domiciled Indians. At the time of Mr Sastri's visit Indians resident in Queensland and Western Australia had neither the provincial nor the federal franchise. In Canada, Indians resident in British Columbia were and are still excluded from the dominion as well as the provincial franchise. While successful in securing a more sympathetic atmosphere towards Indians, Mr Sastri failed to bring about any modification in the existing electoral laws

The question of giving effect to the resolution of 1921 was raised by the Indian representatives at the Imperial Conference, 1923. Their proposal was as follows—

"Let the Dominion Governments who have an Indian population, let His Majesty's Government in the years under their direct control, such as Kenya, Uganda, Fiji and other places where there are Indians resident, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how soonest the principle of equality implicit in the 1921 Resolution may be implemented "

This proposal was favourably received by the Dominion Premiers, excluding General Smuts, and by the Secretary of State for the

(4) The Government of British Guiana shall at any time when so desired by the Governor-General in Council, admit and give all facilities to an Agent appointed under section 7 of the Act

(5) If at any time there is no Agent appointed under section 7 of the Act, or if the Agent is absent or unable to perform his duties, the Government of British Guiana shall at the request of the Governor-General in Council appoint a person to perform temporarily the duties of the Agent

(6) Prior to the arrival of the emigrants a Settlement Commission shall be appointed in British Guiana to select and prepare suitable agricultural land for the emigrants and generally to supervise their employment. The Agent referred to in clause (4) shall, on appointment, be a member of such Commission

(7) The Government of British Guiana shall offer to each family for its separate enjoyment a holding comprising not less than five acres of suitable agricultural land prepared for cultivation on the terms hereinafter set out in a locality which shall be healthy and shall have an adequate supply of good drinking water. All expenses in connection with the preparation of the holdings shall be borne by the Government of British Guiana and shall in no case be recoverable from an emigrant

The annual rent of the holding shall be fixed by the Settlement Commission at a rate not exceeding the lowest rate paid in the locality

After an emigrant has been in occupation of a holding for three years, he shall, provided that he has cultivated a portion of the holding either by himself or through some member of his family, be entitled to a grant of the holding on payment at any time during the ensuing four years of such fees not exceeding 24 dollars as may be fixed by the Settlement Commission

On the expiry of seven years from the date of the commencement of his occupation of a holding an emigrant shall acquire absolute ownership in the holding provided that he has paid the rent and fees referred to in the foregoing paragraphs of this clause and has brought under cultivation either by himself or by some member of his family half the area of his holding

(8) An emigrant on arrival in British Guiana shall be housed and maintained without charge by the Government of British Guiana for at least one month

(9) If any emigrant so requires loans shall be made to him for maintenance, house accommodation, payment of rent and for agricultural purposes generally. Free medical assistance and free skilled supervision shall be provided

(10) Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of 7 years from the date of his arrival in British Guiana

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 3 and not more than 5 years from the date of his arrival

in British Guiana on payment to the Government of British Guiana of half of the cost of his passage from his residence in India to British Guiana

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 5 and not more than 7 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of quarter of the cost of his passage from his residence in India to British Guiana

(11) Notwithstanding anything contained in the last preceding clause the Government of British Guiana on the request of an Agent appointed under section 7 of the Act shall repatriate at its own expense and without any payment by or on behalf of the emigrant to the place of his former residence in India any emigrant at any time after his arrival in British Guiana

(12) An emigrant shall be at liberty at any time after his arrival in British Guiana to take up work or employment other than or in addition to the cultivation of a holding on lease from the Settlement Commission

(13) The ordinance enjoining compulsory education in British Guiana shall be enforced to the same extent in the case of Indian children as in the case of children belonging to other communities

(14) Boards of arbitration in regard to wages shall be established before the arrival of the emigrants and Indians shall be adequately represented on such boards

(15) Any Indian who has emigrated to British Guiana before the date of this notification and under any agreement in force at the date of this notification is entitled to an assisted return passage to India shall not be required to pay more than 25 per cent of the excess in the cost of his return passage and clothing over the cost of such passage and clothing at the time of his first arrival in the colony

(16) Any Indian who has emigrated to British Guiana before the date of this notification and has at the date of this notification become or thereafter becomes destitute shall be entitled to be repatriated to India at the expense of the Government of British Guiana without being further required to prove that he has become incapable of labour

(17) The Government of British Guiana shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of the persons emigrating to the Colony in accordance with this notification

Admission of Indians to Other Parts of the Empire—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917 and 1918, and the policy accepted by the self governing dominions and the British Government was embodied in the following resolutions—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the

(c) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business.

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws.

(10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913.

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or grievances and generally safeguard their interests.

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but it was not accepted by the Union Government.

Present Position—Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal. In the remaining two provinces they are not enfranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal. Their immigration into the Union is barred and severe restrictions exist on inter-provincial migration. In the Transvaal they are not allowed to acquire immovable property outside locations and on the Witwatersrand they are subject to the restrictions of the Gold Law.

The anti Asiatic party have made several efforts, especially in Natal, further to curtail the rights of Indians. Some of these are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms. Examples of recent anti-Asiatic legislation of major importance are:

(a) The Natal Rural Dealers Licensing Ordinance, transferring the power of granting trading licenses from the Licensing Officer to an elected Licensing Board, on which Indians may not sit.

(b) The Durban Land Alienation Ordinance. This Ordinance, which enables Municipalities in selling land to assign it for particular communities, and to that extent to secure segregation,

has been allowed on condition that Asiatics are given reasonable opportunity for acquiring adequate residential sites.

Anti-Asiatic feeling in South Africa—A bill for the 'segregation of Asiatics' known as the Class Areas Bill was introduced in the Union Assembly in March 1921, which though not specifically directed against Indians, contained provisions which could be used for the compulsory segregation of all Asiatics in certain areas. Indian opinion was deeply agitated over the prospect of this legislation which it was apprehended might in the existing state of public opinion in South Africa result in the economic ruin of a large number of Indian traders in the Union. In response to the vigorous protests made by the Government of India the Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements of resident Indians. The Government of India whilst welcoming the assurance were unable to rest satisfied with this position and made every effort to persuade the Union Government to abandon the project. For the moment they succeeded, as in consequence of the unexpected dissolution of the South African Parliament the bill lapsed but the Union Government thereafter appointed a committee to inquire for some other country in the world which would be suitable for Indian immigration and to be a home for Indians going from South Africa. The report of the committee is awaited.

In Natal an Ordinance was introduced in the Provincial Council in 1921 dealing with the township franchise to the detriment of the Indian community. It was again introduced in 1922 and in a modified form in 1923 but in each instance the Union Government withheld its approval. In 1923, the Union Government itself introduced a measure entitled "The Class Areas Bill," containing provisions which could be used in urban areas for the compulsory segregation of Asiatics. Indian opinion was deeply exercised over the prospects of this legislation, despite the assurance of the Union Government that it desired to apply the measure in a spirit of fairness to the interests and reasonable requirements of Indian residents. But in consequence of the unexpected dissolution of the South African House of Assembly in April, 1924, the Bill lapsed. Towards the end of December 1924, news was received that the Government of South Africa had given its consent to the Natal Borough Ordinance. This measure while safeguarding the rights of Indians already on the electoral roll of Boroughs, prevents further enrolment of Indians as burgesses. Similarly the Natal Township Franchise Ordinance (No. 3 of 1925) was passed to or to render Indians ineligible for Township Franchise in future. Further, towards the end of January 1925 news was received that the Union Government had gazetted a Bill to amend the Mines and Works Act in order to take powers to refuse certificates of competency to natives or Asiatics in certain occupations. The Government of India made suitable representations in the matter to the Union Government and the Select Committee to which the measure was referred altered its wording so as not to refer to Asiatics and natives directly. The Bill as amended by the Select

Colonies who cordially agreed that there should be full consultation and discussions between him and a Committee appointed by the Government of India upon all questions affecting British Indians domiciled in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr J Hope Simpson, M.P., *Chairman*, H H the Aga Khan, Sir B Robertson, Diwan Bahadur T Rangachari, M.A., and Mr K C Roy with Mr R B Ewbank, C.I.F., I.C.S., as Secretary to make representations to the Colonial Office on certain outstanding questions affecting Indians in Kenya and Fiji. The Committee assembled in London early in April 1924 and dispersed towards the end of July. During this period they had several interviews with the Secretary of State for the Colonies and the officials of the Colonial Office, in which they made representations upon a variety of important matters affecting Indians in Kenya, in Fiji and in the mandated territory of Tanganyika. In regard to Kenya, the representations covered all questions of interest to Indians dealt with in the decision of His Majesty's Government. The result of these representations was announced by Mr J H Thomas in the House of Commons on August 7th, 1924. The situation in Kenya also improved as a result of the work of the committee by the decision of the Indian community to relinquish their former attitude of non-co-operation and to accept an arrangement by which they will select five members to be nominated by the Governor to the Legislative Council. The result of the representations which the Committee made on certain outstanding questions relating to Indians in Fiji was announced on January 12th, 1927, when the Government of India published the more important papers relating to the negotiations which had been going on with the Colonial Office for some time.

Summary of present Position—Outside Australia, N Zealand and Canada the position stands as follows —

(1) **South Africa**—The main grievances of Indians, which led to a passive resistance movement headed by Mr Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters —

(i) Mr Gorges, Secretary for the Interior, to Mr Gandhi, June 30th, 1914. "With regard to the administration of existing laws, the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights."

(ii) Mr Gandhi to Mr Gorges, July 7th, 1914

"By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading, no matter how often he shifts his residence or business from place to place in the same township."

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships whether in contravention of the law or not should be respected."

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows —

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No 35 of 1908) and Act No 37 of 1919 should not be repealed.

(2) There should be no compulsory repatriation of Asiatics, but

(3) Voluntary repatriation should be encouraged.

(4) There should be no compulsory segregation of Asiatics, but

(5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions —

(a) to lay out residential areas for Asiatics

(b) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted

(6) These areas should be selected and allocated by a board of independent persons in consultation with the Municipal Council and Asiatic community

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes outside townships, should be confined to the coast belt, say, 20 to 30 miles inland

(8) A uniform "License Law" applicable to all the Provinces of the Union should be possible, be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive consolidating Act of Parliament providing, *inter alia* —

(a) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction, outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator

(b) The grounds upon which an application for the grant of a new license may be refused

(c) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application

(d) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator,

- (8) The Government of the Union of South Africa have requested the Government of India to appoint an Agent in the Union in order to secure continuous and effective co-operation between the two Governments

In India, the settlement was on the whole well received. In South Africa the more responsible newspapers, both English and Dutch, e.g., the "Cape Times" and "Die Burger," paid handsome tributes to both delegations for the statesmanship which they had brought to bear on their work, and the eminently reasonable and practical character of the results achieved by them. The majority of people in both countries doubtless regard it as a good first step in the solution of a complicated problem and the spirit, of which it is the outcome, as the best guarantee of a progressive and friendly adjustment honourable to both parties.

The friendly relations which were happily established between the Government of India and the Union Government of South Africa as a result of the agreement not only continue but have grown in warmth and sincerity. The Government of India sent out as their first Agent in South Africa the Right Hon'ble Srinivasa Sastri, P.C., who was a member of the Government of India's Delegation to the Cape Town Conference. His appointment was received with universal approval both in India and South Africa, the satisfaction felt by the Union Government being indicated by their decision, as an act of grace to make his appointment, to extend an amnesty to all Indians illegally present in the Union. On their part the Union Government after the ratification of the Agreement by the two Governments, lost no time in introducing legislation to give effect to their undertakings under it, so that when Mr. Sastri arrived in South Africa in June 1927 all that remained to be done was to take action under Part III of the Agreement relating to the measures required for the upliftment of the Indian community. Most of the provisions of this part concern the Province of Natal where the bulk of the Indian population of the Union is resident, and the Union Government were not slow in moving the Provincial Administration to appoint a Commission to enquire into the condition of Indian education in that province and to devise the means necessary for its improvement. Co-operation with this Commission on the part of the Government of India was provided by the Deputation from India of two educational experts—Mr. K. P. Kichlu, I.E.S., Deputy Director of Education in the United Provinces, and Miss C. Gordon, B.E. (Edin.), Madras Educational Service, Lecturer in Kindergarten methods at the Government Training College at Saidapet, to advise and assist the Commission in its investigations and deliberations.

A notable feature of the present situation was the marked spirit of friendliness and goodwill which now animates the Union Government in dealing with all problems affecting the domiciled Indian community. An example of this occurred in the year 1927 when a measure was introduced in the Union Parliament known as the Liquor Bill, clause 104 of which purported

to prohibit the employment of Indians on any licensed premises—hotels, clubs, breweries etc. The appearance of this clause which threatened the livelihood of 3,000 Indians engaged in such occupations, caused consternation among them and the Minister in charge decided to withdraw the clause from the scope of the Bill.

Much of the credit for the salutary measures referred to and the spirit of friendliness which they denote were due to the Right Hon'ble Mr. Sastri, the Agent of the Government of India in South Africa, whose tact and honesty earned for him the confidence of the European community, official and non-official alike and an increasing measure of their sympathy and assistance in furtherance of the Indian cause. Gratifying response was made by the Indians to this appeal for £20,000 for the purpose of opening a combined Teachers' Training and High school in Durban. The institution which meets an urgent need for Indians in the Union of South Africa was opened on October 14th, 1922, by His Excellency the Earl of Athlone, Governor General of South Africa. It is known as the Sastri College and has on its staff six fully qualified Indian teachers recruited in India.

In India the Government of India have appointed officers to look after repatriates and their personal property immediately upon their return from South Africa, to arrange for their despatch to their homes and, if possible, to find them employment for which they may be suited.

Early in 1929, the Rt. Hon. V. S. Srinivasa Sastri retired on the expiration of his period of appointment, and Sir Kurma Venkata Reddi, Kt., was chosen as his successor. In December 1929, sudden and serious illness compelled Sir Kurma Reddi to return to India on sick leave. During the time he held his post, Sir Kurma amply justified his selection to this important office. Sickness having compelled him to retire, Kunwar Sir Maharrj Singh, Kt., C.I.E., M.A., Barrister, has appointed to succeed him.

Early in February 1930 the Government of the Union of South Africa set up a Select Committee of the House of the Assembly to enquire into certain questions relating to the right of Indians to occupy and own fixed property in the Transvaal and to propose such legislation to the House as it might deem fit. This decision was the result of a number of recent judicial judgments bearing upon the occupation of premises on proclaimed grounds in the Transvaal by persons belonging to the native races of Asia and to the wide spread belief that the intentions of the Union Parliament as indicated in Act 37 of 1919 which purported to prohibit the acquisition of immovable property by Asiatics subsequent to its coming into operation were being systematically defeated. As the labours of the Committee were likely to affect important Indian interests, and as Sir Kurma Reddi was on leave in India the Government of India deputed Mr. C. D. Tyson, I.C.S., to make suitable representations to the Committee for safeguarding legitimate Indian interests and to give the Indian community in the Transvaal such assistance as it might need for placing its views before the Committee. The Committee's conclusions which were embodied in a Bill and its Report were placed on the table of the Legislative Assembly of the Union on the 13th May and the Bill prepared by them was

Committee was passed by the Union Assembly but rejected by the Senate. In January 1926 it was reintroduced and in May it was adopted in a joint Session of the Senate and the Assembly by eighty-three votes, to sixty seven. In reply to representations made by the Government of India they were informed that there was no present intention on the part of the Union Government of extending regulations beyond the position as it existed prior to the judgment of the Transvaal Provincial Division of the Supreme Court in the case *Rex versus Hildich Smith* when it was held that certain regulations with reference to mines and works which have actually been in force in the Union of South Africa since 1911 and in certain provinces for many years before that date were not valid under sections of the Act in terms of which they were promulgated. The Government of India were assured that should any such extension of the scope of these regulations be contemplated in future every reasonable opportunity will be given to all the parties in the Union interested in the matter to make representations.

In July 1925, a more comprehensive Bill, known as the Areas Reservation and Immigration and Registration (Further Provision) Bill, was introduced in the Union Assembly. The Government of India made effective representations against the provisions of this Bill both on grounds of principle as well as of detail.

Deputation to S Africa

Towards the end of November 1925, the Government of India, with the concurrence of the Government of South Africa, sent a deputation to South Africa the personnel of which was as follows —

G F Paddison, Esq, CSI IOS, Commissioner of Labour, Madras—*Leader*

Hon'ble Syed Raza Ali, MOS—*Member*
Sir Deva Prasad Sarvadikary, Kt, CIE—*Member*

G S Bajpai, Esq, CBE, IOS—*Secretary*

The main purpose of the deputation was to collect as soon as possible first hand information regarding the economic condition and general position of the resident Indian community in South Africa and to form an appreciation of the wishes and requirements of the Indian community in South Africa. This deputation was followed by a return visit to India of a Parliamentary deputation from the Union Government of which the following were members —

The Hon'ble F W Beveridge, Minister of Mines and Industries, Patrick Duncan, KC, CMG, Messrs A C Fordom, J S Marwick, G Reyburn, O S Vermooten, W H Reid, and J R Hartshorne. As a result of the investigations of these deputations, the Government of India and of the Union arranged for a meeting in the Union of a further delegation from India to explore every possible avenue, in order to arrive at a satisfactory solution of the Indian problem.

The Indian delegation whose members were Sir Muhammad Habibullah, the Hon'ble Sir Phiroze Sethna, Sir Darcy Lindsay, Sir G S Paddison, the Rt Hon'ble Srinivasa Sastri, Mr G L Corbett and Mr G S Bajpai, assembled in Conference with the Parliamentary deputation in Cape Town on the 17th December 1926. At the Session which lasted until the 11th January 1927, the contentious differences were discussed by the delegates freely and openly and in a spirit of determination to find a satisfactory solution of the outstanding difficulties. At the close of the Conference the delegates were therefore able to recommend the following articles, which were unhesitatingly approved of by the respective Governments, as a basis of agreement —

- (1) Both Governments reaffirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of Western Standard of life
- (2) The Union Government recognize that Indians domiciled in the Union, who are prepared to conform to Western Standards of life, should be enabled to do so
- (3) For these Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after three years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile, which will be of general application. Emigrants under the assisted Emigration Scheme, who desire to return to the Union within the three years, will be allowed to do so only on refund to the Union Government of the cost of the assistance received by them
- (4) The Government of India recognise their obligation to look after such emigrants on their arrival in India
- (5) The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918
- (6) In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement which has now happily been reached between the two Governments and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with Areas Reservation, Immigration and Registration (Further Provision) Bill
- (7) The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest,

read in the House for the first time on the 14th of that month. As soon as copies of the Bill and the Select Committee's Report reached the Government of India, they made pressing representations to the Government of the Union to allow adequate time for careful examination of the far-reaching provisions of the measure which the Select Committee had prepared. Their representations were not without effect and the Union Government decided to postpone further consideration of the Bill until the next session of the Union Parliament early in 1931.

The bill did not, however, come up before the Union Parliament in 1931, as the Union Government agreed to postpone it further until after the conference between their representatives and the representatives of the Government of India in connection with the revision of the Cape Town Agreement of 1927. This Conference was held at Cape Town in January-February 1932. The Government of India delegation was led by the Honourable Sir Fazl-i-Husam, the other members being the Rt Honourable V S Srinivasa Sastri, Sir Geoffrey Corbett, Sir Percy Lindsay, Mrs Sarojini Naidu, Mr G S Bajpai, and Sir K V Reddi.

The results of the Conference were announced simultaneously in India and South Africa on the 5th April, 1932. As regards the Cape Town Agreement of 1927, the following statement was made —

1 "In accordance with paragraph 7 of the Cape Town Agreement of 1927 delegates of the Government of the Union of South Africa and of the Government of India met at Cape Town from January 12th to February 4th, 1932, to consider the working of the Agreement and to exchange views as to any modifications that experience might suggest. The delegates had a full and frank discussion in the Conference which was throughout marked by a spirit of cordiality and mutual good-will.

2 Both Governments consider that the Cape Town Agreement has been a powerful influence in fostering friendly relations between them and that they should continue to co operate in the common object of harmonising their respective interests in regard to Indians resident in the Union.

3 It was recognised that the possibilities of the Union's scheme of assisted emigration to India are now practically exhausted owing to the economic and climatic conditions of India as well as to the fact that 80 per cent of the Indian population of the Union are now South African-born. As a consequence the possibilities of land-settlement outside India, as already contemplated in paragraph 3 of the Agreement, have been further considered. The Government of India will co operate with the Government of the Union in exploring the possibilities of a colonisation scheme for settling Indians, both from India and from South Africa, in other countries. In this investigation, which should take place during the course of the present year a representative of the Indian community in South Africa will, if they so desire, be associated. As soon as the investigation has been completed the two Governments will consider the results of the enquiry.

4 No other modification of the Agreement is for the present considered necessary."

The Union Government, as already mentioned in an earlier paragraph, took action to implement the first part of paragraph 3 of the statement. No suggestions in regard to the exploration of the possibilities of a colonisation scheme for settling Indians both from India and South Africa, in other countries have so far been reported. The South African Indian Congress decided to appoint a delegate to the committee of investigation on certain conditions. The Committee's report is awaited.

As regards the Transvaal Asiatic Land Tenure Act, certain changes were made which, broadly speaking, had the effect of further safeguarding Indian rights than was expected at the time when the results of the Conference were announced in India. These modifications were explained to the Members of the Indian Legislative Assembly in the following statement which was made on the 12th September, 1932 —

Clause 5 of the original Bill, which sought to segregate Asiatics by provision for the year marking of areas for the occupation or ownership of land exclusively by Asiatics, has been deleted. Instead, the Gold Law has been amended to empower the Minister of the Interior, after consultation with the Minister of Mines, to withdraw any land from the operation of sections 130 and 131 of the Gold Law in so far as they prohibit residence upon or occupation of any land by coloured persons. This power will be exercised, after inquiry into individual cases by an impartial commission, presided over, by a judge, to validate present illegal occupations and to permit exceptions to be made in future from occupational restrictions of the Gold Law.

Fixed property acquired by Asiatic companies up to 1st May 1930, in which the controlling interest was nominally in the hands of Europeans but *de facto* in the hands of Asiatics of which stood lawfully registered in favour of an individual Asiatic on the same date and fixed property held through European trustees immediately prior to the 15th May 1930 will all be protected. Shares held by an Asiatic or Asiatic Company in a private company which in the terms of the original Bill, would have been forfeited to the State if the company acquired any fixed property after the 1st May 1930, are protected, provided that they were held by an Asiatic on the 1st May 1932 and have not been transferred by him since that date and they will be heritable by one Asiatic from another who lawfully holds them.

The provision in the original Bill, which declared illegal the occupation of any fresh 'land' after 1st May 1919 in the same township by an Asiatic, has been made applicable from the 1st May 1930. Extensions made between the 1st May 1919 and 1st May 1930 are protected.

In areas, like Springs, which, according to a judicial pronouncement, were not formerly subject to the restrictive provisions of the Gold Law, but which have now been brought under those restrictions, Indians who were lawfully residing on or occupying land on the 1st May 1930, will have their right of residence or occupation protected and will also be able to transfer the right to their lawful successors in title.

their services are understood to have been greatly appreciated by the resident Indian communities. The personnel of the Commission was announced by the Secretary of State for the Colonies on November 14th 1927 and was as follows — The Right Hon'ble Sir Edward Hilton Young, P.C. G.B.L., D.S.O. D.S.C. M.P. (*Chairman*), Sir Reginald Mait, K.C.I.L. C.S.I., Sir George Schuster, K.C.M.G., G.B.L., M.C., and Mr G. H. Oldham, *Members* with Mr H. I. Downie (*Secretary*). The Commission left England on December 22nd 1927, and travelled via the Nile to Uganda and thence to Kenya, Tanganyika, Zanzibar, Nyasaland, and Northern Rhodesia, visiting the chief centres and hearing the views of representatives of different sections of the community. The Commission also visited Salisbury for the purpose of conferring with the Government of Southern Rhodesia. The report of the Commission was published on the 18th January 1929.

It was examined by the Government of India in consultation with the Standing Immigration Committee of the Indian Legislature and with prominent representatives of all parties in the Legislative Assembly, who were not members of the Committee. The tentative conclusions reached by Government on the main recommendations in the Report were set out in a telegram to the Secretary of State for India of the 19th March 1929, which was published in India in September 1929.

In March 1929, the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal if he wished to make use of him in dealing with the Indian deputations.

Mr Sastri left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

- press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike,
- invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll,

- oppose the grant of responsible Government to Kenya or of any institutions leading up to it,
- oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson;
- demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians,
- advocate the continuance of the official majority in the Legislative Council of Kenya,
- demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions.

In September 1929 the Indian Delegation from East Africa was received by Sir Fazl-i-Husain, Member in charge of the Education, Health and Land Department of the Government of India at Simla. The delegation was represented by Mr J. B. Pandya, Mr C. P. Datta and Mr Iswari Das from East Africa and Pt. H. N. Kunzru and Sir Purshotamdas Thakurdas, M.L.A.s, Sir Frank Noyce, Secretary, and Mr A. B. Reid, Joint Secretary in the L. H. Department, were also present.

Sir Fazl-i-Husain welcomed the delegation and requested them to tell him in what matter they wished the Government of India to help them. The delegation stated 'the views of the Indian Communities in East Africa on the matters arising out of the Hilton Young Commission's Report which in their judgment most vitally affected Indian interests. The statement made by the delegation related principally to the question of common franchise in Kenya, the representation of the natives of the country on the Council, the Federation of the several territories in East Africa along the lines suggested in the report, the reservation of land in Kenya for the settlement of Indians, the residential segregation of Indians in Kenya, the appointment of an Indian Trade Commissioner in East Africa, the improvement of educational facilities for Indians in East Africa, the appointment of Indians in the higher public services there and the better political representation of Indian interests in Uganda and Tanganyika. The delegation also requested the Government of India to nominate a representative to accompany the Deputation which they propose to send to London shortly to put the Indian case before His Majesty's Government before they pass any orders on the Hilton Young Commission's Report.

Sir Fazl-i-Husain thanked the delegation for their interesting statement, but said that, before he could make any statement on the attitude of the Government of India in regard to the points advanced by the delegation or reply to their request for the nomination by the Government of India, of a representative to accompany the proposed deputation to London, he would like the members of the delegation to attend the meeting which the Government of India had arranged to hold upon the 14th September, with leading members of the Legislature and the

(1) IMMIGRATION—My position is that if danger ever arises of such an influx of immigrants, of whatever class, race, nationality or character, as may likely be prejudicial to the economic interest of the natives, I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE—I have given careful consideration to representations in favour of a common poll, but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, expressed or implied, which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question.

With regard to the announcement in connection with "Lowlands" the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-cooperation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be

heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, viz., an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January, 1927.

In view of the issue of another White Paper in July 1927 in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

The announcement excited serious apprehensions in India with regard to the future position of Indians in those Colonies. A deputation drawn mainly from both houses of the Indian Legislature also waited on His Excellency the Viceroy on the 17th September, 1927, and represented the position of Indians in East Africa. One of the suggestions made by the deputation was that permission may be given for a small deputation appointed by the Government of India to go over to East Africa in order—

- (a) to make a general survey of these territories in relation to Indian interests there and
- (b) to help the resident Indian community in preparing their evidence for the Commission.

The Government of India readily accepted this suggestion and, with the approval of His Majesty's Government, sent Kunwar Maharaj Singh, CIE and Mr R. B. Ewbank, CIE, ICS, to East Africa. These officers visited Kenya, Uganda, Zanzibar and Tanganyika and

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute, while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921 from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 4th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies have returned their representatives to the Council, but no candidate offered himself for election from the third constituency. It is understood that two subsequently elected members also withdrew from the Council owing to the decision of the Secretary of State for the Colonies that the introduction of a common electoral roll in Fiji is impracticable at present.

British Guiana—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr J. J. Nunan, Attorney General, and Mr J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonization of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs Pillai, Keatinge and Tivary visited British Guiana. Mr Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay, D. W. in Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President, and Mr Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt and the Hon. Mr J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters. Kunwar Maharaj Singh, M.A., C.I.L., Bar at Law, was deputed for this purpose. He proceeded to that Colony in September 1925. His report was received on February 1st, 1926 and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonization scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

(4) **Other Parts of the Empire**—In Ceylon, Mauritius, and Malaya, the position of Indians has all the while been satisfactory, and the matters have gone smoothly. The Government of India maintain their own Agents in Ceylon and Malaya. The

Standing Emigration Committee, so that the latter might have the advantage of hearing the delegation themselves before they advised the Government of India upon the situation. The delegation expressed their readiness to attend the meeting and then withdrew.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, P. C., C. H., as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of *Closer Union*, His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time has not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

As regards the Common Electoral roll, the Committee have stated that it would be impracticable under present conditions to advocate the adoption of the system in preference to the existing system of election. This recommendation has also been accepted by His Majesty's Government. It has also been decided that no change should be made in the present arrangement which secures an official majority in the Kenya Legislative Council.

During the year 1927, another matter which engaged Government and the public in India was the report of the Local Government Commission which was appointed by the Governor of Kenya in July 1926, to make recommendations as to the establishment or extension of local Government for certain areas in the Colony. —The report of the Commission

was submitted to the Governor of Kenya in February 1927. The recommendations made were numerous and so far as Indians were concerned they involved a decrease in the proportion of Indian representation on the local bodies at Nairobi and Mombasa and the creation of an European elected majority in both places. This caused resentment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's Secretary of State for India on the subject.

In 1928 the Local Government (Municipalities) Ordinance was passed. This amended the law relating to Municipal Govt in Kenya to provide for the nomination of 7 unofficial Indian Members as against 9 European Members to be elected in Nairobi and for the nomination to the Municipal Board of Mombasa of an equal number of European and Indian Members, viz., 7.

(3) *Fiji and British Guiana — Emigration* to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that 'the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji'. In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members Messrs. Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which was finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan, did not reach Fiji until the end of January 1922.

Indians in Great Britain.

Some seventy years have gone by since the Parsee community, in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co., led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained though there are both Hindu and Mahomedan business men firmly established there. Nor are the professions unrepresented for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 four Indians—the late Mr. Ameer Ali, the first Lord Sinha, the late Sir Binode Mitter and Sir Dinsha Mulla—have served on the Judicial Committee of the Privy Council. Three Indians are on the Secretary of State's Council. In 1919, the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government. In the spring of 1923 Mr. (now Sir) Dadabhai Dalal was appointed High Commissioner for India being the first Indian to hold the office. He resigned towards the end of 1924 to be succeeded by Sir Atul Chatterjee, who in 1931 was followed by Sir B. N. Mitra. The early years of the present century saw the gathering of a new Indian element in permanent residence—that of retired officials and business men, or people of independent means who from preference or in order to have their children educated in England, leave the land of their birth and seldom if ever visit it again. Further the stream of Indian summer visitors includes wealthy people who come regularly.

Sectionally, the only Indian community to be fully organised is that of the Parsis. They have an incorporated and well-endowed Parsi Association of Europe. Its central Zoroastrian House, 11, Russell Road, West Kensington, opened in 1929, includes a room devoted to ritual and ceremonial purposes, a reading room and library, and rooms for social intercourse. The Arya Bhavan, a home for orthodox Hindus visiting London, was opened at 30, Belsize Park, Hampstead, in the summer of 1928. Indian business interests have been organised by the formation of the Indian Chamber of Commerce in Great Britain, with offices at 85, Gracechurch Street, E.C. 3. The East India Association (3 Victoria Street S.W. 1) established in 1867, provides a non-partisan platform for the discussion of Indian problems, and exists "to promote the welfare of the inhabitants of India." The India League (146, Strand, W.C.) under the chairmanship of Mr. Bertrand Russell exists "to support the claim of India for Swaraj (Self Rule)." At the other end of the scale in Indian political

controversy is the Indian Empire Society 127, Alfred Place, South Kensington S.W. 7, with Lord Sumner as President and Field-Marshal Sir Claude Jacob as Chairman of the Executive Committee.

India House

In March, 1920, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Aldwych, erected and furnished at a cost of £321,000. The design of this noble building which has a frontage of about 130 ft. opposite the Waldorf Hotel, was the work of Sir Herbert Baker, A.R.A., with Dr. Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry and symbolism an individuality that proclaims it the London house of India. Including basement and mezzanine floors, there are twelve floors in all, the available space for clerical work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase, exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Aggra and Delhi sandstone, carved and pierced in the geometrical patterns of the *jali* in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble. The use throughout of Indian hardwoods, chiefly gurgan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non-Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver gray, loko, laurel and the beautiful dark red poudouk have been used. The domes and vaults of the building have been embellished by mural

question of the fixation of a standard minimum wage for Indian Estate labourers in Ceylon and Malaya has been the subject of negotiations between the Govt of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922. So far as Ceylon is concerned a settlement satisfactory to the Govt of India and that of Ceylon has been arrived at, *i.e.*, the standard wage and other outstanding questions affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as "Indian Labour Ordinance No 27 of 1927". The Standard Rates of Wages agreed upon were introduced with effect from the 1st January 1929. In 1931, however, it was decided with the concurrence of the Government of India to reduce these wages by 5 cents for men, 4 cents for women and 3 cents for children by way of readjustment owing to the price of rice issued from estates being fixed at Rs 4 80 instead of Rs 6 40 per bushel. In regard to Malaya, Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas. The rates so fixed were, however, reduced by 20 per cent with effect from the 5th October 1930 owing to acute depression in the rubber trade. The questions affected by these details have recently received much attention by the Indian and Malay Authorities. The worldwide economic depression has also had repercussions on Indian labourers employed on tea and rubber estates in Ceylon. Wages have had to be reduced, but the Government of India have, with the co-operation of the Colonial Government, successfully prevented such reduction from materially affecting the labourers standard of living. For those who are unwilling to work on reduced wages facilities for repatriation to their homes in India have been secured. The position in both the countries is being watched by the Government of India, through their Agents,

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an Officer for the purpose and to give him all facilities, and in December, 1924, an Indian Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry

Kunwar (now Sir) Maharaj Singh's report was published by the Government of India in August 1925. The various recommendations made

in the report were commended to the consideration of the Colonial Government

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, *viz.*, that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the Island, the Colonial Government expressed their willingness to give effect to several of them.

The present position of Indians in the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia, sub-section (5) of section 39 of the Commonwealth Electoral Act, 1918-24, was amended in 1925, by adding after the word "Asia" the words, "except British India". This measure gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia, the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It is, therefore, in Western Australia alone that Indians do not enjoy the suffrage in respect of election for the Lower House. By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 65 years of age, or above 60 years, provided such persons are of good character and have resided continuously for at least 20 years. An Invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £ 5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government.

paintings, the work of specially selected Indian artists. The water supply is entirely independent of municipal service, being obtained from two artesian wells sunk some 460 ft below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which is at the depot off the Thames at Belvedere Road, Lambeth.

The Students

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem. Its numbers multiplied ten or twelve fold in the quarter of a century before the war. After a very considerable temporary check caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or under-graduate student, there are some youths of good family, including heirs of Indian States, admitted into our public schools, such as Eton and Harrow. There are some 500 Indians at the Inns of Court. Since the war there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there are fully 2,000 young Indians (some five per cent of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbs about half the total.

The Advisers

It is well known that for many years ago Indian students were left to their own devices apart from inadequately supported unofficial effort and the chance of coming under the influence of English friends of their families. But in April 1909 Lord Morley, created for their benefit a Bureau of Information and appointed the late Sir Thomas Arnold to the charge of it under the title of Educational Adviser. The Bureau was located at 21, Cromwell Road, together with the National Indian Association and the Northbrook Society, which were thus given spacious quarter for their social work among the young men. In India the provincial advisory committees to help and advise intending students have been replaced in some instances by University Committees. The work of the Bureau rapidly expanded and in consequence Lord Crew in 1912 re-organised the arrangement under the general charge of a Secretary for Indian students, Mr (now Sir) C E Mallet who resigned at the close of 1916. He was succeeded by Dr Arnold under the designation of Educational Adviser for Indian Students to the Secretary of State. Mr N C Sen followed Sir T Arnold as Local Adviser in London. At Oxford the Oriental Delegacy, and at Cambridge the Inter-Collegiate Committee have been instituted to deal with Oriental students generally, whilst Local Advisers for Indian students have been appointed at Manchester, Edinburgh and Glasgow.

These arrangements underwent far-reaching revision in the autumn of 1920 in connection with the setting up, under the Act of the previous year of a High Commissionership for India in the United Kingdom. The "agency work" Sir William Meyer took over from the Secretary of State included that connected with Indian students. Sir Thomas Arnold accepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr N C Sen and Dr Thomas Quayle as Joint Secretaries for the Education Department. The administrative work hitherto divided between the India Office and 21, Cromwell Road was consolidated at the offices of the High Commissioner, thereby obviating a good deal of duplication of files and papers. Dr Quayle is now Secretary in the Education Department of the Office of the High Commissioner and is assisted by Messrs P K Dutt, R M J Knaster and V I Gaster with Miss C H Bose to look after women students.

The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrangements had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar. The Committee held that it should be possible to secure admission both to British universities and, subject to certain reservations, to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamer recommended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the Inns of Court. An Act for the purpose was passed by the Indian Legislature in 1926, but has not narrowed the stream of students at the Inns of Court.

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly Sir Atul Chatterjee held a conference in July 1925, when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London. The subject had been previously discussed at a meeting of the East India Association (April 27

Sport.

The year under review marked a big advance by India in the field of sport. No less than five international teams were entertained by India and cricket history was made by the visit of the first official M. C. C. team of cricketers and the playing of the first Test match on Indian soil. Indian cricket was paid a big tribute by the M. C. C., in that they sent out, as captain of their side, Mr. D. R. Jardine, one of the greatest skippers who ever led in England, eleven, and a man who was born in India. The men Mr. Jardine led were thoroughly representative of English cricket, even if some of the big names were absent and it was not surprising that India failed to win a Test. She did manage to share the honours in the second game at Calcutta but was fairly and squarely beaten in the other two. To Amarnath, a young all-rounder from the Punjab, fell the honour of making the first century for India in Test cricket and there were scenes of great enthusiasm on the Bombay ground when he reached three figures. India showed that she has cricketers well up to Test match standard.

The year also saw the birth of the Cricket Club of India, from which great hopes are entertained for the future, and the bringing forward of a scheme for a cricket championship of India. The visit of the M. C. C. overshadowed all other cricket and once again the Bombay Quadrangular tournament was held in absence.

The inauguration of the Western Asiatic Games which were held at Delhi and Patiala is another achievement which goes to the credit of India. Four countries, Afghanistan, Palestine, Ceylon and India participated and some new records were set up during the games, which were organised on Olympic lines and which were attended by H. E. The Viceroy. Some excellent sport was witnessed at these games, which served to emphasise the urgent need of a properly equipped Stadium for the country, especially a good cinder track.

For the first time in the history of hockey India entertained a foreign hockey team, Afghanistan sending a side which played in several centres, but which was beaten by India in the Western Asiatic Games. This was also the first time Afghanistan had entered the field of international sport.

A foreign tennis team also visited India, a team from West Australia, which India proved good enough to beat. Their visit, however, stimulated interest in tennis which is rapidly making progress. Bombay was also fortunate in being able to see F. J. Perry, the famous English player, for a few hours and E. V. Bobb, the Indian champion, took a set off him.

India is rapidly becoming more sport minded and sport in all its branches is becoming a part of the life of the people. Hockey, perhaps claims the most players, then comes cricket and tennis and more and more are becoming enthusiasts of one or the other, sometimes all three, of these games. Football is played during the Monsoon and this game is growing, the Indians, in Bengal especially, being a very keen soccer enthusiast, while in Bombay, Madras and the Punjab the game is flourishing. It is governed in Bengal by the Indian Football Association, in Western India by the Western India Football Association and in the Punjab by the Northern India Football Association. The chief tournaments are the Indian Football Association Shield played in Calcutta, the Rovers Cup played in Bombay and the Durand Cup played in Simla.

Boxing is another sport which has made progress, though the professional side of the sport appears to have practically died out. There are strong amateur boxing associations in Bombay and Calcutta and the Army organise tournaments frequently all over the country.

Athletics suffer because of the entire absence of tracks in any part of the country. There is a dearth of coaches and very little encouragement for the athlete to keep in training as athletic meetings are comparatively few.

The Turf is the one section which has little to worry about. India possesses some of the finest race courses in the world and at Bombay, Calcutta and Madras, which are the three chief centres enormous crowds attend every meeting. Increased encouragement is being given to Indian bred horses, the best stallions and brood mares are imported, and the sport occupies a high place in the recreations of the people. His Excellency The Viceroy has patronised the turf by entering horses at various meetings and some good races have fallen to him. The Indian Princes support to the turf is well known and the Turf Clubs are flourishing.

Polo has been a favourite game in India for centuries and the Jaipur team earned high praise in Europe. The sport, which had been languishing in Western India, received a big flip by the decision of the Western India Turf Club to organise tournaments.

Golf, Rugby Football, and Yachting are the games of the few, though practically every station has its golf course.

A summary of the chief sporting events of the year appears in the following pages.

INDIAN EMPIRE SOCIETY—(Opposed to the Government scheme of All-India Federation but would favour proposals of the Simon Commission, other than the transfer of Law and Order in the provinces) 48, Broadway, S W 1 *Secretary* Sir Louis Stuart, C I E

VICTORIA LEAGUE—81, Cromwell Road, S W 7 *Secretary* Miss Gertrude Drayton, C B E

WOMEN'S INDIAN ASSOCIATION London Committee 53, Elsworthly Road, N W 3 *Joint Hon Secretaries* Miss Arathi Mehta and Mrs C Hegler

Sport.

The year under review marked a big advance by India in the field of sport. No less than five international teams were entertained by India and cricket history was made by the visit of the first official M. C. C. team of cricketers and the playing of the first Test match on Indian soil. Indian cricket was paid a big tribute by the M. C. C., in that they sent out, as captain of their side, Mr. D. R. Jardine, one of the greatest skipper who ever led in England and eleven, and a man who was born in India. The men Mr. Jardine led were thoroughly representative of English cricket, even if some of the big names were absent, and it was not surprising that India failed to win a Test. She did manage to share the honours in the second game at Calcutta but was fairly and squarely beaten in the other two. To Amarnath, a young all rounder from the Punjab, fell the honour of making the first century for India in Test cricket and there were scenes of great enthusiasm on the Bombay ground when he reached three figures. India showed that she has cricketers well up to Test match standard.

The year also saw the birth of the Cricket Club of India, from which great hopes are entertained for the future, and the bringing forward of a scheme for a cricket championship of India. The visit of the M. C. C. overshadowed all other cricket and once again the Bombay Quadrangular tournament was held in abeyance.

The inauguration of the Western Asiatic Games, which were held at Delhi and Patiala, is another achievement which goes to the credit of India. Four countries, Afghanistan, Palestine, Ceylon and India participated and some new records were set up during the games, which were organised on Olympic lines, and which were attended by H. E. The Viceroy. Some excellent sport was witnessed at these games, which served to emphasise the urgent need of a properly equipped Stadium for the country, especially a good cinder track.

For the first time in the history of hockey India entertained a foreign hockey team, Afghanistan sending a side which played in several centres, but which was beaten by India in the Western Asiatic Games. This was also the first time Afghanistan had entered the field of international sport.

A foreign tennis team also visited India, a team from West Australia, which India proved good enough to beat. Their visit, however, stimulated interest in tennis which is rapidly making progress. Bombay was also fortunate in being able to see F. J. Perry, the famous English player, for a few hours and E. V. Bobb, the Indian champion, took a set off him.

India is rapidly becoming more sport minded and sport in all its branches is becoming a part of the life of the people. Hockey, perhaps, claims the most players, then comes cricket and tennis and more and more are becoming enthusiasts of one or the other, sometimes all three, of these games. Football is played during the Monsoon and this game is growing, the Indian, in Bengal especially, being a very keen soccer enthusiast, while in Bombay, Madras and the Punjab the game is flourishing. It is governed in Bengal by the Indian Football Association in Western India by the Western India Football Association and in the Punjab by the Northern India Football Association. The chief tournaments are the Indian Football Association Shield played in Calcutta, the Rovers Cup played in Bombay and the Durand Cup played in Simla.

Boxing is another sport which has made progress, though the professional side of the sport appears to have practically died out. There are strong amateur boxing associations in Bombay and Calcutta and the Army organise tournaments frequently all over the country.

Athletics suffer because of the entire absence of tracks in any part of the country. There is a dearth of coaches and very little encouragement for the athlete to keep in training as athletic meetings are comparatively few.

The Turf is the one section which has little to worry about. India possesses some of the finest race courses in the world and at Bombay, Calcutta and Madras, which are the three chief centres enormous crowds attend every meeting. Increased encouragement is being given to Indian bred horses, the best stallions and brood mares are imported, and the sport occupies a high place in the recreations of the people. His Excellency The Viceroy has patronised the turf by entering horses at various meetings and some good races have fallen to him. The Indian Princes support to the turf is well known and the Turf Clubs are flourishing.

Polo has been a favourite game in India for centuries and the Jaipur team earned high praise in Europe. The sport, which had been languishing in Western India, received a big flip by the decision of the Western India Turf Club to organise tournaments.

Golf, Rugby Football, and Yachting are the games of the few, though practically every station has its golf course.

A summary of the chief sporting events of the year appears in the following pages.

Racing

Bangalore

Madras Cup Distance 6 furlongs —

Mr Ammamalai Chettiar's Good Boy (9st 6lbs), Dillon 1

Mr Md Oomer's Golden Yew (9st 11bs), O Neale 2

Mr Sir Ismail Saït's Old Buckenham (8st 11lbs), Forsyth 3

Mr Annamalai Chettiar's Hill Flower (9st), Evans 4

Won by $\frac{1}{2}$ length, $1\frac{1}{2}$ lengths, $\frac{3}{4}$ length
Time — 1 min 16 1 5 secs

Bobbili Cup (Div II) Distance 1 mile —

Mr S Hussain's Polish Pride (8st 7lbs), Iyann 1

Mr J C Galstoun's Harmonique (7st 8lbs), Mendoza 2

Mr K Temmol's Sha Hawa (7st 7lbs), McCarthy 3

Mr K Viswanath's Abelard (7st 6lbs), Alford 4

Won by 2 lengths, $\frac{1}{2}$ length, short head
Time — 1 min 42 1 5 secs

Bobbili Cup (Div I) Distance 1 mile —

Mrs Apar and Mr Eason's Snoops (7st 13lbs), Bond 1

THAKORE SHREE KESHRI-SINHJI the present Thakore Saheb of Ambalbara is aged about 47 years and completed the Silver Jubilee of his reign in the month of May 1933. The rulers of Ambalbara State are Chowhan Rajputs, tracing their direct descent from Rajputs of Sambhar or Ajmer.

The State was acquired by the valour of the ancestors of the present Chief, during the reign of Aurangzeb (1658 to 1707) and they were famous for the heroic resistance they made more than once to the Galkwar's troops. The State is entitled to receive tributes in the nature of Ghasdana and Giras Haks from various States as also from the British Treasury.

The State comprises of 36 villages covering an approximate area of 67 square miles, *Population* nearly 11,000, *Revenue* of Rs 96,000.

The State possesses Civil Powers to decide suits upto Rs 10,000, and Criminal Powers of giving imprisonment upto 2 years and fine upto Rs 5,000.

Owing to recent changes, the State has been brought under the direct control of the Government of India along with the other Mahi Kantha States.

At present the Thakore Saheb has three sons, the eldest of whom Dada Saheb *alias* Sardarsinhji, is getting his educational training at the Scott College, Sadra.

Primary education is imparted free throughout the State and Medical Relief is also given free to the State people.

Chief Officers of the State —

DIWAN SUKHA NAND

SHRIMANT BHAVANRAO SHRINIWASRAO *alias* BALASAHEB PANT PRATINIDHI, the Ruler of Aundh, is a graduate of the Bombay University and a treaty Chief. His age is 65 and is married to Shrimati Saubhagyawati Ramabai Saheb *alias* Maisaheb from the Rode family of Poona.

Heri-Apparent SHRIMANT BHAGWANTRAO *alias* BAPUSAHEB is 14 years of age.

Shrimant Pantaheb is alive to the rapid progress going on in the civilized world. A Legislative Assembly was established in the State in 1924. Its strength consists of 39 members with a predominating popular element. The notable feature of the Assembly is that it includes two female members. The Assembly is competent to discuss any subject and pass resolutions without restrictions, while the Annual Budget is passed item by item.

By the Aundh State Act passed in 1931 a Darbar has been formed to run on the administration. It is a miniature executive council and consists of the Dewan of Aundh and the High Court Judge. An elected representative of the people is to be a member of the Darbar from 1935. He takes considerable interest in Rural Uplift and has been making vigorous efforts in that direction.

Shrimant Pantaheb is a keen student of drawing and painting and has edited *Picture Verul*, *Pictorial Ajanta*, *Pictorial Ramayana* and *life of Shivaji* in three picture volumes. He also takes great interest in physical exercise and has written in English a book on the subject called "*The Surya Namaskaras*."

The State possesses an independent High Court. Most of the villages have got Village Panchayats.

HIS HIGHNESS

HIS HIGHNESS MAHARAJA DHIRAJ SHREE HIMMAT SINGHJI OF IDAR —The Idar House was founded 200 years ago by two brothers of the Maharaja of Jodhpur. His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line, and the grand-son of the well known soldier and statesman, His Highness Maharaja Major General Sir Pratap Singhji Sahib of Jodhpur fame. Maharaja Himmat Singh succeeded to the Gadi on the sudden death of His Highness Maharaja Sir Dowlat Singh on the 14th April 1931.

Born On 2nd September 1899

Married in the year 1908 to Shree Jawahar Kunwar Sahibji, the eldest daughter of Raja of Khairpur in the Jampur State.

His Highness received his education at the Mayo College, Ajmer, where he remained for 5½ years, leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chief Colleges in India and was awarded His Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma, five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding, and represented the College against the Aitchison College for 3 years at tent pegging, and also at tennis. For several years he was captain of one or other of the junior football or cricket eleven, and he was one of the best and keenest polo players in the college.

As will be seen, he upheld his family tradition as a sportsman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council, and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of His State when he ascended the Gadi of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. His Highness has embarked on an ambitious programme of reform and advancement which it is expected his experience and keen personal interest will enable him to carry through successfully.

His Highness has got two sons, Maharaja Kumars Shree Daljit Singhji and Amar Singhji, the eldest Maharaja Kumar Shree Daljit Singhji, the heir apparent, was born in 1917.

The State has a Legislative Council of twenty members eight of whom are elected and an Executive Council of six officials with a President. It maintains its own paper currency and coinage, postal system, railways and army. It has a University with six Arts Colleges including one for women and Colleges for Engineering, Medicine, Law and Teaching. It has also an Honours College affiliated to Madras University, a College for Jagirdars and a College of Physical Education. There are also a Central Cottage Industries Institute, a Central Technical Institute and an Observatory. The State is of great historical and archaeological interest, as within its limits, are situated many old capitals of ancient and medieval Deccan Kingdoms, famous forts, temples, mosques and shrines and the wonderful Buddhist sculptures and paintings of Ellora and Ajanta.

Capital Hyderabad—Population 466,000. It is the fourth largest city in the Indian Empire. The city is beautifully situated on the banks of the river Musi, with fine public buildings, broad cemented roads, good electricity and water supply and an efficient bus service run by the State Railway. Among interesting places are the Char Minar, the Mecca Masjid, the fort and tombs of Golconda and the large artificial reservoirs— the Osman Sagar and the Himayat Sagar.

JASDAN is the premier Kathi State and the Rulers are Saketiya Suryavanshi Khshtriyas, being descendants of Katha, the younger son of the Suryavanshi Maharaja, Karan Shruta, of Ayodhya

The Kathis have, since their advent to this Province, effected a change in the name of the Province from Saurashtra to Kathiawad, and they are one of the most important and influential tribes on the westernmost coast of India

Darbar Shree Ala Khachar is the present Ruler of Jasdhan. He was born on 4th November 1905. He was educated at the Rajkumar College, Rajkot, and has passed the Diploma examination.

He succeeded to the Gadi in June, 1919, and assumed the reins of State administration on 1st December, 1924

Heir YUVRAJ SHREE SHIVRAJ aged three years

Area of the State 296 square miles including about 13 square miles of non-jurisdictional territory

Population 36,632 including non-jurisdictional territory

Revenue (gross) Rs six lacs nearly

All education is free throughout the State

Medical relief at the Hospital, etc, is also supplied free

Importation of liquor is prohibited

Cultivators are granted permanent heritable tenure with rights of full ownership over their holdings and are protected against usury by special rules for settlement of money-lenders' claims,

Village Panchayats introduced in twenty villages with a non-official president

Subordinate land-holders have recently been granted the unusual privilege of exemption from resorting to the Civil Court for adjudication of their *inter-se* disputes. These are now settled through the Arbitration Court presided over by the Nyayadhish.

RANA SHRI CHHATRASAIJI
PARWATSINHJI of
Kadana State, Rewa
Kantha

Born 28th January, 1879

Educated At the Girassia
School, Wadhwan, Kathiawar

Kadana State was founded in the thirteenth century by Limdevji the brother of the founder of the Sant State. It has never been conquered by or has paid tribute to any power, but has kept up its independence by the prowess and valour of its own Rulers. The Ruling Family are Puwar or Parmar Rajputs claiming to have descended from the illustrious family of Veer Vikramaditya and Raja Bhoj.

The present Chief takes a personal and keen interest in the administration of his State. For Administrative purposes the State is divided into four Mahals. The State lands have been surveyed and settlements fixed giving more facilities to the cultivators. At the time the Chief ascended the Gadi the State was in the fourth class, but on account of his administrative ability the State is now placed among Class III and the Chief enjoys as a mark of personal distinction full Civil and Criminal powers.

Tagavi-Loans are given to cultivators in cash or kind whenever necessary. Free medical relief is given to the people in the State Dispensary opened for the first time by the present Ruler. Electric lighting has been introduced in Kadana proper. The State maintains three vernacular schools at convenient centres where education is imparted at a very nominal cost. Needy students are given scholarships.

The Chief enjoys the right to elect a representative member to the Chamber of Princes and is entitled to be received and visited by the Governor of Bombay.

SHRIMATI SHARDULKUVERBA, the only daughter of the Ruler, is married to the *Heir-apparent* of Banswara State in Rajputana. The Chief has no son, but sanction to adopt if and when necessary has been obtained from Government. Rule of primogeniture prevails in the State.

RAOIJI SHREL 'SAJJAN-SINHJI, the present Ruler of Mansa State. He is 26 years of age and succeeded to the Gadi of Mansa on the death of his father on 4th January 1934.

Educated At the Princes' Mayo College, Ajmer.

Mansa is by origin, descent and repute an ancient and important State of the Sabarkantha (old Mahikantha) Agency having political relationship with the Government of India through the Hon'ble the A G G. The ruling house of Mansa is lineally descended from the illustrious Vanraj Chavada who in 764 A D ruled both Gujarat and Kathiawar with his capital at Patan,

and according to a statement of an Arabian traveller quoted in the Ras-Mala, he was one of the four great kings of the world.

The late lamented Ruler Raolji Shree Takhtasinhji ruled Mansa for 37 years. During his beneficent regime the State progressed in a variety of ways. He constructed many public buildings, temples and a magnificent Darbargarh (State Palace). Interested as he was in the development of agricultural and natural resources, he induced the cultivators to sink new wells every year and himself took great interest in the plantation of mango trees on a very large scale which added largely to the fertility of the soil and the prosperity of the State. He visited Europe in 1928 and while in England attended the sittings of the Butler Committee on Indian States.

The eldest sister of the present Ruler is married to the Raja Saheb of Bansda and the younger to the Yuvaraj Saheb of Lakhtar. Two of his younger brothers are studying law in England.

Average Annual Income Rs 1,80,000 *Population* 17,000

Mansa is the capital of the State and is situated about three miles from the railway. Electric lighting has been introduced in the capital. The State also maintains water works, a flour mill, a decent library and one dispensary for the comfort of the subjects. Medical treatment and attendance are given free to the people of the State. Primary education is also provided for in the State.

PRINCIPAL OFFICERS OF THE STATE.

General Adviser RAJKUMAR SHREE YESHWANTSINHJI, second brother of the ruler, has got Higher Diploma of the Princes' Mayo College.

Rewa is the largest and the easternmost State in the Central India Agency. The State is bounded on the North by the Banda, Allahabad and Mirzapur Districts of the U P, on the East by the Mirzapur District and the Feudatory State of Chhota Nagpur, on the South by the Central Provinces, and on the West by the States of Maihar, Nagod, Sohawal and Kothri. It is very rich in mineral resources.

The Administration of the State on the executive side is carried on by His Highness with the assistance of a State Council of 8 members of which His Highness is the President. On the Judicial side there is a Chief Court consisting of Judges. A Raj Parishad consisting of 39 members, with the number of officials and non-officials almost equal, has also been established to advise on such matters of public interest as are referred to it. His Highness takes keen interest in the development of trade and industries in the State and with that object has instituted a State Bank.

Chief Minister VAZIR-E-AZAM ATMARAMRAO B ACHREKAR,
M A, LL B

THE Ruling Family in the Sant State belong to the Perwar or Parmar caste of Rajput and are believed to have descended from the celebrated family of Vikramaditya and Raja Bhoy of Ujjain. They first came down from Dhur and settled at Jhalod and finally about the 13th Century at Sant. The founder of the family was Raja Sant who with his brother Limdev was forced to leave Jhalod and established himself at Sant.

Area 391 square miles

Population 83,538 (1931)

Revenue Rs 5,21,877

The present Ruler Maharaja Shri Jorawarsinhji was born on 24th March 1881 and installed on the Gadi in 1896. He was formally invested with full powers on 10th May 1902. He was educated in the Rajkumar College, Rajkot, and was associated with the

Government Administration of the State for more than 7 year preparatory to his being invested with full powers. He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress. The revenue of the State increased—Its lands have been surveyed and regular settlements introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund, granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to the local merchants by way of encouragement at cheap rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, metalled roads in parts have also been made. The regime of Maharaja Shri Jorawarsinhji has been anything but a bed of roses. Famine and lean years had made the financial condition of the State far from satisfactory, but wise management has been instrumental to keeping its head up.

The Rajaji exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadi and the Darbar's right of adoption has been recognised and confirmed by Government.

During the Great War the services of the Rajaji Sahib were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji to be a member of the Chamber of Princes.

Heir apparent MAHARAJ KUMAR SHRI PRAVINSINHJI was born on 1st December 1907

Educated in the Rajkumar College, Rajkot

Married Maharaj Rajkumari, daughter of Maharaj Kumar Shri Vijayarajji, Heir-apparent, Cutch State, on 15th May 1928, at Bhuj

Political Relations From 1st April 1933 this State has been brought into direct political relation with the Government of India through the Agent to the Governor-General in Kolhapur.

Constitution His Highness exercises full control over the administration of the State through the Diwan, who is assisted by the Heads of Departments and is advised by a Legislative Committee. During the short period of his rule His Highness has given practical proof of his keen interest in every branch of administration and is striving hard to do anything that can be done for the welfare of his subjects. Medical relief is supplied free. A separate Anti Malarial Department is run at an annual cost of about Rs 10,000 for eradication of Malaria. The State spends annually about 10 per cent of its revenue on Education.

Diwan R. R. SHIRGAOKAR, B.A., LL.B.

General Sawantwadi State is an ancient one and was the first State to enter into treaty with the British Government as far back as 1730 A.D. In 1784, the Moghul Emperor at Delhi recognised the sovereignty of the Ruler over the State by means of his Firman which granted to him and his successors the title of Raja and the insignia of royalty, namely, Mochal and the necessary Khilat. This title was subsequently recognised by the British Government.

During the Great War, Sawantwadi shared with the Ratnagiri District the honour of supplying the largest number of men in relation to its population in the whole of Bombay Presidency.

HIS HIGHNESS SAID-UD-DAULAH WAZIR-UL-MULK NAWAB HAFIZ SIR MOHAMMED SAADAT ALI KHAN BAHADUR SOWLAT-I-JUNG, G C I E Nawab of Tonk State (Rajputana) is an Afghan of the Baner tribe known as Salarzie

Revenue Member KHAN SAHIB MOHD ASAD ULLAH KHAN

Secretary M HAMID HUSAIN, B A

MIANGUL GULSHAH-
ZADA SIR ABDUL
WADQOD, KBE,
Wah of Swat

Born 1885 Established his Government in 1916 and was formally recognised by the British Government in 1926 as Wah or Ruler of Swat

Family history Grandson of the famous Akhond of Swat and a religious leader. The family has great influence among most of the tribes of the trans-border including Afridis, etc., who look to the members as their spiritual leaders and hundreds come to pay homage.

State It is only of recent creation and only due to the ability of the Ruler himself.

Area is approximately 6,000 square miles.

Revenue is 14 lacs and the population is mainly of agriculturists.

The State maintains a standing army of 11,000, including 500 cavalry.

The Ruler had had many difficulties in its creation and it is to his patience and endeavours that it came into existence. He is modern in his ideas and has an elaborate telephone system throughout his State, which includes Buner, Chamla, Khudokhel, Kana, Ghorband, Chakesar, etc. He is keen on roads and buildings and has a Hospital and an Anglo-Vernacular School at Saidu, the capital, besides 16 other Primary schools. It is a great achievement when compared to other contemporary trans-border states of much longer standing. He is busy with the internal reforms, social, economical and political.

Recreations The valley is famous for pheasants, Chikor and ducks, the chief recreation is shooting, motoring and hill climbing also give amusement.

The Ruler is greatly respected in all matters by his eldest son Miangul Abdul Haq J. recognised by the Government as V.

Travancore is one of the largest Indian States in South India under the Political control of the Government of India. It is bounded on the North by the State of Cochin and the District of Coimbatore, on the East by the Districts of Madura, Ramnad and Tinnevely and on the South and West by the Indian ocean and the Arabian sea. Travancore has an area of 7,625 square miles and according to the census of 1931, the population is 5,095,973. The State now stands in the forefront of educated India. According to the census of 1931, the number of literates per 1,000 of the population excluding children under 5 years of age is 289. For males the figures are 408 per 1,000, and for females 168. The Ruler of Travancore is the source of all authority, judicial, administrative and legislative. The government of the country is conducted in the name and under the control of His Highness the Maharaja. There is a legislature consisting of an Upper and a Lower House, with a majority of elected members and possessing large legislative and financial powers and powers of interpellation.

CAPT NAWAB
MOHOMUD JAMSHED ALI
KHAN of Bagpat Estate,
 was born in August 1894, and
 belongs to a respectable family
 of Muslim Rajputs. The
 ancestral home is Kalanur in
 the Rohtak District (Punjab).
 Rao Karam Ali Khan, grand-
 father of the present Nawab,
 was founder of the Estate. His
 loyal services were highly
 spoken of by the Civil and Mil-
 itary Officers of the Government.
 On the conferment of a big Jagir
 he settled down at Bagpat (Dis-
 trict Meerut) after the Mutiny
 of 1857-58. On the premature

death of his father Rao Khurshed Ali Khan, the present Nawab began
 to look after the affairs of the Estate while only a boy of 14.

During the Great War (1914-17) he helped the Government with
 men and money, in recognition of which he was granted an Hon.
 King's Commission as a Lieutenant in 1920, and was presented with a
 sword of honour. In 1921 he was also awarded a gold pistol, and a
 gun by H. E. the Commander-in-Chief in India. He received
 the title of Nawab in 1923. The same year he presided over the All-
 India Muslim Rajput Conference at Aligarh. In 1926 he was granted
 the Kaiser-i-Hind Medal and the title of M. B. E. He is a member of the
 U. P. Legislative Council from the advent of the Reforms. In 1928
 he was elected Chairman of the District Board, Meerut. He is Presi-
 dent of the U. P. Zemindars Association, Muzaffernagar. In 1930 the
 Association selected him to go to England at the time of the 1st Indian
 Round Table Conference and to put their case before the British public
 and safeguard the interests of the Zemindars. There he addressed
 a public gathering at Caxton Hall, Westminster on November 25th,
 1930 under the Chairmanship of the Right Honorable Lord Meston,
 K. C. S. I.

Rao Bahadur Abdul Hameed Khan is the younger brother of the
 Nawab who is living jointly with him. He is in charge of the internal
 management of the Estate, and it goes to his credit that the estate
 is prospering under his hands.

SIR JOGENDRA SINGH, K.T., comes from an old military family of the Amritsar district—is also a Taluqdar of Oudh

Born On the 25th of May 1877

Educated Privately at home

From early life he has been interested in agricultural development, education and social reform. Under the guidance of the late Mr B. M. Malabar and Mr George Chesney of the Pioneer, he began regular contributions to the press, and his writings attracted notice. He occupied his leisure hours in writing, reading and riding. Early in life he was called upon to work as a Minister for the young Maharaja of Patiala. Lord Hardinge spoke of the late Sir Zulfiqar Ali Khan and him in high terms in the speech that he made at a dinner in Patiala. After about 2½ years in Patiala, he returned to agriculture again. He joined the Council of State when it was first constituted. In the meanwhile, he wrote several books and edited *East and West* and was President of the Sikh Educational Conference and Member of the Indian Sugar Committee, the Indian Taxation Enquiry Committee, Sandhuist Committee and many provincial Committees in the United Provinces and the Punjab. In 1926 he became Minister of Agriculture in the Punjab—an office which he still holds.

COLONEL MAHIPAL
SRI SINGHJI BAHADUR,
KCSI, ADC to His
Highness, son of late Maharaj
Sri Khet Singhji Sahib,

His Heir and successor is Heroji Sri Ajit Singhji Sahib, born on Monday, 30th July 1917, and is receiving his education at the Mayo College, Ajmer, Rajputana.

RAJA BAHADUR KIRTYANAND SINHA, B A, of Banaili, Purnea, (Behar, India)

Born 1883 Is the youngest son of the late Raja Bahadur Lilanand Sinha

Family History Banaili Raj is one of the premier estates in Behar to-day and has extensive possessions in Bhagalpur, Monghyr, Purnea, Santhal Pergannas and Maldah The original ancestor of the family, Pandit Gadadhra Jha of village Baighi Nawadah, in Darbhanga district, because of his great learning and saintliness received great wealth from Emperor Ghyasuddin Tughlakh Tenth in descent from Gadadhar Jha

was Parmanand Chowdhary, who became the real founder of the Banaili family and his son Dular Sinha Chowdhary, received the title of Raja Bahadur from the East India Company, for having helped them substantially in the Nepal War His son Bedanand Sinha was favoured with the title of Raja Bahadur by Government Raja Bahadur Bedanand Sinha was succeeded by Raja Bahadur Lilanand Sinha and the present Raja Bahadur of Banaili, Kirtyanand Sinha, is his youngest son

Raja Bahadur Kirtyanand Sinha, entered the public life of the Province of Behar very early He was a distinguished member of the old Bengal Legislative Council under the Minto-Morley Reforms, later on served on the Behar and Orissa Legislative Council, as the elected representative of the landholders of Bhagalpur He was President of the Co-operative Movement in Behar and of the Behar and Orissa Law and Order Conference, held at Gaya in 1931 For conferring liberal benefactions to the public he was deservedly decorated with the title of Raja by Government in 1913 He was put on the Champaran Agrarian Committee by Government to represent the Zemindars and was afterwards made a Raja Bahadur by Government He announced grant of lands to recruits from amongst his tenants, for service in the World Great War and placed his own personal cars at the disposal of Government He subscribed over 1½ lacs of rupees towards Government War Loan Bonds and has made various public donations

Chief Recreations While young he was actively interested in Polo, Tennis, Football and Motoring—has a passion for jungle sport and is perhaps one of the most renowned Shikarees in India Angling, gardening, music and writing books on big game shooting and Homeopathic medicines are the other occupations, in which he takes great interest His first book "Purnea—a Shikar Land," is a very interesting work on big game shooting in India

THE RAJ DEO also known as "Deo Munga" has its seat at the village Deo in the Subdivision of Aurangabad in the District of Gaya in the province of Bihar. The Rajas of Deo belong to the Sisodia clan of the Gohilote Rajputs of the solar race and trace their descent from the Rana family of Udaipur (Mewar). The founder of the present line of Rajas came here in the early part of the 17th century.

The present Raja Jagannath Prasad Sinha is the grandson of Maharaja Sir Jaiprakash Singh Bahadur, KCSI, who was famous in his time for his bravery in quelling the rise of certain tribes in Palamau and for his loyalty to the British Raj during the Mutiny of 1857. Raja Jagannath Prasad Sinha is a painter of great merit and is a past master in photography. His histrionic talents are well-known and admired by many people all over India. Lately he has written and filmed a drama named "Punarjanma" which has elicited praise from all men of education and culture in this province. This is the first film produced in Behar. Besides this his other works are "Bhakta Bhagwan," "Bhakta Tuls Das," "Sati Parvati," "Rajrishi Prahlad," "Balkrishna," "Punarjanma," "Kalki Autar," "Beshya" for the stage, "Goswami Tuls Das," "Ras Leela," and "Gobardhan Leela" for Talky.

He has travelled widely and has visited most of the places of interest in India and Europe.

The village Deo is famous for its ancient temple of the sun which is believed to have existed since the "Tretayug". The Raj is bounded on the south by mineral hills which are calling the attention of geologists and are very likely to prove of great interest in the near future.

HIS HIGHNESS THE HON
THE MAHARAJADHIRAJA
SIR KAMESHWAR SINGH
BAHADUR, K C I E, of
Darbhanga

Born 28th November 1907

Ascended the Gadi on 14th July 1929 on the death of his father, Sir Rameshwar Singh Bahadur, G C I E, K B E, D Litt, etc, and is the 19th successor to the Darbhanga Raj

Family history Darbhanga Raj is an ancient principality of long standing and is the premier Raj in Bihar to-day. It is more or less identical with Mithila. The Royal family belongs to the Shrotriya Brahmin family of the highest class and the Maharajadhiraja of Darbhanga is the accredited secular head of this community over which he exercises powers, especially in matters social and religious.

The public donations made so far by His Highness to various Universities, Temples and Colleges amount to 6½ lakhs. Generous concessions to his tenants have been made and their welfare receives the constant attention of the Maharajadhiraja.

His Highness the Maharajadhiraja takes a very keen interest in politics—selected as a delegate to the first and second sessions of the Indian Round Table Conference—has been nominated as a member of the Council of State and elected as the President of the Bihar United Party—President of the All-India Landholders' Association and the Bengal Landholders' Association—Life President of the Bihar Landholders' Association—General President of the Sri Bharat Dharma Mahamandal, the premier Association of the Orthodox Hindus in India—Life President of the Maithila Mahasabha—A life-fellow of the Patna University, a fellow of the Calcutta University and the Royal Society for the Encouragement of Arts, etc—A member of the Royal Empire Society.

In recognition of his public services His Highness was made a K C I E by His Imperial Majesty The King-Emperor of India in January 1933.

Chief Recreations Polo, Tennis and Motoring. His Polo team is considered to be the best in Bihar and has won several trophies.

His Highness possesses a rich library wherein there is a number of valuable old manuscripts.

Area of the State 2,500 square miles

ADMINISTRATION.

Karbhari MR G B KULKARNI, B A , LL B (

HIS HIGHNESS MAHARAJA BAHADUR SRI CHANDRA MAULESWAR PRASAD SINGHJI of Gidhour in the District of Monghyr (B & O) belongs to the clan of Chandel Rajputs who settled in the highlands of South Behar as early as in 1066 A.D. The Gidhour House founded that year is still flourishing and influential and is regarded as one of the most ancient aristocracy in the entire province of Bengal, Bihar and Orissa for more than eight and a half century

Area of the Estate 450 square miles

The Maharaja is also the sole owner of several big estates containing mica and other minerals in the outlying parts

Born November 1890

Succeeded his father the late the Hon'ble Maharaja Bahadur Sir Rameswar Prasad Singh, K C I E, in November 1923

Educated under European and capable private tutors at home

The Maharaja has been a member of the Legislative Council since the inception of the Reforms till 1926. He is the President of the Divisional and District Landholders' Associations, being the leading Zemindar of the Division. The Gidhour family is noted for its characteristic devotion and piety, and is also famous for its numerous acts of beneficence and extensive charities. The temple of Baidyanath was built by an ancestor of the present Maharaja Bahadur, who is the permanent President of the Temple Committee.

Recognised by the British Government which conferred in 1877 the hereditary title on the holder of the Estate—"Maharaja Bahadur"—a distinction enjoyed as the premier nobleman of the Province, until a higher title was created for the province in 1920.

The Raj abounds in hills and jungles fairly full of beasts of prey and also game, and the Maharaja Bahadur possesses among his other trophies a fine pair of tusks from a rogue elephant shot by him, as also a charming specimen of Albino—a White tiger also shot by him—which is preserved for show in the Palace.

Maharaja Bahadur's son and heir-apparent Kumar Chandra Chur Singhji, born in February 1917, is being privately educated. His marriage with the eldest Princess of Tehri Garhwal State, U P, has been a recent event of note.

NAWAB LUTFUD DOWLA
BAHADUR of Paigah
Estate, Hyderabad,
Deccan

His father Nawab Zafar Jung Shamsul Mulk Bahadur was the son of Nawab Sir Khursheed Jah, Amir-i-Kabir, Shamsul Umara and his mother was the daughter of the then Nizam, Nawab Afzalud-Dowla Bahadur, the grand-father of His Exalted Highness, the present Nizam. The head of this family was the Nawab Abul Fateh Khan, Shamsul Umara I. The Estate of the Paigah was awarded him by the Nawab Mir Nizam Ali Khan, the Second Nizam. From

that time to the present day the Paigah has been held by the family.

Shamsul Umara I was a descendant of the well-known Sufi Shaikh Fariduddin Shaker Gunj. This renowned Sufi died in 1296 A.D. His shrine at Pak Patan is even to-day visited by pilgrims.

Nawab Lutfud-Dowla's real name is Lutfuddin Khan. He was born on the 21st July, 1883 A.D. On the death of his father he succeeded him as Amir Paigah by Command of the Nizam. On the 18th August, 1917, he was appointed Minister for the Army and Medical Departments (Regular and Irregular Forces, Military, Civil and Unani Department and Jail). At the Birthday honours, His Exalted Highness conferred upon him the title of Latafat Jung. On organisation of the Executive Council of the State, he was made Member for the Army, Jail and Medical Departments. On February 16th, 1923, at the Birthday of His Exalted Highness, he was honoured with the title of Lutfud-Dowla. On January 26th, 1925, he was Member in charge of Public Works, Irrigation, Drainage and Registration Departments. On June 7th, 1928, he was appointed Member for the Judicial and Ecclesiastical Departments, in which capacity he still continues.

The area of the Estate is about 1,687 square miles with a revenue of Rs 21,75,397. It consists of 10 Taluqas of 495 villages. Its population is 2,75,448.

NAWAB SALAR JUNG
BAHADUR (MIR
YUSUF ALI KHAN),
one of the premier noblemen
of Hyderabad Deccan, and
the sole representative of
the illustrious family of
Sir Salar Jung the Great of
the Mutiny fame

Born 13th June 1889 at
Poona

Educated At Nizam
College

Was Prime Minister
between 1912-15, has
travelled all over Europe,
Iraq, Persia, Syria,
Palestine, etc, keeps a

Polo Team, has got a fine library, takes interest in the
Industrial Development of the country and is Director of
seven Companies

Area of State 1,480 square miles

Population 202,739

Revenue Over Rs 15 lakhs

Administration is divided into several departments on
modern lines, and is under direct control of the Nawab Saheb
who personally supervises the work

Family History About the middle of the 17th century
the great grandfather of the Nawab Saheb migrated from
Medina to the Adil Shahi kingdom of Bijapur where he
settled and married into a noble's family. After the fall of
the kingdom, the members of the family took service under
the Moguls. Later on they transferred their allegiance to the
family of the Nizams and served them as Prime Ministers,
who are as follows —

(1) Shair Jung, (2) Ghayur Jung, (3) Dargah Khuli
Khan Salar Jung, (4) Mir Alam, (5) Munirul-Mulk, (6)
Sirajul-Mulk, (7) Sir Salar Jung I, (8) Sir Salar Jung II,
(9) the present Salar Jung

Address Hyderabad (Deccan)

NAWAB MUHAMMAD MOIN-UD-DIN KHAN, NAWAB MOIN-UD-DOWLA, BAHADUR, the only son of the late Nawab Sir Asman Jah Bahadur, one of the three great Paigah Nobles of the Hyderabad State, was born in Hyderabad Deccan in the year 1891. Nawab Moin-ud-Dowla's Paigah or feudal state covers an area of 1,281 square miles and has a population of 276,533, while its annual revenue amounts to Rs 22 lakhs. He carries on the administration with the help of a Council consisting of a President and two Members.

In 1919 Nawab Moin-ud-din Khan Bahadur was given the title of Nawab Eyanath Jung, and in 1922 the title of Nawab Moin-ud-Dowla. In 1923 he was appointed Minister in charge of the Industrial Department and also a Member of the Executive Council. The next year he was given charge of the Military Department and in 1927 he resigned the post, for, by an order of His Exalted Highness the Nizam, his Paigah Estates were released from the Court of Wards and he was made the Amir of the Sir Asman Jahi Paigah.

Though at one time a keen rider, Polo Player and Racing Noble, Nawab Moin-ud-Dowla Bahadur's present main recreation is shooting. He is also passionately fond of watching cricket, and he has done much to encourage the game and raise its standard not only in Hyderabad Deccan but in the whole of India. The All-India Gold Cup Cricket Tournament, which was started three years ago as a result of his munificence, attracts to Hyderabad most of the best Cricketers in India. The last M.C.C. fixture in Secunderabad, Deccan, was also due to his keen interest in Cricket and his generosity.

NAWAB WAJID DOWLAH
BAHADUR Member of
His Exalted Highness the
Nizam's Executive Council in
charge of Army, Education,
Medical and Sanitation, Regis-
tration and Stamps, Archaeolo-
gical and Postal Departments,
is a son of Nawab Sir Vicar-ul-
Ulma Bahadur, Prime Minister
to His Highness the late Nizam
and a member of the Pargah
family, closely related to the
ruling family by marriage.
The Nawab, who was born on
the 16th October 1882, was sent
to England at the early age of 7.
He entered a preparatory School
and after receiving his education

at Eton and Cambridge returned to India in 1900

On his return to India he was attached to a British Cavalry Regiment, The 4th Queen's Own Hussars in Trimulgherry, and afterwards joined The Imperial Cadet Corps on the invitation of Lord Curzon, the then Viceroy and Governor-General in India and had further Military Education and training at Meerut and Dehra Dun, later received the King's Commission. He was then posted on the Staff of General Sir Charles Egerton, Commanding the Southern Division, after which his services were transferred to the Nizam's Government where he took appointment as Musketry Officer to the 1st and 2nd Imperial Lancers Regiments. In 1911 after the present Nizam came in power he was given the high appointment of the Army Minister and in 1917, he was appointed Minister in charge of the Judicial, Police, and General Departments. In 1924 he was appointed to act as President of His Exalted Highness the Nizam's Executive Council. In 1927 on the conclusion of the period of his acting appointment, he reverted to the Minister's Post as member in charge of the Army, Education, Medicine and General Departments. He is the *Ex-Officio* Vice-Chancellor of the Osmania University. Being the senior most member in His Exalted Highness the Nizam's Executive Council, he is also its Deputy President.

The Nawab is a keen sportsman having shot many tigers, and a Polo player.

NAWABZADA KHAN
BAHADUR SYED
DILDAR ALI KHAN of
Hosamabad in the District
of Monghyr (B & O)

Born 30th September 1856

Family history Nawabzada is the scion of one of the oldest and noblest family of India claiming its descent from Bani Hashim on father's side and Hossain Syed from mother's side. The family has always been well known for literary attainments as well as political power, and was the recipient of *Allama* from the Emperor Aurangzeb. The Emperor Shah Alam made Nawab Ali Ibrahim Khan 'Khud' a Shash-Hazari (Order of six thousand) noble and conferred the titles of "Khan Bahadur Nawab" and "Aminuddaula Azizul Mulk Naseer Jung". He

is highly spoken of by the authors of "Sirul-Muta-akharin" and "Gulshan Hind" the two most authentic documents in the world of History and literature of the period, and was acclaimed also by Warren Hastings as "Aminuddaula Azizul Mulk-Naseer Jung". During the regime of Lord Cornwallis he was the Chief Magistrate and the Governor of Benares where he died in 1208H. He was the author of "Gulzar Ibrahum", "Khulasatul-Kalam", "Marhatta War book", "Chet Singh's rebellion". His letters adorn the British Museum.

Nawab Ali Khan, the father of the Nawabzada, was recognized as a loyal Zemindar and the Parganas of Rajgir and Amarithu were settled with him long after the permanent settlement in the year of Grace 1878 A.D. The income of the Nawab was Rs. 3 lakhs and the area of the family estate 65,540 acres.

Nawabzada Syed Dildar Ali Khan is the head of the Hosamabad family. He is loved by his tenants and is the emblem of Eastern courtesy. His liberality, generosity and religious fervour are unexampled. He is the chief patron of Islamia High School, Shaikh-pura and was President of the Provincial Shia Conference. Though the Nawabzada has never been very officious about titles owing to his retiring nature the Government granted him a Sanad in 1903 and conferred the title of Khan Bahadur in 1922. He has free license for keeping a certain number of fire-arms.

Sons Syed Mohammed Baqar Ali Khan and Syed Mohammed Jabir Ali Khan

SARDAR BHASAHEB
RAISINGHJI, MLC,
THAKORE SAHEB OF
KERWADA, District Broach

Born 23rd May, 1881

Educated At the Rajkumar
College, Rajkot

Accession At the very early
age of 23 in the year 1904 The
Thakore Saheb has managed the
Thakrat very efficiently increas-
ing the revenue by about half a
lac and has always looked to the
interests of his subjects through
a sympathetic parental eye
Electric lighting and water
supply have also been intro-
duced

The Thakore Saheb is very
popular with his people as well
as the Government officials

Besides being a first class Sardar of Gujarat, he is one of
the leaders of the Thakores, Sardars, Inamdars and Talukdars of
Gujarat whom he has represented for more than 21 years in the Bombay
Council

The Thakore Saheb has been Honorary First Class Magistrate
for 27 years—Was President of the Wagra Taluka Local Board for
about 17 years and First elected non-official President of the Broach
District Board Is a member of the District Local Board of Broach
Is Chairman of the School Board of the District Local Board of
Broach Is Vice-President of the Anjuman-I-Islam, Broach—A member
of the B B & C I Railway Advisory Committee, Agricultural Research
Committee of Bombay Presidency, etc The Thakore Saheb has been
a staunch supporter of the Constitutional Government for the last
21 years and supplied well over 1,500 recruits during the War as a re-
cognition of which service he has been presented with three medals
One from the War Office, one from the Iron Cross for best work and
one special Medal from H E Lord Willingdon as Governor of Bombay
He presented a motor ambulance on behalf of the Talukdars of Gujarat
to be used in the War and subscribed Rs 50,000 towards the War
loan

Recently after the suspension of the Broach Municipality by
Government he has been elected Chairman and within a short period
of 12 months has succeeded in restoring its financial condition, showing
a balance of nearly Rs 90,000 on hand after money being spent on
many improvements in the City

RAJA KRIPA CHANDRA
MANASINGHA HARICHAN-
DAN MARDARAJ BHRA-
MARBAR RAY of Paralud, Orissa

Born In June 1899

The Ruler of Paralud claim their descent from the warrior class (Rathor) of Northern India and the first Raja Sudarshan Ray had a small fiefdom at Jupur about forty miles to the north east of Cuttack in Orissa. His son Raja Jaduraj was the real founder of the dynasty who established his kingdom at Bondo in Bampur,

Orissa. In course of time the family removed to Paralud, consisting of a group of Islands and bounded on three sides by the lake Chilka and on one side by the Bay of Bengal. The land area is 67 sq. miles and water area of Chilka Lake is 150 sq. miles.

The family obtained the hereditary title of Raja from the British Government in 1872 and as such holds the first position in Bihar and Orissa. The present Raja is the 22nd heir of the family. His grandfather, Raja Gour Chandra Manasingha Harichandan Mardaraj Bhramarbar Ray and great grandfather Raja Chandra Sekhar Manasingha Harichandan Mardaraj Bhramarbar Ray obtained the titles of Raja Bahadur and C S I, respectively, from the British Government for their humanitarian service in helping people at times of famine in 1866 and 1892. The family is well known for its fidelity and loyalty to the British Government.

Educated At the Rajkumar College, Raipur

Succession In August 1930, on the demise of his father Raja Radhamohan Manasingha Harichandan Mardaraj Bhramarbar Ray

He was made a member of the Advisory Committee of the Bengal Nagpur Railway in June 1933 and the Chairman of the District Board, Puri, in the latter part of 1933. He is also a member of the General Council, Raipur College.

Married The sister of the Ruling Chief of Athamallik (Orissa) in March 1931

RAJA YUVERAJ DUTTA
SINGH of Oel and
Kaimarah Estates,
Lakhimpur-Kheri, Oudh,
U P

Born On the 31st of
July 1907

Asscended the Gadi On
the 24th of April 1933
on the death of his late
grandfather Raja Krishna
Dutta Singh His father
Kr Ram Dutta Singh
died in the life-time of the
late Raja Krishna Dutta
Singh who died on the
15th of December 1932 at the age of about 72 years

The estate is the biggest estate in the district of Kheri and one of the most prominent estates of Oudh It remained under the superintendence of the Court of Wards from August 1896 to 24th April 1933 on the request of the late Raja during which period the estates flourished very well and the income increased from roughly $3\frac{1}{2}$ lakhs to about 9 lakhs The area of the estate is 196,960 acres and consists of 223 whole villages and 16 partials The estate gives very high guzaras to the members of the family The next heir to the estate is eldest son of Raja Saheb, Kr Jagdish Naram Dutta Singh who is now about 7 years

Raja Yuveraj Dutta Singh is a Chauhan Thakur and was educated for a number of years at the Mayo College, Ajmer He was married in 1926 to the daughter of the late Raja Bindeshwari Parshad Singh Sahib of Payagpur, an estate lying in the districts of Bahraich and Gonda in Oudh The late General Padam Jung Bahadur Rana, the third son of the late His Highness the Maharaja Sir Jung Bahadur Rana, Prime Minister of Nepal, was the father-in-law of Kr Ram Dutta Singh, the father of the present Raja

The estate has its capital at Oel, but the headquarters of the present Raja are at Lakhimpur-Kheri

Raja Yuveraj Dutta Singh is interested in motoring and tennis which are his chief hobbies He is a non-official visitor of the District Jail and an Honorary Magistrate

AITMAD-UD-'DOULA, VIQAR-UL-MULK, NAWAB SIR LIAQAT HYAT KHAN, Kt, OBE, K.B., Prime Minister, Patiala, is the eldest surviving son of the late Hon'ble Nawab Mohammad Hyat Khan, CSI, of Wah in the Attock District of the Punjab

He entered the Punjab Government Service in 1909 as a Deputy Superintendent of Police and received unusually early promotion to the Imperial Police where he held several important appointments with conspicuous success. His services were recognized by the grant of the "King's Police Medal" and the titles of "Khan Bahadur" and "OBE," as also a grant of land from Government

In 1923 his services were lent to His Highness the Maharaja Dhuraj of Patiala as Home Secretary, but His Highness soon raised his status to that of Home Minister placing under his control the administration of some of the most important Departments in the State. In 1928 his meritorious services to the State were recognised by Government by the grant of the high title of "Nawab" which is now a rare distinction.

After seven years' loyal and efficient service to the State His Highness was pleased, as a mark of favour and appreciation, to appoint the Nawab Sahib as his Prime Minister and confer upon him the following honours and rewards —

- (1) Title of Aitmud-ud-doula, Viqar-ul-mulk, "Nawab" and Tazim (Hereditary)
- (2) Jagir and Biswedari yielding an annual income of Rs 51,000 (Hereditary)
- (3) Cash reward of Rs 1,01,000
- (4) First seat in Darbar to the left of the Gaddi (Masnad-i-Shahi), (Hereditary)
- (5) Khillat of Rs 1,700 on all Khillat occasions for him and his heirs

He represented the State twice at the Round Table Conference and again as a delegate to the Parliamentary Joint Select Committee. In January, 1933, His Majesty the King-Emperor conferred upon him the honour of "Knighthood."

During the last ten years the Nawab Sahib has introduced many important reforms in the State, and has proved himself to be a very capable and efficient administrator and a statesman of high order. His politeness, impartiality and keen sympathy with the people of the State have made him immensely popular with all classes of His Highness' subjects.

BIRAJ SRI GAJAPATI
GOLDISWAR NABAKO-
TIKARNATOIKAI A

KAI SRI SRI SRI RAJA
RANACHANDRA DEB RAJA of
Puri (B & O) belongs to the
famous Gunga Vanshi Rajput,
Descendant of King Chodagang
Deb who came from Southern
India. The present Raja is the
direct lineal descendant of the
Hindu Kings of Orissa.

Maharaja Dibya Singh Deb,
the grandfather of the present
Raja, was conferred with the
title of Maharaja by the present
Government. The Moghul

Government conferred on this family the hereditary title of Maharaja.

Many of the Rajas and Ruling Chiefs of Orissa were under the
sovereignty of this house until the British conquest and many of the
Rajas and Ruling Chiefs still use the title conferred on them by this Raj
which was the fountain of honour.

The Raja is the hereditary guardian of the famous Temple of
Jagannath at Puri. Electric lighting has been installed in and around
the temple for the comfort of the pilgrims visiting the Temple.

Born 6th November 1898 as 3rd son of Raja Satchidanand
Tribhuban Deb, late Chief of Bamra, a native State of Orissa, later
got adopted to Puri family. Succeeded his late father Raja Mukund
Deb on 14th February 1926.

Married A Princess of the famous Bhanj family of Mayurbhanj.

Educated At Bamra State High School and then at Calcutta.
He is the 1st educated Raja of Puri gadi.

Heir-Apparent SRI SRI SRI NILKANTH DEB JENAMONI, born 2nd
July 1929. *2nd Prince* SRI SRI RAJRAJ DEB SANJENAMONI, born 8th
May 1933. *Princess* RAJKUMARI KASTURIKAMODINI DEBI, born 1931.

The Calendars.

...more common than we found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 760 years and 3 months before the beginning of the Christian Era, the year is Luni solar.

The *Mohammedan*, or era of the Hejira, dates from the day after Mahomet's flight from Mecca which occurred on the night of July 15, 622 A.D. The months are Lunar.

The *Parsi* year was derived from a combination of the Hejira and Samvat years by the order of Akbar, it is Luni solar. The *Bengali* year seems also to have been related at one time to the Hejira, but the fact of its being Solar made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is Luni solar. The months are divided into two fortnights—*sudi*, or bright, and *badi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendars.

BUSINESS SUCCESS

demand **this**
KNOWLEDGE

FEW men in business can make the most of their opportunities without a comprehensive knowledge of book-keeping. Irksome and expensive class study is entirely obviated by

BOOK - KEEPING SELF-TAUGHT

practical and simple book by
one of the foremost authorities
in India.—

FRAMROZ R. MERCHANT, F.S.A.A.

(Incorporated Accountant)

Easily understood, this book is invaluable not only to students but to small traders, and includes every aspect necessary to a comprehensive grasp of the subject.

Price Rs. 2-8.

BENNETT, COLEMAN & Co., Ltd.

Hornby Road, Bombay & 13/1, 13/2
Government Place, East Calcutta.
